And stood it straight and tall,
Then leaned the others 'gainst it
To support them lest they fall.

And last, not least, she took the cap
And, for protection, see?
She spread it carefully o'er the whole
As neat as it could be.

The buyer 'rose on a summer day,
I'll eat my breakfast and hie away
To the farms. There's been a wonderous yield
And I'll engage my wheat right in the field.

Not much, says Maud, when asked to tell
If she knew her father would like to sell.
We've shocked our wheat and going to stack.
And with a satisfied smile she turned her back.

She rolled up her sleeves with a vigorous jerk,
Spit on her hands and resumed her work,
The buyer looked back as he climbed the hill,
But, bet you, Maud was not standing still.

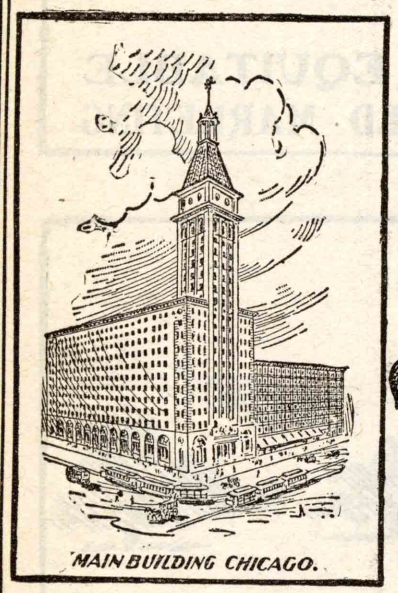
FOR THE

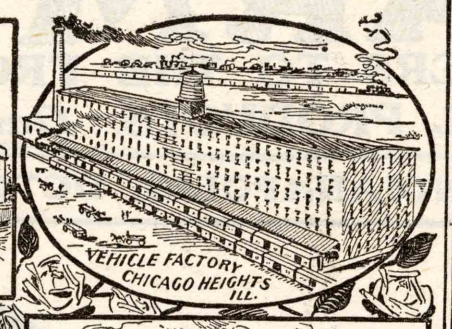
CO-OPERATING FARMERS OF AMERICA

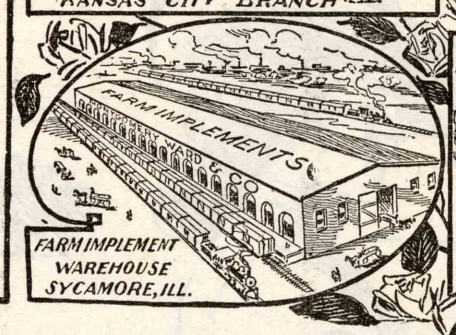
The

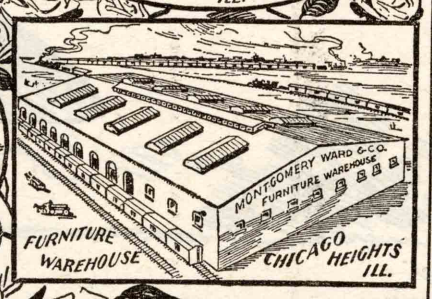
Greatest Mercantile Establishment in the World

Remarkable Expansion in Buildings to Meet Wonderful Business Growth









Present enormous plant of Montgomery Ward & Co.

Further extensive enlargements in contemplation. The most successful enterprise of the age.

The wonderful growth of Montgomery Ward & Co., from a single room in 1872 to its marvelous mercantile palaces of the present time, as shown in the accompanying illustrations, is a magnificent tribute to honest merchandising.

Today the business if this great concern towers above its imitators and would-be competitors as high as its lofty tower on the Lake Front of Chicago towers over the passerby on the street below.

The eight mammoth separate and distinct structures entirely occupied by Montgomery Ward & Co. exclusively for the transaction of its colossal business, would, if gathered into one grand group, be recognized as one of the wonders of the world.

Each of these magnificent buildings is a giant in itself, and the total realty holdings of Montgomery Ward & Co., are the very largest of any mercantile establishment in the world.

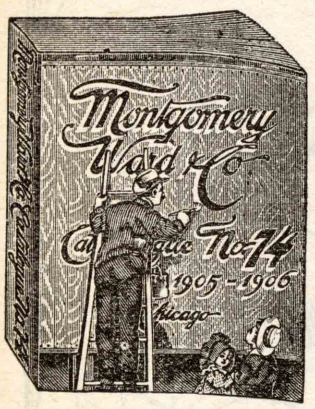
Every foot of the many acres of floor space represented in these structures is crowded with merchandise of every description, fully set forth in their marvelous catalogue, and still there is insistent demand for additional space to accommodate the increased and increasing business.

Already magnificent plans are in view for further enlargement during the coming year, which will give due consideration to future possibilities, permit of unlimited expansion and development to any magnitude.

Not only is this great house the original, the very first in the world to develop the Catalogue idea of selling everything direct to everybody—it is also the leader in magnitude of business done, in growth of its patronage, in maintaining its old customers for the longest periods and in expansion of area year by year to meet business requirements.

Its catalogues and its customers are everywhere.

It ships goods regularly to every country on the globe, to every inhabited island of the seas, to every state and county in the United States, Canada, Mexico Central and South America, as well as to Europe, Asia, Africa, Australia and Oceanica.



The magnitude of the business transacted by this vast concern is almost beyond human calculation.

We have just finished the printing of a large, new catalogue, number 74, containing the economical bargains and choice selections in every line of merchandise for the season of 1905-6. This large, illustrated book is the standard Buyer's Guide of the world and comprises nearly 1200 pages, 126,000 different articles, quoted at the very lowest prices.

This catalog is the leading and recognized authority on anything that may be purchased in any store to eat, to wear, to use.

It is the largest city store brought right to your door. Always complete; always has the latest things; always absolutely trustworthy, containing lowest prices on honest goods of the exact quality represented, without exaggeration or falsehood.

The policy of this firm is to make its catalogue the undisputed leader, far in advance of anything others can ever hope to attain.

Cut here, fill in carefully, and send to Montgomery Ward & Co., Chicago

Send me FREE and prepaid one copy of your New No. 74 Catalogue for 1905-6.

THE ANNUAL MEETING

Local and County Unions, Officers and Elections

Office of the National Union of the American Society of Equity, Indianapolis, Ind. Sept. 1, 1905.

To the officers and members of all Local and County Unions, of the American Society of Equity and members at large, Greeting:—

The date of the Annual Meeting of the National Union of this Society has been fixed to begin October 23, 1905, and the meeting will continue as long as necessary to transact all business properly coming before it.

Reduced railroad rates will be granted from all parts of the country and special and ample accommodations will be made for members, delegates and others while in the city.

The report of the Annual Meeting of the National Union, A. S. of E., will be published in pamphlet form. The name and number, also name and address of secretary of each local and county union of the American Society of Equity in the United States and Canada, with the total membership in each, on Oct. 1t5h, 1905, should be and we expect will be published as a part of this report as a complete directory of the society. A copy of the report will be mailed to each local union secretary, to all officers of county unions, to delegates who attend the Annual Meeting and may be procured by members at large and others desiring them at 10 cents each copy. Every local union and every county union must report on or before Oct. 10th, so that all may be in by Oct. 15. FILL REPORT BLANK BELOW.

If your union has not and will not hold a meeting, will not you, as an active member, answer the first four and last two questions, on report and write us a letter telling us what is needed and send at once.

Do all these things. Come to the Annual Meeting and help to make it as great as the industry it represents and one that will attract the world's attention by its numerical attendance and the results accomplished.

The National Union of the A. S. of E.

J. A. EVERITT, Pres.

M. WES. TUBBS, Sec'y.

BEAN GROWERS READ

Beans and Peaches

The bean situation is becoming alarming. I understand that the buyers intend making $1.50 the ruling price for first grade beans. Will the farmers submit to such robbery? Have we a Bean Growers' Branch of the A. S. of E? If not, why not?

When I read in Up-to-Date the activity and success of the Tobacco Growers' Branch and realize that our bean growers can accomplish even grander results I feel as though there must be some immediate action taken and the buyers prevented from robbing our people of thousands of dollars.

Bean growers of Michigan and New York let's "get busy." We hold the key to the situation. Let us turn it.

In this lake shore country peaches drive everybody wild. Many scarcely take time to eat, drink, sleep or read while they are on but when this season's crop is well out of the way and growers take a review of the situation and do some sober thinking, they will then realize that the buyers were combined in their purpose to secure the crop below cost of production. Many already begin to realize the situation and some have recognized the fact all along but unorganized, have been powerless to help it.

Peaches have been selling at all kinds of prices, except profitable ones. I was told that buyers for eastern markets loaded cars last week in South Haven, paying only 10c for one-fifth bushel baskets of large, fine, yellow, No. 1 stock. They are also said to have expressed surprise among the town's people that the growers would sell at such low figures, but that, of course, they must buy as cheaply as possible.

Can it be that the bean growers and peach growers will allow such methods to continue? They alone must answer.—H. B. Northrup, Kibbie, Mich.

(You are right, Brother Northrup. The key has been turned before and it must be turned again. We are asking for reports on Beans, Broom Corn and Potatoes in this issue and expect the Bean Growers Branch of the A. S. of E. will have delegates with us in attendance at the Annual Meeting. This was thought more desirable than to hold a separate meeting, as in the case with the tobacco growers. But there is nothing to hinder holding a convention of bean growers yet. Who will move first in the matter? The good accomplished and the benefits resulting will, of course, depend upon the co-operation of the groweds themselves.—Ed.)

Poor, Dead Michigan

We say this because certain farm papers reported the A. S. of E. dead in that state and which the members vigorously deny. Also the evidences are quite to the contrary.

Of the nineteen states so far contributing to the "Press Fund" free will offering Michigan leads both in amount contributed and number of contributors. Wisconsin comes second in number of contributions and New York second in amount. It is gratifying to note that ALL SECTIONS OF THE COUNTRY are as a unit in this movement.

UP-TO-DATE FARMING

PUBLISHED TWICE A MONTH

J. A. EVERITT, Editor and Publisher

JOHN P. STELLE, Associate Editor

SUBSCRIPTION PRICE 50 CENTS A YEAR

Foreign Subscriptions $1.00 a Year

CLUBS. Five subscriptions, on any offer we make may be taken at the cost of four. This applies to five of one offer or it may embrace several offers. To illustrate, five 50 cent offers for $2.00 (40c each) or five $1.00 for $4.00 (80c each).

Many club raisers fail to indicate their names separate from the club. We want to know who our workers are, therefore always write: "This club was sent by (name)."

☞ Always state if a renewal or new subscription. **Don't Neglect This.**

Your Address should always be written very plainly, including **county.** Do not give street or box number when not necessary to facilitate delivery of your mail. If on a rural mail route use the letters R. R. before the number.

Renewals and Change of Address. Give the same name as before. If a change from one member of the family, so state. If you change your postoffice, give old office as well as new.

If a mark like this appears on the first page it is to notify you that your subscription or renewal has been received. The publisher thanks you and he hopes you will be delighted with Up-to-Date Farming and take it many years.

Advertising Rates will be quoted on application.

Only Reliable Advertisers are admitted to our columns. We guarantee that they will deal honestly with subscribers. However, should any advertiser in Up-to-Date Farming fail to keep his promise as advertised and not give a subscriber an honest deal, we will make good the amount of the loss, provided you were induced to deal with the party through his announcement in this paper only, and providing such transactions occur within a month of the publication of the paper, and that it is reported to us within a month of its occurence. It is understood that this offer is not binding on the publisher unless you mention Up-to-Date Farming when you write.

The Farmer's Union Label must be made the strongest link in the chain of organized farming, as it has long been the strongest link in the chain or organized labor. By the use of the Label an article is recognized as a product of organized labor, and those who use such articles know they are patronizing and sustaining organized effort for improved conditions. Look for the LABEL.

The solution of the Farmers Labor Problems that will come through Profitable Prices means a demand for millions of union laborers

Minimum Prices

Below are the prices recommended by the American Society of Equity. They are the minimum prices, *below which* farmers should not sell, but any person may sell at higher prices. They are all based on some central market, and the farm price will be enough less to equal freight and a legitimate profit to the handlers. Farmers should control their marketing so as to keep the market hungry and the demand seeking the supply, when they can make their own prices—control marketing so your crops go off of the farms over the period of a year instead of in a few months. *If those who can hold will hold all, and those who cannot hold all will hold part, then those who cannot hold may market and all will get the price.* This is the key to controlled marketing. The world must have your products at *your* price if it cannot get them at prices made by some other people.

Wheat, No. 2 red, Chicago, 1905 crop per bushel	**$ 1.00**
Corn, No. 2 Chicago, 1904 crop April 1 to next crop	**.60**

Hogs, " per cwt.	**6.00 to 6.50**
Cattle, " per cwt.	**6.00 to 7.50**

NOTICE

The third installment of "Our Foreign Markets" article is omitted from this issue on account of the press of other important matter and particularly to make room for the resolutions passed by The Farmers' Congress and comments on the same. These resolutions came to hand as we were about to close our forms.

Farmers to the front.

That's where they belong.

The American Peril—Low prices for farm products.

The Press Fund is growing. But have YOU contributed?

A Clearing House in every county, not to buy and ship produce, but to direct the marketing.

A Telephone in every farm home to report your crops and receive instructions about marketing.

A Farmers' Warehouse plan that will enable farmers to warehouse their crops on the farm and secure cash advances.

MONEY for FARMERS at reasonable rates of interest. Why not? His security is as good as anybody's.

Farmers' Stock Yards, where stock can be kept almost as cheaply as on the farm and where the surplus can be held over against the shortages, thus regulating supply to demand.

Our Foreign Markets. The farmers cannot depend on Congress to maintain them or enlarge them. They must depend on themselves.

That New Press to proclaim profitable prices and secure them. We've got to have it.

The Annual Meeting. This should be the culmination of all your years' planning and work, and the time and place where your reward will be definitely agreed upon. As you have succeeded in the work of producing, so are you entitled to reap reward from the distribution of your products. Come to the Annual Meeting.

These are the things that should now engage the serious attention of farmers. They will all be considered at the Annual Meeting.

An error occurred in our article on "Our Foreign Markets" in September 15th issue. The table printed to show the average export prices for pork (cured meat) was wrong. Instead of it representing the per cwt. price of pork it did represent the price per head for the same years.

Second Annual Convention of Tobacco Growers

In April 1904, Mr. Everitt and Mr. Sherman begin the campaign of Education and organization in the tobacco district of Kentucky. Since then the organizers from headquarters have campaigned in Kentucky, Tennessee, Virginia and North Carolina and the tobacco growers are better organized than any other class of farmers.

The result has been that the price of tobacco has been raised from an unprofitable basis to one of dignity and profit. One National Convention has been held and now the second one approaches. Tobacco growers have shown their power and tasted the sweets of independence. Nothing can turn them back from the determination to completely rule their business. The coming convention, we expect, will be the capsheaf to crown their complete triumph in controlled production, controlled marketing and price making. Come to the convention. Every tobacco grower has made enough extra from his crops to justify attendance, but what he has made measures as cents against dollars when compared to what is in store for each in the future.

Delegates from more than twenty counties had been appointed before September 1st, and the intense and active interest displayed everywhere in the tobacco sections fortells a great meeting and insures success. The leaders and best informed planters are busy with plans for future control of the tobacco crop, the best of which will be selected by the delegates and put into effect directly after the convention. Farmers who produce beans, broom corn, and other special crops should profit by the work of the tobacco growers, and be able to profit thereby.

No Longer Alone

December 21, 1902, the American Society of Equity was organized for the purpose of equalizing the conditions of farmers with other classes so they could secure an equal share of rewards for efforts put forth. The results were to be accomplished through controlled marketing of crops and the claim was made that such control would compel a profitable price.

This, at the time was a "new and strange" doctrine. It was not understood by the people and was ridiculed by the press. Farm papers were particularly active in denouncing the idea; called it impossible of accomplishment and even went so far as to impugn the motives of the advocates of the doctrine and plan.

But time has brought a change. The doctrine of controlled marketing has been proven sound, the plan to apply it to farm products has been demonstrated to be effective and Up-to-Date no longer stands alone in advocating the former and urging the latter. From our esteemed contemporary Farm and Ranch, Dallas, Texas, we take the following:

The Texas division of the Southern Cotton Association has recently demanded that 12 cents be fixed as the export value of cotton for this year's crop.

The American Society of Equity, an association of farmers with a strong membership in all the wheat districts of this country, has just fixed $1.00 per bushel as the minimum price of wheat at the Chicago market, and advises all wheat growers to hold for this price. It is probable that similar organizations interested in cotton and wheat will follow the action taken by these two great associations of farmers. If this be done, the farmers of the Southwest will march forward grandly in their work of emancipating farm products from the domination of boards of trade and exchanges in our great central markets.

The associations of cotton growers and the association for the betterment of wheat markets have won signal victories. Cotton went to 10 cents and beyond at the demand of Southern growers. Wheat has climbed to above $1.00 at least twice within two years, because thousands of growers refused to sell for less. If vigorous efforts are now made to build up the weak places, to enliven the farmers in this matter of *"controlling marketing"* if farmers are aroused to the necessity of standing together to resist the encroachments of warring organizations, victory will continue to crown the efforts of those who till the soil.

As the pioneer in this grand movement to "emancipate farm products from the domination of boards of trade and exchanges in our great central markets" Up-to-Date Farming sends greeting to The Farm and Ranch. This article will do more to cement the southern farmers to that paper than anything else it could possibly have published. We have no doubt the southern farmers have already expressed their approval of the fair acknowledgements by that paper and quite in contract would they be to the expressed sentments of Michigan farmers to one of their papers that gloated over its invented defeat of the A. S. of E. in that state as follows:

The paper was buried beneath the disapproval of an indignant public sentiment as all papers will be, sooner or later that refuse to stand by the farmers and assist them in their just demands, but oppose their honest efforts.

The Tobacco Department only runs in enough papers to cover the tobacco territory. This explanation is made so our other readers will know this industry is not being neglected.

A Statement

For more than two years my time has been so much occupied with publishing Up-to-Date Farming and establishing the American Society of Equity that I could not give the seed business, of which I was the head, the attention that so exacting a business deserved.

As a result what was formerly a very successful and profitable business became less profitable and was not run with entire satisfaction to the customers.

Being conscious of the harm that would result to farmers if any but satisfactory seeds were sent them and having more responsibility than one man can in justice to his health and business assume, I voluntarily place the J. A. Everitt Seedsman (Inc.) business in the hands of The Union Trust Co., of Indianapolis, Ind.

The trust company will conduct the business until such time as they can dispose of it to good advantage, or reorganize and equip with capable manager.

In the meantime orders for seeds, etc., to J. A. Everitt Seedsman will be received and executed the same as before.

The sacrifice of this fine business, which was known all over the world, was made because of my work for the farmers, but I do not regret it and will make even more sacrifices if necessary to accomplish the complete triumph of the A. S. of E.

By this arrangement my time is more fully at the disposal of the publication business and the Society.

J. A. EVERITT.

Convention Number

November 15th number will contain a complete report of the Annual Meeting of the A. S. of E.

It will be the greatest, best, most valuable as well as the largest number of Up-to-Date Farming ever printed.

It will be 250,000 copies. This is 100,000 extra copies.

We want each one of these extra copies to make a convert to Controlled Marketing, and they will if placed in good hands.

This number will contain all the minimum prices on all crops grown this year, as made at, or confirmed by, the Annual Meeting, and arguments to support them.

It will be the greatest propaganda number ever printed of this or any other paper. We promise it and will do it.

This quarter of a million edition will go far toward putting prices of all farm crops up to the minimum if we can only get the extra copies properly distributed. Here comes the rub.

Now, in all seriousness: Are there not 10, or 25, or 50 farmers in your neighborhood who are not taking Up-to-Date Farming and who raise a surplus of some farm crop—grain, meat, fruit, cotton, tobacco, beans or broom corn, etc.? Just as sure as we can get this number into their hands they will be converted and they will hold their crops and work with you for profitable prices. You want this to be brought about. The benefits to prices in your community will show immediately.

I appeal to each of you as you read this to consider what this will mean. No person can estimate the power of the education that this will bring about—a power that in less than three short years has largely revolutionized the marketing system for crops of the country. What we seek is to extend this education until the power is sufficient to compel the fair price at the beginning of the season, as it does now, later in the season.

It can be done.

It will be done.

Here's what we want you to do. We want you to order a bundle of the convention number at the special rate here quoted. These prices are far below cost of production and mailing, but we feel that the issue must go out for the good of the farmers and to put prices where they ought to be—regardless of cost.

A bundle of 10, 15 cents post paid.
A bundle of 25, 30 cents post paid.
A bundle of 50, 50 cents post paid.
A bundle of 100, 75 cents post paid.

Larger quantities at same rate. The prices are strictly cash and apply only to this special number, which will contain enough pages to print all the proceedings of the meeting and much other valuable matter.

BEFORE ANY FARMER CAN BE A POWER TO HELP AT PRICE MAKING HE MUST UNDERSTAND THE DOCTRINE OF CONTROLLED MARKETING AS TAUGHT ONLY BY UP-TO-DATE FARMING.

EVERY READER of the paper wants its teachings to reach every farm home in the county; therefore order a bundle to convert your neighbors.

EVERY MEMBER of the A. S. of E. wants his hands help up by his neighbors; therefore order a bundle to convert them.

EVERY ORGANIZER wants to convert the people so he can organize them; therefore order a bundle. You never had such propaganda material before.

EVERY LOCAL UNION wants to increase its membership. There is no better way than to order a bundle of this issue.

This number will be a revelation to those farmers who possibly have not heard much about the American Society of Equity. It will truly be an eye-opener.

Each copy of this number will cost over 1½ cent to produce and mail. The publisher would offer them entirely free if he could afford to do so, but he cannot.

There are surely 1,000 people who will invest 75 cents for a hundred copies. That will make 100,000 copies.

Pub. Up-to-Date Farming,
Indianapolis, Ind.

Please send to me prepaid .....

50 copies, 50c; 100 copies, 75c.

GREAT VICTORY FOR THE A. S. OF E.

The American Society of Equity Plans to Get Profitable Prices for Farm Products and to Enlarge Our Foreign Markets Endorsed by the National Farmers' Congress

As we were about closing our forms we received a copy of resolutions adopted by the National Farmers' Congress assembled at Richmond, Va. The resolutions were based on President Harvey Jordan's address and were in part as follows:

We regard the point made on the marketing of crops, the selling at profitable prices of all the products of the farm, to be of supreme and paramount importance to the American farmers, and we recommend that these ideas as advocated by The American Society of Equity be taken up and incorporated in all farm organizations; that they be carefully studied and given a prominent place in the deliberations of the National Grange, the Farmers' Educational and Co-operative Union, the Farmers' Alliance, and all other farmers' organizations. That the farmers of our common country avail themselves of every source of information so that they may be educated in co-operative selling, to the end that profitable prices may be obtained on all farm products. And we further recommend that the question of profitable prices by control of the market be given a prominent place on the programme at all the future meetings of the National Farmers' Congress and that at every state a. d county institute throughout the United States this subject be given a prominent place on the program. This latter recommendation we especially commend to the careful consideration of the head of the Farmers' Institute at Washington, D. C.

Higher prices of farm products which will be profitable to the American farmers, are absolutely necessary so that the surplus of American farm products will not go on the European markets at such low prices as to prevent the European farmers from selling their products in competition with ours at fair prices. The old system threatens to starve the European farmers unless they assess a heavy tariff tax against American farm products. The result is the closing up of foreign markets and it prevents the obtaining of new ones while the cry of American statesmen and farmers is now, and has been, that we must have larger foreign markets for our surplus farm products.

These resolutions were adopted by the congress without a dissenting vote.

Well may we call this a "Great Victory for the A. S. of E." This was the twenty-fifth annual meeting of the congress, hence to have them realize after twenty-five years of existence that "selling at profitable prices of all the products of the farm, is of supreme and paramount importance" is indeed a great victory. A victory not only for the A. S. of E., but for themselves. If they will teach this idea in the future they will be on the sure road for great accomplishments for farmers as they never were before.

But they go farther and say "As advocated by the A. S. of E." They thus endorse our plan. Then they go farther yet and admit that the accomplishment of the idea must come through education. They call upon all farmers' organizations to give it "a prominent place in their deliberations;" upon the farmers "to avail themselves of every source of information" and upon "state and county institutes to give it a prominent place on the program."

They might also have called upon all farm papers to teach it but they probably know this would be useless. The farm press has shown by its silence or active opposition to this idea of marketing crops for profitable prices that farmers need expect nothing from them, hence they must "avail themselves of every" other "source of information."

But there is another victory the champions of the farmers have won. It is the plan to retain our foreign markets, enlarge them and open up new ones. Although this plan was never suggested by any person or institution as long as agriculture has existed in America and although the evils of the old system have been exerting their baneful influences for many years, no remedy for the troubles has been found until Mr. Everitt's plan as printed in September 1st and 15th issues of this paper. So strongly does this plan appeal to the National Farmers' Congress that they without a dissenting voice endorse it.

These are things for members of the A. S. of E. to be congratulated on, and for all farmers to think about. We feel a new era is dawning in the great farmers' era that is at hand. We believe every farmer's institution pretendedly for the benefit of farmers will, through the overwhelming power of public opinion, be forced to endorse the principles and plans of the A. S. of E., and help to accomplish its objects. Then will they be real friends and working for real benefits.

CROPS AND MARKETS

A Timely Review of Conditions as They Concern Farmers

The crop season of 1905 just closing will go on record as being the most bountiful this country ever experienced. The weather has co-operated with the farmers, to secure good results, to a degree that is rarely known. There was an abundance of rain in nearly all states and the moisture was fortunately accompanied by a migh temperature which induced seasonable maturity of crops notwithstanding their rank growth and development.

In view of the revolution that has almost taken place in marketing crops the record breaking yields this year will be true blessings to farmers, but not to the extent that they would be if the revolution was complete. While without the change in marketing that has been wrought with farmers the large crops would have to be viewed with serious apprehensions, without the sustaining power of controlled marketing as now exerted by probably more than half the farmers, we truly believe that prices would be nearly as low as resulted from the big crops in 1895 and 1896. Corn then sold down to 20 cents in Chicago, wheat to 50 cents and other staple crops in proportion. In fact there is more reason now for low prices as far as production is concerned because the crops have not only been uniformly good for the past three years, but they nearly all have been record breakers.

Wheat

The crop of the United States is variously estimated at 600 to 700 million bushels. A conservative estimate in view of the fact that no serious mishap befell the spring wheat crop, will be 650 million bushels, or about 100 million bushels more than last year. Other countries with one important exception, have taken altogether, about an average crop as some, like Canada, prove very good crops and others only moderate. The important exception is Russia.

From the most recent report from a creditable source, viz., Broomhall credits Russia with a total wheat crop (both winter and spring) of 441 million bushels and a total rye crop of 552 million bushels, or a grand total of 993 million bushels of bread grain. For comparison we will present the official figures of 1904 as follows: Total wheat (spring and winter) 620 million bushels. Total rye, 904 million bushels. Grand total 1,524 million bushels against 993 million bushels this year or a shortage of 521 million bushels.

To make up their shortage there appears to be only America with larger crops than last year and not more than 150 million bushels here (including Canada). Therefore the future of wheat prices, if the late reports are correct, can easily be forecasted. But according to the A. S. of E. theory, it is not so much a matter of crop reports. They may be reliable or they may be unreliable. YET IT IS A FACT that all the wheat (and other staple crops also) that is grown is consumed. It has been so in the past and will be so in the future. Therefore if a large number of the first owners will hold their crops, for a known price, they will get their price the day the demand (which needs all the crop) comes.

Besides the shortage in the Russian wheat crop the same report shows shortage of other crops under the 1904 official yields as follows: Barley, 64 million bushels; oats, 296 million bushels, or a total shortage of all grain of 891 million bushels.

This is a terrible calamity to Russia, if it is true, (and there is no doubt of a serious shortage there), and it furnishes an opportunity for the American farmers that makes it quite unnecessary to squander their crops at unfairly low prices. This advice is, however, good every year and without any reference to crop shortages in any particular country, because the world produces just about the same average of wheat every year. Hence the countries of short crops need not starve if they have the money to buy with and the countries of large crops can sell at good prices if they don't get panic struck at the sight of large crops at their own doors.

A dispatch says "American wheat is in great demand in Spain owing to the failure of their crop. A reduction of fifty per cent on duty was made."

All honest brokers and dealers agreed that stocks of wheat are very light and the primary receipts very small. The receipts are even smaller than last year, notwithstanding the larger crop. Don't this prove that controlled marketing is becoming more general? One broker says: "The slow and gradual advance in wheat price continues. I would say the sole reason for this is the primary receipts are smaller than were expected, and the demand among millers is improving as it develops that the crop is not the big one that has been looked for. Farmers are not disposed to break prices down on themselves."

You can't keep a good thing down—$ Wheat is a good thing.

Another broker says: "Wheat is not coming fast enough to supply the home demand. This talk about the need of export sales is folly. We are in dependent of foreign buyers and the price of cash wheat is demonstrating it."

You see we are not alone in the claim that America makes or can make the price on her wheat instead of Liverpool as claimed.

A Chicago Board of Trade membership is worth several thousand dollars. This for the opportunity to speculate in the farmers' products.

Corn

The corn crop will surpass any of its predecessors by some couple hundred million bushels. For this the farmers should be thankful and they should have wisdom and foresight enough to make it contribute to their great financial welfare. No crop is more generally useful than corn and none can more easily be held for future use or sale.

The corn crop of 1902 was 2,523 million bushels, of 1903 2,244 million bushels and of 1904 2,467 million bushels. Never before were three two billion crops grown in succession while the average for the 20 years preceding 1902 was only 1,800 million bushels. The average farm price for the last three big crops was 50 cents in following May. While for twenty years previously the average was 39 cents. To state it clearly, the three biggest crops the country ever raised and coming consecutively sold for an average of 11 cents a bushel more than the average of twenty crops previously. To make the illustration more forcible still we will take two billion crops that occurred in the 20-year period (we find there were six of them) take the total of prices and divide by 6 and we have the average price for the two billion crops of 24 cents a bushel.

We now come to the fact that the average price of three of the biggest corn crops the country ever raised coming consecutively, sold at an average price of 50 cents a bushel, while the average price of six crops of two billion bushels or more SCATTERED over 20 years only sold for 24 cents a bushel. Or under controlled marketing the gain was 26 cents a bushel or more than double the price under uncontrolled marketing.

It is also interesting to know that a crop of 2,400,000,000 bushels at an advance of 26 cents a bushel represents the nice profit of $624,000,000.

Is it any wonder that farmers are in better condition financially than before?

The price of No. 2 cash corn September 15th was at Chicago 54½c. Of new crop December corn the speculative price was 44½c. The difference is 10c a bushel. On a crop of 2,500 million bushels this figures a loss of $250,000,000 to the farmers. This can easily be saved to the farmers if they will adopt the simple plan of the A. S. of E. Is it worth working for? It will cost you a few cents individually, to organize, but it costs you many dollars, individually, to not organize.

Oats

On September 15 cash No. 2 oats were selling at 27c at Chicago. A year ago at 32 cents. Oats have been a neglected crop as far as price making is concerned. The price can be affected by controlled marketing the same as wheat and corn. Why don't farmers exert their power?

Cotton

Cotton planters have learned rapidly the past year and they have learned their lesson well. There need not be much fear of low cotton prices in the future. Controlled marketing will be all powerful.

Present price in New York is around 11c a pound. It was up to 11.55c.

With a short crop this year, variously estimated from 9 to 10½ million bales. The crop will easily bring 12c, which is a fair value. But the speculators will have a good opportunity to boost the price to 17c as they did on the 1903 crop. Here again the farmers can show their power if a corner is attempted because they, having the cotton, can unload and the price must break. Farmers should not be in a hurry to sell.

Some of the members advocate a minimum price of 15c and others still higher for cotton, but we say, steady, boys! There are other countries in the world where cotton can be grown, and if we refuse to let the world have our cotton at fair prices, those places will be found and developed. Thus you will kill the goose that lays the golden egg.

Potatoes

Blight has appeared in the potato fields over a large extent of the territory. As potatoes are a perishable crop, and as growers are not organized sufficiently to follow the only correct plan of marketing to control prices, this seeming calamity may be a blessing in disguise. With the experience of last season so fresh in your minds, you should welcome a moderate crop and good prices that will naturally follow.

Broom Corn

Indications are for a short crop. We do hope the Oklahoma growers will not allow themselves to be deceived as they were last year. As broom corn is nearly all raised in limited and well defined territories it would be practicable to organize the growers as the tobacco Growers did. Who will move first? We suggest that broom corn growers should attend the Tobacco Growers' convention at Owensboro October 18-20, for hints.

Come to the Annual Meeting and help to make fair prices on your crops.

Crop Bulletins

No more bulletins will be issued nor minimum prices made until the Annual Meeting assembles.

Here matters will have prompt attention and the minimum prices will appear in November 15th Up-to-Date Farming. In the meantime growers are requested to keep the following recommended prices in mind which we consider equitable for the various crops.

Corn, No. 2, 50 cents, cotton 12 cents at New York, potatoes 50 cents at Chicago. Beans, $2.00 at Detroit. Broom corn, $75.00 per ton at Chicago. Clover seed $6.50 at Toledo. Hogs, $6.00 to $6.50 at Chicago. Cattle, $6.00 to $7.50 at Chicago.

For other prices see third page first column. For Crop Report Blank see this paper and use it.

Farmers' Elevators Profitable

The American Elevator and Grain Trade in a recent issue contained a list of farmers' elevators that have failed to find the plan of "merchandising their crops" profitable. The list follows:

At Redwood Falls, Minn., Hartford, S. D., Hardwick, Minn., Fairmont, Minn., Monticello, Ill., Luverne, Minn., Kenneth, Minn. These elevators lost from a few dollars to a few thousand each. The same article states that the stockholders in the Farmers' Co-operative Elevator Co. of Sheldon, Iowa, that failed a few years ago, were assessed 100 per cent. and then the full indebtedness was not met. Another case at Coon Rapids, Iowa, the stockholders raised $8,000 to meet the indebtedness.

Other instances of similar nature are given, all of which confirms our advice to farmers to stick to producing and sell their crops at good prices to the consumer or shipper, at least until they are more completely organized and prices are steady.

Write Us a Letter

At this season of the year we want to hear from our readers by a letter telling us if they have been benefitted by reading Up-to-Date Farming. Consider the financial benefits you have received by taking its advice, if any. Also let us know if you are better fitted to cope with the problems that come up on the farm because of the education it has given you. We have written much for you. Now please reciprocate and write the publisher a letter. It will help us to make Up-to-Date Farming just what it ought to be.

More Funds Needed(?)

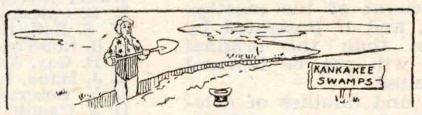
Secretary of Agriculture Wilson says his department needs an increased appropriation. He says: "My department needs more funds to carry on its increasing work. The money spent annually goes for a good cause, and results in late years have been of inestimable value to the agricultural and live stock industries."

Suppose Mr. Wilson was required to show "value" for the past expenditures and to justify an "increased appropriation," how would he go about it? Can he show increased average yields? Can he show any increase in price attributable to the work of the department? Have stockmen got a dollar more for their stock because of anything the department has done, including the investigation of the meat trust?

Should they have an increased appropriation because they have sent out monthly crop reports, which constantly produce the ideal conditions for the speculators and are always opposed to the farmers' interests? Because the crop report on cotton knocked the price down from near 12c. to 7c. and which has taken months of earnest, concentrated effort and expenditure of much money on the part of growers to put back to an equitable basis? In short, as long as the Department of Agriculture ignores the vital part of the farmers' business—the distributing end—is it entitled to an increased appropriation? Could not many of the useless expenditures now made, including the Free Seed Distribution, be lopped off and thus provide an abundance of funds for all the really helpful lines of activity that is within the scope of the department?

Farmers should oppose an increase of the appropriation until the usual appropriation is WISELY expended.

Well Done and Otherwise



More Land to Cultivate

M. H. Downey, a drainage expert, representing the Department of Agriculture, is in northern Indiana and eastern Illinois giving his attention to the idea of draining the Kankakee marshes. This is a large area and if the work is undertaken it will cost an immense sum of money. If accomplished it will benefit a few owners of worthless land which God evidently did not intend to come into cultivation until the dry land was raising maximum crops and until farmers were receiving profitable prices. There is no call for redeeming large areas of waste land in this country at this time. Future generations can do this when the United States is as thickly populated as some of the older countries. This money could be expended much more wisely in ending gambling in farm products and teaching farmers the doctrine of Controlled Marketing to secure uniformity in marketing and prices which would help every legitimate business.

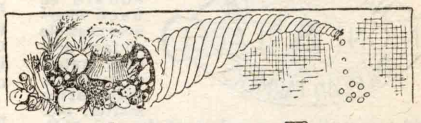
Controlled Marketing of Grapes

From a daily Indianapolis paper we quote as follows:

The first carload of New York grapes is now on sale at 22½c for eight-pound baskets and 16c for "ponys." The grapes are the Moore's Early, Worden and Concord varieties, with a few small baskets of Delawares. As to quality, although they are not as good as some of the later shipments may be, they are better than the average run of Michigan grapes and as good as the best that have been received from that state.

The representative of the Chautauqua Grape Growers' Association is here, and it is expected that as, in recent years, local receipts will be kept down to the actual requirements of the market, and there will be no surplus to be disposed of at prices that mean losses to both growers and dealers.

Here is a practical illustration of Controlled Marketing and also an example of the Clearing House idea. The representative advises the shippers when to ship and when to not ship. As these representatives are in all leading cities, we can see how easily the plan is carried out. Of course, it costs something, but growers must think what it costs them when they strike glutted markets and get very little or nothing for their stuff.



Pennsylvania Farmers' Schools

A report comes from Pennsylvania that the 400 farmers' institutes will take on the complexion of real farmers' schools.

It is proposed, according to the report, "to make them the most complete effort at practical agricultural education ever attempted in Pennsylvania." They will cover dairy, horticulture, agriculture, poultry, stock, etc., and the most scientific methods of production will be taught.

Not a word is said about the distributing end of the farmer's business. Can it be possible that the managers of farmers' institutes never think about marketing and the prices of farm crops? Shall we be charitable and give them credit for not knowing that the larger the crop the smaller the price, and that when the farmers raise big crops their money comes out at the little end of the horn?

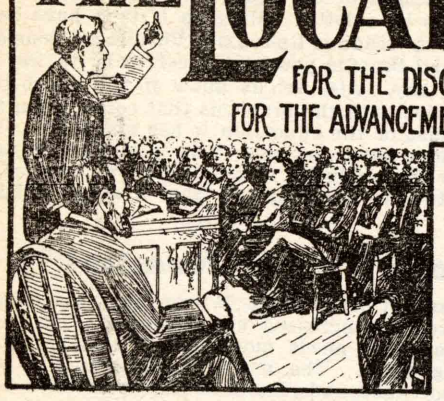
Shall Farmers Federate With Organized Labor?

The New Jersey Federation of Labor has adopted a resolution that invites co-operation of organized farmers with them.

Up-to-Date Farming warns against any entangling alliances. As we have said before farmers are numerous enough, rich enough and when organized will be strong enough to accomplish whatever they need in business or government without the help of any other class. Organized labor desires the co-operation of the farmers more to strengthen themselves than to lend strength to the farmers. Farmers, depend on yourselves.

THE LOCAL UNION

FOR THE DISCUSSION OF ALL FARM PROBLEMS
FOR THE ADVANCEMENT OF CO-OPERATIVE FARMING



THE AMERICAN SOCIETY OF EQUITY

Is an international organization, incorporated, with headquarters at Indianapolis, Indiana, and whose first and principal object is: "TO OBTAIN PROFITABLE PRICES FOR ALL PRODUCTS OF THE FARM, GARDEN AND ORCHARD." It also has other objects of great importance to agricultural interests, which will be worked out as the organized farmers desire to take them up. The supreme body is

The National Union

Composed of the officers, directors and accredited representatives from subordinate bodies. The unit of organization is

The Local Union

This is the home workshop of the American Society of Equity. In it, must be forged and shapened the interests that shall revolutionize agriculture, and usher in the time when the soil tiller shall no longer be a "hewer of wood and a drawer of water" for other classes, but when he shall stand erect, an important and independent member of society. Where three or more local unions exist in a county

The Emblem

of the American Society of Equity as here shown, is symbolical of PRICE, being on an equality with PRODUCTION AND CONSUMPTION.

The Fee

Is $1.00 for members at large and $1.00 a year. Charter members of local unions pay no membership fee but a charter fee of $12.00 is charged, no difference how large is the union. Members of local unions pay 30 cents quarterly. Members at large are individual members, outside of local unions. Each member receives a certificate, a badge, all bulletins and other public documents issued from headquarters, and Up-to-Date Farming, the official paper, paid for by the National Union.

Complete instructions will be sent free on request, how to organize local and county unions and all information about fees, dues, etc.

The Union Label

Is intended to designate the products of Union or Co-operative farmers. It should be used wherever possible on farm produce, crates, on letters, advertising matter, etc.

It will be supplied to members of the A. S. of E. and members of other farmers' organizations that have for their chief object Profitable Prices for Farm Products. The price is $1.00 per thousand, 500 for 50 cents. They are supplied on gummed paper and on tags.

Supplies, including books, blanks, etc., are furnished FREE to all new local unions and all old ones that ratify the new constitution.

OCT. 1st. QUARTERLY DUES

This is just a reminder that the Oct. 1st. quarterly dues are now due. From these quarterly dues the steam to keep up our society and your official paper running must come. You will now appreciate the importance of the quarterly dues being paid—promptly.

INSTRUCTIONS TO DELEGATES

And Others Who Will Attend the Annual Meeting of the American Society of Equity, Oct. 23d, 24th and 25th

Any delegate wishing to avail himself of the reduced rate must purchase a first-class ticket (either limited or unlimited to the place of meeting at the regular rate, and at the same time procure from the ticket agent a certificate of the standard form properly executed and stamped by said agent. If a through ticket cannot be procured at starting point the person should purchase to the most convenient point at which such ticket can be obtained and there repurchase through to the place of meeting, procuring a standard certificate from EACH AGENT from whom a ticket is purchased, and presenting all of the certificates to the special agent at the place of meeting.

(2) It is absolutely necessary that certificates be procured indicating that full fare has been paid for going passage and also indicating the routes traveled in going to the place of meeting. NO REFUND OF FARE CAN BE EXPECTED BECAUSE of FAILURE TO SECURE SUCH CERTIFICATES.

(3) No certificate will be honored which was procured from the agent at starting point more than three days prior to the date fixed for the commencement of the meeting (Sunday not included.)

(4) Certificates will not be honored by conductors. They must be presented to ticket agents.

(5) Neither certificates nor tickets furnished on account of the meeting are transferable, and if presented by any other person than the original purchasers they will not be honored but will be forfeited.

(6) The wives and families of delegates attending such meetings will be accorded the same concessions as delegates upon presentation of duly executed certificates. By the term "families" is meant males under 21 years of age and dependent females.

(7) Those expecting to attend the meeting should see local ticket agent, in advance (two weeks if possible), giving him notice of such intention so as to enable him to provide himself with the necessary certificates or to get instructions if not already notified by the Passenger Department of his road.

(8) All certificates should be deposited immediately on arrival with M. Wes. Tubbs, Secretary of the A. S. of E.

(9) The special representative of the different Passenger Associations will be in attendance only on October 24th, to visee or validate the certificates. For this service a charge of 25 cents is made for each cerificate viseed. No certificates can be viseed on any other date and no certificate will be honored for return ticket not so viseed.

Hotel and Boarding Accommodations

Ample provision will be made for such accommodation for all who attend the meeting. Board at good private boarding houses will cost one dollar per day for board and room. At hotels from $1.50 per day up, board and room.

Equity Speakers

A great many calls are constantly received at headquarters for speakers. We refer to the following, who will accept such calls to address meetings. Write them for terms:

C. C. Simpson, Dardanelle, Ark.
T. J. Woodard, Clarksville, Ark.
W. E. Johns, Tifton, Ga.
Walter Newby, Woodward, Ia.
E. B. Oglesby, Cloverport, Ky.
W. S. Ball, Hardinsburg, Ky.
S. B. Robertson, Calhoun, Ky.
E. E. Gay, Vultons Creek, Ky.
T. J. Mann, Liva, Ky.
L. N. Robertson, Utica, Ky.
D. T. Hamill, Guthrie, Ky.
E. L. Davenport, Cisney, Ky.
F. B. McCown, Kirkmansville, Ky.
J. W. Cannon, Liberty, La.
A. K. Finebut, Barryton, Mich.
Walter Todd, Kelden, Mich.
W. C. Webber, Rochester, Minn.
C. W. McDade, Ceylon, Minn.
M. H. Poole, Geyser, Mont.
Chas. C. Wilson, Queenstown, Md.
D. Phillips, Pool Siding, Neb.
J. B. Whiting, Interlaken, N. Y.
Chas. H. Olive, Reno, N. Dak.
Louis H. Erdmon, R. R. 2, Kenmare, N. D.
L. S. Meyer, Grand, Okla.
R. H. Mo'den, O'Keene, Okla.
W. M. Baker, Republic, Ohio.
J. F. Gordon, Jamestown, O.
B. M. Thompson, Freeland, Tex.
Welton Winn, Santa Anna, Tex.
Dr. C. W. Bowman, Caddo Mills, Tex.
J. W. Overstreet, Bedford City, Va.
Riley Pritt, Beverly, W. Va.
Sam. J. Hampton, Durant, I. T.
Senator L. P. King, Winfield, Kas.
P. Anthony, Kaseys, Va.
T. T. Barrett, Henderson, Ky.
O. B. Shafer, Hastings, Neb.
C. O. Drayton, Greenville, Ill.
Dr. T. W. Evans, Concord Depot, Va.
James M. Vaughan, Cumberland, Va.
N. C. Crawley, Baraboo, Wis.
D. S. Edwards, Hopkinsville, Ky.
M. J. Cox, Benton, Ky.
E. R. Williams, Stockholm, Okla.
Rev. W. H. Millar, South Haven, Mich.

LOCAL AND COUNTY UNIONS' REPORT

☞ The National Secretary's Report will be made up from these reports. They will also form the basis of the A. S. of E. Directory.

Name of {Local or County} Union..... No.....

Co..... State.....

Secretary..... P. O.....

Co.. ..... State.....

This Union has ..... regular members and ..... special members.

Our last meeting was.....190... Our next meeting will be

.....1905.

The following delegates with P. O. addresses have been elected to represent us at the Annual Meeting:

.....

.....

Has this Union ratified the New Constitution?..... Do you expect to Ratify the Constitution as approved by the Annual Meeting?

This report was sent by..... P. O..... State.....

No Report can be counted if received later than October 15th.

IMPORTANT NOTICE

No Local Union will be counted in making up Secretaries' Report for Annual Meeting that fails to send in Report as called for herewith.

In fact, the Secretaries' Report will be made up from these reports after October 15. The same rule will apply to County Unions. The Directory, if published, will record no Local or County Union failing to make such Report. Do not neglect this important matter.

M. WES. TUBBS, Secy.
The American Society of Equity.
Sept. 15, 1905.

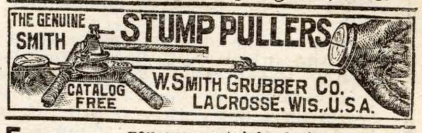
The FARMERS' Account Book A NEW, complete and practical record for all transactions on the farm. Designed by an expert. Will last 8 years. Easy to keep. Saves time, trouble, worry, disputes and **Cash.** Specimen page **Free.** County agents wanted. **Big Money.** Write Quick. **CENTURY SUPPLY CO., Dept. P. Springfield, Ohio.**

THE GENUINE SMITH STUMP PULLERS



Farmers, you are certainly losing money by failing to use the famous $5 per ton fertilizers invented by Prof. M. M. Lipps, Bluff City, Tenn. No better made. Over 500,000 tons used the past season, saving to those farmers many thousands of dollars, and crops equal to any they ever raised. Why should you not do likewise? Write today for particulars and testimonials.

EXTENSION AXLE **NUTS** CURE WABBLES
Make old buggies run like new. Also process and outfit for mending broken castings. Agt's wanted. HARDWARE SPECIALTY CO. Box J-37. PONTIAC, MICH.

Conventions and Meetings

ANNUAL MEETING OF THE A. S. OF E. and convention of all farm interests, Indianapolis, Ind., beginning October 23d, 1905. Each local union is entitled to one representative, and each county union to one representative for the county at large, and an additional representative for each two hundred members in the county.

NATIONAL TOBACCO GROWERS' ASSOCIATION BRANCH OF THE A. S. OF E. Annual convention at Owensboro, Ky., October 18, 19 and 20, 1905. Representation: One delegate for each local union, but a maximum of three for a county. Address C. Hayes Taylor, Secretary, Indianapolis, Ind.

LEELANAU COUNTY, (Mich.) Union will hold its next regular meeting at Cedar City, Mich., on Saturday, Oct. 7th at 10 o'clock a. m., for the purpose of choosing delegates to attend the Annual Meeting of the A. S. of E. and for the consideration of other matters of vital importance to every farmer in Leelanau county. A full delegation from every Local Union in the county is desired and non-members will be welcomed at this meeting.

FRANK J. ZEITS,
County Secretary, Provemont, Mich.

POPE COUNTY (Ark.) Union. The next meeting will be held October 4th, at Gillespie Hall (two miles south of Russellville, Ark.). As this is the meeting for the election of delegates to the annual meeting of the National Union and also to consider and make recommendations regarding the Farmers' Business System, it is especially desired that every Local Union will send a full representation and that as many members as possible will also attend.—C. C. Minyard, Co. Union Sec'y, Russellville, Ark.

MADISON COUNTY, (Ill.) The County Union will meet in the court house in Edwardsville, Ill., Saturday, October 14th, at 9:30 a. m. Every Union in the county ought to send as many delegates as possible, not less than five. Ten cents should be collected from each member to be paid into the county treasury. Bring as many farmers who are not members as possible to this county convention. Business men and farmers not members will be welcome. Come and hear the principles and plan of this society fully explained. C. O. Drayton, Greenville, Ill., State Organizer.

CHIPPEWA COUNTY (Wis.) Union will hold its next regular meeting in Chippewa Falls, October 7. Wm. Reich, Pres., Sault Ste. Marie, Wis.

DUNN COUNTY (Wis.) Union will hold its next regular meeting at Colfax, Oct. 7th.—G. W. Emmerton, Sec'y.

McLEAN COUNTY (Ky.) Union A. S. of E. will meet Saturday, Oct. 7th, at 9 a. m., at the court house in Calhoun.—S. B. Robertson, Calhoun, Ky.

WASHTENAW COUNTY (Mich.) Bean Growers' Association and County Union A. S. of E. will meet together at Ann Arbor Saturday, September 30th, at 10 a. m. Officers and Directors will be elected, also delegates to the Annual Meeting of the A. S. of E. at Indianapolis.—K. H. Wheeler, Sec'y, Dexter, Mich.

MASSIC COUNTY (Ill.) Farmers' Institute which will be held at the opera house in Metropolis, Ill., Oct. 27th, has recognized the importance of the principles of Controlled marketing by placing on the program:

"Profitable Prices for All Farm Products, How to Secure Them—by C. O. Drayton, State Organizer of Illinois, A. S. of E."

Dr. Drayton handles this subject in a masterful manner and every farmer should make it a point to hear him.

NOTE: Members of the A. S. of E. in other counties should insist that the "Price Making" end of farming should receive attention at all Farmers' Institutes. If reported to us we will note such cases in our columns.

Sauk County (Wis.) Union Picnic

Editor Up-to-Date Farming: At an early hour in the morning of August 30th, farmers' rigs loaded with their families and lunch baskets were moving toward Devil's Lake where was to be held, that day, the second annual picnic of the Local Unions of the A. S. of E. of Sauk County. Those from a distance were conveyed in a special train of seven coaches furnished by the C. & N. W. R. R.

The day was ideal and the arrangements perfect. Shortly after 10 o'clock, Rev. Harris of Necedah, Wis., delivered an address which received close attention and is worthy of a place among the printed literature of this movement.

We will not court envy, because you were not present when the lunch baskets were opened, by going into detail as to the sumptuousness of the spread. Only those who have been privileged to dine with farmers at such an occasion can appreciate the quantity, quality and variety there spread out.

Dinner being over, State Organizer N. C. Crawley opened the afternoon program with a very interesting and instructive address. He was followed by County Supt. of Schools, Prof. G. F. Snyder, who delivered an address on "The Past, Present and Future of the Farmer." This was a masterful presentation and coming, as it did, from one of the leading educators in the state, it made a very marked impression on those present, especially on those who had given this great movement but little thought.

Although we have not been very active during the busy season we feel greatly encouraged when we find such men as Rev. Harris and Supt. Snyder, with their numberless duties, taking time to inform themsleves along these lines. May their influence spread and would that we had more of them.—Geo. B. McGilora, Co. Union Sec'y, Baraboo, Wis.

To the Local Unions of Illinois:

I desire to urge all Local Unions in Illinois to adopt the new constitution and fall into line at once in the proper support of our organization. Each local ought to have a committee to collect the dues from each member. If every member will pay into his Local Union ten cents per month it is hoped this will be sufficient to support fully the Local, County and National Union. This will put money enough in your Local Union treasury to enable you to send 80 cents per year to the National Headquarters to pay for your paper and support a good office there, and also to send 20 cents per year to your county Union. The putting of this plan into operation for the benefit of the farmers depends entirely upon the support of the Local and County Unions. Without these you have no machine with which to do the work. This organization must be extended from Township to Township and from County to County, until every producer falls into line and stands pat for dollar wheat, and profitable prices on all other crops. If every wheat raiser in the United States would stop hauling for thirty days the bread eaters would so reduce the visible supply in the leading markets of our country that wheat would jump to one dollar at once, and if they would not haul when the price was under that, the foreign markets would rise to our level and every bushel of this crop would bring the farmers an advance of 20 cents over the present price. Brother Farmer, do you prefer dollar wheat to 80-cent wheat? Then support the American Society of Equity till we get every farmer into line. Hold a picnic and get money enough to send one or two delegates to the National Meeting at Indianapolis Oct. 23d. One thousand farmers ought to attend that meeting.

Your Brother Farmer,
C. O. DRAYTON,
Ex-National Organizer,
Greenville, Ill.

Crop and Market Notes

The corn visible is the least in twenty-five years, notwithstanding the large crops that are grown the consumption has increased with such rapidity as to more than keep up with production. Besides the natural increase of consumption by reason of increase in population and increase of domestic animals there are now more varied and numerous uses than ever before. There is no reason for corn to be lower and all farmers need to do is to control marketing to the required extent when the minimum price will prevail.

Considering that the supply is kept so well cleaned up any departure from a large crop as will come some year will cause very high prices. We can't see any risk in holding a fair reserve of corn.

The wheat crops in foreign countries indicates less than a normal yield. Take the world over there is not much variation in the crops year by year, while the increase of population justifies a higher level of prices.

The United States has a crop of wheat that will allow about 100,000 bushels for export. Some states, notably Indiana, have the largest average yields ever raised, but the county as a whole has not a bumper crop. In Indiana the acreage was very short, but little more than half of the ten year average. Farmers living in sections where the crop is very good are cautioned to not dump their crops on the theory that the crop is heavy everywhere.

The consensus of market reports is that farmers are not rushing their wheat to market. A small fraction have to sell and their wheat is what is going to market now. When they are done the price will seek its proper level. More wheat is being controlled this year than ever before, which improves the outlook for all holders.

Suppose, yes, let us suppose that 1906 will be a dry season and the important wheat, corn and oats crops are very short, What will be the result. With consumption treading so closely on the heels of production. Any departure to a minus quantity in any of our leading crops will be serious for those who have not, and profitable for those who have. As there have been four years of abundant moisture may we not expect a season of drought is about due? It is not a bad policy for the forehanded farmers to keep some staple crops on hand.

Possibilities of internal troubles in Russia will continue to be bull factors in the wheat markets. Some sections of that country have good harvest prospect, while some others are reported as very poor and "famine inevitable." Russia has taken the lead of the United States as an exporting country for wheat.

A TELEPHONE IN YOUR HOME SAVES TIME AND MONEY

A telephone in the home is an investment—not an expense. It will pay for itself over and over again. In reality it costs you nothing to install a telephone in your own home. Aside from the time and money a telephone will save you — think of the convenience—think of the comfort there must be to know that at any moment you can be in instant communication with any of your neighbors, or that you can call your physician at any hour day or night. Perhaps the time saved will save the life of one that is dear to you. Think of the advantage there is in sending orders or messages to any of your nearby cities. Can you not see what it will mean to you to be in close touch with all market quotations? All those and many more advantages are fully explained in our 80-page Rural Telephone Book which is free for the asking. Write before the supply runs out. This valuable book tells how to organize, secure subscribers, build lines, and install instruments. Advises what to use and where to buy. Shows cost per mile. Contains franchises, by-laws, rules, code of signals, contracts, cuts of telephones, switchboards, tools, supplies and wiring diagrams. Teaches how to remedy telephone troubles. Largest and most complete book on rural telephones and lines ever published. Valuable and instructive. Worth writing for. Write while your mind is on it.

FARMERS FORUM

Feel the Need in Kansas

Right now we feel the need of unity of action in Kansas. Last fall we labored hard to put in a large area of wheat. This midsummer we worked early and late in the hot sun to save the crop. Yet now after all this is accomplished we find that a wagon load of wheat brings in less money than last year.

Then there are other reasons why farmers should stand together so they can get equity in dealing. They don't get a fair deal now in grading. The way it is done is like this:

I take a load of wheat to town. As I drive up to the elevator, out comes a man with a little brass bucket, with scale attachment. He takes up a handful of wheat, rams his nose in it, sniffs a bit, bites a grain and is apt to say "musty" or "damp." Then he fills his tester very carefully so as to get as little in it as possible, strokes it off without jarring the grain down, then weighs it, It tests, say 58 lbs and he remarks "No. 3." Looks earnestly at a paper and after a while says "Worth 53 cents today."

Next day I take of the same wheat to another buyer. He goes through the same process but it may test 59 lbs and goes in the No. 2 grade, but the "price is off a couple cents today." The seller is powerless. He has nothing to say about the grade nor price. He has his harvest hands to pay and must meet some bills so he sells and all the wheat thus sold goes on the market to force down the price of later deliveries.

If farmers were joined together in local unions all over Kansas I tell you they would do things. When we raised No. 1 or No. 2 wheat you know we'd get credit for it and there's just lots of wheat would bring us 5 to 10 cents a bushel more if we got full credit in grade.

Wheat is selling for 25 to 30 cents a bushel lower than the price a few months ago. Wheat buyers say "O, the tremendous crop, so many millions and hundreds of millions of bushels" but they buy it, yes they take every bushel and are not afraid it won't be used. Therefore why should the farmers sacrifice it at less than a fair price?

My brother farmers, we can stop this advantage being taken of us. We must get together. If you don't know how. Write to Mr. Everitt.. He will tell you how. It is time the wheat growers of Kansas, Minnesota and the Dakotas learn the lesson and practice it.

S. A. BLACK,
Manhattan, Kan.

Growth in Iowa

I have just had the pleasure of attending the Quarterly meeting of the Cass county Iowa, Local Union of the American Society of Equity. This movement, starting a little over a year ago, in the southeast corner of the county has now spread out until it fully covers four townships with an average membership of more than 100 in each. The members in this vicinity have developed wonderful business capacity and are saving and making hundreds and thousands, of dollars by co-operating together both in selling and buying. New Locals will be very shortly organized in all other parts of the county and next year you may expect that Cass county, Iowa, will compete for the first prize as the banner county in the whole union both in membership and in results. If president Everitt could visit this section of Iowa it would do his soul good to see what a little education along the lines advocated by Up-to-Date Farming has done for the farmers in this part of the state.

J. W. WITHAM,
Dept. Pres. for Guthrie Co., Panasa, Ia.

To the Wheat Farmers

Wherever there is a County Union of the A. S. of E., in a wheat county there should be appointed a committee of one member in each township to make a list of all the farmers who thresh wheat, and find out how many bushels of wheat were threshed in that township and send the total amount to the county secretary. In this way, when we get all the wheat counties organized, we will know exactly how many bushels of wheat in the United States and Canada. It will not be an estimate or guesswork, but the facts.

On August 12th, the Clinton county, Ill., Union met in Carlyle. Among other practical things they did, was to appoint a member in every township to find out exactly how many bushels of wheat were threshed in each township and report to Albert Wringe, Carlyle, Ill., the county secretary. This will be done without expense except postage. We will find how many bushels of wheat Clinton county raised in 1905.

Wherever we are organized the farmers should begin to learn to put this plan into operation. Absolutely correct statistics on all farm crops can be obtained from the farmers, for the farmers, when we are thoroughly organized. This one benefit will be worth more than the union will cost. This very practical plan is worth nothing unless we put it into operation. Let us have one reliable man in every school district, as we get organized, who can report to the township statistician, he to the county secretary, and he to the national statistician at Indianapolis; then as fast as the threshing is all finished in a county the reports will go to headquarters. Let us begin to learn to do this as fast as we are organized.

C. O. DRAYTON, State Organizer,
Greenville, Ill.

North and South

Mr. Everitt: I see that you make note of what brother Frank Ross has to say about wheat and cotton, on page 9, Aug. 1st issue. I don't know Mr. Ross or whether he made the statement accredited to him or not, but I do know that his idea is wrong.

We want dollar wheat and twelve cent cotton. Results are what count and results show that when your people (the wheat growers) were getting 60c and 70c for wheat, we were paying $4 to $5 for a barrel of flour, while we only received 6c or 7c for our cotton. We only had $1 or $2 left from 100 pounds of cotton after paying for the flour.

Now we pay $6 to $7 for a barrel of flour and get from 10c to 12c a pound for cotton, leaving us from $4 to $6 profit on 100 lbs. of cotton after paying for a barrel of flour made from dollar wheat.

It is the same way with meat. Don't you people see that all farmers' interests are the same everywhere? Yes, brothers, stand for dollar wheat, and 12-cent cotton. We can then buy more flour and meat as well as other things and you can buy more cotton goods, etc. Thereby greatly enlarging our markets at home.

J. P. CHILDER,
Dening, Tex.

Some Observations

Contributed to The Democrat, Pinckneyville, Ill.

The telephone is the all important topic in the rural districts just now.

Farmers everywhere are talking telephone, or building telephone lines. We can see many ways in which the telephone will be an important factor in farmers' business. It will bring the farmers in closer touch with the business and professional world. By doing this it brings the producer in closer touch with the consumer. This is a step in the right direction, a very important step, but there is another matter that to the farmer, is not second in importance to the telephone. It is a matter of more importance to the farmer and also to the business and professional world.

That is obtaining profitable and equitable prices for all products of the farm, orchard and garden.

It is a fact that cannot be denied that staple farm crops are often sold at a loss to the producer. There is no use to ask the reason, this is plain. Somebody else prices every article of produce he sells and as long as the buyer can fix the price it will not be very profitable for the seller.

The farmers are the only class of people that do not price their own products. Give them this right, which is justly theirs and the price will be equitable and profitable.

This sounds like farmers' union and it may be; but it is not the kind of farmers union that wants to boycott the local merchants. Its not the kind of farmers union that wants to drive everybody's products, but their own. It's not the kind of farmers union that wants to control the price of farm machinery and manufactured articles of all kinds.

It's not the kind of farmers union that would tear some other business down to get material, to make a foundation upon which to build the farmers' business.

But it's the kind that wants to bring the farmers business up to a level with all other business enterprises. It's the kind that believes the farmer has not only a legal but a divine right to put an equitable and profitable price on the products of his labor.

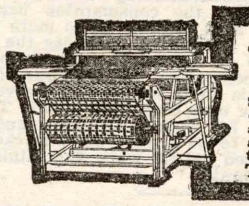
All other classes are organized and they fix the price of their products or the products of theirs.

Farmers can do the same if they will go at it in the right way and we believe the American Society of Equity a simple and practical plan to remedy this, the farmers FIXING THE PRICE OF HIS OWN products or the products of his labor.

We urge farmers to investigate the plan of the American Society of Equity. Business and professional men are also urged to study and learn the plan by which their business will be benefited.

One of the largest wheat growers in Bartholomew Co., Ind., when solicited to sell his crop of wheat, replied: "Mr. Everitt says wheat is worth $1.00 and that's my price." He put his wheat in granaries. Hundreds of thousands of others have done the same.

Mention Up-to-Date Farming when writing advertisers.



FROM RAGS TO RUGS

Old clothes, carpets or rags can be made into handsome, attractive, durable carpets or rugs by using

A NEWCOMB AUTOMATIC LOOM

That New Press

Please find enclosed $1.00 to help buy THAT PRESS. Try and gather reports on potatoes as soon as possible.—W. R. Yarkey, Canal Fulton, Ohio.

Enclosed find $1.00 for renewal for two years. I believe your plan is the best that has ever been presented to the farmers.—W. A. McKeaig, Sturgis, Ky.

You will find enclosed $1.00 for the good of the order—"That New Press" must come. Send supplies to organize a Local Union.—J. N. Stamps, Haleys Mill, Ky.

I find Up-to-Date Farming very interesting and helpful. Inclosed find $1.00 for Press Fund. We must carry forward the educational work.—P. Ramming, Iowa Park, Texas.

I am ready to do my part toward THAT NEW PRESS. I inclose $1.00 in stamps and hope all other members will do as well. I'm for equity now and as long as I live.—R. D. Gibson, Meridian, Tex.

Enclosed find $1.00 for renewal of subscription to Up-to-Date for two years. I am with you for "that new press," profitable prices and to bring farmers to the front.—David Zwiener, Peake, Neb.

Find enclosed one dollar to help buy THAT NEW PRESS. The time is coming when farmers will fully realize the benefits of co-operation and equity.—Robt. Paisley, Mindoro, Wis.

Inclosed please find two dollar bill which apply to Free Will Press Fund. I consider this a loan. We expect it back many fold in improvements, and better prices after "that new press" is in operation and as the education advances.—S. D. and H. F. Kump, Cambridge, Wis.

Enclosed please find $1.00 for "that new press" and $1.00 for literature for free distribution. The Third Power and Up-to-Date Farming are practical, up-to-date and necessary to free the farmers from the speculators who are now pricing their products. —— ——, Wyoming, Delaware.

Please find enclosed money order for one dollar ($1.00) for "THAT NEW PRESS." I am well satisfied that the principles of Controlled Marketing are all right and propose to do all I can to help BRING FARMERS TO THE FRONT.—J. F. Stellpflug, R. R. No. 2, Galesville, Wis.

I think your plan is all right. We have some dumpers. I think $20 or $22 is too much sacrifice to make on 100 bu. of wheat. I shall hold my wheat for $1.00 and help the good cause along by inclosing herewith one dollar for Press Fund, one dollar to renew my subscription for two years and 50c for one new subscriber.—J. R. Watkins, R. R. No. 4, Hillsdale, Mich.

Farmers can not expect to accomplish much if they refuse to give their support to those agencies really working in their interest. I hope you will soon get enough to buy that New Press and am willing to do my part. I enclose $1.00 herewith for PRESS FUND.—Henry F. Rust, R. R. No. 34, Beecher, Ill.

It looks now as though Leebanau county (Mich.), would be well represented at the Annual Meeting. I enclose $1.00 for New Press Fund to help the cause along. Hope the National Meeting will be a grand success. I am, yours for victory.—Thos. W. Robinson, Leland, Mich.

25c will do it

Twenty-five cents from each reader, contributed, advance subscriptions or advance dues will enable us to order THAT NEW PRESS. Will it pay? A comparison of prices for the past two years under the partial influence of Controlled Marketing with prices under the old plan in previous years should make but one answer possible.

Why delay? You will read some farm paper anyway. You are honest and will pay for it. You can read but ONE that will help you in getting better prices. There is ONLY ONE. Just ONE farm paper published that has dared to say to middlemen that farmers HAVE A RIGHT AND SHOULD PRICE THEIR OWN PRODUCTS. THAT ONE furnishes a definite plan and urges farmers to refuse to sell the products until they get a profitable price for them. We want you to read that one. We want you to help us a little now so we can make that ONE larger, better and more powerful. Also, so we can get out larger editions so as to carry forward the teachings more rapidly. 25c WILL DO IT. But not while widely separated and in the pockets of our readers. We must collect them. Get them together, a hundred thousand of them, and turn them into the Equity Press. It will require a little effort on your part, dear reader, to make this possible. You will have to write a letter and send us the QUARTER, the HALF or the DOLLAR as you feel disposed. We will credit you as you direct.

Do not delay. Do not put the matter off any longer. The little necessary for each one to do to make success possible will hardly be noticed by any of our readers. The greatest hindrence, is dread to write the necessary letter. DO IT NOW and have it done with.

Act at once

There can be nothing gained by delay. Much will be lost. It is human nature to put off doing things not absolutely imperative. Do not cultivate this undesirable quality especially when business matters involving your own welfare are involved.

Do you realize that Up-to-Date Farming is the ONLY paper in the world that is demanding for you profitable prices for your products? Do you know that Up-to-Date Farming and The American Society of Equity have, and are still, exerting a tremendous force in sustaining prices on this year's crop.

There is little doubt but that cash wheat would be selling at 65 cents in Chicago at this time were it not for that NEW thought, CONTROLLED MARKETING, set in motion and put into operation by our educational efforts. The price of cotton has been forced to over 11 cents by the same effort. Tobacco is selling for double, the price of three years ago because of the same force. A stimulating influence on prices is felt all along the line.

Shall this education be continued and this price making power be made more powerful or shall lack of adequate facilities continue to be a barrier to future progress? THE ANSWER DEPENDS UPON YOU.

President's Picture

We have in course of preparation a beautifully vignetted tinted half tone reproduction of President Everitt, size 11x14 inches and suitable for farming. As soon as completed we propose to send one of these fine pictures, prepaid, to every Free Will Contributor of twenty-five cents or more to the A. S. of E. Press Fund. This will serve as our acknowledgment of the receipt of your remittance besides being something you will prize very highly. Remember, also, that your name will be listed in the "Roll of Honor" if your contribution is one dollar or over.

UP-TO-DATE Field Crops

PRODUCTION AND MARKETING

Preliminary Report on Broom Corn Crop of 1905

From August, '05 Crop Reporter, Department of Agriculture.

States.	Decrease of acreage compared with that of 1904.	Condition, per c nt of normal	Average price per ton.	Average yield per acre.	Per cent of former crops in farmers' hands.
	P. c		*Dolls.*	*Lbs.*	
Illinois	31	87	78	480	6
Oklahoma	18	75	36	325	22
Kanas	22	85	55	400	10
Missouri	24	84	64	350	5
Nebraska	43	80	St. 70 / D. 45	400	5

From the above summary which is conceded by the Agricultural Department, to be but fragmentary in its scope, it is clearly evident that the 1905 crop will be much below the average and hence growers should not listen to the stories of large crops and big surpluses held over from last year.

The Report continues:

"No accurate figures giving the number of acres of broom corn planted have been published since the census report of the crop grown in 1899, therefore it is impossible to give, even approximately the number of acres devoted to the present crop. The acreage of Oklahoma in 1904 was unusually large by reason of the partial failure of the wheat crop, many acres seeded to wheat in the autumn of 1903 being plowed in the late spring of 1904 and planted in broom corn. Another reason for the reduction of acreage in Oklahoma is that the farmers received such a small price for their brush in 1904 that they were not paid for their labor in producing the crop and putting it on the market.

The decrease of acreage in Illinois, Missouri, and Kansas would indicate a shortage in the crop of standard brush which would mean better prices than those obtained last year.

Two varieties of broom corn are raised in the United States, called "standard" and "dwarf." In Illinois and Missouri the standard variety only is raised, while in Oklahoma, Kansas, and Nebraska both varieties are cultivated."

Growers are requested to report on broom corn using regular Crop Report blank.

We believe it is wise in planning for another year, to stick to the main crops, those that have stood the test of time, and for which there is always a demand. Take wheat, for instance. There is some profit in wheat at $1 per bushel, and it should never sell below that. World conditions are such that we believe ordinary price-making methods will not be able to force it much below that for some years yet. Corn can be grown at 50 cents. The experience of the past year shows that even an imperfect organization may hold a large crop well up to that figure and above it. The demand for cotton cannot fail under any circumstances, and ten cents per pound, if the planter could always be sure of it, leaves a little money to his credit. The planter now knows he can rescue his crop from the most desperate plunderers, and compel a price safe up to ten cents. So of all the staple crops. Stick to the main crops.

PRE-ANNUAL MEETING

Crop Report Blank

Corn, Cotton, Potatoes, Beans, Broom Corn and Clover

SEE HERE! YOU don't take the interest in reporting crops that you should. How is the National Union, or the Annual Meeting going to correctly report the crops grown unless YOU do your part, which is to send a report of your 1905 crops? We just can't do it. Now please understand this is a serious matter. How can you expect the benefits if you don't help? On this text we have been preaching for years. Have you been sleeping all this time or what's wrong with some of you?—perhaps laziness or indifference.

It's time now to act. We want a report from every reader of this paper—member or non-member—and want it on any of the crops mentioned in heading that you grow. We want it for YOUR good, not for the good of the officers of the National Union. Everybody does something to get good markets but farmers. Will they begin now? They will.

☞ **Write over the columns what crops you are reporting on.**

UP-TO-DATE Live Stock and Dairying

PRODUCTION AND MARKETING

BREEDING HORSES FOR PROFIT

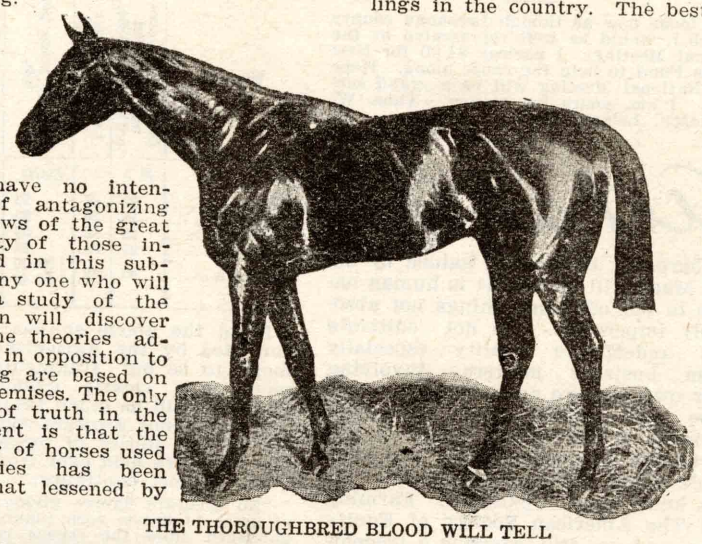
How to Breed to Enrich the Farmers by Millions

[This article will be followed by others on breeding cattle and hogs. They will be calculated to teach readers of Up-to-Date Farming how to breed so that the gold from cities and foreign countries will flow to their farms, also strangers will seek you out and pointing to your fine stock say, "Say, Jones, what'll you take for them?" This is simply working out the great plan to bring farmers to the front.—Ed.]

(Copyrighted)

How and what to breed and whether breeding pays are the questions of the hour, questions, which apparently have more than the proverbial nine lives of the cat, and will neither be downed nor answered to popular satisfaction.

Very recently the opinion prevailed that the horse industry was on the high road to extinguishment from neglect, but this idea has been abated by the revival of common sense, which proves to us that while human beings inhabit the globe the love of God's noblest animal, the horse, will continue to demonstrate itself in efforts for his improvement. Fashionable horse shows are frequent all over the country, extraordinary inducements in prizes being offered for fine animals, and we see in this and other facts signs of increasing interest in the horse beautiful, with an attendant interest in breeding.



THE THOROUGHBRED BLOOD WILL TELL

We have no intention of antagonizing the views of the great majority of those interested in this subject. Any one who will make a study of the question will discover that the theories advanced in opposition to breeding are based on false premises. The only shade of truth in the argument is that the number of horses used in cities has been somewhat lessened by the increase of trolly and cable transit. But the growth of cities, with its attendant demand for heavy draft horses, the increasing number of the rich with expensive partialities for stylish horses, together with a European trade, which we shall mention later, more than compensate for the few horses displaced by mechanical means of transit.

While there may be differences of opinion regarding some phases of the horse industry, all agree that but few colts are being produced. Authentic reports declare that there are almost no suckling colts and very few yearlings in the country. The best mares are also rapidly disappearing, especially the fine, stylish mares of the carriage type and the large draft mares, although both kinds bring prices which will yield the breeder better profits than most of the products of the farm. Buyers are to-day searching the country for good horses of all kinds, and are offering fully 30 per cent. better prices than were offered six months ago. Another important factor to be seriously considered is the foreign demand for American horses, which is increasing at a phenomenal rate, shiploads of American horses being transported weekly. England, Germany, France, Ireland, Scotland, Belgium, and in fact all Europe concedes that America can raise better horses for less money than any other country in the world, and Europe may be depended upon to take all our surplus stock in the future at fair prices.

There is, however, a rational explanation of the breeder's present timidity and the farmer's indifference to breeding. There was an overproduction of horses, the government report showing an increase of 2,150,000 in the United States for the year 1895. The explanation of this overproduction lies in the increase of the export trade, farmers and breeders fancying that a large demand for horses meant an unlimited demand for any manner of beast, by courtesy called a horse, which they could produce, and as a consequence such horses became a drug on the market. Then the reaction came, and the farmers who had on hand this while elephant of horseflesh, which was in style neither fish, flesh nor fowl and supplied no existing demand, sold for anything they could get; and going to the other extreme of fancying that the horse industry was dead, sold even their brood mares.

And now the universal cry of the dealer is, "Where shall we get horses?" Sight has been entirely lost of the fact that it was not the market, but the horse, which was poor. Among so many bad horses there were, of course, many good ones, and for these there was and is a ready sale.

A visit to the great live stock markets of the world would be of inestimable benefit to breeders and farmers by convincing them that the supply of horses does not equal the demand. The heads of these markets are unanimous in the conviction that there are only two kinds of horses worth breeding. Of these the stylish coach and saddle horse, they will convince the breeder, has never equaled the demand, while of the well formed, heavyweight draft horse the supply is also incredibly short.

There is another reaction impending, however, one which will turn in favor of breeding good stock, and we may expect to see gradually established a normal relation between supply and demand. In the meantime, as a horse cannot be created in a minute, there is a "horse drought" in sight, which will inevitably increase in aggravation

TUBULARS WRING GOLD FROM MILK

Tubular butter brings 25 to 35 cents. Cream is worth only one cent for stock food. Yet many farmers have no separator—only half skim their milk by setting—lose 24 cents on cream fed to stock—and wonder why dairying don't pay. **Tubulars get the last drop of cream out of the milk**—make big profits. Tubulars are the only modern separators. Notice the low can and enclosed gears. Write for catalog S-136

Address,

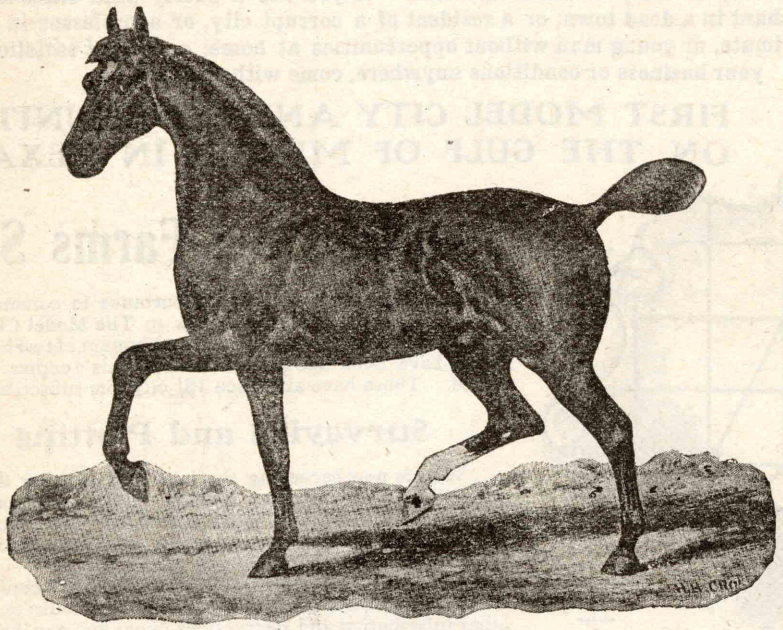
SEARS, ROEBUCK & CO.
CHICAGO, - - ILLINOIS.

until several crops of yet unfoaled colts shall have grown to maturity. Therefore there can be no better time to begin to breed than now, at the very commencement of the scarcity, when prices are mounting higher. The farmer who takes this hint will do so to his lasting advantage, for it is unlikely in this enterprising age that such a dearth of horses will occur twice in a man's lifetime.

Like an army in battle, which must have recruits or stop fighting, so we must reinforce the stock or get off our pedestal as a fine-horse producing country and so lose the profits of the industry. All we have now to depend upon to do this is the short crop of colts from a limited number of mares bred the last few seasons.

(To be continued)



STYLISH CARRIAGE HORSE

With Our Advertisers

By the Advertising Manager

Cut the coupon out of Montgomery Ward & Co.'s advertisement and send for their big catalog. It weighs four pounds but they send it free.

Write the H. P. Deuscher Co., Hamilton, O., for information about the fine field roller they make. Say you read Up-to-Date Farming.

A book about saw-mill and wood workers' machinery will be sent by the American Saw Mill Machinery Co., 637 Engineering Bldg., N. Y. City.

Ingersoll's mixed paint bought from the factory is used by thousands of farmers. Save money by buying from O. W. Ingersoll, 234 Plym .ch street, Brooklyn, N. Y.

A gas engine is needed on nearly every farm. The Temple Pump Co., Chicago, want readers of Up-to-Date Farming to write for their free catalog.

The hunting season is best enjoyed with a good gun. None better than those made by Union Fire Arms Co., Desk T, Toledo, Ohio.

If you want a good wind-mill send for booklet 48 published by Double Power Mill Co., Appleton, Wis.

Property can be sold by addressing N. B. Johnson & Co., 543 Bank of Commerce Bldg., Kansas City, Mo.

Did you send for Dr. Haas' book "Hogology" advertised last month? Every reader of Up-to-Date Farming may have this valuable book free. Send to Jos. Haas, V. S., Indianapolis, Ind.

When a man sells a washing machine that must pay for itself I think it must be pretty good—and worth having. R. F. Bieber, 948 Henry St., Binghamton, N. Y., sells the "1900" Washer that way. Write for information.

Reliable nursery stock may be obtained from Hart Pioneer Nurseries, Box 28, Fort Scott, Kans.

Agents will find a good seller in "12 Tools in 1" sold by National Tool Co., Box 8, Three Rivers, Mich.

Have you tried Absorbine for those bruises or bunches on your horses' legs? It removes inflammation but does not blister or destroy the hair. You will be pleased with it. Absorbine Jr., for mankind quickly cures bunions, corns, sprains, etc. Send for free book 12-B to W. F. Young, P. D. F., 102 Monmouth St., Springfield, Mass.

Is there a farmer who has not tried International Stock Food? There should not be one. And those who have tried it once will certainly find it a money maker. The manufacturers absolutely guarantee one ton to MAKE the feeder $360 over and above its cost. One hundred pounds is guaranteed to make a profit of $18.00. They are able to fulfill every promise. Write the makers. Ask for particulars of their $1000.00 prize contest. Tell them how much stock of all kinds you own and that you read Up-to-Date Farming. Our guarantee is back of their guarantee. Write International Stock Food Co., Minneapolis, Minn.

Market reports indicate a difference of 2 cents a pound between prime steers and common steers. This is usually the difference (value) placed on intelligent work and the opposite. The feeder who can turn his brains to account in business transactions is usually the one who succeeds the best.

A Wonderfully Successful Doctor

In the great and successful field of home treatment there is probably no physician who has won such an enviable portion of fame and has made so great a success in his particular line of work than has Dr. F. Geo. Curts, 532 Gumbel Bldg., Kansas City, Mo.

It is surprising what a large percentage of cures have been accomplished by Dr. Curtis' Mild Medicine Method. Failures are so few and far between that they are almost unknown to him. The Doctor shows his faith in his ability to cure any disease of the eye and ear by offering to refund the money paid him for the first month's treatment if results are not entirely satisfactory.

His big book, "Blindness and Deafness; Causes and Cures," which is sent free to anyone upon request, has probably been the means of doing a greater work in the relief of suffering humanity than any other medical book ever written. Dr. Curtis will be glad to send his book to any one upon request.

100% ON YOUR MONEY EVERY YEAR FOR TWENTY YEARS

This is the marvelously good investment that more than 650.000 users have actually found the **DE LAVAL CREAM SEPARATOR** to be.

With the average number of cows a **DE LAVAL** machine saves and earns its whole cost the first year, which it continues to do yearly for its established life of fully twenty years more to come.

There surely isn't another such investment, either on the farm or off it, open to anyone having cream to separate. Why delay making it?

As for the first cost, if you have the ready cash of course there is a fair discount for it, but if not any reputable buyer may secure a **DE LAVAL** machine on such liberal terms that the machine is ***actually free of cost for it will earn its cost and more while you are paying for it.***

Send at once for catalogue and full particulars.

These 24 Cash Premiums are absolutely free for our friends and customers who are feeding **"International Stock Food".**

If you have not received our complete list of these 24 premiums we will mail you one if you write to our office and request it. The smallest premium is $25.00 cash and the largest is $125.00 cash.

Dan Patch 1:56 COLORED Lithograph ABSOLUTELY Free

This Splendid Picture is a Reproduction of a Photograph which was taken by our own artist. It is 18x24 and in Six Brilliant Colors. It is as life like as if you saw Dan coming down the track and shows him pacing a 1:56 clip with every foot off of the ground. Every Farmer and Stockman should have a picture of the Fastest harness horse that has ever appeared on earth. Dan is in better shape than ever this year and will surely lower his own wonderful record. In his first public appearance this year he paced a mile in 1:59½ at the Minnesota State Fair and he followed this up in four days with a mile in 1:57½, with the last quarter in :27½ seconds, which is a 1:50 gait. Dan has been eating "International Stock Food" every day for three years and it has given him better digestion and assimilation and more strength, endurance and speed. He was not a champion when we bought him but has broken eight world records since that time. DAN PATCH 1:56 IS OWNED BY INTERNATIONAL STOCK FOOD CO.

COME WITH US TO THE

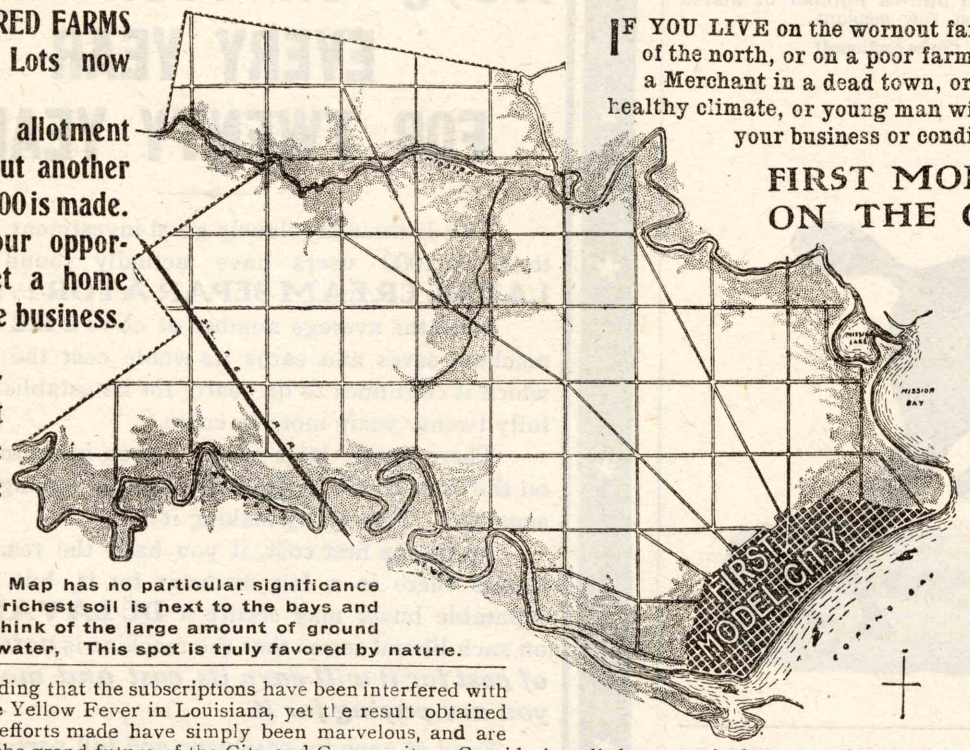
First Model City and Community

TWO HUNDRED FARMS and 181 Lots now sold.

The first allotment now closed but another allotment of 200 is made.

This is your opportunity to get a home and profitable business.

An opportunity that don't come twice in a life time.



The shading on Map has no particular significance except that the richest soil is next to the bays and streams. Just think of the large amount of ground lying along the water, This spot is truly favored by nature.

IF YOU LIVE on the wornout farms of the east, or in the winter impoverishing regions of the north, or on a poor farm anywhere. If you are a poorly paid office man, or a Merchant in a dead town, or a resident of a corrupt city, or a professor in an unhealthy climate, or young man without opportunities at home; or are not satisfied with your business or conditions anywhere, come with us to the

FIRST MODEL CITY AND COMMUNITY ON THE GULF OF MEXICO IN TEXAS

Two Hundred Farms Sold

WE HAVE news of great importance to communicate to friends and subscribers to The Model City and Community Movement. The first allotment of two hundred farms have been subscribed for and this section is now closed. There have also been 181 city lots subscribed for.

Surveying and Plotting

We are now surveying the land and plotting the city and will soon have a grand opening. Those who got in on the first allotment are to be congratulated. The success of of the movement is now assured and every farm and lot is really worth more than the price paid.

Every subscriber will receive by Mail a complete list of all the subscribers with their complete address. Also other information and instructions about going to the Model City. Other interested people can also obtain this list by applying for it.

Notwithstanding that the subscriptions have been interfered with on account of the Yellow Fever in Louisiana, yet the result obtained to date from the efforts made have simply been marvelous, and are an indication of the grand future of the City and Community. Considering all the natural advantages the location possesses, with the model homes, model business and model Government that will be maintained here, the future can only be seen with the eye of prophesy.

There are probably 1000 people who have expressed an interest in the Model Community—who have not yet subscribed for farms or lots. They may be hesitating for various reasons. We feel sure if they could go to this place and see with their own eyes they would not let another day or night pass without being enrol ed to **come with us to The First Model City and Community.** It will not be possible for all to go, and see in advance, therefore let us show you just what your experience and conclusions would be if you could go.

We will select as an example a man who you would all have explicit confidence in if you knew him or if he was representing you. This is Mr. W. H. Winters of Poteau, Ind. Ter. Mr. Winters is a Minister of the Gospel and a farmer, and has the confidence of the people as evidenced by the fact that he has sent subscriptions from his friends for 30 farms and 22 lots. You can have just as much confidence in his statement as though he was acting for you. We print below some of his letters.

Read particularly Mr. Winters' letter reporting what he found at the Model City and Community Tract

Poteau, I. T., June 19, 1905.

Mr. J. B. Coghill, Mgr.

Dear Sir:—Please send me prospectus of Model City and Community. I am much interested and have interested several others. If everything is favorable, I will make the place my home and want my friends to do the same.

REV. W. H. WINTERS.

Poteau, I. T., July 17, 1905.

Mr. J. B. Coghill, Mgr.

Dear Sir:—There is to be cheap excursion to Texas in a short time. I want to take advantage of it and go to the Model City and Community to personally investigate this proposition. There has been so many fake schemes that people are suspicious of all new ventures.

REV. W. H. WINTERS.

Poteau, I. T., August 12, 1905.

Mr. J. B. Coghill.

Dear Sir:—I will not be able to go to the Model City in August on account of illness of my wife, but will go as soon as possible. I am sure if I go and bring back a favorable report that fifty to one hundred will go to the opening from here.

REV. W. H. WINTERS.

Poteau, I. T., August 20, 1905.

Mr. J. B. Coghill.

Dear Sir:—I will go to view the land about September 5th.

REV. W. H. WINTERS.

Poteau, I. T., August 31, 1905.

Mr. J. B. Coghill.

Dear Sir:—I will start to the Model City next Tuesday * * * I hope to live to see a prosperous Model City and Community established and my word for it, if I find things favorable when I go there those 1,800 farms will be taken in a short time. We want homes under conditions as promised in the Model City & Community. We mean business.

REV. W. H. WINTERS.

Rockport, Texas, Sept. 11, 1905.

Mr. J. B. Coghill.

Dear Sir:—I arrived here Wednesday night the 6th, and have led a strenuous life ever since. I and my people are from Missouri and Arkansas. The Missourians have to be "shown" and the Arkansans have to be "sighted." So I came to see.

I am well pleased with the land and the climate. I consider the soil first class. There is quite a diversity of soil on the tract, black, deep soil and sandy loam predominate, but there is black sandy soil. It all seems to be very productive. The climate is delightful. I find some mesquite trees (a) on the land which I did not know as I thought it was prairie land, also I learn that this section is subject to droughts (b) to a greater degree than I anticipated, but old settlers tell me that the rains come at seasons to raise one good crop of everything each year and often two or more crops. I also find that it freezes here in winter, about once in ten or twelve years, the freeze being severe enough to injure and sometimes kill orange trees.

I want to suggest that you put down artesian wells. (c) In my opinion you cannot do anything that will bring half the returns as money put in artesian wells. I have had experience in Arizona in irrigation, and I would much rather pay $50 an acre for irrigated land than to pay $20 without and I believe my people will agree with me.

I came here to see the dark side and I must report the truth to my people. Now with these drawbacks that I have mentioned I THINK THIS THE BEST PROPOSITION BEFORE THE WORLD TO-DAY. I will come to the First Model City and Community to live, and will urge my constituents to do the same. Your prices are low enough. The advantage of climate, fertile soil, opportunity for pleasures and assurance of health in this locality far outweigh, in my estimation, the objections mentioned above.

I urge you to proceed to the sinking of artesian wells, then allow the settlers to unite in convenient number to put down joint wells, then we will have the raising of crops reduced to a mathematical certainty.

I find your representative, Mr. Chas. H. Lee, and I agree on nearly all points, and I am in favor of investing him with the power to act in the capacity of an overseer, giving him ample discretionary power which I do not think he will abuse.

In conclusion I want to say that I do not consider the question of water vital, but it is one of great importance. It will be necessary to supply water for the city and I think the artesian well will be the solution. With fine artesian water we will make one of the finest cities in our country.

I will start for home thin P. M. and you can rely on my help and good wishes.

REV. W. H. WINTERS.

(a) Mesquite are scrubby trees suitable for fire wood and fence posts. They are prized on ranches on account of the shade they afford and as protection against flies. They are easily cleared. Mexican labor can be obtained very cheaply in winter for this purpose, or settlers can clear up their own farms with very little or no extra outlay.

(b) All sections are subject to occasional droughts. We think with as good cultivation here as is given in the North (the natives don't do it) crops can be grown with as much certainty. However, if the first crop is well grown and marketed right farmers can afford to rest from their labors in mid-summer.

(c) From a fourth to a third of the purchase price of the land is to go into public improvements. With the consent of the settlers this can be devoted to drilling artesian wells.

EXTRACTS FROM MR. LEE'S LETTER.

Mr. Charles H. Lee (address Rockport, Texas), is representative of the Model City Land and Improvement Association. Following are extracts from his letters that will help to give our readers a clear understanding of the tract and its possibilities.

When Mr. Winters was down Mr. Lee wrote as follows:

"Mr. Winters arrived here last night. He spent today interviewing truck growers in the vicinity of Rockport. We will leave for the Model City lands in the morning on the 'Dolly Gray.' Mr. Winters is delighted with what he has seen and been told by residents."

September 9th as follows:

"I have studied the Model City site very carefully. I think the bay front should be plotted in quarter acre lots and sold for fine residences. The shore is from 12 to 30 feet above the bay and fine soil to the edge. With a beautiful drive next the shore, which can be made, then these lots, facing the bay, will make almost or quite the finest residence sites in the United States. When placed on the market this way they will sell very rapidly. Of course it will be necessary to cut one or more wide streets through to connect the wharfs and city and as arteries for the business."

Again on September 9th he wrote:

"I was over to the Model City tract yesterday showing Mr. Winters the land. I expected to spend at least two days with Mr. Winters on the land, but after driving for six hours he was so well pleased with the land and the cite for the city that he said he thought it would be time wasted to look farther. We interviewed two parties as to what can be grown on the land. Today Mr. Winters has gone to The Pass to see the work the government is doing there to open a channel for large sea going vessels to land here. Mr. Winters will leave Monday morning for home well pleased with what he has seen and learned.

Sept. 11th, 1905, Mr. Lee writes:

"I think the Model City and Community proposition is one of the finest business propositions to be found in the country. The land is very fine and the cite for the city can't be beat anywhere. The climate is ideal. The more I investigate the stronger it appeals to me.

SECOND ALLOTMENT, 200 FARMS.

As stated, the first allotment of Two Hundred (200) farms has been taken up.

Second Alloitment of 200 Farms. Cut out and send promptly. You may be one of the 200 if you mail today

No._____

To Mr. J. B. COGHILL, Mgr., Dept. 8, Indianapolis, Ind.

I hereby subscribe for.....farms of 25 acres each;.....5 acre farms;.....¼ acre Bay Front lots and.....lots, all in Refugio Co., Tex. and in the tract of land known as **The Model City and Community.**

For such farm land and lots I agree to pay to **The Model City Land and Improvement Association,** $20.00 per acre for the farm land, $50 per acre for 5 acre city farms; $100.00 each for city lots, and $500.00 for Bay Front lots. One third to be paid in cash as soon as two hundred (200) 25 Acre farms are subscribed for; another one-third in cash when I take possession of the property and on delivery of the deed. I agree to take possession of the property or place some person in possession within six months from the time of notice of subscriptions for 200 farms is received. The balance one third is to be paid in one year from same date. Deferred payments to bear interest at 6 per cent. per annum. If it is not convenient to make the last payment at time specified it is agreed that the time will be extended another year. In the case of city lots the condition to take possession is waived.

A Zobo Band

Composed of boys will afford them more harmless amusement than anything else, no matter what the cost. The Zobo is an inexpensive musical instrument. It can be played by anyone without a minutes practice or instruction. Costly instruments can be used only by experts after years of practice. Old and young find entertainment and enjoyment with a Zobo. It furnishes good dance music; can be used in street parades or any place where music is desired.

BOYS Get up a Zobo Band. Tax each member a dime and you can buy your instruments. Nothing better than a Zobo. Made of strong material and not liable to injury. 6 inches long. Full printed instructions with each Zobo. Get a dozen and sell them to your friends. **Price** 10c each. $1.00 per dozen postpaid. 100 not prepaid $5.00.

UP-TO-DATE
Home on the Farm
HOW TO KEEP IT BRIGHT, HAPPY AND CHEERFUL

The Man Without the Hoe

Aye, he's the man to pity and point the tale of woe,
Who hath no wish to plant a seed and help to make it grow,
Whose heart is brick and mortar,
Whose life is soulless barter,
A million miles from God's sweet world—the man without the hoe.
—*E. C TOMPKINS*

October! How fast the months roll by.

We hope every farm home has a full supply of provisions safely stored.

It will soon freeze ice. Have you put the house in order for winter? Are you sure the apples and potatoes are safe from Jack Frost? Now is the time to see to those things.

Take down the screens and put up the storm doors, if you live very far north from Mason & Dixon's line. Don't wait and be caught by an early "northwester."

If it gets stormy outside take particular pains to make it sunny inside. If you cultivate cheerful and happy thoughts and keep your heart right, there will be no need to take particular pains; the sunshine in your home will be spontaneous. But I will warrant you that your comfort will depend a great deal on the condition of your house. If there are negleted tasks that ought to be performed, it will chase contentment out of doors. Go fix that which needs fixing, and come back whistling and happy.

I have been talking to the men and boys this time. In the winter they spend much time in the house. Nearly all the "women folks" always do what they can to insure winter comfort in good season. It only remains for the "men folks" to complete the task.

How often it occurs that the housewife, with her numerous duties, allows the food cooking in the frying pan to stick and burn. Here is a partial remedy worth remembering: Never attempt to cleanse the frying pan by washing with water. Place the pan over the fire to melt any grease that may be sticking, and while hot the inside of the pan should be rubbed thoroughly with soft paper. Twist the paper tight and rub vigorously. Frying pans treated so will never burn their contents until worn out.

Now don't forget the magazines and papers for the winter's reading. Choose them wisely, and if you would make quite sure of keeping the boys and girls on the farm, let a paper come into your home that tells the darker side of city life, and it is well that the young country folks know something of the great, harsh, cruel city that puts business greater than humanity and a dollar of more importance than a man. Though one in a thousand succeed, the success is hardly worth the winning, and there are nine hundred ninety-nine who fail. Keep both sides before the young folks, and make home on the farm full of pleasure and interest, and though they may go, they will gladly return.

Children's Eating and Drinking

The following excellent advice to mothers concerning the eating and drinking for children is credited to the leading child doctor of Chicago:

"As you love the children, do not allow them to buy anything to eat—the baker's alluring 'stuff,' the delectable candies, and the gas drinks are all deadly! They are the sure undermining of the child's health and morals. If the zeal of temperance workers could prevail in this matter great salvation might be accomplished. One big root of the evils of drinking and treating is in the soda fountain.

"Let your children eat and drink all that they need at home. When they come from school—tired and cross—they can be rested and smoothed down by ministering to their digestion. We should give careful, inteligent attention to what and how our children eat, studying to give them of quality and quantity of nourishment such as will promote their health and development."

Cingered peaches will be found very nice prepared thus: Make a pint of strong ginger tea, and strain. Peel eight pounds of ripe peaches and cut into quarters or smaller. Place a layer of peaches on a platter and sprinkle thickly with granulated sugar; add another layer of peaches and sugar, and so on until all are used. Let stand over night. Turn into a porcelain lined preserving kettle, add the ginger tea, and simmer until rich and thick.

In all sweet pickles the standard proportion is seven pounds of fruit, three and one-half pounds of sugar, and a pint of vinegar. Spice to suit the taste.

Celery is helpful for nervous people, and should be used freely by them at meals or otherwise.

Breathing exercises should be taken each morning upon arising. Breathe deeply, sending the breath down to the waist line. Place the hands at the waist line and when inhaling force the hands apart. This will fill the bottom of the lungs. The majority of people are said to use the full lung in breathing but seldom. Deep breathing will develop the chest, lungs and throat and build up the entire system.

To strengthen and develop the muscles of the lower limbs practice the following exercise: Raise on the toes, count five, lower the body until the heels almost touch the floor, repeat eight times, touching the floor with the heels only on the eighth count. Repeat the same exercise, raising on the heels.

Skin eruptions show an impaired digestion and an impure condition of the blood; for the blood take the old-fashioned remedy of sulphur and molasses. Avoid rich and greasy foods and each morning before breakfast take a glass of hot water in which you have squeezed the juice of an orange or lemon.

A Big Chance for the Boys

We understand that a prize name competition has been inauguarted by the J. Stevens Arms and Tool Company, makers of the world-famous Stevens Rifles.

The object of their competition is to get a name for a new Boy's Rifle. Every wideawake lad the country over has a chance to win one of the prizes they offer. A "Favorite" No. 17 rifle goes to the boy sending in the best name; a "Little Krag" No. 65 goes to the boy sending in the second best name; a "Crack Shot" No. 16 goes to the sender of the third best; a "Stevens-Maynard, Jr." No. 15 to the fourth best, and a "Tip Up" No. 41 pistol to the fifth.

Their competition closes the 15th of August, 1905. Every boy can send in as many names as he chooses, though of course he can only secure one Stevens as a prize.

The conditions are very simple. Write on but one side of the paper, date the communication, state name and address plainly, and send it to The Prize Rifle Competition, 2 5 High Street, Chicopee Falls, Mass. If a number of boys send in the same names, the boy sending in the name first will receive the prize. The officers of the company are to be the judges.

We feel sure that such a generous offer as this will bring in thousands of replies from boys the country over.

Absorbine, Jr., Removes Goitre

Mr. G. A. Foehringer, R. F. D. No. 9, Butler, Pa., writes under date of May 29, 1905: "My wife is using Absorbine, Jr., for goitre, has almost used one bottle and it has reduced it so that you can hardly notice it." Absorbine, Jr., is a mild remedy to use and will leave no deleterious after effects. $1.00 per bottle at your druggists or sent postpaid upon receipt of price. W. F. Young, P. D. F., 102 Monmouth St., Springfield, Mass.

UP-TO-DATE

Tobacco Department

BY C. HAYES TAYLOR

Delegates, Attention!

Rates to Owensboro will be reduced to one and one-third fare, plus 25 cents. Full fare must be paid to Owensboro and each delegate and person attending the convention must request the ticket agent to issue him a certificate of such purchase, properly filled and signed. If a through ticket cannot be purchased at starting point, purchase a regular ticket to nearest point where through tickets are issued, and repurchase through to place of meeting, requesting a certificate at each point.

Tickets for the return journey will be sold at place of meeting at one-third regular fare, plus 25 cents, ONLY TO THOSE HOLDING CERTIFICATES, signed by the Secretary of the Association, and countersigned by the agent of the roads.

Persons not delegates who desire to attend the convention may purchase tickets on the same terms granted to delegates.

These instructions are given in accordance with the rules of the railroad companies granting reduced rates, so that all intending visitors to Owensboro may make no mistake.

Note—The same terms and instructions will apply to the Annual Meeting of the A. S. of E. at Indianapolis.

Tne Program at Owensboro.

The convention will be called to order at 10 o'clock a. m., Wednesday, October 18. The morning session will be given to the seating of delegates, the address of welcome, and the response by Pres. Davenport of the Association.

The afternoon session will be given to the announcement of committees, reading the report of the Secretary, and an address by Pres. Everitt of the A. S. of E., followed by discussion. The evening session will be given over to addresses and discussions, and the report of the committee on Order of Business.

It is anticipated that three sessions will be held daily. Adresses will be made by Jno. W. Gainess, the "Tobacco Congressman" from Tennessee, H. B. Sherman, National Organizer A. S. of E.; Col. John S. Cunningham of North Carolina; Hon. S. C. Adams, President Interstate Tobacco Growers' Association; Hon. Chas. Fort, President Dark Tobacco Growers' Protective Association; Hon. Felix G. Ewing of Tennessee; Congressman A. O. Stanley of Kentucky, and others. Discussion will follow the addresses in which all delegates and interested persons are invited to take part.

The subjects of addresses and topics for discussion will include: Quantity and Condition of 1905 Crop of Tobacco; Methods of Growing, Storing and Priizng; Methods of Marketing; Scale of Price to Be Adopted for 1905 Tobacco; Completion of Organization; Tobacco Clearing Houses in Principal Markets; Financing 1905 Tobacco; Provision for Funds to Maintain Organiaztion and Transact Business. Committees to prepare reports on these topics will be announced the first day of the convention, and reports will be made during the morning of the last day. All plans will be carefully considered and thoroughly discussed during the sessions and finally acted upon after the committee reports are rendered.

Permanent committees to assist and facilitate the work, and promote the associated interests of the tobacco growers will be chosen; also, officers for the ensuing year will be elected, and the place of meeting in 1906 decided upon.

C. HAYES TAYLOR, Secy.

Announcement of Committees

Cisney, Ky., Sept. 20, 1905.

To all members of Tobacco Growers' Associations—Greeting: By virtue of authority in me vested by the National

IF SICK OR WELL

You ought to read **THE NEW GOSPEL OF HEALTH.** This valuable book of over two hundred pages, explains A New Method of Diagnosis and Treatment and describes one hundred diseases which have been cured by it. Also testimonials from those cured. It will be sent free on receipt of ten cents for postage. Address
J. F. SHAFER, M. D., UrineDoctor,
222 Penn Ave., Pittsburg, Pa.

This $1.00 box SENT ON TRIAL

STOMACH TROUBLES CURED!

I will send a $1.00 Box John's Stomach Tablets, enough for one full month **Before You Pay** They cured me of stomach troubles. Try them at my expense. Pay when satisfied. They are the best remedy for dyspepsia, gas on stomach, heartburn, heart palpitation. A trial will prove it. For your own health's sake you should send for them today. Address **JOHN MORROW, Chemist,**
Forrest Bldg. Springfield, Ohio.

Tobacco Growers' Association, of which it is my honor to be President, I hereby announce the following committee appointments for Owensboro convention and earnestly hope each person appointed will prepare thoroughly for the important duties before them:

COMMITTEE ON CREDENTIALS: R. J. Marshall, Brookneal, Va.; J. B. Kittinger, Central City, Ky.; J. M. Rice, Kirkmansville, Ky.

COMMITTEE ON ORGANIZATION AND FEDERATION: S. C. Adams, Red Oak, Va.; E. T. Bondurant, Rice Depot, Va.; M. J. Cox, Benton, Ky.; Felix G. Ewing, Glenraven, Tenn.; F. B. McCown, Kirkmansville, Ky.; L. N. Robertson, Utica, Ky.; S. D. Kump, Cambridge, Wis.

COMMITTEE ON GRADING, PRIZING AND FINANCING: T. W. Evans, Concord, Depot, Va.; James M. Vaughan, Cumberland, Va.; Otho Hull, Lowry, Va.; C. P. Warfield, Clarksville, Tenn.; D. T. Hamill, Guthrie, Ky.; T. T. Barrett, Henderson, Ky.; P. T. Burns, Moseleyville, Ky.

COMMITTEE ON PRICES: S. C. Adams, Red Oak, Va.; E. T. Bondurant, Rice Depot, Va.; P. Anthony, Kasey, Va.; D. T. Hamill, Guthrie, Ky.; E. E. Gay, Mayfield, Ky.; R. C. Hopson, Hawkins, Ky.; T. T. Barrett, Henderson, Ky.; G. M. Taylor, Maceo, Ky.; J. H. Burney, Greenville, Ky.; A. D. Kump, Cambridge, Wis.

Other appointments will be made later. E. L. DAVENPORT,
Cisney, Ky.

Pittsylvania County, Va.

Editor Up-to-Date Farming:

I have spent nearly two weeks time in Pittsylvania county with good effect. I believe we can line up the county solid as soon as a practical plan for selling tobacco is formulated. This plan is the burning question here. "How are we to sell to control the market?" is a question that meets us everywhere, and all eyes are turned toward Owensboro. Two tobacconists from Danville attended my last meeting and acknowledged the correctness of my statements. I hope for a good delegation from Pittsylvania and Bedford counties.

P. ANTHONY, D. P.
Kasey's, Va.

Dane County, Wis.

Editor Up-to-Date Farming:

Buyers from Eastern markets have been exceedingly active the past two weeks, and perhaps 50 per cent. of the 1905 crop has been contracted for at prices ranging from 8 to 11 cents, with 10 per cent at 2 cents. The coming convention at Owensboro undoubtedly pushed the buyers into the field early. indications are that the crops could have been sold at from 12 to 16 cents in the bundle by demanding those prices, but the prices offered are much better than those formerly paid.

Notwithstanding that a large portion of the Wisconsin crop has been contracted, we propose to attend the Owensboro convention and help make plans to insure as good or better prices in 1906. We will look out for Dane county, and hope that you will be able to secure a good representation from Columbia, Crawford, Rock and Jefferson counties as well. We are going down to Owensboro with the intention of putting in three or four days hard work and put things in shape so we will know where we are, what we should do and how to do it. We advise holding the next annual convention somewhat earlier.

S. D. KUMP,
Secretary Dane County Union.

The Federation Idea Finds Favor

A man who takes a prominent part in organizing the farmers, and is a leader in both the A. S. of E. and the D. F. G. P. A., writes: "A federation of tobacco growers' associations is just the thing. We must have it if we would control the tobacco situation. I thank God, farmers are beginning to realize the strength of unity. I believe the solution of the problems confronting the tobacco growers lies in the clearing-house idea." We have many other letters commending this plan. It will not, cannot injure in any way the effective work of the different local organizations, but will assist them greatly, adding the increased strength of unity.

Tobacco News Notes

Owensboro convention, Oct. 18, 19 and 20.

Railroad rates one and one-third fare on the certificate plan.

Kentucky growers are more active than ever, notwithstanding many prophesies that the organization would amount to nothing. They propose to make it amount to something. Six organizers were busy at work in Caldwell county a week ago.

The crop report blank reappears in this issue. It is not too late for you to send in your report if you have not, and there is your non-member neighbor; get his report and send it in.

When the organized farmers have several million pounds of tobacco carefully graded, prized and stored, there will not be any great difficulty in disposing of it at farmer's prices, especially if no one else has any tobacco for sale. The farmers hold the key to the situation.

Turkey has purchased heavily of American tobacco during 1904-5, especially of the common grades. We anticipate that prices for this class of tobacco will be much better than for the past few years. There will be no doubt of this if the organized tobacco growers co-operate fully in refusing to market unless better prices are paid.

Have you appointed delegates to Owensboro yet? Are you arranging to get a complete crop report ready? Has your county union met and made provision for learning the exact condition of tobacco and for grading, storing and handling it? If not, do not delay longer. You have built a co-operative machine—now use it.

The Grand Opera House in Owensboro, with a full suite of committee rooms, has been secured for the Owensboro convention. Though it has a seating capacity of more than 1,200 we anticipate it will be filled to overflowing each day of the convention. Numerous hotels and boarding houses are preparing comforts for the visitors. The Owensboro Business Association is giving valuable assistance and their hearty co-operation in making the meeting successful from every point of view is appreciated by our members.

Get This Gold Pair FREE

Listen! In the past year I received thousands of letters from spectacle-wearers all over the world, expressing their thanks and appreciation, and the one I give here is a good sample of what they all say. The Reverend O. C. Clark, one of the most prominent ministers in the State of Illinois, says: "I highly appreciate your famous "Perfect Vision" spectacles, for I can honestly and truthfully say that with them I now read the finest and smallest print both day and night, just as well as I ever did in my life Your spectacles are truly marvelous." Now I have no doubt but that the testimony of this noted minister of the gospel is sufficient proof to every fair minded spectacle-wearer that my famous "Perfect Vision" spectacles are really **THE BEST IN THE WORLD**, as I claim.

But I Want YOU to Judge Them For YOURSELF

and thereby get **YOU to send me YOUR testimonial also.** Hence, before placing them on the market for sale at their regular price of $5 per set, I make you the following special offer which will actually save you $4 cash: Just write me your name and address and I will mail you my Perfect Home Eye Tester, free, with which you will be able to test your eyes at your own home, just as well as if you paid an occulist $10 for doing it. Then when you return me the Eye Tester with your test, I will send you a complete five dollar family set of my famous "Perfect Vision" spectacles for only $1 (which is an actual saving of $4 to you), and this will include a pair of my handsome Rolled Gold Spectacles absolutely free of charge. This set will last yourself and family a lifetime. With these famous "Perfect Vision" Spectacles of mine you will be able to thread the finest needle and read the smallest print, both day and night, just as easy as you ever did in your life, and this even if your eyes are so very weak now that you cannot read the **HEADLINES** in this paper. I also hereby agree to return you your dollar cheerfully if you **YOURSELF** don't find them to be the most perfect-fitting, clearest and best you have ever bought anywhere, at any price. Write today for my free Home Eye Tester. Address my company as follows:

DR. HAUX SPECTACLE COMPANY. Haux Building, ST. LOUIS, MO.

I WANT AGENTS ALSO And any man or woman (also storekeepers), without any previous experience whatever, can fit the weakest eyes with my Improved Home Eye Tester. This is so simple that any one can work it with perfect satisfaction and easily earn from $25 to $100 weekly selling my famous Perfect Vision Spectacles, either in their own homes, traveling or in stores. My agents need no license as I furnish necessary documents with the Agent's Outfit

(NOTE.—The above is the largest Mail Spectacle House in the United States and perfectly reliable.)

$200.00 IN CASH PRIZES FREE

Other Prizes are Given for Sending us Subscriptions; but THIS $200.00 IN CASH PRIZES WILL BE AWARDED ABSOLUTELY FREE to the persons sending us the neatest correct solutions. : : : : : :

Arrange the 41 letters printed in the centre groups into the names of six cities of the United States. Can you do it? Large CASH PRIZES, as listed below, and MANY ADDITIONAL PRIZES to those who send in the neatest solutions, will be given away. **First Prize, $50.00 in Gold. Second Prize, $25.00 in Gold. Third Prize, $15.00 in Gold. Fourth Prize, $10.00 in Gold. Five Prizes of $5.00 each. Ten Prizes of $2.50 each. Fifty Prizes of $1.00 each. Making a Total of Two Hundred Dollars in Prizes.** Don't send us ANY MONEY when you answer this advertisement as there is absolutely no condition to secure any one of these prizes. **RULES GOVERNING THE CONTEST.**—In preparing the names of the six cities, the letters in each group can only be used as many times as they appear, and no letter can be used that does not appear. After you have found the six correct names you will have used every letter in the 41 exactly as many times as it appears. These prizes ARE GIVEN, as we wish to have our Magazine brought prominently to the attention of everyone living in the United States. Our Magazine is carefully edited and filled with the choicest literary matter that the best authors produce. **TRY AND WIN.** If you make out the six names, send the solutions at once—who knows but what you will WIN A LARGE PRIZE? Anyway, we do not want you to send any money with your letter, and a contest like this is very interesting. Our Magazine is a fine, large paper, filled with fascinating stories of love and adventure, and now has a circulation of 400,000 copies each issue. We will send **FREE** a copy of the latest issue of our Magazine, to everyone who answers this advertisement. **COMMENCE RIGHT AWAY ON THIS CONTEST** and you will find it a very ingenious mix-up of letters, which can be straightened out to spell the names of six well-known cities of the United States. Send in the names right away. As soon as the contest closes you will be notified if you have won a prize. This and other most liberal offers are made to introduce one of the very best New York magazines into every home in the United States and Canada. WE DO NOT WANT ONE CENT OF YOUR MONEY. When you have made out the names of these cities, write them plainly on a postal card and send it to us, and you will hear from us promptly BY RETURN MAIL. A copy of our fascinating MAGAZINE WILL BE SENT FREE to everyone answering this advertisement. Do not delay. Send in your answer immediately. WE INTEND TO GIVE AWAY VAST SUMS OF MONEY in the future, just as we have done in the past, to advertise our CHARMING MAGAZINE. We find it is the very best advertising we can get to offer LARGE PRIZES. Here are the names and addresses of a few people we have recently awarded PRIZES: M. M. Hannah, Fernwood, Miss., $75.00; H. A. Parmelee, Milford, Neb., $61.00; Kate E. Dunlap, 138 N. Hill Street, Los Angeles, Cal., $61.00; Mrs. E. Preister, Richmond, Tex., $55.00; M. G. Christenson, Gregg, Minn., $50.00; Mrs. C. E. Welting, 1330 Lauderdale Street, Memphis, Tenn., $50.00; Mrs. Harriet S. Bullard, 120 Intendencia Street, Pensacola, Fla., $40.00; J. C. Henry, Box 118, Sligo, Pa., $25.00; Henry Perry, Central Islip, L. I., N. Y., $25.00; James A. Cooter, Holden, Mo., $25.00; Evelyn S. Murray, 132 S. Central Avenue, Austin, Chicago, Ill., $25.00; Mrs. L. D. Puffenberger, 340 West Forty-fifth Street, New York City, N. Y., $20.00. We could go on and point to hundreds of names of people who have gained large sums of money from our contests, but only give a few names. The solution can be worked out by an alert and clever person, and it will amply pay you to TRY AND SPELL OUT THESE CITIES. Brains and energy nowadays are winning many golden prizes. Study it very carefully and let us see if you are clever and smart enough to spell out the cities. We would rather take this way of advertising our excellent Magazine than spending many thousands of dollars in other foolish ways. We freely and cheerfully give the money away. YOU MAY WIN. We do not care who gets the money. TO PLEASE OUR READERS IS OUR DELIGHT. The question is, Can you get the correct solution? If you can do so, write the names of the cities and your full address plainly in a letter and mail it to us, and you will hear from us promptly by return mail. Lazy and foolish people neglect these grand free offers and then wonder and complain about their bad luck. There are always plenty of opportunities for clever, brainy people who are always alert and ready to grasp a real good thing. We have built up our enormous business by being alert and liberal in our GREAT OFFERS. We are continually offering our readers RARE AND UNUSUAL prizes. We have a big capital, and anyone can easily ascertain about our financial condition. We intend to have the largest circulation for our high-class Magazine in the world. In this progressive age publishers find that they must be liberal in giving away prizes. It is the successful way to get your Magazine talked about. Of course, if you are easily discouraged and are not patient and are not willing to spend any time in trying to work out the solution, you certainly cannot expect to win. USE YOUR BRAINS. Write the names of the cities and send them to us, and we will be just as much pleased as you are. We desire someone to be successful, and as it does not cost you one cent to solve and answer this contest, it will be very foolish for you to pass it by. In all fairness give it some of your leisure time. SUCCESS IS FOR ENERGETIC AND THOUGHTFUL PEOPLE, and the cause of FAILURE IS LACK OF INTEREST AND LAZINESS. So, dear reader, do not pass this advertisement without trying hard to make A SOLUTION OF THE LINES OF LETTERS PRINTED IN THE CENTRE OF THIS ADVERTISEMENT. We suggest that you carefully read this offer several times before giving up the idea of solving the puzzle. Many people write us kind and grateful letters, profusely thanking us for our prompt and honest dealings, and saying that if we had not so strongly urged them to try to win they would not have been successful. It always pays to give attention to our grand and liberal offers. OUR PRIZES have gladdened the hearts of many persons who needed the money. If you need money you will give attention to this special offer this very minute. If you solve it, write us immediately. DON'T DELAY. **WE WILL GIVE OTHER PRIZES THIS SEASON.** Get your name on our list and win a prize. Do not delay. Write plainly.

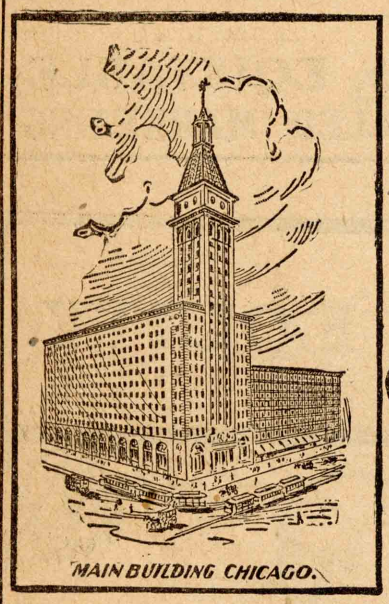
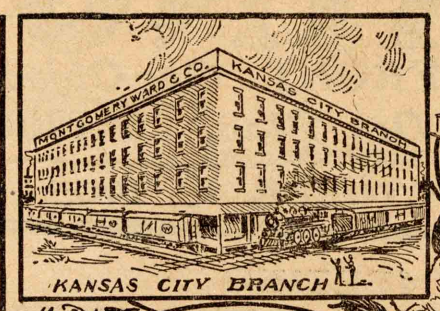
FOR THE CO-OPERATING FARMERS OF AMERICA

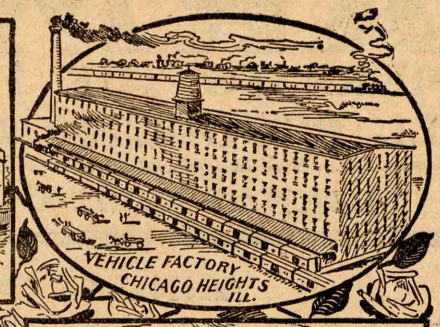
The

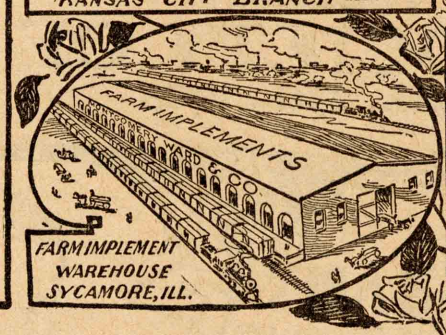
Greatest Mercantile Establishment in the World

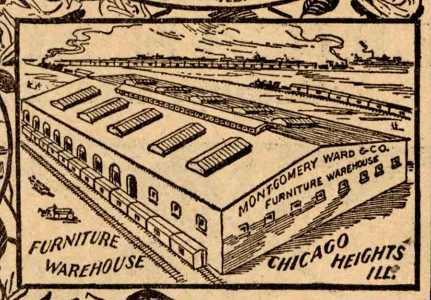
Remarkable Expansion in Buildings to Meet Wonderful Business Growth

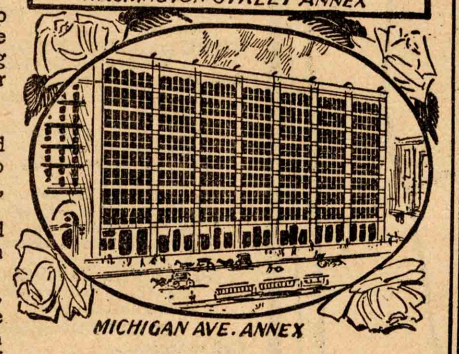












Present enormous plant of Montgomery Ward & Co.

Further extensive enlargements in contemplation. The most successful enterprise of the age.

The wonderful growth of Montgomery Ward & Co., from a single room in 1872 to its marvelous mercantile palaces of the present time, as shown in the accompanying illustrations, is a magnificent tribute to honest merchandising.

Today the business if this great concern towers above its imitators and would-be competitors as high as its lofty tower on the Lake Front of Chicago towers over the passerby on the street below.

The eight mammoth separate and distinct structures entirely occupied by Montgomery Ward & Co. exclusively for the transaction of its colossal business, would, if gathered into one grand group, be recognized as one of the wonders of the world.

Each of these magnificent buildings is a giant in itself, and the total realty holdings of Montgomery Ward & Co., are the very largest of any mercantile establishment in the world.

Every foot of the many acres of floor space represented in these structures is crowded with merchandise of every description, fully set forth in their marvelous catalogue, and still there is insistent demand for additional space to accommodate the increased and increasing business.

Already magnificent plans are in view for further enlargement during the coming year, which will give due consideration to future possibilities, permit of unlimited expansion and development to any magnitude.

Not only is this great house the original, the very first in the world to develop the Catalogue idea of selling everything direct to everybody—it is also the leader in magnitude of business done, in growth of its patronage, in maintaining its old customers for the longest periods and in expansion of area year by year to meet business requirements.

Its catalogues and its customers are everywhere.

It ships goods regularly to every country on the globe, to every inhabited island of the seas, to every state and county in the United States, Canada, Mexico Central and South America, as well as to Europe, Asia, Africa, Australia and Oceanica.

The magnitude of the business transacted by this vast concern is almost beyond human calculation.

We have just finished the printing of a large, new catalogue, number 74, containing the economical bargains and choice selections in every line of merchandise for the season of 1905–6. This large, illustrated book is the standard Buyer's Guide of the world and comprises nearly 1200 pages, 126,000 different articles, quoted at the very lowest prices.

This catalog is the leading and recognized authority on anything that may be purchased in any store to eat, to wear, to use.

It is the largest city store brought right to your door. Always complete; always has the latest things; always absolutely trustworthy, containing lowest prices on honest goods of the exact quality represented, without exaggeration or falsehood.

The policy of this firm is to make its catalogue the undisputed leader, far in advance of anything others can ever hope to attain.

Big Catalogue Free

The popular Ward Catalogue, very latest edition, 1200 pages, a new book from cover to cover. The catalogue that is known everywhere and liked by everybody. It has been in use for a third of a century and has made friends in all parts of the world.

Don't bother with unreliable, incomplete catalogues, when you can get the genuine Ward book for the mere asking. This is the catalogue for wide awake buyers. It's reliable, brand new, complete in every department, honest in descriptions, and quotes the very lowest price for really good merchandise. No cheap goods at Ward's. Catalogue No. 74 will prove a money-saver for you.

Cut here, fill in carefully, and send to Montgomery Ward & Co., Chicago

Letter from David Dobetter

No. 57.

Near Williamsport, Ind., Sept. 15, 1905.
Dear Mr. Everitt:

I am feeling sort of lonesome this evening and I guess I will get out my tools and write to you. John and Mary have gone back to school again; I suppose that is why I am so kind of down in the mouth just now. It always makes me feel homesick to have the children gone. After they went the other day, mother and I sat at the table waiting for Ben to get back from the station, where he had been with his brother and sister. She said: "I don't believe we ever ought to let the children go away again, father. You and I need them as much as anybody."

"Need them!" I answered. "We've got to have them! I have been so lonesome all the forenoon I couldn't hardly stand it! Pretty soon Ben will be going back to round out his work at the agricultural college, and what will you and I do then?"

"I believe we had better fix it so that they can settle down right near us somehow. I believe they will be just as happy on the farm as anywhere in the world. They love the old place. It is big enough to give them all a piece and then we have enough left for us."

It took me several minutes to get the full meaning of this proposition through my mind. Mother always could see farther through a grindstone than I can. But when the things did fairly dawn on me, I just gave a whoop that brought Sweetheart and Chipper in to see what in the world had gone wrong.

"Mother, you've struck it! We'll do that very thing. If we need more land we can get it. Naturally the time may come when the children may want to fix up a home of their own. We must expect that. It was the way you and I did; it is the way of life. But we can buy a little more land if we want to, and build houses for them all near the old home. That will be great! We'll begin right away to work out that plan!"

"I guess the first thing would be to talk it over with the children and see what they think about it. We must remember that they are getting to be grown up folks themselves now, and probably have some plans of their own."

There it was again! I going off half-cocked; wife looking everything fairly in the face, and weighing all carefully in the balance of good judgment.

"Wish we had thought about this before they were gone."

"Time enough for that when they come home for Christmas."

Already looking ahead to the home returning, you see! I tell you these young folks don't realize what a hold they have on the hearts of father and mother. What do they know about the great hopes they have for the boys and girls? How little they understand what dreams come to them for the children they have so long carried on their hearts! Maybe it is just as well. Nobody wants the young ones to become old before their time. If you are ever going to see the bright side of things it is when the sun shines in the morning of life. If you can keep so bright that when the sun slips down back of the hills, it still seems like morning, it is a great thing. Most of us begin to feel kind of stiff and lame by that time though, and ready to crawl out of the harness. Thank God, wife and I have so far succeeded in brushing off the dust that has been sifting over us along the road, and so have kept our hearts cheery. I think that is one reason why the boys and girls all like the old home so well. I tell you, we as farmers are too much inclined to let our faces get long as a hammer handle when we grow old, and we do like to tell how much smarter and better folks were when we were young than they are now. Sometimes we think we have a call to preach, into the bargain, and if there is anything that live young folks cannot stand it is preaching, especially when it is aimed straight at them. A man may live just as pure and true and right as he will, and it will be all right with the boys and girls, but when he gets to looking solemn and laying down the sermons right at them, it does not work at all well. You can yell like sixty and say awfully good things twenty-four hours in the day, but it will not count half so far as the one-half minute of right living you do all in silence.

So we sat up to the table and ate a good square meal, in spite of the two empty chairs at the side next to mother. And now we are laying plans for the little Dobetter settlement we can already see in sight.

Still, right now, I am somewhat

SUBSCRIPTION PRICE 50 CENTS A YEAR
Foreign Subscriptions $1.00 a Year

CLUBS. Five subscriptions, on any offer we make may be taken at the cost of four. This applies to five of one offer or it may embrace several offers. To illustrate, five 50 cent offers for $2.00 (40c each) or five $1.00 for $4.00 (80c each).

Many club raisers fail to indicate their names separate from the club. We want to know who our workers are, therefore always write: "This club was sent by (name)."

☞ Always state if a renewal or new subscription. **Don't Neglect This.**

Your Address should always be written very plainly, including **county.** Do not give street or box number when not necessary to facilitate delivery of your mail. If on a rural mail route use the letters R. R. before the number.

Renewals and Change of Address. Give the same name as before. If a change from one member of the family, so state. If you change your postoffice, give old office as well as new.

If a mark like this appears on the first page it is to notify you that your subscription or renewal has been received. The publisher thanks you and he hopes you will be delighted with Up-to-Date Farming and take it many years.

Advertising Rates will be quoted on application.

Only Reliable Advertisers are admitted to our columns. We guarantee that they will deal honestly with subscribers. However, should any advertiser in Up-to-Date Farming fail to keep his promise as advertised and not give a subscriber an honest deal, we will make good the amount of the loss, provided you were induced to deal with the party through his announcement in this paper only, and providing such transactions occur within a month of the publication of the paper, and that it is reported to us within a month of its occurence. It is understood that this offer is not binding on the publisher unless you mention Up-to-Date Farming when you write.

The Farmer's Union Label must be made the strongest link in the chain of organized farming, as it has long been the strongest link in the chain or organized labor. By the use of the Label an article is recognized as a product of organized labor, and those who use such articles know they are patronizing and sustaining organized effort for improved conditions. Look for the LABEL.

ALLIED PRINTING TRADES UNION LABEL COUNCIL INDIANAPOLIS 18

The solution of the Farmers Labor Problems that will come through Profitable Prices means a demand for millions of union laborers

Minimum Prices

Below are the prices recommended by the American Society of Equity. They are the minimum prices, *below which* farmers should not sell, but any person may sell at higher prices. They are all based on some central market, and the farm price will be enough less to equal freight and a legitimate profit to the handlers. Farmers should control their marketing so as to keep the market hungry and the demand seeking the supply, when they can make their own prices—control marketing so your crops go off of the farms over the period of a year instead of in a few months. *If those who can hold will hold all, and those who cannot hold all will hold part, then those who cannot hold may market and all will get the price.* This is the key to controlled marketing. The world must have your products at *your* price if it cannot get them at prices made by some other people.

Wheat, No. 2 red, Chicago, 1905 crop per bushel	**$ 1.00**
Corn, No. 2 Chicago, 1904 crop April 1 to next crop	**.60**

Booklet E 37

Wonderful to educate the people; 64 pages and cover. We have 15,000 to give away. All we ask you is 6 cents a dozen to pay postage. Order a lot and distribute them. This is one way for you to do your duty.

The Annual Meeting, Oct. 23-25. Come.

Farmers' institute season. Will it be conducted so as to teach you how to solve your problems?

Low prices result in impoverishment of our land and smaller crops.

Good prices result in improvement of our land and larger crops.

To keep up with increase of population and increasing ability to consume, demands increased production.

The aggregate crops grown this year in America is far in excess of the aggregate of any former year, yet the total production of staple crops throughout the world is less than last year. America's opportunity. Will she embrace it?

Good prices for all crops will prevent an overproduction of one crop, because the inducement is not present to discontinue one and throw too much effort into another.

The American Peril. You can remove it and turn it to your account by maintaining uniform and good prices.

The German nation is going to shut all American farm products out except on one condition. The condition is that you must maintain uniform prices and good prices always.

Farmers of America, the United States and Canada, can pocket all the money that now goes into the treasuries of foreign counties as tax against their products and at the same time secure freer and larger markets. Are these things worth organizing for?

Fifty-cent corn and $1.00 wheat look about right to us for 1905 crops.

Farmers should not lose sight of the fact that corn marketed in the fall contains considerable weight that later disappears. Hence 5 cents a bushel less in the fall, or 7c. or 8c. less right out of the field, and no extra handling, might be advisable.

Foreign countries will take enormous quantities of our corn if the trade is encouraged by equitable and uniform prices.

In some parts of Iowa and other Western States corn is selling for less than 30 cents a bushel, so we are informed. How long will it be until it is down to the mortgage breeding basis? If it was not for the sustaining element supplied by the co-operating farmers we believe, in view of the large crops that have been produced, that prices would now be as low as this country ever knew.

Things We Want to Keep Before the People

The new press to proclaim profitable prices.

Clearing houses to direct the marketing of farm products.

One crop report a year by the Department of Agriculture.

Farmers' stock yards or farms for receiving and distributing live stock.

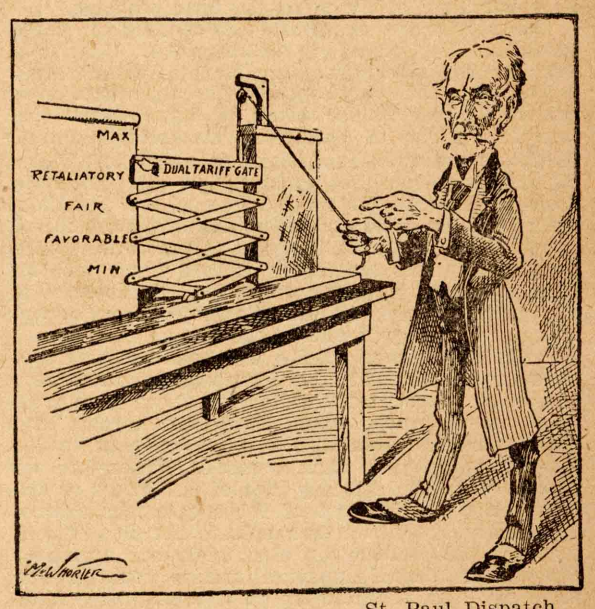
The extension of telephone lines and consolidation of independent systems.

The farmers' warehousing plan.

Cheap money for farmers with crop security.

Solution of the railroad problems in the interest of agriculture as well as all other interests.

Our foreign markets. How to retain them, enlarge them and secure new ones.



—St. Paul Dispatch.

This is the kind of tariff gate the foreign countries need to conform to the fluctuations of our price.

Many farmers hesitate to pay anything, even a dollar a year, to market their goods profitably, but are paying hundreds of dollars a year for the privilege of letting other people market for them.

Suppose we will estimate the expense to each individual stockman to build and maintain a system of marketing at $5.00. Now suppose he realizes 4 cents per pound for fat cattle without the machine of marketing and could get 6 cents with it. Will 2 cents per pound justify an investment of $5.00 a year?

Every person coming to the annual meeting must get from the ticket agent, a certificate showing payment of one first class fare. This certificate will secure return fare at one-third rate.

Farmers' Institutes

Have you acted on our advice to have controlled marketing and price making included in your farmers' institute program? We will just mention also the subject "Our Foreign Markets—How to Retain and Enlarge Them." We will be pleased to send the A. S. of E. plan with argument, in circular form, free to all applicants. This matter read before any farmers' institute will start a new wave of thought and do much good.

Two Sides to It

There are usually two sides to each question. There are two sides to the question of patronizing home industries. If the home merchants always give preference to taking the products of home farmers, gardeners and fruit growers, then, providing they sell their goods at equitable prices, the people should patronize them.

There have, however, been many cases where the merchants appear to think, and do act, as though there is only one side to this matter. They have been known to refuse to buy home products, yet have had shipped in the same kind of produce for which they paid as much or more. This is not fair and producers of fruit, vegetables, meat, etc., will surely resent such treatment and retaliate by buying elsewhere.

Then again, too often there is too much difference in the price of goods. Many illustrations might be made where the home merchants charges from 50 to 100 per cent. more for staple articles than they can be obtained for in cities or of the mail order houses. The people will find this out, result the orders quietly go to the city store.

We think the burden of this matter rests on the merchants. Let them find or make a market for the country produce, establish a reputation for good goods and fair prices and our word for it, the country people will patronize him even at slightly higher prices than the same goods would cost from the city.

THE AMERICAN PERIL

Low Prices for American Products Feared by European Countries

(This article began in September 1 number and continued in September 15 under the heading "Our Foreign Markets.")

By J. A. Everitt.

Number 3.

THE civilized world fears the Yellow Peril from Asia and the Black Peril from Africa and America, but neither of them compare to the American Peril of low prices for farm products.

The people are accustomed to looking on large crops and low prices as blessings, but Up-to-Date Farming has shown in many incontrovertible arguments that the very opposite is the case. Low prices, the inevitable result of large crops (before the power of controlled marketing was effective) were withering, blighting curses to all people and industries they touched, low prices of farm crops bred mortgages for the farmers and put them out of the list as heavy consumers of manufactured goods. Thus industrial America has more than once been thrown into the throes of hard times with all their attendent losses and miseries. However, it is not our intention to discuss this subject from a local standpoint, but as it affects our foreign markets.

In the two former articles we showed clearly that Germany, France and other European countries were compelled to erect tariff walls against our farm products that otherwise would have been thrown into those countries oftentimes at prices ruinous to the farming industry in such countries. Therefore we may as well eliminate any idea of unfairness or discrimination on the part of those countries against America and attribute their acts to the plea of self-defense. We believe we also made our argument unassailable, that if American farmers would put the price of farm products up to a point where they could go into the various countries and not jeopardize the business of the farmers in those countries that the tariff taxes would be removed and the American farmers could pocket the difference which now goes into the treasuries of those countries.

We know this is a bold claim and a new idea in international trade. But we are not without believers in the new and strange doctrine. Witness the endorsement by the Farmers' National Congress recently in session at Richmond, Va., and as published in October 1 number of Up-to-Date Farming. Also we quote from a letter from one of the soundest writers on economic subjects in the country as follows:

"I have given your article on 'Our Foreign Markets' a critical study. I believe your theory of how to retain and enlarge our foreign markets and open up new ones is correct, and that the arguments sustaining it are incontrovertible. I am satisfied this is another idea of yours which will be accepted by the nations, and will form a new basis for shaping industrial policies.

"Marketing controlled by farmers and equitable home prices as means of holding and increasing foreign trade are ideas distinctively new in national trade policies. They are yours, and they are enough to immortalize your name."

We are not seeking for glory. We want the truth to be known, and it must be greatly deplored in future years if farmers do not start right when their foreign markets are threatened as they are now. They are less now than they should be, but just as sure as the farmers do not act on the advice given by Up-to-Date Farming they will soon be much less. This is not a matter for Congress, and if farmers depend on Congress it will be like following after false gods. We should think farmers have had enough of depending on others and Providence, and would be ready to depend on themselves. We will again say, God and Congress will help those who help themselves. Therefore, put yourself in a position to enjoy the blessings sent by God, and to make yourself heard and felt by Congress. This means organization, concert of action, controlled marketing, which, expressed in two words, mean—equitable prices.

Following are some newspaper items, with comments on same. They will help to show the conditions in Germany and this country:

"Through the German consul in Chicago inquiries are being made to supply the home government in all haste with information on the price of cattle, hogs, sheep on the hoof and in the carcass. Evidently there is a desire to find out how much Germany is standing in her own light by refusing to admit on fair terms the cheap and wholesome meat food products of this country."

Is it not more likely she wants to know how low prices are now just before revising her tariff so she will be sure to make the tax high enough? Our abominable system of price making cuts like a two-edge sword. Germany must base her tariff on our lowest price to always protect her products, hence when our prices go up the German price, with the inflexible tariff added, makes the price so high as to curtail consumption in that country, hence curtails our exports. It might be a great advantage to the American stockmen if prices of meat were very high now which would operate in favor of a low tariff for years to come.

The New York Journal of Commerce thus remarks:

"There will doubtless be much congratulation on the increase of our foreign trade, especially in the value of exports, but it has not yet reached proportions to be proud of in comparison with that of other commercial nations. It is still far below that of Great Britain and not equal to that of Germany, in spite of our vastly greater area and natural resources and much larger population. * * * We must promote instead of obstruct the exchange of surplus products. Our highest record of foreign trade is still a low one for a country of such natural capacity."

And the way to promote the exchange of surplus products is to put them on a basis so they will not disturb the internal affairs of the country we seek to trade with.

From the London Spectator:

"Protection in Germany is producing its natural results upon the food of the people. The import of cattle for the butchers is highly taxed to gratify the agrarians, and the consequence has been a general rise in the price of meat by nearly 50 per cent., the average consumption of a family costing £19 10s. a year, instead of £13 10s. Even the lower classes of officials are effected and are petitioning the government. The agrarians, of course, adhere to their theory that such taxes are necessary if cattle-breeding is to continue; but the great cities are growing indignant, and the Socialists exult in new recruits. The Emperor has not yet pronounced his will; but it is believed that, although he needs the agrarian vote, he will in the end decide to remodel treaties in accordance with the desire of the masses of the population. He can hardly ask for new taxes on beer and tobacco, which are necessary for the rapid increase of the fleet, if meat, and even the better sorts of bread, are to be made so dear."

This brief item suports both sides of our argument. First, the tax is imposed against our cheap products to protect the farmers of Germany and insure them good prices for their crops. Second, the safety valve of the "Masses of the population" will prevent Germany from maintaining a high tariff against imports of food products, providing the exporting countries will maintain prices fair to the German farmers. Our readers must admit that this is a very interesting subject.

From the Chicago Live Stock World:

"The newspapers of Frankfort, Germany, report that a meeting of butchers and butchers' journeymen was held at Berlin to consider the meat famine, at which a resolution was adopted asking for the abolition of the prohibition of importation of animals for slaughtering purposes, in order to do away with the great famine, on account of which thousands of butchers, journeymen and master butchers have lost the means of earning a living.

"On the same date six numerously attended popular meetings took place at Cologne, at which the present high prices of meat and the means for bringing about normal conditions were discussed. It was resolved to request the common council to take the initiative through the first mayor in order to abolish the prohibition of importation of animals for slaughtering purposes. In addition, the common council is requested to organize the meat supply of the city in the same manner as has recently been done with good results by the city administration of Vienna."

Above shows the popular demand for meat at fair prices. America never before had such an opportunity as presents now. What she should do is to put prices of meat on a fair basis, fair to producer, to home consumer and to foreign countries, and then make representations that the price will be maintained uniformly. With such a condition Germany would be compelled to abolish her tax against American meat or make it on a basis that will not be irksome to the great masses of consumers while protecting her home producers.

Here's another from the same paper:

"The meat famine in Berlin has reached proportions that give ground for serious concern. Official statistics show that the advance in the price of meat over last year reaches, in some cases, 32 per cent., and there has been a further rise since this report was made up. Thus the live weight price for swine in Munich in June was nearly £7 per metric cwt., (220 pounds), as compared with £5 4s in June, 1904. Similar increases are reported from many parts of the country. Much discontent is expressed in the cities at the refusal of the government to give relief by partly opening the frontiers to imports of animals.

"Sooner or later public opinion in Germany will result in the utter rout of the agrarian element. A blow in the stomach is as effective as one in the pocketbook. Uncle Sam will regain access to the meat markets of the fatherland as certain as the sun rises. Germany has played a mistaken policy."

Germany may make the mistake to throw down the tariff wall and put the farmer element to "utter route," but we don't think so. If she does more than regulate her tariff to give equitable protection to her agricultural interests we miss our guess on the astuteness of her statesmen. What Germany can be expected to do is to make a fair compromise between the stomach of the consumers and the pocketbooks of the producers. Uncle Sam's part in this game is by no means as sure as the writer thinks, but if he plays fair now he may play for large stakes and win.

Again let us say to the stockmen of America: This matter all depends on you. If you cannot or

Convention Number

November 15, 1905

YOU FAIL to do your duty to yourself, your family, your brother farmers and to American agriculture if you neglect or refuse to order a bundle of 100 or less copies of the A. S. of E. convention number of Up-to-Date Farming.

This was announced in October 1 issue. It will be 100,000 extra copies, and will contain enough pages to print all the proceedings of the annual meeting.

It will give the new officers of the A. S. of E and the minimum prices on all the important crops grown this year.

It will be the best educator in controlled marketing and price making ever produced.

The edition of a quarter of a million properly distributed will go far to putting the price of every crop where it should be and keeping it there.

Because every person into whose hands this number can be placed will become a convert to the doctrine of Controlled Marketing and a co-operator to bring it about. One hundred copies distributed in your neighborhood will benefit your prices locally at once.

One thousand people ordering one hundred copies each will take the one hundred thousand extra copies.

We want each reader to consider this a personal appeal to him or her to order what can be judiciously placed. The cost will be a few cents, but don't you see you are losing many dollars each year by prices below the minimum.

Will you do it? You will.

We rely upon you.

Before any farmer can be a power to help at price making he must understand the doctrine of Controlled Marketing as taught ONLY by Up-to-Date Farming.

Here's what we want you to do. We want you to order a bundle of the convention number at the special rate here quoted.

Each copy of this number will cost over 1½ cent to produce and mail. The publisher would offer them entirely free if he could afford to do so, but he cannot.

A bundle of 10, 15 cents post paid.
A bundle of 25, 30 cents post paid.
A bundle of 50, 50 cents post paid.
A bundle of 100, 75 cents post paid.
Larger quantities at same rate.

EVERY READER of the paper wants its teachings to reach every farm home in the county; therefore order a bundle to convert your neighbors.

EVERY MEMBER of the A. S. of E. wants his hands held up by his neighbors; therefore order a bundle to convert them.

EVERY ORGANIZER wants to convert the people so he can organize them; therefore order a bundle. You never had such propaganda material before.

EVERY LOCAL UNION wants to increase its membership. There is no better way than to order a bundle of this issue.

This number will be a revelation to those farmers who possibly have not heard much about the American Society of Equity. It will truly be an eye-opener.

Cut out below and send.

will not make good prices and maintain them uniformly, then you must absolutely let Germany and other foreign countries impose taxes or prohibit imports from this country as they please, because you will be powerless and Congress will be powerless. On the other hand, if you will act now you can soon solve this problem through fair prices, and you will have every foreign country ready to admit your cattle, hogs and meat free or on favorable terms.

It is time ao act. Meetings should be held in every State in the country, so the people can be educated. Again we say, however, that the stockmen themselves must act. The meetings will never be held unless they move. The education will never be accomplished unless they call for the meetings.

Up-to-Date Farmnig is at their service.

The Department of Agriculture Fraud

The general government is watchful for people and companies who deal in questionable comodities and whose activities lead to the demoralization of business and losses to the public. It is well that the government should exercise a paternal care over its people and industries, and guard them from harm. But it is not well that one branch of the government should be engaged in exactly the thing that demoralizes trade and causes great losses to the greatest and most deserving class of citizens.

We refer to the Department of Agriculture advance crop reports. As a conjurer, juggler, diviner or wizard, this department certainly leads all the necromancers of the land. It does not attempt to deal in accomplishments, but its effort is directed to making predictions. Its predictions are the purest speculations and can serve no good or legitimate purpose. But on the contrary, as each recurrent monthly report is sent out, on account of the powerful speculating element in the country, many lines of business must readjust themselves to meet the new conditions set up by these visionary reports—merely guesses.

If these monthly reports have ever benefited the farmers we want to be shown when and how. That they have damaged the farmers financially there are instances so numerous and recent that any person can recall them and make mention unecessary. That they do benefit another class—the speculators—is equally patent. In fact. the speculators' success depends on crop guesses and without them their business would probably starve to death.

Therefore, as the government's monthly crop reports are a fraud to the farmers, a curse to the legitimate business interests of the country and a benefit only to interests that should be denounced as illegal, how can they be justified? Every newspaper in the country should agitate their discontinuance. Every farmer should put himself on record as demanding of his Congressman his support of a bill to discontinue them. Such a bill is likely to be pressed at the next session of Congress.

This is one of the subjects demanding the attention of the annual meeting of the A. S. of E. Come with your gun loaded for big game—bulls and bears—and let us fire broadsides at the enemies through Congress until every gambling parasite is driven off the backs of farmers.

What Texas Needs

The editor of Up-to-Date Farming made a brief trip to Texas the last week of September.

We were impressed with several things. First, with the immensity of the state. While we can cross any of our northern states in one-half or one day, think of traveling two days and a night straight ahead and all the time in Texas. Also we were impressed with the wonderful natural resources of the state, as yet but slightly developed. Truly Texas can feed the nation if cultivated intensively.

Among the leading industries are cattle raising, cotton, truck and fruit. There are other farm crops produced in large quantities but they are mainly needed for local consumption, in fact, the state does not produce enough of grain crops for its own needs.

Notwithstanding, it has the soil and climate to raise nearly every crop that can be grown anywhere in the United States. We found that great quantities of wheat, corn, potatoes, fruit, etc., are shipped from the north and California. This is because the natives are careless, or we may say, indolent and improvident. They have grown cotton and cattle until they don't know anything else and lack ambition to learn.

As this article must be brief, we will not attempt to consider the needs of the stockmen. The cotton growers problem of marketing and price making is being worked out and we predict the time of cheap cotton,—unprofitably low to the producer— is past. We will, however, confine the article to the needs of the truckers and fruit growers, whose industries are now suffering at the distributing or selling end.

The southern and eastern part of Texas lies in a latitude that will produce the earliest fruit and vegetables in the United States, except a small part of Florida and southern California. The quantity that can be produced in Florida is comparatively small, while California is so distant from the large eastern markets that it would not be a close competitor if all other things were equal

Therefore, Texas can produce vegetables and fruit when all the northern states are bound up in ice and snow and should have almost unlimited markets at very profitable prices. But, while the truckers and fruit men have produced in abundance they have not been fortunate in marketing. With an effective, definite system of marketing, this portion of Texas would become a veritable land of abundance and its people would prosper equal to those in any part of the country.

The Texas truckers and fruitmen in their helpless condition—growing the stuff and dumping it on the markets without regard to supply and demand—should not expect anything short of disappointment and losses. To illustrate. One producer sends a consignment of stuff to Pittsburg and gets splendid prices. This is a signal for many to ship to that market and the result is a glut. Also they are the victims of designing commission men, who want cheap stuff. They will wire many shippers that prices are good in Kansas City or St. Louis and so many will rush their produce to those markets as to break the prices. All will sell at a loss but it produces the dealers opportunity to stock up at low prices.

We know of a commission man in Indianapolis who has become very wealthy by sharp practices. He operates largely in potatoes. His plan is to wait for a time when the market is low in supply and prices high. He then wires shipping points: "Potatoes scare, prices high, I advise shipping at once." This telegram would be sent to many people and the result is a great flood of potatoes. Of course the price breaks and this party quietly buys them up at his own figures, store them (controls them), puts prices up and gradually feeds the demand. By the time these are worked off, prices have gone up again and he sends out another bunch of telegrams and repeat the operation. This same scheme is worked in other markets and on other produce besides potatoes. Commission men are usually organized so there is no trouble to practice sharp tricks, which, if not legally wrong are morally reprehensible.

But to return to the Texas producers. We heard of many cases where consignments of fruit and truck brought little or nothing to the shippers and in some cases brought nothing but a bill for freight. Part of the trouble may be chargeable to the shippers on account of poor condition or poor packing; part to delays in delivering by transportation companies, but the chief blame must rest with the manipulators in the markets. How else can you account for a case like this?

Mr. B. notifies Mr. C. at Cincinnati that he has shipped him a car load of cabbage and makes the request that he shall dispose of it to best advantage and make prompt returns. In course of time, a period having elapsed sufficient for the car to get to Cincinnati and be disposed of, Mr. C. reports: "Car in bad condition, had to sacrifice it. Sold it for just enough to pay for freight and commission." But in this case the car was delayed and on receipt of the alleged returns for the car, it was still on shippers track in Texas. Numerous instances were cited where it was evident some houses were committing wholesale robbery against the shippers.

But what better can be expected. Human nature will assert itself and while "honesty" may "be the best policy" yet the people who handle the unorganized farmers' products, agree that "honesty is not the most profitable policy."

The season 1905, was not a profitable one for the Texas truckers and they are not in the dark as to the reason. They know they produced plenty of crops. They know they have all the northern cities for markets and they know the consumers in those cities pay fancy prices for the early stuff. Therefore, they know that with a fair deal they could realize a good price. This fair deal is what they are now after.

They know that they cannot expect different conditions to prevail as long as they are passive and they now realize that it is only through co-operation—concert of action—that they can win. They have the fruit and vegetables that the north will have regardless of price; therefore, they realize if they can put a fair price on it, and stand solid for it, they wil get it. In short, they are ready for organization.

The Texas producers organized on the plan of the A. S. of E. can get good prices f. o. b. their station, and throw the burden of marketing and the risk of transportation on the other parties. Or, they can have their representatives in the chief markets and through a central clearing house, they can secure the maximum in markets for their products, direct the marketing and get good prices for immensely more than they are able to produce up to this time.

The American Society of Equity will provide the system and machine for marketing as rapidly as possible. All it asks is the hearty co-operation of the interested people themselves. We expect to have organizers at work in the fruit and trucking sections soon and we believe the next crops will bring fair prices to the producers.

Consider the Farmer

From the Record-Herald, Chicago, we take the following:

Consider the farmer, says the railway magnate, and the Wall street operator, and the ever admiring politician who rolls his eyes in ecstasy. Riches are the farmer's portion, they all declare, and they kindly give him a hunch, lest he should overlook the fact in the absorption of the early morning milking.

But theirs are not the only stories of the farmer's prosperity. There are others of a more intimate kind that strike the imagination quite as forcibly as statistical visions in which the tiller of the land is represented as having 2,700,000,000 bushels of corn and some odd millions of wheat concealed about his person. Visitors from the city who have gone out from two-by-four coops with all the arrogance of municipal life upon them return to tell of the wonders of farmers' homes. Telephones, electric lights, "all the modern improvements" loom up as they do in the model creations of a new subdivision. The route back to the soil is by way of spacious mansions thus equipped. And if all farmers are not supplied with luxuries to the full degree there have certainly been changes enough of late years to excite comment. Conveniences have multiplied amazingly, there is much less of isolation than there used to be. A journey to town by a trolley car is no greater effort than a journey in town by the same means of transportation, and a great part of the country is like an expanded city.

Out motto, "Farmers to the Front," is literally coming true. That farmers are making more progress now in education, enlightenment and wealth than even before cannot be doubted. But the farmers have not come to the front to an extent that they should or can, and as long as they are not thoroughly educated to the principles of systematic marketing of their crops there will always be the danger of losing what they have gained.

As long as the farmers refuse to organize completely to market their crops they are in the position of the frog trying to climb out of the well, which was one of the problems we had to deal with in the early arithmetics, as follows: A frog is in a well 35 feet deep, and is trying to climb out. He climbs up two feet each day and slips back 20 inches the next day. "This is about the way the problem ran with some variation. "Now how long will it take the frog to climb out of the well?"

This is the farmer's condition. He will raise a good crop of corn or wheat one year and sell it for a good sum, but the next year he raises much larger crops and sells them for less money, slipping back in the heavy crop years. In what other industry do the producers take less for a large output than for a moderate one? Others control the price even though they must control the production, and this what the farmers must do if necessary.

The railway magnate who gets as much for hauling a cheap bushel as for a dear one; the Wall street operator who sees his stocks go up when there is a great abundance of farm products almost regardless of their value, and the politician who throws a glamour before the farmer's eyes by holding up the immensity of his products and concealing that more important factor, the price, may hunch the farmer and tell him he is a good fellow and the lord of creation, but he has not come entirely to the front where he belongs.

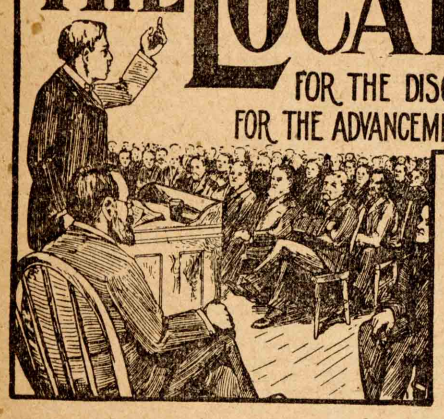
When we can see a comfortable house with all the conveniences that the tastes of the family crave on every farm; a large substantial barn sufficient to house all the farmer's stock and implements as well as store all his grain until the demand seeks it; the farm well fenced, well cultivated, well fertilized and free from obnoxious weeds; the children going to school and colleges as generally as the children in cities; the house furnished with pianos, and furniture, carpets and rugs to compare with city homes of merchants, bankers and manufacturers; the farmer and his help laboring shorter hours and resting from the heat of the mid-day sun; then will farmers have come to the front

If these things mean that prices of farm products must be put still higher or much of the cost between producer or consumer cut out, then these are the things to do. We do claim that, considering his position at the very base of all our national greatness, industrial and otherwise, the farmer is entitled to the first consideration. In view of the number of farmers and the importance of their products, they cannot be prevented from taking their rightful position if they determine to take it, which must be first through organization and second, through co-operation.

This is a prolific season for strikes among organized laborers for shorter hours and higher wages. But such strikes would pall before a strike by farmers for fair prices, backed up by withholding marketing of food and clothing supplies. Could there be any question about such a strike winning?

Keep all copies of Up-to-Date Farming.
File them in regular order.
A year's volume of this paper will be a valuable addition to any library.
Remember it teaches farming as no other paper does. In after years when farmers have solved all their serious problems, copies of Up-to-Date Farming will have an added interest and value.

THE LOCAL UNION



FOR THE DISCUSSION OF ALL FARM PROBLEMS
FOR THE ADVANCEMENT OF CO-OPERATIVE FARMING

THE AMERICAN SOCIETY OF EQUITY

Is an international organization, incorporated, with headquarters at Indianapolis, Indiana, and whose first and principal object is: "TO OBTAIN PROFITABLE PRICES FOR ALL PRODUCTS OF THE FARM, GARDEN AND ORCHARD." It also has other objects of great importance to agricultural interests, which will be worked out as the organized farmers desire to take them up. The supreme body is

The National Union

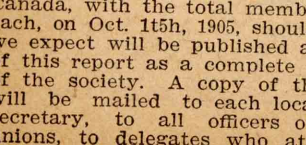
Composed of the officers, directors and accredited representatives from subordinate bodies. The unit of organization is

The Local Union

This is the home workshop of the American Society of Equity. In it, must be forged and sharpened the interests that shall revolutionize agriculture, and usher in the time when the soil tiller shall no longer be a "hewer of wood and a drawer of water" for other classes, but when he shall stand erect, an important and independent member of society.

The Union Label

Is intended to designate the products of Union or Co-operative farmers. It should be used wherever possible on farm produce, crates, on letters, advertising matter, etc.



It will be supplied to members of the A. S. of E. and members of other farmers' organizations that have for their chief object Profitable Prices for Farm Products. The price is $1.00 per thousand, 500 for 50 cents. They are supplied on gummed paper and on tags.

The Fee

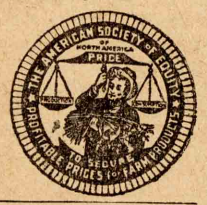
Is $1.00 for members at large and $1.00 a year. Charter members of local uni ns pay no membership fee but a charter fee of $12.00 is charged, no difference how large is the union. Members of local unions pay 30 cents quarterly. Members at large are individual members, outside of local unions. Each member receives a certificate, a badge, all bulletins and other public documents issued from headquarters, and Up-to-Date Farming, the official paper, paid for by the National Union.

Supplies, including books, blanks, etc., are furnished FREE to all new local unions and all old ones that ratify the new constitution.

Complete instructions will be sent free on request, how to organize local and county unions and all information about fees, dues, etc.

The Emblem

of the American Society of Equity as here shown, is symbolical of PRICE, being on an equality with PRODUCTION AND CONSUMPTION.



THE ANNUAL MEETING

Local and County Unions, Officers and Elections

Office of the National Union of the American Society of Equity, Indianapolis, Ind. Sept. 1, 1905.

To the officers and members of all Local and County Unions, of the American Society of Equity and members at large, Greeting:—

The date of the Annual Meeting of the National Union of this Society has been fixed to begin October 23, 1905, and the meeting will continue as long as necessary to transact all business properly coming before it.

Reduced railroad rates will be granted from all parts of the country and special and ample accommodations will be made for members, delegates and others while in the city.

The report of the Annual Meeting of the National Union, A. S. of E., will be published in pamphlet form. The name and number, also name and address of secretary of each local and county union of the American Society of Equity in the United States and Canada, with the total membership in each, on Oct. 15h, 1905, should be and we expect will be published as a part of this report as a complete directory of the society. A copy of the report will be mailed to each local union secretary, to all officers of county unions, to delegates who attend the Annual Meeting and may be procured by members at large and others desiring them at 10 cents each copy. Every local union and every county union must report on or before Oct. 10th, so that all may be in by Oct. 15. FILL REPORT BLANK BELOW.

If your union has not and will not hold a meeting, will not you, as an active member, answer the first four and last two questions, on report and write us a letter telling us what is needed and send at once.

Do all these things. Come to the Annual Meeting and help to make it as great as the industry it represents and one that will attract the world's attention by its numerical attendance and the results accomplished.

The National Union of the A. S. of E.
J. A. EVERITT, Pres.
M. WES. TUBBS, Sec'y.

Do not neglect your reports and remittances for quarterly dues for the quarter beginning October 1. If any have delayed until this time attend to it at once.

Instructions to delegates and explicit information regarding tickets and the necessity of getting CERTIFICATES of your local ticket agents, so as to entitle you to return passage at one-third regular fare is repeated in this issue. See page —.

If you, Mr. Secretary, have not sent in the special report called for on page 6, October 1 issue, or page 8, September 15 issue, do so at once. It is your duty. You owe it to your Local Union, whether it is active or not, and you owe it to the National Union. We want a report from every Local Union that has been organized.

The Local and County Union Directory has been mentioned. It will be considered at the annual meeting and published if deemed advisable. It will contain the name and number of every union sending in report as called for, also the name and address of its secretary. Each union will be supplied with one of these directories, so correspondence can be carried on between unions direct if desired.

The following special crops are now receiving extra attention at headquarters, not because they are the most important, but because they are all products of limited area and can quickly be put in shape to command profitable prices. These are beans, broom corn, especially the Oklahoma growers, rice, peanuts, potatoes and apples. The two latter crops are unquestionably below the average this year. If members and Local Unions in sections producing any of the above crops will co-operate with us by keeping us posted as to condition of crop and prices, and also in pushing forward the work of organization actively in their respective localities, we can, by another season, show marked results and assist wonderfully on this year's crops.

Members are not giving the attention they should to sending in their crop reports. THESE REPORTS ARE IMPORTANT, and every member should either send them in direct or fill them out and hand them to the Local Union Secretary, who should send them collectively for the union. If you have not sent in your crop report do it to-day.

Much is being said lately regarding the necessity for more funds. The statement under "That New Press" shows the condition. The American Society of Equity has not been a good collector. It has been "carried" very largely by a few zealous workers and financial deficiencies have been made up by Mr. Everitt personally. No one is complaining but "it is necessary now that each one do his or her part. The experimental stage has been passed. It is proven that controlled marketing will compel profitable prices. Organization, knowledge of conditions and means of disseminating such knowledge is necessary to make controlled marketing successful. Education must precede organization, and education requires teachers (organizers), literature (plenty of it), and practical lessons (show me) of benefits received. Reports of the latter

OCT. 1st. QUARTERLY DUES

This is just a reminder that the Oct. 1st. quarterly dues are now due. From these quarterly dues the steam to keep up our society and your official paper running must come. You will now appreciate the importance of the quarterly dues being paid—promptly.

are received by us daily, but do you see that the same reports are published in your local papers? It will pay. If report blanks or any other supplies are needed by any Local Union write for them. It is necessary to have working material if the best results are to be attained. The same applies to officers of County Unions.

The Sole Object (?)

Member S. W. Gahagan sends us a clipping taken from The Southern Mercury, written by Mr. Sanders, and asks us to reply to it. It contains the following:

In my opinion, the sole object of the A. S. of E. is to overthrow the F. E. and C. U. of A. I believe that we are too loose in work. No resolutions of any local, district, county or state Union should be published to the world. Look for all kinds of schemes to undermine the Farmers' Union. Let us keep mum, be wary of outside propositions, shun all the confidence traps, let the Cotton Growing Association, Fruit Growing Association, Labor Unions, Knights of Labor, American Society of equity, etc., severly alone, and strictly attend to our own business.

B. A. SANDERS,
Viola Union, I. T.

It appears almost unnecessary to reiterate what we have published before, viz.: that the A. S. of E. has no fight against any person, class, legitimate industry or organization; that it has the kindliest feeling for all farmers' organiaztions and particularly those that are helping to teach controlled marketing to secure profitable prices.

How any person can conclude that "the sole object of the A. S. of E. is to overthrow" any other organiaztion we are not able to conceive, nor why any paper should print such a statement. True, some of our own workers may point out the weaknesses of other societies if they have any and make comparisons favorable to the A. S. of E., and this is legitimate. But that the A. S. of E. has no object other than to tear down, is ridiculous.

The A. S. of E. is purely an organization to BUILD UP agriculture to a level, in system and results, with the best business in the country. It was the pioneer in such effort and has done more in that direction than all other farmers' organizations that now exist, good other present farmers' organizastated by other people that, all the good other present farmere' organizations possess in their objects and plans have been copied from the A. S. of E. But we will let our readers judge.

ePrhaps the trouble with the F. E. and C. U. of A. is inherent in their own organization. Perhaps they would do well to look nearer home for their troubles instead of looking beyond.

We are constantly receiving letters with expressions like the following:

I have been ordered by our County Union of the F. E. & C. U. of A. to send you a list of secretaries of our unions so you may forward to their addresses such literature as you think will be beneficial in educating them so we can transfer from the "Farmers' Union" to the A. S. of E.

———— ————,
Secretary of County Union.

Enclosed find $3.00 for which send to addresses given herewith 12 copies of the Third Power to spread the greatest movement of the age. * * * I will also thank you for any literature on your society as we wish to transfer in a body from the "Farmers' Union" to the American Society of Equity.

———— ————,
Chairman of Executive Committee.

We have —— unions of the F. E. and C. U. of A. who are very much dissatisfied with the conduct of the parent Society, and we propose, in fact many of them have voted, to disband and join the A. S. of E. of which many of us are now members.

———— ————,
President.

We might multiply these almost indefinitely, but let these suffice to show the sentiment among the rank and file of the complaining society. They will serve to show that the freedom, openness, freedom from jealousy and determination to have no fight with any people, as characterizes the A. S. of E., is winning friends. And why should the farmers have secrets from any other class? They are so numerous, and when organized will be so powerful, and they first own what others must have to support life, to be clothed with and for the various industries that they can do everything in the broad light of day and truth. What would it benefit the farmers to go be-

hind closed doors, be bound by oaths and have their life ruled by a ritual? As soon as they would retire into secercy they would be accused of scheming and plotting and would lose the confidence of other classes.

Only those need to resort to secrecy who want to get undue advantages over others, and this is no part of equity.

Conventions and Meetings

ANNUAL MEETING OF THE A. S. OF E. and convention of all farm interests, Indianapolis, Ind., beginning October 23d, 1905. Each local union is entitled to one representative, and each county union to one representative for the county at large, and an additional representative for each two hundred members in the county.

NATIONAL TOBACCO GROWERS' ASSOCIATION BRANCH OF THE A. S. OF E. Annual convention at Owensboro, Ky., October 18, 19 and 20, 1905. Representation: One delegate for each local union, but a maximum of three for a county. Address C. Hayes Taylor, Secretary, Indianapolis, Ind.

MASSIC COUNTY (Ill.) Farmers' Institute which will be held at the opera house in Metropolis, Ill., Oct. 27th, has recognized the importance of the principles of Controlled marketing by placing on the program:

"Profitable Prices for All Farm Products, How to Secure Them—by C. O. Drayton, State Organizer of Illinois, A. S. of E."

Mr. Drayton handles this subject in a masterful manner and every farmer should make it a point to hear him.

NOTE: Members of the A. S. of E. in other counties should insist that the "Price Making" end of farming should receive attention at all Farmers' Institutes. If reported to us we will note such cases in our columns.

CLINTON COUNTY (Ill.) Union will meet in the court house in Carlyle, Ill., on Saturday, Nov. 11th at 9:30 a. m. Every local union in the county is requested to send as many delegates as possible. Be sure to send one. We wish to make this a mass meeting of delegates, members, farmers and business men. Come and bring as many with you as possible. We will elect officers for 1906. ERNEST KROST, President.
ALBERT WRINGE, Secretary.

DUBOIS COUNTY, (Ind.) Union will hold its next regular meeting at Huntingburg, Saturday, Oct. 28th at 10 a. m. This county now has eleven local unions and a membership of nearly 250. A full attendance is expected as full report will be made at this meeting of the delegates who attend the Annual Meeting at Indianapolis.
JOHN G. KOCH, Co. Sec.,
Huntingburg, Ind.

ST. CLAIR COUNTY (Ill.)—Every Local Union in St. Clair county, Ill., is requested to send delegates to Lebanon, Ill., on Saturday, November 4th, at 9:30 a.m. to form a County Union for St. Clair county. Each Union is also asked to collect ten cents from each member for the county treasury to pay expenses. Bring all the farmers and business men who are not members, you can, to hear the plan and principles of the A. S. of E. explained. Tell then they will be welcome. C. O. Drayton, Greenville, Ill.,

WASHTENAW COUNTY (Mich.) Bean Growers' Association and County Union of the A. S. of E. met at Ann Arbor, Mich., September 30th, and had a very enthusiastic meeting. The following officers were elected for the ensuing year: Geo. Merritt, Hamburg, President; John McDougal, Ypsilanti, Vice President; S. G. Palmer, Gregory, Treasurer; K. H. Wheeler, Dexter, Secretary. Also a Board of Directors consisting of one man in each township. The report we received of this meeting closed with the following pertinent paragraph: "Every person present went home with the determination to double our membership before the spring meeting, which will be held on the third Saturday in April, 1906." Prices on this year's bean crop will be announced after the Annual Meeting. K. H. Wheeler, Co. Sec., Dexter, Mich.

Letter From David Dobetter

(Continued from page 2)

lonely to-night. An old man's heart is a queer thing. The young folks never can really understand it till they, too, have boys and girls of their own. Then how quickly the line between boyhood and manhood slips out of sight! My only hope is that we may all, Sweetheart, Chipper and all, get through to that time with good clean hearts. That is what counts for the most of anything.

The farm swings along first rate these days. John and Ben have been digging in like beavers to get the work as well out of the way as they could before the time came to separate. The potato crop netted us a handsome sum this fall. We have sold the most of them as fast we dug them. We realized a fair price for our crop this fall, and then we save once handling and the shrinkage. We did put a couple of hundred bushels in the cellar for seed in case the market should call for them. Besides, we are saving a good supply for our own seeding. The tubers are of an unusually fine quality this fall. The weather and everything seemed to be just right. They rotted very little. There was one place which was rather low where the water settled somewhat, and there we found a few partly decayed potatoes. Later potatoes have some trouble with blight, but ours were out of the way when blight came.

Tom is plowing to-day where we had potatoes this season. Tom is a steady fellow. We like him more and more the longer we keep him. He is getting over his wild notions somewhat. He no longer favors strikes. I guess that Chicago teamsters' trouble rather opened his eyes. It did mine, at any rate. Tom and I had some real serious talks on that matter. He has good sense and that helps a man a lot. You can reason with a man that has good sense to begin with. It is the men who do not think for themselves that make most of the trouble in the labor world to-day. But Tom is coming out all right. He is honest, saves up his money and is getting to be a good all-round citizen. That is the kind we need in this country. Lots of room for them, but no place for those that never see only one side of everything, and that the side that helps them regardless of how much it hurts others.

Wife and all the rest are asleep. I must go, too. I have a lot of work I want to do to-morrow. For one thing, I intend to see our neighbor on the south and find out if it is a fact that he wants to sell his farm. I have heard that he did. Some way he has not done quite as well as he might, it seems to me. I think some of buying that farm if we can agree on terms. You can guess why.

Now, good-night. Yours sincerely,
DAVID DOBETTER.

The Man Without the Hoe

M. WES. TUBBS.

On warm and sunny days he stands,
Or leans, or lies, with empty hands;
And in his eyes, no light is seen, no flame
of thought,
Nor, no emotion of ambition wrought.
Idle, listless, lazy; a blot upon the scroll
Which God, to man in mercy, did unroll,
Which to him gave dominion over all
That walk, or creep, or fly, or crawl.

On cold and windy days he stands,
Or leans, or lies, with empty hands.
His heart, benumbed with mortal cold,
Is want to grumble 'cause his shiftless is
not gold.
Idle, listless, lazy, a murderer of time
Which, when well employed, makes life
sublime;
And gives to man a warmth, a glow, a
flush;
And ought to give to such an one a crimson
blush.

Through all the busy day he stands,
Or leans, or lies, with empty hands;
And calls unto the gods in sorrow's voice,
Nor, in his sadness, does he blame his
choice.
Idle, listless, lazy; a stain upon mankind;
He, yet by luck, his fortune still would
find,
Instead of delving 'neath the sod or rock,
Or, hewing fortune out of Nature's rough-
est block.

Dabbler in all the wisdom of the day he
stands,
Or leans, or lies, with empty, idle hands.
Because his knowledge is not deep, pro-
found,
He flounders for a time and then goes
down.
Idle, listless, lazy; a Bachelor of Art,
Who's too genteel to do an honest, noble
part;
Who spurns the thought of working on the
wall
Without the which, the building needs must
fall.

Oh, man! Oh, mortal soul! Why longer
stand,
Or lean, or lie, with idle, empty hand?
When north and south and east and west
Lay idle fields for you the very best.
Idle, listless, lazy; "The Man Without the
Hoe,"
By Fate, is detailed to the hadest row.
Kings, rulers, masters can not ease the
mental load
Which bows him down and makes him
tramp the road.

Up, man; arise! no longer stand,
Or lean, or lie, with empty, idle hand.
Wait not for job, employer, fortune, naught
But grasp the "hoe" and work. The
battle's fought.
Active, diligent, industrious, the conqueror
now;
And all the earth, in reverence, stop and
bow,
While this new being, now by measured
strokes,
Does conquer, overcome and fall the stout-
est oaks.

ALFALFA is now attracting much attention everywhere. Do not forget that Alfalfa needs heavy doses of POTASH to insure successful growth.

We have a book which is full of valuable information to all farmers who are experimenting with Alfalfa, and will gladly mail it free of all cost to any one who will be good enough to write for it.

Come With Us To The First

THE First Allotment of 200 Farms has been taken and another allotment is made. This is your opportunity.
All we have said for this First Model City and Community Site, has been confirmed by purchasers. Read Reports.

The 2nd Allotment of 200 Farms now on Sale

Subscribers to the second allotment have the advantage of just as choice land and the added assurance of success of the undertaking.

We offer 200 more farms at exactly the same price as before; but all the ground is worth more than the price.

READ THIS—I want to say to all the readers of Up-to-Date Farming that when the first allotment of 200 farms where sold by the Model City Land and Improvement Association I went to this place to examine the property. I am glad to report that there is not a richer or more favorably located tract of ground in Texas.

This is my honest opinion and it is supported by statements from entirely reliable people who have lived in Texas many years.

J. A. EVERITT, Pub.

SECOND ALLOTMENT OF 200 FARMS.

IF you did not get in on the first allotment, you should not be concerned, because there are 1200 farms just as good as the first 200.

What concerns you is to get in now before the price is raised. We positively expect this to be the last opportunity to buy the farms at $20.00 per acre. You should know without us telling you that this land, raw from the ranch, and which is cheap enough at $20.00 per acre, will be worth more when 400 families are settled on it. If it won't be worth $40.00 an acre we can't judge land. Land not as good as this, nor as well located, in settled neighborhoods in Texas is now selling for $50 to $75 an acre.

☞For your information we will say that we expect this allotment of 200 farms will be subscribed for in fifteen days or less from the appearance of this paper. The sale began October 1st and the orders are coming in at this writing Therefore, don't delay.

VERY PARTICULAR NOTICE.

There will be over 1600 farms in the Model Community. It is the intention of the Association to sell only 800 at this time. It is also a late conclusion by the Association to reserve every alternate farm and give the owner of the adjoining farm the use of it until it is put on the market at some future time. This will give each settler 50 acres instead of 25. The adjoining 25 can be used for pasture if not prepared for cultivation. Also by this arrangement the adjoining owner will be given the first opportunity to buy the abutting farm.

Exception. Let it, however, be understood that as this provision was not a condition of purchase in the first allotment it will not be enforced on the purchasers of the first two hundred farms, but they can elect to have it apply if they so wish.

Also. This provision is not intended to operate against any person purchasing two or more 25-acre farms adjoining. Some people will prefer to buy what they want at the present low price rather than wait and pay the higher price.

FIVE ACRE CITY FARMS.

THIS is a new feature of the Model City, and community-development.

As already announced, 3,000 acres will be set apart for the First Model City. In time we expect this will all be occupied by the business and residence portions of the city. But it will be several years before the city will occupy all this ground. Therefore, we have decided to plot a portion of this ground in five (5) acre farms and sell them at $50 per acre.

Considering that they adjoin the city and can in time be sold off in city lots these small farms will be splendid investments Besides they will afford ideal places for a family to do light gardening, poultry raising, etc., as well as the opportunity to build fine suburban homes with enough ground to make fine lawn, garden and orchard displays.

This feature was suggested by several of our city friends who want to go to the first Model City, but they did not want a 25-acre farm nor only a city business or residence lot. We expect the five-acre

No reservations will be made in the five-acre city farms, first subscribers will have first choice.

MODEL CITY RESIDENCE PARK.

THE First Model City and Community will be established on a beautiful elevated plateau that extends about ten miles back from the beautiful, enchanting Copano Bay—as fine a body of water as the country can boast—which may all be considered a large harbor The bay is about ten miles wide by about fifteen miles long. Also there is a smaller bay named Mission and Mission lake on the borders of this tract.

The city will be built on Copano Bay. The main street will be about the middle of the shore line, which is about six miles long. South of the main street along the bank a reasonable distance from the shore on ground about twenty-five feet above and overlooking the bay will be the Model City residence park. This will be laid off in one-fourth-acre residence lots with reservations for a shore line boulevard, streets, fountains, squares and parks. The lots will be sold for $500 each, and first subscribers will have first choice.

Try to imagine a beautiful. level scope of land, of say, 500 acres occupied by beautiful homes, interspersed by numerous small parks and divided by shell roads or drives that wind around the beautiful homes, bounded in front by a beautiful sheet of water stretching six to ten miles straight ahead or to the sides, with the distant shores faintly visible on clear days and the surface of the water bedecked by pleasure, commerce and fishing craft when our city is built. Back and to the north the Model City, constantly growing in population and wealth and reaching out its long arms (streets) to invest the park and hug the beautiful spot to its throbbing bosom as a thing it loves, as it will.

Pardon this picture of the future. It is not overcolored. The advantages the Model City offers will attract people of wealth, culture and taste for the artistic and beautiful. They will help to make this, what we will strive for,—the most beautiful city in the country.

The Model City residence park lots will be sold now at $500 each. Like other model city property, they will soon be worth several times the price. No reservations will be made. First subscribers will have first choice which naturally will be facing the bay and on the shell boulevard.

BUSINESS AND RESIDENCE LOTS.

THE business lots will be 25x150 feet and the residence lots 50x150 feet. With the first allotment of 200 farms 190 lots were sold. The subscribers have first choice of all lots and naturally for business lots they will be selected along the main street referred to already. It will be the same way with lots subscribed for while the second allotment of 200 farms are being subscribed for, i. e., they will have the next choice in order as they secure numbers beginning at one and up to as many as are called for. There will be no dearth of choice lots in the second allotment. We can

One Fourth of all the money received for the sale of farms and lots goes to the City and Community and will be expended for the good of the place, improving and beutifying

Model City and Community

safely count on 1,000 business lots being occupied by merchants, traders, artisans, hotels, banks, etc., in a short time.

In the future, sales of business and residence lots will be made subject to every third one being reserved and not subject to selection or sale at this time.

In view of the sales already effected and the fact that thousands of families can be put on this tract and in the city, all the lots now sold will be worth more than the cost as soon as they are occupied and will double and quadruple in price in a short time.

The records show that most of the people want to be interested in both farms and lots—the country and city.

MANUFACTURERS SECTION.

TO the north and lying on Copano and Mission bays will be the manufacturing section. The ground lies well for such purpose and besides it is the chief stretch of land on the entire tract not of high agricultural value. Correspondence solicited about manufacturing sites.

RECAPITULATION.

We offer, first, 25-acre farms at $20 per acre.
Second, 5-acre city farms at $50 per acre.
Third, ¼-acre residence park lots at $500 each.
Fourth, business and residence lots; the former 25 feet by 150 feet; the latter 50 feet by 150 feet.

One-fourth of all money received for sale of land and lots will be used to improve and beautify the city and country.

The Second allotment of 200 farms is now selling. When this number is subscribed for this series will be closed. All farms will be numbered from 1 up to 200. All 5-acre tracts, all ¼-acre lots and all city lots will be numbered from one up to as high as they reach till the 200 farms are taken. Number one will have first choice, number two second, etc.

This Will in all probability be the last allotment at the ps reneetiprcAMarand12cmfwypvbgqkjxzfifl at the present prices. People who did not get in on the first allotment have not lost anything, but those who fail to get in on this will probably have to pay higher in the third allotment.

We Expect the second allotment to be taken in fifteen days from the appearance of this paper.

General Information

For the Benefit of New Readers Who Have Not Read Our Former Advertisements Or Had Printed Matter

This will be called the First Model City and community because it will be the first opportunity the people have had to acquire property, do business and live in a city and community where equity in business and honest government will prevail.

We aim to make it a community of model people, of model homes, of model business, of model streets, of model government.

The tract of ground is not excelled for natural advantages and contour of surface by any equal size tract in the country. It is bounded by Copano bay on the east, by Mission bay, Mission lake and Mission river on the north, and Arkansas river on the south. The rivers are both dammed near their mouth, and have five to twelve feet of water the entire length of the land.

The rivers abound in fresh water fish, and the bays and lake in salt water fish, oysters and fowls.

This will be the hunters' and fishers' paradise, while for bathing, boating, delightful climate, beautiful sunrises and sunsets, health, pleasure and profit the opportunities, after a short time for development, can scarcely be equaled in the country.

As a winter resort California and Florida cannot compare, while the model city is a thousand miles nearer the northern and eastern cities, without the discomforts of the tiresome ride across the plains.

A very great variety of crops can be grown (send for circulars). The leading industry (agricultural industry) will be trucking and fruit growing. Through co-operative marketing residents of the model community are expected to reach the cream of the markets and secure the very best prices.

Manufacturing will be carried on in the city. For manufactures the model city will offer rare advantages. Being a seaport, it will get special rates on railroad for interior shipments, while we will be within reach of all large coast cities by vessels. Also manufactures who locate in the model city will enjoy special favors from the farmers of the country who are taking a great interest in this movement.

Lands and lots secured now will surely increase in value very rapidly. Business lots bought now at $100 will bring thousands of dollars in a few years, and farm land bought now at $20.00 an acre will be worth $100 as certainly as Iowa, Illinois and Indiana lands retain their present values. From the present viewpoint, and considering the natural advantages of this place, the attention it is receiving throughout the country, and particularly because of the superior conduct of the city and community over any other American city or community, we believe it offers better opportunities for safe and profitable investments than any other place in America. Money invested in these lands and lots is as safe as in a savings bank. But Savings banks pay only 3 per cent., while this will most likely pay 100 per cent. a year for years.

WOULD YOU LIKE TO VISIT THE MODEL CITY AND COMMUNITY LOCATION?

No doubt you would, and we would be delighted to have you go. Our resident agent, Chas. H. Lee, and Judge B. M. Sheldon and Mr. T. D. Woods, would take great pleasure in showing you everything. But it will not be possible for many to go, therefore read the letters of Mr. Winters as printed below. Mr. Winters is a minister of the gospel, and went as a delegate, sent by his friends, who want to locate in the M. C. and C. His report is just what yours would be if you went in person.

(We print from several of Mr. Winters' letters to show that he took all due precautions.)

Poteau, I. T., June 19, 1905.

Dear Sir:—Please send me prospectus of Model City and Community. I am much interested and have interested several others. If everything is favorable, I will make the place my home and want my friends to do the same.

REV. W. H. WINTERS.

Poteau, I. T., July 17, 1905.

Dear Sir:—There is to be a cheap excursion to Texas in a short time. I want to atke advantage of it and go to the Model City and Community to personally investigate this proposition. There has been so many fake schemes that people are suspicious of all new ventures.

REV. W. H. WINTERS.

Poteau, I. T., August 12, 1905.

Dear Sir:—I will not be able to go to the Model City in August on account of illness of my wife, but will go as soon as possible. I am sure if I go and bring back a favorable report that fifty to one hundred will go to the opening from here.

REV. W. H. WINTERS.

Poteau, I. T., August 31, 1905.

Dear Sir:—I will start to the Model City next Tuesday * * * I hope to live to see a prosperous Model City and Community established and my word for it, if I find things favorable when I go there those 1,800 farms will be taken in a short time. We want homes under conditions as promised in the Model City and Community. We mean business. REV. W. H WINTERS.

Poteau, I. T., August 20, 1905.

Dear Sir:—I will go to view the land about September 5th.

REV. W. H. WINTERS.

Rockport, Texas, Sept. 11, 1905.

Dear Sir:—I arrived here Wednesday night the 6th, and have led a strenuous life ever since. I and my people are from Missouri and Arkansas. The Missourians have to be "shown" and the Arkansans have to be "sighted." So I came to see.

I am well pleased with the land and the climate. I consider the soil first class. There is quite a diversity of soil on the tract, black, deep soil and sandy loam predominate, but there is black sandy soil. It all seems to be very productive. The climate is delightful. I find some mesquite trees (a) on the land which I did not know as I thought it was prairie land, also I learn that this section is subject to droughts (b) to a greater degree than I anticipated, but old settlers tell me that the rains come at seasons to raise one good crop of everything each year often two or more crops. I also find that it freezes here in winter, about once in ten or twelve years, the freeze being severe enough to injure and sometimes kill orange trees.

I want to suggest that you put down artesian wells. (c) In my opinion you cannot do anything that will bring half the returns as money put in artesian wells. I have had experience in Arizona in irrigation, and I would much rather pay $50 an acre for irrigated land than to pay $20 without and I believe my people will agree with me.

I came here to see the dark side and I must report the truth to my people. Now with these drawbacks that I have mentioned I THINK THIS THE BEST PROPOSITION BEFORE THE WORLD TO-DAY. I will come to the First Model City and Community to live, and will urge my constituents to do the same. Your prices are low enough. The advantage of climate, fertile soil, opportunity for pleasures and assurance of health in this locality far outweigh, in my estimation, the objections mentioned above.

I urge you to proceed to the sinking of artesian wells, then allow the settlers to unite in convenient number to put down joint wells, then we will have the raising of crops reduced to a mathematical certainty.

I find your representative, Mr. Chas. H. Lee, and I agree on nearly all points, and I am in favor of investing him with the power to act in the capacity of an overseer, giving him ample discretionary power which I do not think he will abuse.

In conclusion I want to say that I do not consider the question of water vital, but it is one of great importance. It will be necessary to supply water for the city and I think the artesian well will be the solution. With fine artesian water we will make one of the finest cities in our country

I will start for home this P. M. and you can rely on my help and good wishes.

REV. W. H. WINTERS.

(a) Mesquite are scrubby trees suitable for fire wood and fence posts. They are prized on ranches on account of the shade they afford and as protection against flies. They are easily cleared. Mexican labor can be obtained very cheaply in winter for this purpose, or settlers can clear up their own farms with very little or no extra outlay.

(b) All sections are subject to occasional droughts. We think with as good cultivation here as is given in the North (the natives don't do it) crops can be grown with as much certainty. However, if the first crop is well grown and marketed right farmers can afford to rest from their labors in mid-summer.

(c) From a fourth to a third of the purchase price of the land is to go into public improvements. With the consent of the settlers this can be devoted to drilling artesian wells.

If you are interested (and who will not be?) send your subscriptions AT ONCE and ask for prospectuses, how to go to the M. C. and C., etc., etc.

Second Allotment of 200 Farms. **Cut out and send promptly.**
You may be one of the 200 if you mail at once

No._____

To MODEL CITY LAND AND IMPROVEMENT ASSC., Dept. 9, Indianapolis, Ind.

I hereby subscribe for.....farms of 25 acres each:.....5 acre city farms;.....¼ acre Residence Park lots and..... city lots, all in Refugio Co., Tex., and in the tract of land known as **The Model City and Community.**

For such farm land and lots I agree to pay to **The Model City Land and Improvement Association** as follows:

$20.00 per acre for the farm land. $50 per acre for 5 acre city farms; $100.00 each for city lots, and $500.00 for Residence Park lots. One third to be paid in cash as soon as two hundred (200) 25 Acre farms are subscribed for; another one-third in cash when I take possession of the property and on delivery of the deed. I agree to take possession of the property or place some person in possession within six months from the time of notice of subscriptions for 200 farms is received. The balance one third is to be paid in one year from same date. Deferred payments to bear interest at 6 per cent. per annum If it is not convenient to make the last payment at time specified it is agreed that the time will be extended another year. In the case of lots the condition to take possession is waived.

PRODUCTION AND MARKETING

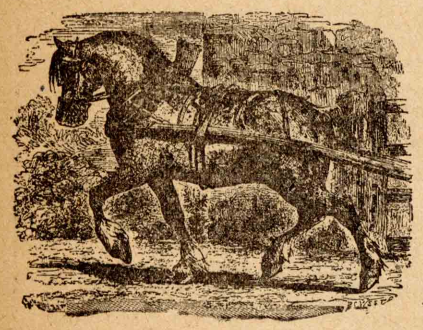
BREEDING HORSES FOR PROFIT

How to Breed to Enrich the Farmers by Millions

[This article will be followed by others on breeding cattle and hogs. They will be calculated to teach readers of Up-to-Date Farming how to breed so that gold from cities and foreign countries will flow to their farms, also strangers will seek you out and pointing to your fine stock say. "Say Jones, what'll you take for them?" This is simply working out the great plan to bring farmers to the front.—Ed.] (Copyrighted)

[Continued from October 1]

Like produces like, or the likeness of some ancestor. The scrub horse will produce the scrub horse, and the scrub farmer will have the scrub stock that will lose him money, while the progressive farmer will produce the prize winners which will prove both a source of great pride and of profit. It costs no more to raise a good horse than a poor one; one eats as much as the other. I have no axe to grind and no particular man's stock to advertise. I give an unbiased opinion without fear or favor, and what I advise the farmer to do is this: Cross a big, bony, thoroughbred running horse with straight action with a round, smooth-turned Norman, Percheron or other large mare with good action, which the two former invariably have. The mare will give size and action and the stallion symmetry, activity and staying quality, thus forming a foundation of fine brood mares of which the country is now sadly in need. The produce will be half-bred hunters and saddle horses, which are in great demand, and carriage horses fit for home and export trade. Pairs of such horses as this breed can pull a plow or draw a carriage, and will find a ready sale at a minute's notice at from $500 to $1,000. The breed may be still further improved by taking the progeny from this cross and breeding it to carefully selected thoroughbred trotting, coach horses or hackneys that are bred in the purple. But the stallion must in no event be a half-bred cur.



PULLS ALL BEHIND HIM

By following my suggestions, the farmer, when he drives to town with a pair of such horses, will have so many offers for them that he will likely exclaim, "Thank God! at last I've produced something for which the buyers follow me around and ask, 'Smith, what'll you take for them?'" I am talking from experience, and when I say that the thoroughbred is not nearly so much appreciated by the average breeder as he should be, and that the thoroughbred alone can impart the desirable finish to a coach or other horse, I know whereof I speak.

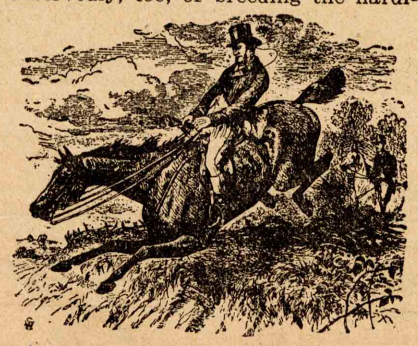
There is another horse to which we must pay some attention. That is the draft horse proper. The draft horse requires the same forethought to produce him that the coach horse does, for while the latter must be showy the former must be herculean in strength, and neither quality is bred by chance. To get a draft horse, breed a Percheron stallion to a Norman or even a Clydesdale mare. Do not make the irreparable mistake of trying to breed draft horses from nondescript stock, even if it is good, sound and of medium weight, say from 1,300 to 1,500 pounds, and even if you use a big draft stallion. The stallion cannot counterbalance in the progeny the mare's lack of weight, and the result will be that bugbear of the breeder—a horse which is not what it was purposed to be, and consequently more likely than not is unfitted for any purpose. In breeding for draft horses remember that the weight of the draft horse is increasing, and that while a 1,300 to 1,500-pound animal would pass for such a few years ago, it will do so no longer, 1,600 pounds being the very lightest weight desirable.

The general purpose horse is still another animal which may be noticed in passing. No suggestions are necessary for its breeding, the stock takes care of itself, and is constantly replenished by inbreeding.

Haphazard breeding is the order of the day among farmers. Too often they breed without a purpose, not caring what is crossed with what, so that the result is a colt which can be marketed. The average farmer is, above all others, the man who must market his produce, whether it be stock or grain, at a good price in order to make both ends meet, to say nothing of "making farming pay." And yet he persistently neglects to take the one step which will bring him good prices. It is only by repeated admonitions, urging and prodding that he will ever be induced to take forethought enough to control by proper breeding the quality of the stock he markets. And not until he does this will he make breeding pay.

A thoroughbred stallion, it may be argued, is an expensive article, and cannot be afforded by the average farmer. The solution of this difficulty is simple. What one farmer cannot afford, two, three, or, if necessary, a dozen can afford easily, and would this number of farmers form a syndicate and purchase a thoroughbred running stallion they would soon find themselves reimbursed for the outlay by the higher prices brought by their young stock. Could the government be induced to purchase thoroughbred stallions and place them in the different breeding sections of the country, charging the farmers a very nominal price for their services, it would result in a dissemination of good blood, in better prices for stock, and in hitherto unknown prosperity for the breeders and farmers.

I have spent the better part of my life in Canada, where the government gives a little valuable attention to the breeding of horses, and besides have inherited a love for a drop of blood, and have in much traveling seen its results. Canada has the reputation, and deservedly, too, of breeding the hardiest, toughest, best-selling saddle and carriage horses on the American continent. There is where you can see a



LIKE A BIRD

Sharples TUBULAR CREAM SEPARATORS

Will you buy a bad separator because the agent is a "good fellow?" Some people do. They should read this.

If You Have a Brand New Separator

not a Tubular, put it in the garret. **We guarantee Tubulars to make enough more butter than any other separator, and from the same milk, to pay 25 per cent yearly interest on their cost. You test them free side by side.** Your decision is final.

Carnegie is using investments paying 6 per cent; here is a guaranteed 25 per cent to you. The waist low supply can—simple bowl—enclosed, self-oiling gears—are found only on Tubulars. Catalog T-136 explains it.

THE SHARPLES SEPARATOR CO.

TORONTO, CAN. CHICAGO, ILL.

CHEAP SEPARATORS

It is universally recognized that in point of goodness ***DE LAVAL*** Separators stand alone. Hence the claim of imitating machines to cheapness.

There is nothing else perhaps in which "cheap" means as much as in Cream Separators.

The really "cheap" machine is not that which costs least, but that which gives the most capacity, recovers all the butterfat, produces the best cream, runs easiest and will last longest.

These are the qualities which represent recognized goodness in the ***DE LAVAL***, and in any and all of which no other Separator is comparable.

Most "cheap" Separators are in a class with rhinestones, "dollar" watches, and other trashy imitations of the real thing. But worse than all that, they WASTE butter-fat every time they are used, and so would be dear as a gift.

The genuinely cheap separator is the GOOD separator which soon SAVES instead of LOSES its cost, and may be bought on such easy terms as to actually PAY FOR ITSELF during the first year of use, and then be good for another twenty years more of clear profit.

Facts, figures and reasons, to be had for the asking.

I Am the Paint Man

Let Me Give You 2 Gallons of My Paint As a Test

SUPPOSE you went to a store and the man placed 2 full gallons of paint on the counter and said "Here is some paint I want you to try before you buy. Just spread these 2 gallons on your walls. When you have done so, if the paint is entirely satisfactory, come in and buy the balance of your order. If not, these 2 gallons are a present from me as a test."

You would think it was a mighty fair offer, wouldn't you?

But no paint dealer ever makes this kind of an offer. * * *

I am not keeping a paint store.

I am running a paint factory.

My paint is not sold over the counter.

I sell it direct from my factory to the user fresh.

Let me make you a better and more liberal offer than the above.

Here it is.

Let me ship you an order of paint. I will pay all freight on 6 gallons or more.

You sign no contract, obligation, or send me a penny of money in advance.

When the paint arrives choose any 2 full gallons of the order, spread it on your building—it will cover 600 square feet, 2 coats—then you be the judge as to whether you want to use the balance of the order or not.

If not, return the balance of the paint—I will pay the freight back and the 2 gallons used are yours, free, for the test.

If the paint spreads better—further—and looks better than any paint you ever saw, and you want to use the balance of the order, keep it and pay me at the end of 6 months.

With the paint I send my pen-and-ink signed iron-clad Guarantee that it will last 8 years.

This Guarantee is binding and says "money back at the end of the Guarantee period if the paint is not as represented."

The reason I can make you this liberal offer is because I manufacture and sell paint in a new way.

My pigment, or paint base,—which is white lead, zinc, coloring matter and drier—is ground fresh to order after your order is received, hermetically sealed in cans, dated the day it is packed, and shipped in separate cans from the oil.

My Pure Old Process Linseed Oil is shipped in a twin can.

My paint is ready to use but NOT ready mixed.

There are reasons for my manufacturing and selling this way. Good reasons.

Reasons that permit me to give an 8 Year Guarantee.

Briefly, here they are:

Paint pigment is a mineral,

Pure linseed oil is a vegetable.

When packed together the chemical action of the mineral pigment eats the life out of the oil—that shortens the life of the paint.

Old process linseed oil is scarce on the market.

Oil used in ready mixed paint is usually adulterated.

My oil is pure.

Shipping it separately gives you a chance to prove it.

Ready mixed paint settles—a cement-like substance forms in the bottom of every can. This can never be properly mixed again by hand.

My method of shipping pigment and oil separately, does away with all settling. You can use every drop out of every gallon of my paint on your walls, and you get the full life of the paint on your buildings.

* * *

I want to tell you more about my plan.

Just drop me a line today, asking for my Paint Book, copy of my Guarantee, and other printed matter, which includes my feee instructions "This Little Book Tells How to Paint." They are all FREE.

Do it now while you think of it.

O. L. CHASE,
The Paint Man,
415 B Sixth Street, St. Louis, Mo.

NOTE—My 8 Year Guarantee backed by $50,000 Bond.

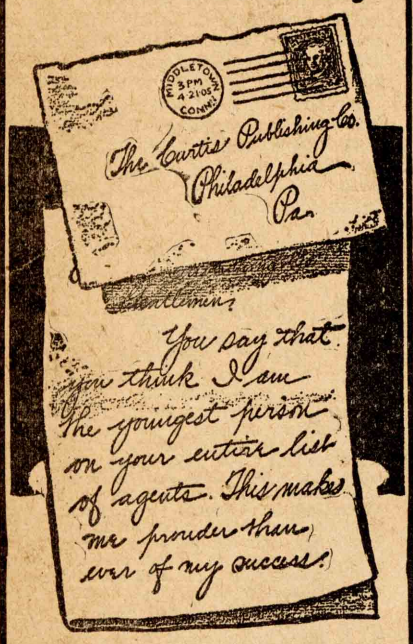
How Young People Can Earn Money



Continuing, this Bright Schoolgirl in Middletown, Conn., writes:

"I do not know of any other little girl who has earned thirty-five dollars in so short a time and in such a pleasant way as I have, and I am quite sure that none of your older agents are more pleased with their success."

What this Schoolgirl did others can do

THE LADIES' HOME JOURNAL and THE SATURDAY EVENING POST will willingly co-operate with others who want to accomplish the same result. A very liberal commission will be paid upon each subscription and renewal secured, besides offering each an opportunity to share in **$5000** to be divided EACH MONTH from now until next June among those who do good work.

The Curtis Publishing Company
E 29 Arch Street, Philadelphia

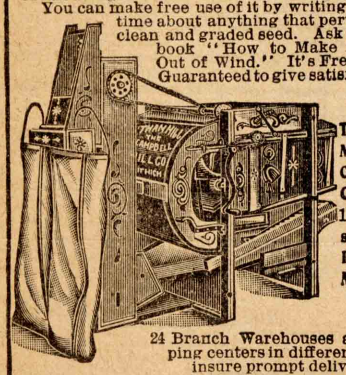
Now is just the time to buy a Chatham Fanning Mill

Clean up your grain for market. Grade up your seed for next year. Cut out all the weeds. Plant full, even sized kernels. You can do all of this with one of our Mills. It pays for itself over and over each year. Over 210,000 farmers are now using them—why not you?

We give a month's free trial to test the mill—and we pay freight to your state.

If the mill is not satisfactory and as we represent it to be, send it back at our expense. If it does the work we claim it will, and you like it, advise us of your decision. Our Corn Grader is the greatest machine out. Did the job 98 per cent perfect in a recent test at the Iowa Agricultural College. We have a lot to tell you about graded corn and clean seed. Our Free Bureau of Information is headquarters for this kind of knowledge. It is in the hands of crop experts.

You can make free use of it by writing at any time about anything that pertains to clean and graded seed. Ask for our book "How to Make Dollars Out of Wind." It's Free. Guaranteed to give satisfaction.



The Manson Campbell Co., Ltd., 159 Wesson Ave., Detroit, Mich.

24 Branch Warehouses at shipping centers in different states insure prompt delivery.

No More Blind Horses For Specific Ophthalmia, Moon Blindness and other Sore eyes. Barry Co., Iowa City, Ia., have sure cure.

NEWTON'S Heave, Cough, Distemper and Indigestion Cure. A veterinary specific for wind, throat and stomach troubles. *Strong recommends.* $1.00 per can, of dealers, or Exp. prepaid. **The Newton Remedy Co., Toledo, Ohio.**

farmer driving a pair of big sixteen-hand half-bred horses in and out of town forty miles, their heads and tails up all the way, and their big sinews playing like the piston rods of a ten-horse engine. In too many states if the farmer drives to and from town a few miles his common-bred curs loll up against the fence on the way home to keep from falling over.

In conclusion I will say that I am not afraid that the horseless age is upon us, the automobile fiend to the contrary notwithstanding. Does the automobile enjoy a lump of sugar from your hand? Can it toss its head and whinny a joyous greeting as it hears your voice, or carry you like a bird on the wing over a five-bar gate? Do you fancy that inanimate cobweb of rods and wheels from the machinist's will ever take the place of my feeling, thinking, loving companion from Barbary? Not while the automobile remains blind to your actions of kindness and dumb to the sound of your voice, nor while the horse is the delightful company he is, whether in the stable, under the saddle or in the harness! Certain it is that as far back into the ages as we can trace his association with human beings, the horse appears as the friend and intimate companion of man. He steps down the ages decked with the flowers and wreaths of love, poetry, romance and chivalry no less than with the stern trappings of heroism and war." Man's inhumanity to man" and beast is justly lamented, but so associated with the sentiment and necessities of man is the horse that motorcycles and automobiles combined will be powerless to displace him.

You may depend upon it, good horses, and especially good coach and saddle horses, will always be in demand. The dealers say, "It is not a question of money now. It is a question of horses. If we can get what our customers want in the way of carriage horses, they do not want to know the price, and will pay the bill without a question." And as the old ranchman said as a warning not to harbor his runaway wife: "A word to the wise is sufficient, and ought to work on fools."

We have nothing to give away; nothing absolutely free except our good will. Nothing to sell at less than cost. If you buy a Jones scale you will have to pay a fair price for it, and our terms are satisfaction or no sale. In this way we have done a successful business for just forty years this month. We would be glad to give you a full description of the Jones scale, and hope that you will write us for price list. We have no doubt that we can please you, as we have many thousands before. Address Jones of Binghamton, Box 348C, Binghamton, N. Y.

A very handsome booklet printed in colors comes from the Vermont Farm Machine Co., Bellows Falls, Vt. Besides being well printed it is valuable to the smallest as well as the largest dairyman. If you read Up-to-Date Farming you may have a copy free if you write for it. We are sure you will be interested.

Begin to think of the condition of your stock for wintering.

Banner Rubber Company, St Louis, Mo.

The Banner Rubber Company, 400 Bittner St., St. Louis, Mo., advertises in this issue of our paper. Their advertisements set forth in a very straightforward way the unusual merits of the Buckskin Brand of rubber boots and shoes. The cuts show simply and forcibly how thoroughly well the Buckskin goods are made and give good and sensible reasons for their long wear qualities. The Banner people are a well known and reliable firm and since every reader may have the opportunity to try their goods, no risk is incurred in purchase. They publish a very interesting little booklet on how rubber boots and shoes are made. They will mail you a copy free if you ask for it. Write them to-day.

The fewer parts there are in anything, the less likely it is to get out of order. That is self evident. And when an article is simply made yet does the same and MORE work than a complicated machine, the ideal is closely approached.

A close examination leads us to believe that the ideal Saw Mill is produced by the DeLoach Mill Mfg. Co., Box 850, Atlanta, Ga., whose advertisement appears in another column. It is simple, strong and durable, and does must excellent work. The catalogue of this firm is well worth having.

If you have not investigated the Mode City and Community you should do so. See advertisement in this issue.

With Our Advertisers

By the Advertising Manager

Every farmer of today needs one or more windmills. It is eberyone's duty to have a good one—the best, if possible. I advise all who want a first-class article to write Smith & Pomeroy Wind Mill Co., Kalamazoo, Mich. They make most excellent tanks, too. Mention Up-to-Date Farming when you ask for catalog.

* * *

Osgood Scale Co., Box 100, Binghampton, N. Y., have a catalog for you. They have a dandy proposition for agents.

* * *

Buhr Stone Mills made by Nordyke & Marmon Co., 1202 Kentucky Ave., Indianapolis, are the standard. No doubt you need just such a machine—then send for their interesting, illustrated catalog.

* * *

Steel Roofing and Lumber can be bought very cheaply from Chicago House Wrecking Co., Chicago. Ask for their catalog No. A. M., 204, telling about the World's Fair supplies they have.

* * *

You can get a Blizzard feed and ensilage cuter on trial by writing Joseph Dick Agricultural Works, Box 80, Canton, O. There are no better machines of the kind made.

* * *

Investors should send for the free book issued by the Co-operative Tropical Fruit Assn., 974 Real Estate Trust Bldg., Philadelphia, Pa.

* * *

Every up-to-date farmer must be familiar with fertilizers. They enter largely into his business. Ask the German Kali Works, 93 Nassau St. N. Y. City, for their books on the subject. Mention Up-to-Date Farming and they are free.

* * *

How many farmers realize that a Fanning Mill will increase the yield of many crops 33 1-3 per cent? This is an actual fact as statistics prove. Write the Manson Campbell Co., 154 Wesson Ave., Detroit, Mich., for their free book "How to Make Dollars Out of Wind."

* * *

If readers mention Up-to-Date Farming and write how much stock of all kinds they have they can get a very beautiful picture of Dan Patch, the fastest harness horse in the world. It is sent free by the International Stock Food Co., Minneapolis, Minn.

* * *

Send for the free Eye and Ear book, offered by Dr. F. G. Curts, 532 Gumbel Bldg., Kansas City, Mo.

* * *

For reliable nursery stock write to America's Greatest Nurseries. They want good agents. Write Greening Bros. Nursery Co., Monroe, Mich. Tell them you read Up-to-Date Farming.

* * *

Clip the coupon from Montgomery Ward & Co.'s advertisement and send for their free four-pound catalog. The average family will save more than $100.00 in a year by using this book as a guide in buying.

* * *

Boys, send for catalog of Stevens Rifles—they're dandies. J. Stevens Arms Co., 225 High St., Chicopee Falls, Mass.

* * *

Send for a free sample of X-Ray Stove Polish. Best made. Lamont, Corliss & Co., Dept. 36, 78 Hudson St., N. Y. City.

* * *

New and slightly used furniture sold very cheaply. Complete catalog free. Langon & Phillips, Dept. F 189, St. Louis, Mo.

Bog Spavin

Lameness resembles bone spavin, but the bunch is in front of the true hock joint, a little to the inner side, and is soft and yielding, hardening sometimes as the case grows old.

Fleming's Spavin Cure (Liquid)

is a special remedy for the soft and semi-solid bunches that make horses lame—Bog-Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It isn't a liniment to bathe the part, nor is it a simple blister. It is a remedy unlike any other—doesn't imitate and can't be imitated. Easy to use, only a little required, cures the lameness, takes the bunch, leaves no scar. Money back if it ever fails. Write for **Free Horse Book** before ordering. It tells all about this remedy, and tells what to do for blemishes of the hard and bony kind.

FLEMING BROS., Chemists,
207 Union Stock Yards, Chicago, Ill.

THICK, SWOLLEN GLANDS

that make a horse Wheeze, have Thick Wind or Choke-down, can be removed with

ABSORBINE

or any Bunch or Swelling caused by strain or inflammation. No blister. No hair gone and horse kept at work. $2.00 per bottle, delivered. Book 3-B free. **ABSORBINE, JR.,** for mankind, $1.00 delivered. Cures Goitre, Tumors, Varicose Veins, Etc. Book free. Made only by

$75 MONTH Expenses advanced. District Managers to travel and leave samples at stores. Address PEOPLE'S SUPPLY CO., Dept. 19. 62 Plymouth Place, CHICAGO, ILL.

UP-TO-DATE Poultry and Bees

PRODUCTION AND MARKETING

Make sure that the bees have plenty of honey and are properly covered and protected for winter.

This done, the outside work is over for this year. Cleaning up the honey, crating it and putting extracted honey in marketable shape should be rushed along and all empty hives, frames and soiled sections got ten together where they can be cleaned up and put in "ship-shape" this winter when you are not very busy.

This is the season for marketing poultry.

Poultry, like hogs, should be confined in small range and fed heavily two or three weeks before time to kill. Do not forget to supply lots of grit and more water. Both are very essential.

Now or at market time more, perhaps, than at any other season, is the difference between common stock and thoroughbred poultry noticeable. The pen or crate of pure bred fowls will sell quicker and bring higher prices than a crate of mixed birds, even though the mixed birds are fatter and better. This is especially noticeable on the market. Also, it is a fact that the white varieties are given a preference over the dark or colored types because, when picked, they look cleaner, having no discolored markings owing to dark pinfeathers.

If farmers would be successful in raising poultry, as in producing other things for market, they must furnish the market with what it likes best. While almost anything that looks like a "chicken" (under forty) will sell, it is only fine stock well fattened and within reasonable age limits that will bring top prices. It is the to price that marks the great difference btween success and failure, and they go to the pure-bred fowl every time. Many poultrymen are compelled to dispose of some of their old stock at this season of the year to make room for the young; also are offering a few choice pens, trios and cockerels at very reasonable figures. It will pay any reader of this paragraph who has only common stock to get something better. For an unprejudiced description of the different varieties we refer you to "Standard Varieties of Poultry," published by the United States Department of Agriculture, Washington, D. C. It is free. Write for it. Then make your selection and write to the poultrymen, advertising in this paper, telling them you saw the "ad" in Up-to-Date Farming. That will insure fair treatment.

If any of our readers have some thoroughbred poultry to sell do not furget that you can tell all of the 150,000 readers of Up-to-Date about it for only eight cents a word. Unless in the business extensively one notice ought to sell all your surplus.

Extracted honey is becoming more popular every season. Common glass fruit jars are now used extensively as containers for home markets. They are a household necessity and the up-to-date beekeeper finds them ready sellers. Prices vary in different localities, but the following schedule is not far from equitable: Pints, 25c; quarts, 45c, and two-quarts, 75c.

Prices of Poultry and Eggs

It will make an interesting exhibit, and at the same time furnish a practical lesson as to what may be accomplished when the A. S. of E. has a clearing house in almost every county to publish current local prices for spring chickens (alive) and fresh eggs in the different States. We desire our readers to assist us by furnishing this information. Get prices if possible on November 1, and when you write us just give us this information. As soon as all States are heard from we will prepare and publish the exhibit. This can be done without any extra trouble, as we get letters from every State almost every week. You might include local prices for potatoes on the same date, as they are grown almost as generally as are chickens.

Dropping Boards

Of all little contrivances of real merit that may be installed in the henhouse, none is so essential and yet so much neglected as the dropping boards. These are merely a tight platform or flooring about eighteen inches above the floor, and about a foot below the roosting poles. These serve two most important purposes. They catch the droppings so that they can be easily collected in almost a pure state and stored under cover until wanted in the spring for field or garden. They also assist wonderfully in keeping the henhouse clean, as if absent, the droppings fall to the floor and are soon mixed up in the litter by the continual scratching of the flock. Any old boards will answer for this purpose, but if nothing is available it will pay to buy new, no matter how high lumber may be in your locality. The saving and advantages are so great.

That New Press

Indianapolis, Oct. 1, 1905.

Statement—

Amount received and pledged to date, including advances.	$667.50
Amount we actually expected and should have had to enable us to order "THAT NEW PRESS" on this date..	10,000.00
Deficit	$9,332.50

Gentlemen, what are you going to do about it?

Statement—

Amount due on arrearages (approximately)	$15,000.00
Amount due on subscriptions for balance of 1905 and for 1906 (approximately)	40,000.00
Amount due from members of the A. S. of E. in Local Unions and members at large to January, 1906 (estimated)....	20,000.00
Approximate amount actually due the society and the publisher of the official paper that should be paid in and available for use in carrying on this movement.....	75,000.00

Gentlemen—This money is needed. Members of the A. S. of E., how do you expect great success to crown the efforts in your behalf when you do not promptly pay your obligations to your society? Do you expect some magical process to win the fight for you without money and without price? Are you dissatisfied with what has been accomplished? If you have been an active worker you are not. If you have "laid down," "done nothing" and with the "dumpers" said "farmers wont stick," may God pity you. The prospects are brighter than ever before. We are receiving recognition from many sources that two years ago thought controlled marketing impossible. Farmers everywhere are holding their products for "EQUITY" prices. Millions of dollars have been gained by the American farmers because of this idea first advanced by President Everitt, and yet YOU allow him to be handicapped for lack of necessary funds—money actually due him and the society—to carry on the good work to the fullest extent.

Education even along the lines of controlled marketing is free, but the papers, books, circulars, etc., etc., and the postage to send them out and organizers in the field cost large sums of money—more than you have "put up" in the past, hence our predicament. The time has arrived, however, when "THAT NEW PRESS" should be ordered. The account stands like this—about $1,000 paid in, contributed and advanced, against $75,000 that should be available for immediate use.

To the many who have helped we are very grateful. Our greatest regret is that so many have not. How many will use the below coupon before November 1 and assist in making possible what is so much needed?

LETTERS

You will excuse me for failing to respond to your call of Aug. 15th for help to buy new press. I was so busy that I did not get that far into the paper, but after reading Sept. 1st copy, I began to investigate. I take pleasure in sending free will offering of one dollar and also one dallor to pay my dues in National Society as far as it goes. I will try and get some of our farmers to help. They owe it to us, and to yourself, for without your plan and method of fixing a price for a whole year, many of us would have been selling crops at the old price of 45, 50 or 55c as we formerly had done. Sometimes, when I meet the farmers who won't contribute a cent toward our war, I wish that wheat were again down to low water price and that such price would touch only the farmer who is unwilling to help his own organization.

If this remitance is not enough to help along, you can sight draft on me for three dollars more. I would advise sending delinquent members a statement and request prompt remittance.

Wheat is threshing from 18 to 22 bushels in this part, the price at elevator is 71c. I am holding mine for our price. Please let me know if you think it will get any higher than at present this fall. I favor a "clearing house" in every country.—Edward Murphy, Crary, N. Dak.

[Such letters tell more than pages of argument. Farmers who have followed this movement know it is responsible for the good prices now received for farm products. Shame on those willing to receive the benefits but not willing to help in perfecting the machine of co-operation. Wheat will go higher.—Ed.]

Enclosed pleased find one dollar "to help buy that New Press." You may credit remittance to Free Will Offering.—F. C. Marks, Sterling, Colo.

Enclosed find $1.00 to help buy "that new press." While not a member of the A. S. of E., I am fully in accord with its teachings and have pinned my faith to Up-to-Date Farming. I have been a constant reader of the ——— ——— for about 15 years, there being an illustration of the blind leading the blind, and I did not get my eyes opened unto the real needs of the farmers until I dropped it and began Up-to-Date Farming.—E. H. Smith, R. R. No. 13, Fayette, Ohio.

We are very anxious to see "THAT NEW Press" installed. Had hoped that it might be ready for Jan. 1st, 1906, issue of the official paper.

We begin to fear that there are so many who "won't do a blamed thing but drag their feet" that we enclose another installment of "self assessed" "special" dues ($1.20) and will try and duplicate it each month instead of each quarter until "press fund" is completed.

Equity must and surely will prevail sooner or later, but the question is, who among us wishes to have it said of him "he dragged his feet." When victory is won, when great success has been achieved, how much better to have it said "he withheld not his mite, he was always ready to lend his financial aid even beyond his just proportion."— The ——— Family, Mich.

Note—This makes $2.40 contributed by this one member and family besides fully as much more sent in as orders for subscription, contribution, etc., for other people. It makes us at Headquarters feel heavy-hearted that the rank and file are so willing for a few to do it all.

S. E. FERRY 842—844 Capitol Ave. N. Indianapolis, Indiana

UP-TO-DATE
Home on the Farm
HOW TO KEEP IT BRIGHT, HAPPY AND CHEERFUL

Freezes and thaws bring mud. Out-of-doors is the proper place to leave it. It will pay the housewife to place a substantial scraper and husk mat just outside the door. Insist on their being used.

Put the potatoes in the darkest corner of the cellar. They will keep better, and be of better flavor.

Help the school children with their arithmetic in the evenings by showing them how to keep the accounts of the farm. There are plenty of chances for them to learn practical lessons in interest, profit and loss, bookkeeping, weights and measures, and many other features of farm business matters. It will be the more interesting because it is dealing with affairs of real life. I venture to assert that the old folks will learn as much, if not more, than the children.

Mother, in providing for your daughter's future, teach her that home making is the sweetest of all vocations for women, and one fraught with opportunities as well as responsibilities. Prepare her for womanhood, wifehood and motherhood as well as for housekeeping. She may not become a wife, mother and housekeeper, all three. Remember that the veil of the future does not permit you to foresee what lies in store for her. Teach her the lessons of home care of the sick and injured that your mother and experience has taught you. Teach her how to take care of her own strength, so she may be able to stand up under the burdens that may fall upon her. Help her to learn to do something that she can do well and that will enable her to pay her own way should she be thrown upon her own resources. Teach her self-reliance by placing in her reach a vocation she can rely upon, and she will make your home all the happier while she is yet with you, and will bless you for it all in after years.

There are habits, good and bad, but the best of all good habits is the habit of being cheerful around the house. If you are sore with disappointment don't let any one know anything about it, and you will soon forget it yourself.

Just common soda is a splendid article to cleanse crockery. It makes old and dingy appearing dishes look like new.

Apples are a healthful food, either cooked or raw, and are especially good for dyspeptics. A raw or baked apple and a cup of hot water for breakfast is better for dyspepsia than a dollar's worth of drugs. Apples are plentiful now in fruit growing sections, and may be served in a great variety of ways to delight the palate of a hungry farmer. Try the following recipe, for it is one of the best:

Mix five tablespoonfuls of butter with two cups of flour; stir in two even teaspoonfuls of baking powder and a saltspoonful of salt; beat an egg until very light, stir it into three-fourths of a cupful of water, and then stir it into the flour; spread the mixture in a shallow pan previously buttered; pare and slice three or four tart apples; and place on the dough; sprinkle sugar over it thickly, and bake for a half-hour. Serve hot with lemon sauce. This is a new, easy and inexpensive way of serving apples, and the dish is truly delicious. Try it and see.

Daughter, do you realize that in your babyhood, mother spent many weary hours over your cradle, and in planning for your future happiness? Do you spend any of your time in planning for her? Don't you think she deserves it? The spirit of cheerful helpfulness in a farm home brightens it wonderfully.

Is Your Heart Weak?

If so we would advise you to send your address to Alice A. Wetmore, Box 67, Norwich, Conn., today, and let her direct you to the perfect cure she herself successfully used. We believe you will be pleased with the information for self-help thus placed in your hands.

She makes no charge whatever for doing this service, as she is glad to be the means of aiding any one who suffers.

Oil of peppermint is obnoxious to mice. Sprinkle it in their runways, upstairs and down cellar, and they will leave the house.

No one can be healthy who wears tight shoes and high heels. The tight shoes impair the circulation, while the high heels strain the muscles of the back and cause nervousness. The sensible shoe has a low, flat heel.

Autumn leaves are now in their glory, and the woods make a picture that artists love to paint. Nearly everyone loves autumn leaves. Many save them, making artistic pictures for the parlor and dining room. To those who enjoy such work we give this suggestion: Press the leaves in a book for a few days, dip them in hot parafine and blow until cool. This will preserve their color indefinitely.

Bad Government
(Contributed)

I saw Johnnie strike his little sister Kate.
He ate his own pie and stuck his dirty fingers in her plate.
And everything she had he cried for early and late.
He ruled and reigned in monarch sway, pulled her hair and broke her dolls and toys.
And mamma said, Katy, never mind, it's the way of boys.
Poor Katy had nothing she could save or call her own.
Johnnie grew, and was at last a grown man,
His habits were formed. He said I'll take advantage when I can,
In childhood he had his own way every time,
And his life was filled with many a crime.
O! mothers and fathers teach equity at home and live it, too,
Train up your children right, untold blessings will fall on you.

Every reader of Up-to-Date Farming who keeps cows should investigate cream separators. If you have a separator perhaps a BETTER one will interest you. A good separator will make you money where a poor one will lose. We advise you to send for the Sharples Catalog No. 136, which tells about the latest improved separator. Address the Sharpless Separator Co., West Chester, Po., or Chicago, Ill. You cannot invest a postal card better.

Have you ordered your badge? If not, do not delay. See another column for prices.

Ask your dealer for Simpson-Eddystone Solid Blacks

Three generations of Simpsons have made Simpson Prints.

The Eddystone Mfg Co (Sole Makers) Philadelphia

condition of the contract, and when the shipper delivers the article to be carried he is held as having accepted the contract, and that is all there is to it. In some countries this problem is solved by the government owning the railroads. The government then, of course, fixes all rates, and they are made uniform in all parts of the country in proportion to the distance hauled.

Vegetable growers, however, may be greatly benefited by organization. Often the Boston, New York or Philadelphia markets may be glutted, while in the smaller interior cities the demand may be active and at fair prices. With representatives of a society like the A. S. of E. at all these market centers a single message would quickly divert shipments from the congested centers to points that would take the produce at fair prices. Such agencies, or clearing houses, if you please, would make the local shipping points, or even the farms, the places of distribution instead of the great cities. The benefit of this to the producers is too great to be even approximately estimated.

Nothing can be gained by delay in organizing, but everything may be gained by prompt organization. No section or individual should wait on another.

Labor to the Front

Editor Up-to-Date Farming:

I would like to see greater effort put forth in the labor papers, papers published in the interest of those who toil, (both the farm and city laborer), and especially the union papers, in urging the need that those who toil, no matter where, should know more fully the condition of the various classes of work people in the different section.

A great trouble is that one class or community knows not how the other lives, nor what trials they have to contend with; whereas, if we did know, we would be more ready and willing to help one another, or, at least, to co-operate for each other's benefit.

Few farmers, when selling their produce to the dealer, know what the city laborer is compelled to pay for it; and few city laborers, when buying farm produce, or its by-products, know what the farmer had to sell it for.

Few farmers, when buying a wagon, a mowing machine, or other tools, or clothing and other supplies, know what the workers received for making them; and few, if any, of the workmen or women, when making these articles, know what the users have to pay for them. We do not know what those who go between the makers and the consumers, make off our labor, and in most instances, if we were told we would be slow to believe it. A farmer could scarcely be made to believe that a certain part of his reaper that costs him $8 as a repair, cost the manufacturer 68 cents! Few would believe that on the labor of men paid $1.50 to $2.50 per day, the manufacturing corporations make from $39 to $80 per day! And yet it is often true.

Few people in the city, when they buy 18 to 24 cent beef, know that the producer gets less than five cents for it.

Few city people realize that the average farmer and those of his family, who actually toil in the fields, make less than 50 cents a day the year through, hence they wonder how it is that so many farmers are burdened with debt, or actually lose their farms by mortgage foreclosures.

Few farmers realize that only a small per cent. of the working people in the city get work and wages the year round, the enforced idle days eating up the meager gains of the work days.

There are many things connected with the lives of all of us, that, if the other fellow knew, he would wonder how we live at all.

LET THE TRUTH BE KNOWN.

GEO. B. DICKERT,

Columbus, Ohio.

The A. S. of E. in Minnesota

We are glad to copy and endorse the following from the Daily Bulletin, of Rochester, Minn. Up-to-Date Farming is essentially in favor of farmers patronizing their home merchants on the lines of Equity, and that we accept advertisements from mail order houses is no evidence to the contrary. The postoffice regulations require that the advertising columns of papers of general circulation must be open, on fair conditions, to honest advertisers, and what the parties pay us for the service enables us to push the doctrine of Equity as we could not otherwise do:

"The Bulletin believes the interests of the people of a town or city, and of the rural districts surrounding, are mutual. Each is necessary to the growth and development of the other. Whatever aids in building up and making a prosperous town or city deserves the support and encouragement of the rural classes. A wide-awake, growing town or city in the midst of an agricultural district means much to the farmers. It means enhanced values in farm lands, better facilities for the exchange of products and in many ways advantages to the man who tills the soil. Since the organization of a union of the A. S. of E. in our city we have heard a good deal about the mutual interests of the city and country people—why the farmers should patronize the home merchants instead of buying from the mail order houses of the large cities, which contribute not one penny to the upbuilding of our community."

And the following also:

"It will be gratifying to our members to know that we now have over thirty local unions in Southern Minnesota, and that this movement is growing rapidly. Members who joined this society a year ago are now beginning to appreciate the unlimited scope of its operations and the possible benefits to be derived when the plan is operated in all its details.

"It is to be regretted that more of our members have not undertaken to study the plan of the society more thoroughly, because in this way only can the interest be kept up. It has been impossible at the limited number of meetings held in Olmsted county to explain every detail of the plan of the society, and it has been necessary, therefore, to constantly suggest to our members that they take advantage of every opportunity to post themselves from the information furnished by the official paper and other literature pertaining to the plan. It seems that in almost every other locality where the society has been introduced, the interest in its success has been greater than has been manifested right here in Olmsted county, where the society was introduced over a year ago. We should have in Olmsted county not less than 3,000 members, while, as a matter of fact, our present membership is about 20 per cent. of that number.

"The officers of our local unions have certainly done a great deal of most excellent work, but it has been almost impossible to obtain from our members the necessary interest to substantially increase our membership. It is hard to understand why the farmers of this great county, especially those who should be familiar with the benefits to be derived through co-operation, cannot be induced to attend meetings and lend their influence to a movement that promises so much for their future welfare. The society now includes over a quarter of a million members in this country, and the farmers have not only displayed great interest in the success of the movement, but have also undertaken to revise certain portions of the plan of the society and also to change many of the provisions of the Constitution, until they now feel that they are operating along the right line and that it will not be long before the required million will be secured, which will make it possible to correct practically all of the adverse conditions that have so long existed for the agricultural class of this country."

Gets Good Prices

Editor Up-to-Date Farming:

I can't understand why farmers don't stand united when they are united. So far as I am concerned, I get very good prices for garden stuff, because, as a rule, I set the price and deliver to my customers in Elizabethtown. I think farmers, as well as gardeners, could control the marketing if they would organize, and stay organized and do their duty.—F. A. Guedry, Elizabethtown, Ill.

Mr. W. F. Young, Springfield, Mass.

Dear Sir: The Absorbine ordered from you gave perfect satisfaction. You will find enclosed money order for $4.00 for two bottles. Send by express at once, etc.

Yours truly,
J. F. KELLEY, M. D.,
Physician and Surgeon.

Absorbine $2.00 per bottle at your dealers or sent express prepaid upon receipt of price. W. F. Young, P. D. F., 102 Monmouth St., Springfield, Mass.

The J. Andrae & Sons Co., have just completed their new book on Farm Telephones, which contains some very valuable information to any one having a telephone or any one who expects to have one. They send book free and we advise readers to write to Andrae & Sons Co., 868 W. Water St., Milwaukee, Wis.

Get This Gold Pair FREE

Listen! In the past year I received thousands of letters from spectacle-wearers all over the world, expressing their thanks and appreciation, and the one I give here is a good sample of what they all say. The Reverend O. C. Clark, one of the most prominent ministers in the State of Illinois, says: "I highly appreciate your famous "Perfect Vision" spectacles, for I can honestly and truthfully say that with them I now read the finest and smallest print both day and night, just as well as I ever did in my life Your spectacles are truly marvelous." Now I have no doubt but that the testimony of this noted minister of the gospel is sufficient proof to every fair minded spectacle-wearer that my famous "Perfect Vision" spectacles are really THE BEST IN THE WORLD, as I claim.

But I Want YOU to Judge Them For YOURSELF

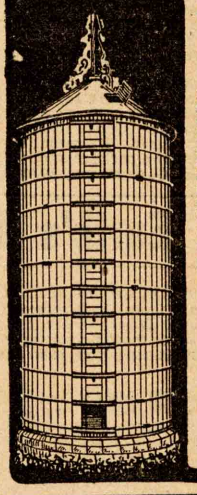
and thereby get **YOU to send me YOUR testimonial also.** Hence, before placing them on the market for sale at their regular price of $5 per set, I make you the following special offer which will actually save you $4 cash: Just write me your name and address and I will mail you my Perfect Home Eye Tester, free, with which you will be able to test your eyes at your own home, perfectly. Then when you return me the Eye Tester with your test, I will send you a complete five dollar family set of my famous "Perfect Vision" spectacles for only $1 (which is an actual saving of $4 to you), and this will include a pair of my handsome Rolled Gold Spectacles absolutely free of charge. This set will last yourself and family a lifetime. With these famous "Perfect Vision" Spectacles of mine you will be able to thread the finest needle and read the smallest print, both day and night, just as easy as you ever did in your life, and this even if your eyes are so very weak now that you cannot read the **HEADLINES** in this paper. I also hereby agree to return you your dollar cheerfully if you **YOURSELF** don't find them to be the most perfect-fitting, clearest and best you have ever bought anywhere, at any price. Write today for my free Home Eye Tester. Address my company as follows:

DR. HAUX SPECTACLE COMPANY, Haux Building, ST. LOUIS, MO.

I WANT AGENTS ALSO And any man or woman (also storekeepers), without any previous experience whatever, can fit the weakest eyes with my Improved Home Eye Tester. This is so simple that any one can work it with perfect satisfaction and easily earn from $25 to $100 weekly selling my famous Perfect Vision Spectacles, either in their own homes, traveling or in stores. My agents need no license as I furnish necessary documents with the Agent's Outfit.

(NOTE.—The above is the largest Mail Spectacle House in the United States and perfectly reliable.)

THIS SILO $92.40



Every stock and dairy farmer needs a Silo. Our Silos are made by expert silo builders, with extraordinary care, from best of materials, and will keep silage in good shape for feeding—in fact, there is no better silo made at any price. Made in sizes to suit. We save the farmer two profits and give him best silo built.

We also have a plan to sell this silo, and all kinds of merchandise, to the farmer at 10 per cent less than list prices—and save him from $150 to $200 a year. Write for full particulars about it.

Write for special Silo catalog. Don't buy until you get it. CO-OPERATIVE SOCIETY OF THE NATIONAL SUPPLY CO., LANSING, MICHIGAN; CHICAGO, ILL.

9 TOOLS IN 1

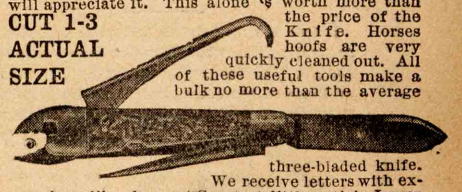
One of the most useful tools of recent invention is the

C. & F. WONDER KNIFE

—9 tools in 1. It successfully combines in one article nine perfect tools, all of which are used every day by the average man and boy. In reality it puts nearly all the tools of a work bench in your pocket. It is so handy that no one will be without after using once.

The knife-blade is of the finest steel and made to stand bad usage. The other tools are: Wire Cutter, that will cut barbed wire; Wire Pliers useful always; Swedging Awl; Leather Punch and Gimlet, for Harness mending and other jobs; Screw Driver, that is always handy; Alligator Wrench and Hoof Hook. The latter is something new and every horse-owner will appreciate it. This alone is worth more than the price of the Knife. Horses hoofs are very quickly cleaned out. All of these useful tools make a bulk no more than the average three-bladed knife.

CUT 1-3 ACTUAL SIZE



We receive letters with expressions like these: "Greatest little article I ever saw," "Never saw its equal," "All my friends want one," "Don't see how I ever got along without it." You will agree when you see the knife.

"C. & F. Wonder Knife received. It is certainly a wonder. I want to buy them by the dozen."—

J. Barnhart, Wilmington, O.

The regular price is $1.50 each. But we want to introduce them and make an offer of only $1.25 each. With each order we send wholesale price list. Agents will find the C. & F. Wonder Knife a wonderfully fast seller. No free samples. Send $1.25 for a sample and get the attractive agents price.

C. & F. Wonder Knives—9 tools in 1—are made to sell on their merits. Made to gain friends and keep them. One sold sells many others.

REQUEST *ADVERTISERS WANT TO Know in what Paper their Advertisment was seen. Therefore We Urgently Request You* **TO** *to mention UP-TO-DATE every time you Write to Our Advertisers.* **READERS.**

We want our pay

BUT not until you can say "Here is the dollar. You deserve it," not until we HAVE EARNED IT, not until you are WILLING to send it to us, not until you want to send it to us, not until you are SATISFIED to pay it, not until we HAVE PROVEN TO YOU that we have what we claim, not until VITAE-ORE HAS DONE FOR YOU WHAT YOU WANT IT TO DO FOR YOU. Until then, you pay us nothing. After that you will be willing to pay, GLAD TO PAY, as hundreds of the readers of this paper, yea even thousands, have been willing and glad to pay. YOU ARE TO BE THE JUDGE. We leave it to you entirely for you to decide. If you can say that we, and Vitae-Ore, have earned your money, we want our pay, as we say at the top, but NOT OTHERWISE. How can you refuse to give this most remarkable of all remedies—a natural, curing and healing mineral ore—a trial on the terms of such a LIBERAL OFFER? If you need medicinal treatment of any kind, if you are sick and ailing, if anyone in your family is ailing, poorly, worn out, sickly, it is actually a sin and a shame if you do not send for Vitae-Ore upon the terms of this thirty-day trial offer. Read the offer! Read it again and again! Send for the medicine! Do it to-day! Each day lost makes a case older, obstinate, harder, hurts you more, pains you more.

WE TAKE ALL THE RISK! You are to be the Judge! It is different from all other treatments, as you will know with the first dose. It looks different, smells different, tastes different and ACTS differently, a difference that is the explanation of the speedy cure it will bring to you if you will give it a chance. If you have been using other treatments and have lost faith in advertised medicines, if you have sworn to yourself never to give another treatment a trial, if you are totally disgusted, sick, worn out, suffering, it is now time that you send for it and allow it to do you the good it has done others. It costs you nothing unless it helps you. Read our offer!

You are to be the Judge!

WE WILL SEND

to every subscriber and reader of UP-TO-DATE FARMING a full-sized one dollar package of VITÆ-ORE by mail POSTPAID, sufficient for one month's treatment, to be paid for within one month's time after receipt, if the receiver can truthfully say that its use has done him or her more good than all the drugs and doses of quacks or good doctors or patent medicines he or she has ever used. Read this over again carefully, and understand that we ask our pay only when it has done you good, and not before. **We take all the risk; you have nothing to lose.** If it does not benefit you, you pay us nothing. We give you thirty days' time to try the medicine, thirty days to see results before you need pay us one cent, and you do not pay the one cent unless you do see the results. **You are to be the judge!** We know that when this month's treatment of VITÆ-ORE has either cured you or put you on the road to cure, you will be more than willing to pay. We know VITÆ-ORE and are willing to take the risk.

What Vitae-Ore Is:

VITÆ-ORE is a natural, hard, adamantine rock-like substance—mineral—ORE—mined from the ground like gold and silver, in the neighborhood of a once powerful, but now extinct, mineral spring. It requires twenty years for oxidation by exposure to the air, when it slacks down like lime and is then of medicinal value. It contains free iron, free sulphur and free magnesium, three properties which are most essential for the retention of health in the human system, and one package—one ounce—of the ORE, when mixed with a quart of water, will equal in medicinal strength and curative value of 800 gallons of the most powerful mineral water drank fresh from the springs. It is a geological discovery, in which there is nothing added or taken from. It is the marvel of the century for curing such diseases as **Rheumatism, Bright's Disease, Blood Poisoning, Heart Trouble, Dropsy, Catarrh and Throat Affections, Liver, Kidney and Bladder Ailments, Stomach and Female Disorders, LaGripp, Malarial Fever, Nervous Prostration and General Debility,** as thousands testify, and as no one answering this, writing for a package will deny after using. **VITAE-ORE** has cured more chronic, obstinate, pronounced incurable cases than any other known medicine, and will reach such cases with a more rapid and powerful curative action than any medicine, combination of medicines, or doctor's prescription which it is possible to procure.

VITÆ-ORE will do the same for you as it has for hundreds of readers of UP-TO-DATE FARMING if you will give it a trial. Send for a one-dollar package at our risk. You have nothing to lose but the stamp to answer this announcement. We want no one's money whom VITÆ-ORE can not benefit. You are to be the judge! Can anything be more fair? What sensible person, no matter how prejudiced he or she may be, who desires a cure and is willing to pay for it, would hesitate to try VITÆ-ORE on this liberal offer? One package is usually sufficient to cure ordinary cases; two or three for chronic, obstinate cases. We mean just what we say in this announcement, and will do just as we agree. Write to day for a package at our risk and expense, giving age and ailment, and mention UP-TO-DATE FARMING, so we may know that you are entitled to this liberal offer.

From The Earth's Veins To Your Veins

VITÆ-ORE comes from out of the ground, from the Earth's veins, the dust out of whicu man was first made, and flows like life through the veins of the sufferer, the sick and the needy, curing everywhere—always. It is the work the Ore was made fof, the duty for which it was put into the earth's veins, and it can no more help doing it than can man help following his natural destiny—the sufferer can no more resist its power, than can man resist the power of the sun, the tides or the earth itself.

CRUTCHES ARE THROWN AWAY bandages are taken off, purges are poured into the sink, hot water bottles laid on the shelf, as it courses through the veins and arteries, as it flows through the vital organs and does the work the Creator intended for it. New flesh appears on ulcerous sores, rheumatic blood is cleansed to remain cleansed. New sinews come on emaciated limbs, diseased kidneys grow healthy, weak stomachs become strong, and all because of this wonderful and mysterious influence rrom the Earth's veins.

It is different from anything that has ever before been offered, from other treatments you have used, as is pure milk from chalk and water or the brilliant sunlight from a tallow candle. It flows through your veins—pure as it came from the veins of the earth, and ACTS in a different manner, CURES in a different way.

OLD CHRONIC CASES are those it seeks especially. It matters not what you think, what you have thought, what the doctors think or what they would make you think. It counts not a whit what desperate efforts you have already made, what disappointing failures you have already been through. Try it! A trial will tell its own plain story, a story that will mean comfort, health and happiness for you.

Write For A Package Today

THIS announcemet won't cure you! The reading of it won't ease your aches and pains. The medicine advertised WILL, but if you NEED it, if you WANT it, you MUST WRITE FOR IT.

We have it and are willing to send it to you ON trial, AT OUR RISK, YOU TO BE THE JUDGE, but we cannot know that you need it, that you want it, unless you write to us and tell us to send it to you.

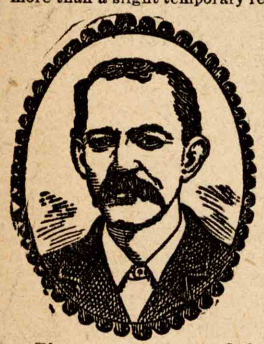
How many times have you seen OUR TRIAL OFFER in this paper? How many times have you THOUGHT you would answer it and send for a package on trial, AT OUR RISK? Now suit the ACTION to the THOUGHT, and write for it to-day. THOUSANDS have done what we ask you to do and are not sorry for having done it. You do it NOW! YOU ARE TO BE THE JUDGE!

TOOK MEDICINE FOR TWENTY YEARS

NO PERMANENT BENEFIT

Vitae-Ore Brings a Complete Cure

I feel it my duty to tell you, and also the general public, what Vitæ-Ore has accomplished for me. For the last twenty ycars I have taken all kinds of medicine, but at no time received more than a slight temporary relief. Three years



ago I took treatment from one of the best doctors at Leopold, Indiana, He examined me and gave as his opinion that I had Catarrh, Bronchitis, Liver and Kidney Trouble. I was at that time taken with a severe pain in my back which he diagnosed as Rheumatic-Lumbago. I doctered with him continually and persistently for five months' time, getting relief for only a very short time, and gave up hope of ever getting well again.

Vitæ-Ore was recommended to me by a friend who had used it and spoke of it very highly. I procured a full treatment and began immediately to use it according to directions. As a result, my suffering is now a thing of the past, and my cure is a permanent one, as this occured fifteen months ago, during which time I have felt as well as I ever did in my life and continue to feel so. I am forty-four years old. My wife also has reason to praise it strongly as I have, she having been cured by its use of a Stomach Trouble. I conscientiously believe that Vitæ-Ore has saved my life, and certainly will do all in my power to bring it to the attention of those about me.

JOSEPH L. MEUNIER, Apalona, Ind.

Trial Package Entirely Cured

Mrs. J. F. Morris of Stevens, Tex., Tell's of Wonderful Results from One Month's Treatment

Entirely Cured of Liver, Kidney and Bladder Disorders Which Previously Defied All Treatment

It Will Do As Much for You

I cannot express my gratitude for the great and lasting good that Vitæ-Ore has done for me. I had been taking medicine ever since October 1902, when I was first stricken down with my disease, a compli-

cation of Liver, Kidney and Bladder disorders. I took several different kinds of patent medicines, but none of them did me any good. My husband then called a doctor. He came a few times and then dismissed the case. He then called in two more doctors, the best this country affords, and one of them treated me two or three months, but he only gave me temporary relief. I dragged along all last year, never feeling like myself. In the fall I grew worse and again went to my physician and he treated me about eight weeks. I was almost ready to give up. I did not know how near death's door I was until a neighbor told me after I began to get better. Some one of our neighbors advised us to send for some Vitæ-Ore on trial, but I told my husband not to bother with it, as I thought nothing could help me. He sent for the treatment without my consent; and I now consider it the greatest favor he ever did for me. One month's trial package nas saved my live. I think I can safely say that I would have been in my grave to-day had it not been for this Vitæ-Ore. I have only taken the one trial package, but I feel that I am entirely well. When I commenced its use I weighed 98 pounds, but now in only five weeks' time I weigh 110 pounds. I would not give this medicine for all the medicine in the world, and I am not ashamed to let the world know what I have to say about Vitæ-Ore. I am willing to do all I can to help its cause.

MRS. J. F. MORRIS, Stevens, Tex.

A Certain And Never Failing Cure For

UP-TO-DATE FARMING

Our Motto, FARMERS TO THE FRONT *Our Object,* EQUITABLE PRICES FOR ALL PRODUCTS. *Our Plan,* CONTROLLED MARKETING

INDIANAPOLIS, NOVEMBER 1, 1905

THESE Jolly Farmers are as happy as they can be. They dance and shout for joy at the victories they have won and at the improved prospects for their business. They have been to the Annual Meeting of the American Society of Equity, and they recognize this as the first real national attempt to put their business on a basis equal to the best regulated business in the country. They have learned that as they have all the wheat, and corn, and oats, and cotton and cattle, and hogs, and beans, and fruit, and broom corn, and barley and truck; and as all the other people have none but what they get from them; and as they have everything on the farm to live on, and the other people can't live even a week without what they get from them; that they can get good prices for all their stuff instead of taking any old price offered by the other fellows. They are overjoyed to learn how to have enough money to easily meet all their necessary expenses and have many of the luxuries of life. Truly this meeting was the beginning of all good things for farmers, and next year they will have the biggest turnout this country ever saw by any class or for any purpose. Keep your eyes on the farmers and watch them come to the front joined hand in hand, shoulder to shoulder with joyous though powerful tread.

FOR THE CO-OPERATING FARMERS OF AMERICA

EDUCATION FOR FARMERS

Time for New Step to Be Taken

The earliest history, of which we have any record, mentions the fact that Adam, in the garden of Eden, tended it. We can scarcely conceive the condition of the first man, with his own resources, practically cultivating the ground without the use of manufactured implements. From that day to this and the same will continue for the ages to come, the farmer will be the man upon whom all the rest of the world must depend for one of the pronounced necessities of life. Man cannot live without air, water and food. Nature furnished the first two in abundance, except in isolated localities, while the latter is only to be had, by the active man, with the force of nature, with connection with the soil. It goes without saying, therefore, that the farmer, the food producer, is an important, if not the most important factor in all the world.

Commerce, of which we hear so much in business circles, and, in fact, in the legislative houses, would cut but a sorry figure, were it not for the products of the soil, as they have come from the farmer or the tiller thereof.

The education of the farmer has been very gradual and wonderfully slow. The evolution has not gone on rapidly as might have been expected, or as many of the wise men of the world hoped. The saying "The mills of the Gods grind slowly, but exceedingly fine," can well be applied to agriculture, through the ages that have passed. In the history of the world, the short time of one hundred years counts but little, but in this 20th century, the development of education along the lines of more profitable, more prosperous agriculture, has been much more rapid than in the years passed and gone—that is those years of which we have certain and absolute knowledge.

The saying "The man that makes two blades of grass grow where one grew before, is a benefit to mankind," has been the thought to which all agricultural educational development has been directed; but the question today arises, whether that thought has not been carried to the limit, and whether the development of increased production from the land, is the benefit to the world, that this thought expresses. Our agricultural colleges, experiment stations, individual schools, have all been directed toward teaching better methods, more scientific ways, cheaper plans for producing food, and the various articles that come from the ground. And today scientific agriculture has reached the point where one man, with well directed effort and the modern appliances, can produce not only two blades of grass where one grew before, but hundreds, with the same amount of labor.

Without taking up the politico-economic discussion of that theory, suffice it to say, that with the knowledge of how to produce food products, and other necessities of our modern civilization, the time seems to be ripe for the beginning at least of the discussions of how the farmer, the great food producer, can secure for his products, fair and equitable prices. The beginning of this kind of education has already been made, but has not been heretofore discussed, either by the farmers themselves or by the professors in the agricultural colleges, and experiment stations. All thought seems to have been directed simply toward production, and not at all toward distribution. It has occurred to me that the farmers institutes of the countries could have and should have directed the farmers to that end of their business, long before this.

The farmer labors, as other people do, first, to secure the necessities of life; second, some of the comforts thereof, and third, to lay up for the future rainy day, something in addition. How he can accomplish this best and to the good of all the people, is a subject that farmers' institutes and agricultural colleges could well devote some thought to.

Today we find in the commercial world, combination and concentration of capital and brains all directed to one thought and one point, to get most from the combination of labor and brains. These combinations may have depended for their very existence upon the control and handling of the farmers' products, caring but little, if at all, whether the producer received an equitable and just price for his labor or not. The methods of business in vogue today are the same as have prevailed for many years, where the farmer has but little, if anything to say as to what shall be the price of his products in the markets. He raises 1,000 bushels of wheat, or feeds 100 head of steers or whatever other products he prefers to raise, sends them to market, and the buyer fixes the price absolutely, the farmer having nothing to say, no regard being paid to the cost, by the buyer, simply get them at the lowest possible rate. On the other hand, when the farmer goes into the market to buy his necessary tools or implements or other articles, the man who sells the goods or articles fixes the price and the farmer pays. That's it—the farmers pay at both ends. The farmers pay to keep the wheels of commerce going and gets a bare living, as a rule, with not all of the necessities, and but few of the comforts and none of the luxuries of the present day. Why should not, the education being so generously and freely provided to the farmer, be directed at least partially along the lines of better methods, in disposing and distributing his products? Is there any reason why this should not and cannot be done? From our standpoint we can see none.

If the farmers, as a rule, would take hold of this phase of the question themselves and admit the fact that they are not up in that branch of their business, and ask for instruction and education along that line, it would be furnished them; but professors, like other people, move along the lines of least resistance. It is better for them to follow the old ways, than it is to blaze out new paths.

The pioneer of the early days of this country who suffered hardships innumerable, did grand work in developing the resources of this western world; but it required much hard work, much labor and many privations. So the pioneer in any great movement will have to suffer, will have to endure; but reward will come.

There is a practical side to this that may well be considered, when it is understood that of the 80,000,000 people in this country three-fifths of the actual workers and wealth producers are the farmers, or those interested in producing and distributing what is grown upon the soil; and what is good for three-fifths of the community and a benefit to them must certainly help the other two-fifths. And if better methods can be taught the producers of food products, by which they will secure a fair and equitable price for their labor, they certainly will become better buyers and users of what the mechanical part of the community produce.

The great thought of the world today is, how can the whole world be benefited by the action of each of us, or all of us, not only in this country, but the world over? We believe there is a tendency to-day, greater than ever before, to develop the better side of humanity, to teach men and women that there is something better in the world than selfishness. We read in the inspired book "that it is more blessed to give than receive." The world is remembering that thought to-day more than ever; and the minds and brains that are directing education in the farmers' institutes, we believe, are beginning to see that there is a broader field and one just as important in teaching the farmer better methods for distributing and selling his product.

Elgin, Ill. D. W. WILSON.

Montgomery Ward & Co.'s Customer's Dividend Certificates

are now being issued with every purchase. These certificates are the wonder of the mercantile world, and call for valuable articles of all kinds; a stupendous profit-sharing plan.

Full particulars, with photographic reproduction of a genuine Dividend Certificate and 16-pps. of valuable articles that can be obtained absolutely free of cost, are bound in our famous 1200-page Catalogue, a book we want every intelligent purchaser to have. This Catalogue is sent free to any address as explained below, and in addition to our liberal Customer's Dividend Certificate plan, contains a page of

Below Cost Trial Order Coupons

which enable you to secure at less than cost prices many staple articles that you have to use every day. Our new Catalogue, No. 74 is now off the press and ready for distribution. Cut out the coupon below, fill in with your name and address, and send for this catalogue at once.

Our Dividend Certificate plan will interest you, the Below Cost Trial Order Coupons mean dollars to you, the entire book should be in every home.

This Catalogue is the most **Convenient,** the most **Economical** and the most **Reliable** way of **buying anything** and **everything** that you ever saw or human ingenuity ever devised. No store in the world ever offered for sale such a vast collection of goods of all kinds for every person and every purpose, nor goods of so high quality at anywhere near so low prices.

We Lead the World

The Convenience of having Montgomery Ward & Co.'s great Catalogue on hand and ordering all your goods from it cannot be too strongly stated. This massive Buyer's Guide and Illustrated Book of Daily Bargains when in the home is right before you every day in the year and every hour in the day with all the benefits of

A Great City Store Brought to Your Door

It is wonderful in illustrating and pricing the very things you want, cannot do without, use every day and must have, and quoted here at lower prices than any retail or wholesale dealer in the world can give you.

So convenient and handy is this great catalogue that millions of people all over the world use it day by day and month by month for all their shopping. Turn its leaves. Look at the pictures. Note the low prices. Here are the foods, medicines and clothes of every day's necessity, the tools of every trade, the vehicles, implements, books, furniture and house furnishings that all require, the sporting goods, toys, jewelry, watches, harness and horse goods, the trunks, sewing machines, musical instruments, builders' hardware and the thousands of necessities and luxuries **here priced within your reach.**

No going to town to buy; no wearisome waste of time—and money. Look over the Catalogue; write us a letter. The goods are sent you at once, fresh, new—not shop worn—the newest style, city goods. That's the **Convenience** of Montgomery Ward & Co.'s plan of shopping.

The Economy of using Montgomery Ward & Co.'s Catalogue for making your purchases from, is shown you in **plain figures** on every page of that great book. **Get the Book.** Compare its printed prices with the prices **that you have heretofore had to pay** in your town stores. You will note with pleasure that **here** is your opportunity and **now** is your chance to obtain goods of the same or better qualities at prices lower by 20 per cent to 50 per cent than any you ever heard of. That is the **great economy** in patronizing the Montgomery Ward & Co. Catalogue.

There is **but** one Montgomery Ward & Co. Catalogue. **We alone** publish it. We alone can supply it. **It** is just off the press. Don't miss it. Don't miss this opportunity to secure your copy free.

The Large New Montgomery Ward & Co. Catalogue No. 74, for 1905-6, contains nearly 1200 large pages, thousands of accurate illustrations and descriptions of over one hundred and twenty-six thousand (126,000) articles, such as every one uses.

With each and every Catalogue will go to you our **Below Cost Trial Offer,** unprecedented and unapproached in its liberality. This offer is your opportunity, for it enables you, whether you have ever been a customer of ours before or not, to secure things you use and eat every day at prices you will know when you see them are really **below** the **cost** of the goods.

Every Catalogue, also, will contain full details of our **Customer's Dividend Certificates,** which Certificates we now present to you every time you buy a dollar's worth of goods. We give you a liberal choice of valuable articles to choose from, and redeem your certificates with such goods as you select, absolutely free. This is the greatest Profit Sharing Co-operative Plan ever inaugurated by any concern.

Our plans for your profit will surprise you. All told about in the No. 74 Catalogue, free.

We ask you to accept a copy of this large Catalogue **Free,** providing you are not a resident of a large city, or of Cook County, in which Chicago is situated. We positively will not send our Catalogue to large cities, so it is useless to ask it.

Montgomery Ward & Co.

are offering all **new** customers, an unheard of opportunity to secure goods on **Trial Orders** at prices absolutely **Below Cost** The goods offered in the **Below Cost Trial Orders** are such as **every** person uses **every** day and cannot do without.

Full Particulars in that wonderful new catalogue, No. 74. Sent **free** and **postpaid** — not a penny's cost. Get it **now.**

Montgomery Ward & Co.'s Customer's Dividend Certificate

exchangeable for many articles; issued **free** for every dollar's worth of goods you buy.

Full particulars in their great No. 74 Catalogue, which they **want** to send you **free.**

Just write and ask for it.

Sent by return mail, all paid.

All others are welcome to a copy, and one will be sent free and prepaid to you if you want it. All you have to do is to write us for it. Fill out the accompanying coupon, or send a postal card, or write a letter, whichever is easiest. Just say, "Send me free and prepaid one copy of your new No. 74 Catalogue." It is worth your while to do this **right now.** If you value convenience and economy in shopping, and wish to deal with a great house of established and proven reliability, where you can buy anything and everything at lower prices than others can possibly sell goods for, get the new, large No. 74 Montgomery Ward & Co. Catalogue at once, free, and profit by its bargains and its liberal profit-sharing and below-cost offers.

Volume VIII **INDIANAPOLIS, NOVEMBER 1, 1905** **Number 21**

Up-to-Date Farming

PUBLISHED TWICE A MONTH

J. A. EVERITT, Editor and Publisher

SUBSCRIPTION PRICE 50c A YEAR

Foreign Subscriptions $1.00 a Year

CLUBS. Five subscriptions, on any offer we make may be taken at the cost of four. This applies to five of one offer or it may embrace several offers. To illustrate, five 50 cent offers for $2.00 (40c each) or five $1.00 offers for $4.00 (80c each).

Many club raisers fail to indicate their names separate from the club. We want to know who our workers are, therefore **always write: "This club was sent by (name)."**

☞ Always state if a renewal or new subscription. **Don't Neglect This.**

Your Address should always be written very plainly, including **county.** Do not give street or box number when not necessary to facilitate delivery of your mail. If on a rural mail route use the letters R. R. before the number.

Renewals and Change of Address. Give the same name as before. If a change from one member of the family, so state.

If you change your postoffice, give old office as well as new.

If a mark like this ✓ appears on the first page it is to notify you that your subscription or renewal has been received. The publisher thanks you and he hopes you will be benefitted by Up-to-Date Farming and take it many years.

Advertising Rates will be quoted on application.

Only Reliable Advertisers are admitted to our columns. We guarantee that they will deal honestly with subscribers. However, should any advertiser in Up-to-Date Farming fail to keep his promise as advertised and not give a subscriber an honest deal, we will make good the amount of the loss, provided you were induced to deal with the party through his announcement in this paper only, and providing such transactions occur within a month of the publication of the paper, and that it is reported to us within a month of its occurence. It is understood that this offer is not binding on the publisher unless you mention Up-to-Date Farming when you write.

The Farmer's Union Label must be made the strongest link in the chain of organized farming, as it has long been the strongest link in the chain of organized labor. By the use of the Label an article is recognized as a product of organized farmers, and those who use such articles know they are patronizing and sustaining organized effort for improved conditions. Use the Label on your letters, envelopes and on your produce.

The solution of the Farmers 18 Labor Problems that will come through Profitable Prices means a demand for millions of union laborers.

Minimum Prices

Below are the prices recommended by the American Society of Equity. They are the minimum prices, *below which* farmers should not sell. They are all based on some central market, and the farm price will be enough less to equal freight and a legitimate profit to the handlers. Farmers should control their marketing so as to keep the market hungry and the demand seeking the supply, when they can make their own prices—control marketing so your crops go off of the farms over the period of a year instead of in a few months. *If those who can hold will hold all, and those who cannot hold all will hold part, then those who cannot hold may market and all will get the price.* This is the key to controlled marketing. The world must have your products at *your* price if it cannot get them at prices made by some other people.

Wheat, No. 2 red, Chicago, per bushel	**$ 1.00**

Booklet E 37

Wonderful to educate the people; 64 pages and cover. All we ask you is 6 cents a dozen to pay postage. Order a lot and distribute them.

Dumper.

Brand him.

Point the finger of scorn at him.

He is a dangerous member of society.

He is responsible for keeping farmers poor.

He is responsible for the existence of many trusts.

He is making many multi-millionaires.

He is a blot on American agriculture and if he continues he will become a repulsive thing in any neighborhood.

Panics.

Hard times.

Do you see any indications of them?

Has there ever been such a long period of prosperity?

Did we not tell you when we first proposed the A. S. of E. that hard times would be impossible if we kept farmers prosperous.

Have not farm prices been maintained ever since the A. S. of E. has been in existence?

Even with the largest crops the country ever produced and without serious shortages in other countries the prices were kept good.

Can you point to the same conditions in the past in the history of agriculture in America and particularly since boards of trade have been in existence?

Honest now, in view of the great number of farmers if they always earn good wages and make good profits EVERY YEAR, how can we have hard times. Imagine if you can nearly half the population of our country prosperous and making money right along and hard times prevalent. Why, it is simply impossible.

Organization is now in order. The third annual meeting of the society will have passed into history as our members and readers read this issue. Also the second annual meeting of The American Tobacco Growers' Branch of the A. S. of E. will have completed its work at the Owensboro convention.

A CALL!

Following the Annual Meeting of the A. S. of E. there should be state meetings in each state and territory in the country and Canada to promulgate the minimum prices and educate the farmers. We expect the National Union to act affirmatively on this proposition. Do you want a state meeting in your state? If you do, write a letter to The American Society of Equity, Indianapolis, Ind., and state where you think the meeting should be held.

November is the month in which we will begin our active subscription campaign. Tens of thousands of sample copies will be sent out and each one is an INVITATION to the one who receives it to become a regular reader and an active co-operator in that important branch of farming not considered worthy of attention by other farm papers, viz. The distributing end.

We hope before this issue reaches our readers that all orders that have been received for the New Equity Song Books will have been filled. We have the promise of having them from the publishers Oct. 21st, and shall send them out just as soon as received. While the size of the book has been greatly increased and some important changes in the music the price will be but slightly advanced. Single copy 35c postpaid, 1 doz. copies postpaid $3.00, 25 copies, not delivered $5.00.

John J. Ingalls' famous verse on opportunity should be studied and mastered by every farmer and now that the opportunity to organize on a rational plan and very inexpensively for the purpose of controlling marketing to compel profitable prices, is offered, it is the part of wisdom to act before that subtile something "opportunity" passes on and it is forever gone.

"Master of human destinies am I,
Fame, love and fortune on my footsteps wait;
Cities and fields I walk; I penetrate
Deserts and seas remote, and passing by
Hovel and mart and palace soon or late,
I knock unbidden once at every gate.
If sleeping, wake; if feasting, rise before
I turn away. It is the hour of Fate,
And they who follow me reach every state—
Mortals desire and conquer every foe
Save death; but those who hesitate,
Condemned to failure, penury and woe,
See me in vain and uselessly implore,
I answer not and I return no more."

Annual Convention Number

The Annual Meeting of the A. S. of E. came too late to get the report in this number. Therefore a full report will be printed in November 15th issue. This number will be the most valuable one ever issued of Up-to-Date Farming or of any other farm paper in instruction and value to farmers. In two preceding issues was a request to order bundles of this number to convert your neighbors. If you have not acted on this request please do so now.

No Tariff Revision

The President has said:

"I have come to the conclusion that a majority of the people, including Speaker Cannon, is opposed to tinkering with the tariff. I shall omit tariff revision from my coming message."

Those who have been working in the interest of revision hoping to benefit the farmers in the foreign markets will no doubt be disappointed. As far as the farmers are concerned it is well that this hope be abandoned as it was a false one. They may now try to do something for themselves along the line of fair and uniform prices.

CONVENTION NUMBER

November 15, 1905

Have you ordered your bundle?

Of course you are going to help in this work. We only ask a little of you.

We would not ask this little if it was possible to get along without your help, but it is not.

We don't know your neighbors names. Hence you see we cannot reach them and call upon you to supply them each with a copy of the Great Convention Number November 15th issue of Up-to-Date Farming.

One hundred copies of this number distributed in your neighborhood will have a lasting influence on the people and we predict will improve prices of your crops almost at once.

Here's what we want you to do. We want you to order a bundle of the convention number at the special rate here quoted.

Each copy of this number will cost over 1 1-2 cents to produce and mail. The publisher would offer them entirely free if he could afford to do so, but he cannot.

A bundle of 10, 15 cents post paid.

A bundle of 25, 30 cents postpaid.

A bundle of 50, 50 cents post paid.

A bundle of 100, 75 cents post paid.

Larger quantities at same rate.

EVERY READER of our paper wants its teachings to reach every farm home in the county; therefore order a bundle to convert your neighbors.

EVERY MEMBER of the A. S. of E. wants his hands held up by his neighbors; therefore order a bundle to convert them.

EVERY ORGANIZER wants to convert the people so he can organize them; therefore order a bundle. You never had such propaganda material before.

EVERY LOCAL UNION wants to increase its membership. There is no better way than to order a bundle of this issue.

If you cannot possibly pay the small price asked, then send the names of your neighbors and we will mail them direct.

This number will be a revelation to those farmers who possibly have not heard much about the American Society of Equity.

Cut out below and send.

Pub. Up-to-Date Farming.

Indianapolis, Ind.

Please send to me prepaid.....

copies of November 15th Convention Number for which I enclose $.....

Address .....

.....

Price, 10 copies, 15c; 25 copies, 30c; 50 copies, 50c; 100 copies, 75c.

My subscription expired some time in August. Please find remittance of $1.00 for renewal for two years. I would be pleased to send you a new subscriber, but all the neighbors now take Up-to-Date Farming.—Herman Friedel, Kenmare, N. Dak.

CROP AND MARKET NOTES

Did you ever stop to consider that notwithstanding the bulls have the crops killed off many times over, the world always has raised enough food to meet the demand, and notwithstanding the bears, in their reports, have the grain and cotton knee deep over the face of the earth and new bearing stalks sprouting up throughout the piles, that when the year is around it is all used?

It is a wise provision of nature that there is always plenty, if it can be wisely distributed and never such an abundance but what all will bring good prices if the supply is wisely controlled.

"And He gave man dominion over all." If God gave man dominion over the flocks in the field, the birds in the air and the fish in the seas did he not give him dominion over the grain produced in the field? Did not God intend the farmers who first own it to wisely use it, first so it will be a blessing to him who gave his toil to bring it forth and second so it would not cost the final consumer more than a fair sacrifice?

We see in a recent Austin, Texas, paper this item:

"Potatoes are steady at 90 cents a bushel"

Yet at the same time 30s to 35c were the farmer's prices in the north. This is too much difference. Oftentimes this inequality makes a famine of money at one end and a famine of food at the other end, but the middle people never suffer.

The yield of grain crops this year is the greatest this country ever produced. But shortages in some foreign countries exist to more than equal any surplus we have. Therefore farmers need not be alarmed about low prices or surpluses to carry over. We think, however, that this will be a pretty safe time to accumulate a surplus against possible short crops that are bound to come.

The exports of corn are increasing. We welcome the buyers for we have the goods.

It would be a novelty, indeed when the government did not issue a monthly crop report that demoralized business. The cotton growers have been hit again. But we urge our southern brethren to be of good cheer. You've got the cotton and enough of you are controlling your supply so the world can't get along without this part. They will come to your price when the dumpers are done marketing. The wheat growers won twice. You can win also.

The Southern Cotton Asso., and the Farmers' Union have agreed on 11c as the minimum price for the 1905 crop of cotton. This is intended to be the country price and is practically the same as 12c on basis of New York.

The cotton growers are in earnest. They have learned the power of controlled marketing and they are going to exert it. Read the following letter printed in the New York Commercial and sent by F. B. Alexander:

A small farmer, raising six or eight bales of cotton, a recent convert to the Baptist religion, brought one bale of cotton to market today, wanting to buy a shirt to be baptized in next Sunday. He was offered 10c; swore that a religious farmer could not go back on the action of the Southern Cotton Association, and asked a customer of mine to lend him a shirt for the baptismal occasion, so that he would be able to hold his cotton. The shirt was lent and the converted farmer took his bale of cotton back home to await an 11c market.

The corn crop is variously estimated from 2,400,000,000 bushels to 2,700,000,000 bushels. This is a big crop, but this country and a few of its wards on the other side of the pond who look to Uncle Sam for dinner, have demonstrated their ability to absorb anything in the line of a corn crop that comes along. The farmers have been trying for three years to overdo the corn production stunt, but they have not succeeded.

"The apple crop is light." This is the report from nearly all important producing sections. Good prices can be obtained on all controlled crops as buyers are seeking anxiously.

Potatoes suffered heavily from blight and rot. The crop is light, quality inferior. Prices should be liberal.

The U. S. Bureau of Labor has issued a bulletin the result of the reports of several thousand experts, as is claimed, that goes to show that the cost of living is increasing, on account of the greater cost of food.

The conclusions are that laborers work shorter hours but get slightly more pay, and are paying more for the necessaries of life.

We don't know how correct these conclusions are but are not inclined to place much credence in the report because of the following reference to the item of potatoes:

> The estimated yield of Irish potatoes in the United States was 247,127,880 in 1903, against 332,830,300 in 1904, but the increased production did not prevent an increased price. In many localities the price was practically double the price of 1903.

It is possible that this is an error and the terms should be reversed. The 1904 crop of potatoes sold at the lowest prices in many years instead of selling for practically double the 1903 prices. except in localities they may have been higher. But reports having a national complexion should not be based on local conditions, Too much care cannot be exercised in preparing reports on subjects of such vast importance and that will be given wide publicity.

Broom corn crop is being eagerly sought after and prices are high for good to choice brush. We particularly caution our Oklahoma readers to not sacrifice their crops.

Bean prices show weakness on account of arrival of new crop. It's always so. But why should it be?

Tobacco growers must keep up courage. It is an axium that two bodies cannot occupy the same space at the same time. It is also true that if the demand is at present suuplied you cannot force it to take more, except at the price made by the demand. This would result in putting your day of independence off. Tobacco is a crop that improves with age. It is only natural that large quantities should be in store from the time you were giving tobacco away. This must be reduced first, It will disappear if you refuse to feed more into the hopper. Dam up the source of a stream and the stream will soon run dry. Drawing out of the warehouses and not putting in soon shows the bottom. our theory is right, your plan is right. How can you lose if you remain faithful?

Wheat prices are advancing. Remember there are great shortages in some European countries, but they will have enough until probably the first of the year without much importing. Control your crop for the minimum price. You'll get it, for your wheat will be needed.

Corn prices are remarkably well maintained considering the three enormous crops in succession and the fourth one which breaks all previous records.

Twelve cent cotton (11c in the country) is a fair price to grower and consumer. If it can be maintained at this price year after year the benefits to the many ramifications of the cotton manufacturing industry could not be estimated. Manufacturers should join heartily with the cotton growers for uniform prices. The gamblers are the only ones who will object.

No crop is to great or too small for the plan of the A. S. of E. to fit and compel profitable prices. The peanut growers are asking for organization. We'll help them.

FARMER'S INCOME AND FARMER'S TAXATION

By EUGENE MATROSOW, D. C. L.

No attempt has ever been made to undertake an investigation into the systems of taxation of the most important states of the union at least as affecting the agricultural classes of the country. Of course in some reports of some tax commissions, some special committees on taxation and some boards of equalization of some states as well as in some reports submitted to the local legislatures and to both Houses of Congress we may find some scattered remarks throwing a little light on the matter but all this is too insufficient to make a proper comprehension of the subject of such tremendous importance, possible.

Such being the case, it would be simply absurd to try in an article of a few columns to present the 49 systems of taxation existing within the boundaries of the United States in their essential features and their bearings upon the economic condition of the agricultural classes of the country and welfare of the American farmers. It should always be borne in mind in this connection that as a whole the mixed system of taxation at present existing in the United States is so confusing that it is almost impossible for an individual intellect to grasp it in its entirety and its bearings upon the economic condition of different classes of the American people. Consequently it is extremely difficult to present how this system is affecting the agricultural classes and farming interests of the country. The difficulty is being increased an hundred fold by the fact that thus far no statistics relating to the farms, farming interests and agricultural classes especially and exclusively have ever been collected in this country. In the official statistics of all the states of the union as well as of the United States the agricultural population, farming classes are invariably treated simply as a part of a supposedly homeogenous rural population; nonurban classes and their affairs and interests are invariably helplessly confounded with the affairs and interests of the residents of villages, townships and small towns generally. Thus we have to limit ourselves to the exposition of the most salient points of our subjects, the most important inferences and the most inevitable conclusions.

The report of the division of statistics of the United States Department of Agriculture for 1897 contains a few pages relating to local taxation as affecting farms in four counties of New York state, thus being the only, though partial, exception among the mass of existing official statistics of the country on taxation. From these few pages we learn that 1,114 farms of four either purely or mainly agricultural counties of the New York state, selected for and covered by the special investigation directed by the Society of Agriculture of the United States, represent the three classes of real estate—the cultivated land, the uncultivated land, and the buildings—of total value of $7,257,802. In these farms there are 76,474 acres of cultivated land having an average value of $41 and altogether worth $3,135,519, and 64,766 acres of uncultivated land having an average value of $15 per acre and altogether worth $198,072, while the buildings on these farms have a value of $3,164,211. Thus the total value of the entire real estate in these farms being $7,257,802, the personal property on them is valued at $987,483. The valuation adopted by assessors is: Real estate, $4,419,133; personal property, $207,800; total, $4,626,933. The entire tax paid for these farms and the personal property on them is $42,656.80.

It will be seen from the above that of the total value of the entire real and personal property combined the cultivated land is 3 per cent., the uncultivated land is 11.6 per cent., the buildings are 38.4 per cent and the personal property is 12 per cent. In particular the total land is 49.6 per cent. and the total real estate is 88 per cent. of the total value of the real and personal estate combined. The unimproved land value constitutes 34.5 per cent. of the true total value of both real and personal estate reckoned together and 39.2 per cent. of the true total value of the real estate alone. The assessed valuation of the real estate of these farms is 60.9 per cent. of the true value of this estate and the assessed valuation of the personal property on these farms is 21 per cent of the true value of this property while the assessed valuation of both real estate and personal property combined constituting 56.1 per cent. of their true value combined. Finally, the rate of taxation on the assessed valuation of the real and personal property of these farms is 0.92 per cent.

From the same offiicial report we learn also that while the total value of the entire real estate in these farms is $7,257,802, the unimproved value of the same real estate—that is what the entire land cultivated and uncultivated would be worth if uncultivated and unimproved with suitable allowances for favorable or unfavorable situations, for fertility, for tillable qualities, and for other matters affecting value—is estimated at $2,872,192. In other words, the estimated total unimproved value of the land is 39.2 per cent. of its true value. The proportion they ascertained which the unimproved land value of the farms bears to their entire real estate value is of extreme importance as it furnishes us with a proper basis for comparison between city and country real estate in this respect. It is a well known fact that the value of the land without improvements in the large cities of the United States constitutes about 60 per cent. of the whole value of the real estate. It appears, therefore, that if the real estates of the farms in the United States were assessed at their unimproved value only—that is to say, at what they would be worth without any buildings, fences, drains, or cultivation, and the city real estates in the United States were assessed also at their unimproved value only, that is, at what they would be worth without any buildings or in other words, if all the land were assessed in the United States in the city as well as the country, just on an uncultivated basis only at its unimproved value, the farms would have to pay just about 40 per cent. of their present real property taxes, while the cities would have to pay about 60 per cent. of their present real property taxes. The conclusion, while being extremely important by itself, should be constantly borne in mind in order to properly and sufficiently understand the distribution of taxation between the agricultural and all the other classes of the country, between the farming and allthe other interests in the United States.

So far back as in 1884, fully twenty years ago, the tax commission of the State of West Virginia which contains no large cities and thus should be considered as a mainly agrcultural one, testified to the inefficiency of the tax on personal property in the following terms:

"Things have come to such a condition in West Virginia that, as regards paying taxes on this class of property, it is almost as voluntary and is considered pretty much in the same light as donations to the neighboring church or Sunday school."

Since that time the tax commissions and other permanent officials of taxation of other States and particularly and especially manufacturing ones containing many large cities, testified to the inefficiency of the personal property tax much more emphatically than the West Virginia tax commission of 1884.

The Ohio tax commission of 1893 in its report to the governor of the State stated in most emphatic terms that the taxation of personal property in cities was a mere farce and that it was the rural districts which bore by far the heaviest proportionate share of taxes upon personal property.

A special committee on taxation and revenue of the California State Senate testified to the insignificant assessment of tangible personal property in the following terms:

"This ridiculously small amount would not be important, if the apparent undervaluation was uniform on all. But it is not. The small stock of merchandise, the farmer's team and milch cows are seen, counted and assessed while the larger possessions of those best able to pay are only guessed at, and the guess is always low enough."

The assessments of the State of Massachusetts, more elaborate and more reliable than those of any other state of the Union, show that, while in the city of Boston the value of assessed personal property constitutes about 21 per cent of the total assessed value of real and personal property combined amounts to not less than 26 per cent. of the total assessed valuation of real and personal property reckoned together. In other words, while the State

of Massachusetts, excluding the city of Boston, pays personal property taxes amounting to 26 per cent. of all its taxes, the largest and the richest city of the commonwealth pays just 21 per cent of its full taxation as personal property taxes, i. e. much smaller proportion of the latter for the whole of the State. Thus the assessment figures always made with the most remarkable fidelity fully support the assertions of permanent tax officials of different States cited above.

It has been shown five years ago that acre property in the vicinity of large cities which is usually held for speculative purposes is invariably assessed much lower than either city lots or farms. Such criminally low assessment of speculative suburban lots has been discovered in the vicinity of Washington, D. C., Philadelphia, Pittsburg, and Scranton, Pa., Cleveland, Ohio, Chicago, Ill., Minneapolis and St. Paul, Minn.—(Political Science Quarterly, 1998.)

Massachusetts commission taxation found seven years ago that in one of the hill towns of the western part of the state fourteen tracts of abandoned land, which having been assessed for taxation at $6.01 per acre, have been sold a few months later for $2.56 per acre t. i., the said tracts have been assessed at almost three times their selling price. Such a thing certainly never could take place in any city of the United States.

The laws of many states (Massachusetts, California, Ohio, Missouri, etc., require from every taxpayer a detailed list of all his property of every kind, real as well as personal which then is separately classified and assessed, for local taxation. In regard to the practical working of the listing system it appears that, while the proportion of personal property belonging to the farmers which is assessed and taxed under the listing system is greater than it is where that system does not exist, in all cities governed under that system the proportion of personal property of city real estate owners shrinks about as much with each succeeding year as in the cities where no lists are required. Thus though a larger proportion of personal property to real property is assessed under the listing system, such increase in personal property assessed and taxed under the former has been attained exclusively at the expense of the farmer of the listing states. As the states of Missouri and Ohio have the most stringent listing laws their valuations for the purposes of taxation present the best and most reliable basis for comparisons in this respect. Thus in the four counties of the state of Missouri only ones which have any important cities within their limits, personal property of the taxpayers is assessed at less than 20 per cent of the real estate valuation while in the remaining 111 counties which are rural in their character the same is assessed at 46 per cent of the real estate valuation. In a similar manner in the four counties of the state of Ohio which include the four great cities of Cincinnati, Cleveland, Columbus and Toledo personal property of the taxpayers is assessed at 26 per cent of the whole valuation of real and personal property combined, while in the remainining four counties which are principally rural, the same is assessed at 32 per cent of the whole valuation of real and personal property combined. Taking for comparison the four city counties of Ohio and its five exclusively rural counties we find that while the value of assesed personal property in the former constitutes 26 per cent of the whole valuation of the real and personal property combined, in the latter it amounts to 32.5 per cent of the whole. Again, taking for comparison the county of Hamilton of the same state, which consists almost entirely of city lots and the county of Medina which consists almost entirely of farms, we find that personal property in the former is assessed at only 25.4 per cent of the entire valuation of real and personal property of the citl lot owners while personal property in the latter is assessed at fully 37.5 per cent of the entire valuation of real and personal property of farm owners.

If thus many states of the Union by the adoption of the listing system, resulting into a more stringent assessment of personal property, just increased proportionately or rather disproportionate burden of taxation thrown on the shoulders of the American farmer, such disproportion in relative assessment and taxation of personal property on farms and in the cities exists in no unconsiderable degree in these states also where no detailed list is required from taxpayers. For instance, while in the county of Monroe of the state of New York containing the city of Rochester, the assessed valuation of real estate is more than double that of the county of Oneida the assessed valuation of the personal property to the latter is almost double that of the former.

The foregoing facts and statistics show quite clearly so far at least as local taxation is concerned that (1) a tax upon personal property does invariably bear far more heavily upon the farmers than it does upon the inhabitants of large and wealthy cities, and (2), if farms were assessed at their strictly unimproved value only that would be about 40 per cent. of their improved value, while on the other hand, an assessment of city lots upon their unimproved value would amount to about 60 per cent. of their improved value.

As in almost all the states of the Union the state taxes are apportioned on the basis of the assessed valuation of the counties and as the rate of taxation for state purposes is usually just a small part of the total tax rate it follows that the foregoing two conclusions in regard to the present distribution of burdens of local taxation between farming and non-farming classes and interests in the United States hold just as good in regard to the present distribution of total taxation between the agricultural and non-agricultural classes of the country.

There is no question but that all over the country the American farmer is greatly overtaxed. Of all classes in the United States he has the least chance to escape taxation. The real estate itself considering its improved value, is usually assessed much higher in the country than in the cities, especially where the same officials make the assessments in both. Wealthy and influential city taxpayers usually succeed in having a man chosen as assessor who will favor city property. While nowhere in the United States is it pretended even, that any property is assessed atits full value, personal property of the farmer is usually assessed at from 40 to 50 per cent. of its true value, but other forms of personal property like merchandise bonds and mortgages, bank property, etc., are usually assessed at from 10 to 15 per cent of their true value. The farmers' personal property is all visible and they cannot escape the assessor's eye. Moreover in most of the states he is required to swear to a minutest statement of his possessions in the shape of a detailed list of all his property. Such list presents, as a rule, a specific enumeration of 91 separate articles. Of these 91 seperate articles which must be included in the list required from each taxpayer in the said states, 42 are absolutely peculiar to the farmer, such as hay, hops, butter, cheese, wood, horses, cattle, colts, calves, cows, hogs, etc., and upon them he must pay while upon almost all of the remaining 49 articles he stands in owning equally with all other members of the community. Again, the assessor knows fairly well the value of all the articles peculiar to the farm while he is not so familiar with the value of different species of merchandise and consequently is unable to correct their valuation by the merchant, the more so that the latter is usually entitled by the law to give a rough sum for his assessment.

Thus it is apparent that agricultural classes and farming interests of the country pay much more than their just share of local as well as of state taxes, that the burden of taxation lays mostly on their shoulders. This is due not so much to the under-assessment of urban real estate which causes the American farmer to pay from three to eight cents too much on each $100 of his real estate annually, but much more to the fact that the bulk of his personal property consists of visible and tangible implements, stock and household goods while the personal property of the inhabitants of the cities is to a much greater extent of an invisible and intangible character which makes it difficult, or even impossible to find or consists of luxuries which though visible in the houses of the taxpayers, require, however, expert knowledge on the part of the assessor to value properly.

It is not hard at all to find the causes of such a flagrant inequity. The existing system of taxation known under the name of the general property tax, is founded upon the general and plausible theory that all property of every kind, real and personal, visible or invisible, tangible or intangible, should be fully assessed at its market value and bear its equal proportion of taxation. While not questioning the soundness of the system which imposes the same tax upon every species of property, irrespective of its nature, class or condition, at this juncture we shall state, however, that though it was well enough adapted to the American colonies at the time of its adoption it has been undoubtedly outgrown as manufacture and commerce have developed. Its adoption to the homogenous agricultural population of this country in its older colonial days does not make it, however adaptable to the modern industrial state as the United States is at present. Although this is not equally true in respect to all the states, it is true enough, however, in respect to the Union as a whole, while this system of the general property tax so called, effectively reached homogenous and mostly tangible property of colonial and even anti-rebellion America, its failure to reach for taxation modern forms of property, especially those of corporate and intangible character, is apparent. It is clear that there are at present numerous forms of wealth of relatively modern origin that under this system do not and cannot be made to bear a just share of burdens of taxation and that in a large part evade or escape taxation, on the one side, and on the other, other forms which are disproportionately, unjustly and oppressed by taxes as compared with the former. The inevitable result of all this is that real estate in the country, farm land and all forms of personal property peculiar to the farmer are unduly overburdened with, and deeply oppressed by taxation.

It would be almost impossible to determine the amount of taxes at present levied on the average American farm on account of lack of any statistical data in this respect. Reports of the last census show that of 5,739,657 farme in the United States June 1st, 1900, there were of 100 acres and under 175—1,422,328 or 24.8 per cent. As thus the farm of 100 acres is the predominating one in this country, we can safely accept it as an average and typical American farm. According to the same reports the annual income from the average American farm is $656 or deducting the average expenditure for labor and fertilizers, $582. According to the most careful and elaborate approximate calculations the taxes levied on the American farm of 100 acres amount to $70. Thus it appears that the taxes levied on the average American farm amounts to fully 10.6 per cent. of its gross income or 12 per cent of its gross income with expenditure for labor and fertilizers deducted therefrom. The enormity of the rate is so apparent that we abstain ourselves from any comment thereon.

It should be remembered also in this connection that by continuous depression in prices caused by fictitious dealings in agricultural products on American boards of trade produce exchanges, etc., this country loses at least $300,000,000 annually. As this annual loss is sustained by the American farmer it should be considered as a special tax levied on him for the benefit of gamblers and fictitious dealers in agricultural products at the rate of over $5 per farm, therefore the taxes levied on the average American farm ought to be estimated at $75, or 11.4 per its gross income or 12.7 per cent of its gross income with expenditure for labor and fertilizers deducted therefrom.

It should not be forgotten also in this connection that the constant movement of population and of wealth from the country to the city exhausts the wealth of agricultural classes in the United States. The farming dis-

(Continued on Page 19)

LAST CALL!!

In this issue we print another blank to be used to order copies of the convention number. This is the last call before the number is printed. We hope those who have not ordered their bundle to convert their neighbors will attend to it at once. Remember, we will print as large an edition as is demanded. This number will be powerful to make equitable prices wherever it circulates.

You cannot do more good to your neighborhood than to place a copy of this number in the hands of each farmer.

Conventions and Meetings

Madison County (Ill.) Union was organized by C. O. Drayton, state organizer for Illinois at Edwardsville on October 14th, 1905. Eight Local Unions were represented as follows: Highland No. 1 and 2; Marine No. 1; Alhambria, No. 1; St. Jacobs, No. 2; Oak Grove, No. 1; Formosa, No. 1; Grantfork, No. 1. The following officers were elected: C. O. Drayton, Highland, R. R. No. 1, Pres.; Julius Reinhart, Highland, Sec'y; delegate to National Union, C. O. Drayton.

Osceola County (Mich.) Union was recently organized and the following officers were elected: Wm. E. Robinson, Evart, R. R. No. 1, Pres.; Geo. W. Delamarter, Sec.; Delegate to National Union, Wm. E. Robinson. We regret at time of going to press full report had not been received.

Okeene, (Okla.) L. U. No. 6, strongly recommended the Farmers' Telephone and Clearing House ideas, also asked that the National Convention render such assistance as within its province to aid in securing the admission of Oklahoma to statehood to which she is unquestionably entitled. Also expressing a willingness to bear its part of the expense necessary to carry out the plans of the society as approved by the delegates in attendance.

CHARLES JULIUS.
Delegate Annual Meeting, Okeene, Okla.

Resolutions

To the County and Local Unions and officers and Members of the American Society of Equity and to the Public Generally:

Whereas, I have been engaged more than forty years and residing in Arkansas thirty-five years and knowing the conditions of the agricultural classes from observation and feeling a natural sympathy for those of our order who are oppressed with debt which they cannot meet if forced to sacrifice the products of their labor and toil and that Equity and Justice may be done to both debtor and creditor. Therefore I offer the following resolutions:

Resolved, That we hold our 1905 cotton crop for the minimum price, 12 cents, and if any merchant, doctor, blacksmith, carpenter or any other public business man whatsoever shall cause any member of this Union to sell his or her products before it reaches the minimum price the members of this order will forever withhold their trade or patronage from any such person compelling them to sell except it be to pay for gathering or storing the products of the farm.

The above resolution is not intended to wrong or defraud any person or persons out of the value of anything, but is intended to enable the farmer to pay his or her debts for the farmers all are convinced that they will never pay their debts at the present prices of the products of the farm. I sold my 1904 cotton crop at an average of 7 cents per pound and afterward bought the following bill of goods: One cotton hat, weight 3 oz. Paid $1.50. So you can see I paid 50 cents an ounce which is eight dollars per pound for my cotton back. I also bought one boy's suit of clothes, price, $5.00. Paid $4.25. I also weighed the suit of clothes. Weighed 3½ pounds. So you can see that I paid over one dollar per pound for the clothes. Now figure 500 pounds of lint cotton at 50 cents per ounce, allowing no loss and we have four thousand dollars. Now just think about that cotton being bought for 7 cents per pound when will farmers get out of debt taking the above for an example.

Resolved, Also be it known, to all of the members of the A. S. of E. that are not willing to sell their farm products when it reaches the minimum price or so much of it as will satisfy his or her debts if his or her creditors in case he or she wishes their money paid to them, any member refusing to sell his crop or so much of it as will satisfy his debts shall be expelled from the order of the A. S. of E., their names published in the Up-to-Date Farming and thereby forever debarred the privilege of affiliating with the order of the A. S. of E.

Respectfully submitted by
W. F. CATLETT,
President Golden City L. U. No. 1.
Approved and adopted by Golden City L. U. No. 1, Sept. 23d, 1905.
Adopted by Sugar Grove L. U. No. 1, A. S. of E., Sept. 23d, 1905.

Blount County

Resolved, That we, the members of Snead Local Union, No. 5, of the American Society of Equity do refuse to sell any cotton seed for less than 30 cents per bushel, and will absolutely hold for the same, and we ask the co-operation of all other locals in the state and also ask the co-operation of all other farm organizatins in the State of Alabama.

Adopted, this, 26th day of Sept., 1905, by Snead Local Union of the A. S. of E.,
C. C. Sulser, Sec.

The following very pointed and pertinent recommendations for consideration at the Annual Meeting were received from Colfax, Wis., L. U. No. 3:

"Do not try to control the markets until well organized.

"Have all dues paid once a year, say in October of each year.

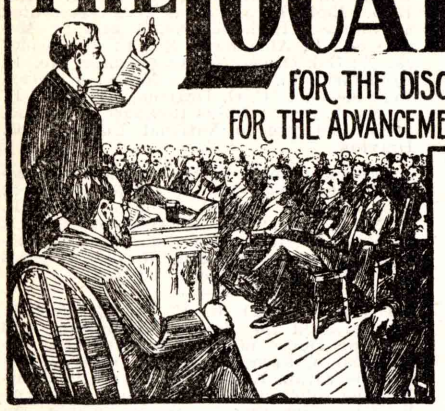
"Have farmers own and operate their own stock yards at the earliest date possible." FRED CURRIER, Pres.
C. N. Amble, Sec.

I wish to support Bro. Drayton's motion to amend Article VII of the Constitution and By-Laws but would suggest that if carried it go into effect Jan. 1st, 1906, thus giving a little notice and opportunity to those wishing to "get in cheap."

H. B. NORTHRUP, Kibbie, Mich.

THE LOCAL UNION

FOR THE DISCUSSION OF ALL FARM PROBLEMS FOR THE ADVANCEMENT OF CO-OPERATIVE FARMING



THE AMERICAN SOCIETY OF EQUITY

Is an international organization, incorporated, with headquarters at Indianapolis, Indiana, and whose first and principal object is: "TO OBTAIN PROFITABLE PRICES FOR ALL PRODUCTS OF THE FARM, GARDEN AND ORCHARD." It also has other objects of great importance to agricultural interests, which will be worked out as the organized farmers desire to take them up. The supreme body is

The National Union

Composed of the officers, directors and accredited representatives from subordinate bodies. The unit of organization is

The Local Union

This is the home workshop of the American Society of Equity. In it, must be forged and shapened the interests that shall revolutionize agriculture, and usher in the time when the soil tiller shall no longer be a "hewer of wood and a drawer of water" for other classes, but when he shall stand erect, an important and independent member of society.

The Union Label

Is intended to designate the products of Union or Co-operative farmers. It should be used wherever possible on farm produce, crates, onletters, advertising matter, etc. It will be supplied to members of the A. S. of E. and members of other farmers' organizations that have for their chief object Profitable Prices for Farm Products. The price is $1.00 per thousand, 500 for 50 cents. They are supplied on gummed paper and on tags.

The Fee

Is $1.00 for members at large and $1.00 a year. Charter members of local uni ns pay no membership fee but a charter fee of $12.00 is charged, no difference how large is the union. Members of local unions pay 30 cents quarterly. Members at la ge are individual members, outside of local unions. Each member receives a certificate, a badge, all bulletins and other public documents issued from headquarters, and Up-to-Date Farming, the official paper, paid for by the National Union.

Supplies, including books, blanks, etc., are furnished FREE to all new local unions and all old ones that ratify the new constitution.

Complete instructions will be sent free on request, how to organize local and county unions and all information about fees, dues, etc.

The Emblem

of the American Society of Equity as here shown, is symbolical of PRICE, being on an equality with PRODUCTION AND CONSUMPTION.

Will Not Quietly Submit

"The world's greatest great men were not made great in a day, or by traveling a rosy path to victory. They fought, defended, overcame difficulties and forged ahead. They burned the bridges as they advanced—never yielding to the temptation to turn their backs to the conflict and give up the battle as lost."

This is what we must do in the A. S. of E. if we are to achieve the great success that lies before us. Those who have been making the greatest profits out of the uncertainties of the farmer's business are not likely to quietly submit to the new order of things without opposition. Already their vampir like cries have found place in a few papers of local importance while the "Packer" and some other of the mouthpieces of corporate greed have endeavored to palm off on the farmers as Associated Press dispatches villifications intended to prejudice the farmers against the society and some of its officers.

The thing most strikingly noticeable in their attacks is the absence of those former statements they were so wont to put in big letters two years ago: Visionary—a pipe dream controlled marketing impossible—farmers cannot make prices—supply and demand only determines prices, etc., etc. This proves beyond question that they now realize the farmers power and are seeking by the most despisable means to create suspicion and dissatisfaction within their ranks and thus continue their plunder.—M. W. T.

State Conventions

After the Annual Meeting auxiliary meetings should be held in every state in this country and Canada to educate the people what to do to make and maintain prices.

Such meetings are particularly important now in view of the inimency of the new and prohibitary German tariff. How many will second this motion?

We are depending very largely on our present readers, members and friends to assist us in extending the circulation of the official paper and thereby the education which must precede organization and co-operation. If each will do his or her part we shall be able to double our present circulation before the season is over and this will increase the effectiveness of our efforts to control marketing and to compel profitable prices many fold. Let the slogan be, "get one new member," at least one new subscriber.

A Daily Paper Almost Free

IT is not often that such a bargain as the following can be made to any people. And this bargain is so good and so unusual that it will be open only a short time. The offer may be withdrawn November 1.

THE OFFER—by special arrangements with the publishers in Chicago (at the greatest market of farm products in the world) we are able to offer to members of THE AMERICAN SOCIETY OF EQUITY a daily newspaper (published every day in the year except Sunday) FOR ONLY $1.50, including a years dues to the A. S. OF E. and a year's subscription to UP-TO-DATE FARMNG.

Don't misunderstand us. For $1.50 you get all we mention, viz.: A daily paper for a whole year (312 copies), with daily market reports, including prices, receipts and shipments, together with all the important news of the world, a good short story, etc.; Up-to-Date Farming one year and membership or dues in the American Society of Equity.

This offer may also be taken by members of Local Unions or those who become members of Local Unions. In that case pay $1.50 to your secretary and you will have only 10 cents quarterly to pay afterward for one year, which is the local union portion.

Members whose subscription is paid in advance for their paper will be extended a full year.

This offer is to MEMBERS of the A. S. of E. ONLY, and those who become members, and is made to supplement the work of Up-to-Date Farming in keeping members better informed about marketing their crops. Please use below coupon.

Pub. Up-to-Date Farming, Indianapolis, Ind.:

I want to avail myself of your offer of a daily paper to members of A. S. of E., and enclose $1.50 herewith.

Are you a member at large?

Are you a member of a oLcal Union?

Name.....

Address.....

Date.....

Has Your Charter a Seal

It has come to our attention that a few charters were mailed without having the "gold seal" attached at the left of the signatures of the President and Secretary. This is to be regretted and if the secretaries receiving charters, with no seal attached will report the fact to us a seal will be forwarded at once and should be attached by the secretary. This will improve the appearance of the charter wonderfully.

Do not overlook the importance of the Convention Number containing a full report of these meetings. It will be just the thing for educational purposes and anticipating the demand for them we have planned for 100,000 extra copies. This will be the largest paper we have every published and will be mailed for educational purposes in bundles of 10 for 15c, 25 for 30c, 50 for 50c, 100 for 75c.

Equity Speakers

A great many calls are constantly received at headquarters for speakers. We refer to the following, who will accept such calls to address meetings. Write them for terms:

C. C. Simpson, Dardanelle, Ark.
T. J. Woodard, Clarksville, Ark.
W. E. Johns, Tifton, Ga.

Rev. E. T. Hays, Olive Branch, Ohio.

Benjamin Franklin was one of the deepest of our early-day philosophers and a sincere lover of mankind. He recognized as a part of the people, the masses who struggle, and his life was devoted to their general uplifting. He had a very high opinion of the farmer and his calling. In the old "Poor Richard's Almanac," famous in the days of our grandfathers, Franklin said: "No man who can have a piece of land for his own sufficient, by his labors, to subsist his family in plenty, is not poor enough to be a manufacturer and work for a master." That is, he did not believe a man could afford to become a wage laborer so long as he could have land on which he could support himself and his family. And the old philosopher was about right.

As stated we are about to begin sending out sample copies in quest of new subscribers and for educational purposes. We will appreciate the kindness if any member will send us a few names of good substantial farmers likely to be interested in Up-to-Date Farming and the A. S. of E. Also, it will do good if you will see the people whose names you send two or three weeks after and get their subscription or membership or both. Now that the busy season is over you may have a little time that you can devote to this work and if so write us and we will submit a proposition that will prove profitable to you while at the same time, helping to hasten the time when profitable prices will be assured. Write for Workers Group No. 1. Address The American Society of Equity, Indianapolis, Ind.

Conventions and Meetings

CLINTON COUNTY (Ill.) Union will meet in the court house in Carlyle, Ill., on Saturday, Nov. 11th at 9:30 a. m. Every local union in the county is requested to send as many delegates as possible. Be sure to send one. We wish to make this a mass meeting of delegates, members, farmers and business men. Come and bring as many with you as possible. We will elect officers for 1906. ERNEST KROST.
ALBERT WRINGE, President.
Secretary.

Tarry L. U. No. 1022 held a very successful picnic Sept. 20th. Gen. Organizer E. R. Williams of Stockholm, Okla., was the principal speaker, and gave general satisfaction in his explanation of the principles of Controlled Marketing. Also, created much enthusiasm in the members to take hold and make this movement the success it should be. The prevailing sentiment favored more thorough organization, activity and more careful attention to the reports necessary to keep members everywhere in touch with each other.—Mark S. Mercer, Sec. Tarry, Okla.

DANE COUNTY (Wis.) Union met on Sept. 30th. There was a large and enthusiastic crowd in attendance. Prof. D. G. Ristad of Edgerton and Stephen Hait of Rockdale were elected as delegates to attend the Annual Meeting at Indianapolis and the Tobacco Growers' Branch at Owensboro, Ky. A committee on extension work was appointed also a program committee to look after the details of making the County Union meetings, power for good. Owing to the expense necessary to send a creditable delegation from Dane county to the Annual Meeting it was found necessary to raise the county dues to 50c per member. Local Union secretaries will be governed accordingly. S. D. KEMP, Co. Sec.
Cambridge, Wis.

Virginia Coming Forward

Editor Up-to-Date Farming: Today was a good day for the A. S. of E. in Cumberland County, Virginia. The county union met by the order of the President, A. S. Gray, and we had representatives from all the local unions from the adjoining counties of Goochland, Powhatan and Buckingham. All the Cumberland county unions were represented by a full delegation. The county union was called to order at 11 o'clock, by the president, who then, with some appropriate remarks, introduced J. M. Vaughan, County Organizer, who next introduced our representative in Congress, the Hon. H. D. Flood, who gave the union a most excellent and interesting speech, which was full of facts and figures. After the address by Mr. Flood the meeting adjourned for dinner. The meeting was called to order again at 2 o'clock by the president, who stated the object of the meeting, which was the election of a delegate to represent the county at the Owensboro Convention. J. M. Vaughan was chosen, also to represent the county in the National Convention at Indianapolis, Ind., on Oct. 23d, 1905. The next business before the union was to raise funds to pay the expense of the representative to the convention, which was promptly done. After this we had some very good speeches by Bro. W. W. Hobson of Tobaccoville Union, also by Bro. Milton M. Lourire of the same union, with some good remarks from delegates from Goochland and Buckingham Counties. So you see we feel that we had a very interesting and profitable meeting. And now since the main crops have been gathered and stored away, we hope the farmers will lend a hand to the work of organization with renewed energy and redoubled vigor and set about securing profitable prices for the products they have labored hard to produce so that all the people in the world may live and prosper.

Yours for advance,
A. S. GRAY, Pres.
Cumberland, Va., Sept. 30, 1905.

Telegram

OWENSBORO, KY., Oct. 19.
150 delegates. 1200 in attendance. Grand success.
C. HAYES TAYLOR, Sec.
Am. Tob. Growers Assn.

Osage County, (Mo.) members of the A. S. of E., in spite of inclement weather held a rousing rally and picnic at Linn, Mo., on Sept. 19th. The printed report we received from the "Unterrified Democrat" of Linn gave special mention to the addresses given by Prof. R. H. Bryan, county superintendent of schools and Attorney John Peters both of whom are active in assisting farmers to free themselves from the speculators in their products. The report reads, "The picnic was a success in all particulars. The floats, representing agriculture and forestry, were very attractive. Members of the A. S. of E., dressed in uniforms made a splendid appearance while financially it was also a success netting approximately $40."

The report, with card of thanks to the speakers, citizens of Linn, the press and others assisting in making the meeting a success, was sighted by J. D. McKnight, Pres., R. E. Laughlin, Sec.

Hurrah for Woodward County

Sam. J. Hampton, who has travelled and made addresses to farmers of the A. S. E. in many places says: "For business qualities, business dispatch and fraternal unanimity, your county union surpasses any other I have seen." We wish to add that our county union is making a record in keeping with these words of praise. While our clearing house is not yet "ideal" we will make it such. While, as farmers, we are only now learning to do business, we are built of the stuff that will learn. Our "dye" is cast. Woodward county is in the great A. S. E. with conceptions of its work, its principles, its adaptation to the end sought, clear cut and intense, and these conceptions publish themselves in our record. The eyes of the county are upon us. And we expect organization to go right on with accelerated momentum.

E. R. WILLIAMS,
Stockholm, Woodward Co., O. T.

Spencer, Ohio, Sept. 17, 1905.
My Dear Mr. Everitt: I have intended writing you for some time, but have delayed until now.

Enclosed find M. O. for $1.25 for membership in the A. S. of E., and for one copy of the Third Power book.

A short time ago I saw in the National Stockman and Farmer, Pittsburg, an article reidiculing the A. S. of E. and its author and stating the Society was dead in Michigan.

I wrote the N. S. and F. editor a letter asking him what he meant by ridiculing the earnest efforts of an earnest man and a Society, which, if its principles were in effect, would make the farmers the foremost power in the land.

He replied and said he thought the earnest efforts of the earnest man was to extract as many dollars as possible from the pockets of the American farmers.

Well, here is my dollar, Mr. Everitt, and I take pleasure in sending it for granting that is your object (which no sane, unprejudiced and unselfish man could believe) you have done more in the last three or four years to show the farmer where he is at and where he is coming to than all the rest of the agricultural press put together have done for the past twenty years.

Hurrah for the A. S. of E. and may God speed the time when every farmer will belong to this grand organization.

HARRY H. RICE,
Spencer, Ohio.

I think Up-to-Date Farming the best and most helpful farm paper published. I wish every farmer in the United States could read it and if they did we would all get better prices for our crops. All the members of Coal Hill L. U. No. 7 say the same thing.

Fraternally,
H. T. GOSSET,
Coal Hill, Ark.

I hope to see the time come in the near future when the A. S. of E. and the F. E. & C. U. of A. will be connected as one and then I think farmers both north and south will get their just and equitable rights.

W. H. RIX,
Gordon, Texas.

I herewith enclose $1.00 for renewal of my subscription to the most entertaining and valuable farmer's paper ever published. It is truly an "eye opener" as the saying goes. Though not a farmer I am heartily in sympathy with them and for the producing classes generally. Wishing you health and success in your mission of good to all, I am truly,

S. L. KNEPPER, M. D.,
Conklin, Mich.

FACTS AND FORMS ALSO AN UP-TO-DATE PIN FREE

Up-to-Date Farming wants a representative at every postoffice and on every Rural Route in the country.

The subscription season is NOW here. During the next few months we must receive ONE HUNDRED THOUSAND new subscribers to Up-to-Date Farming. We will pay TWENTY THOUSAND DOLLARS to our REPRESENTATIVES for assisting us in getting them. Men, women or bright boys and girls can do the work we must have done, and get their share of the $20,000 for doing it.

Each representative will be furnished one of the above Up-to-Date Pins in blue and gold, a sample book containing several different issues of Up-to-Date Farming, all necessary blanks and instructions and a liberal supply of sample copies. All the above will be furnished Free.

We will also furnish, if 25 cents is sent as a DEPOSIT, our new premium book "Facts and Forms" to use as a sample while canvassing and will allow you to deduct the amount from your remittance for the first ten subscriptions sent us SO YOU WILL REALLY GET THE BOOK FREE.

Facts and Forms

FACTS AND FORMS is a concise Business guide. Just what is needed by our Up-to-Date People to help them get in touch with Business Practices and to warn them against the sharp practices of fraudulent schemers.

It is a handy volume bound in strong cloth and containing 260 pages. It abounds in numerous practical illustrations. Gives a simple yet complete course in Bookkeeping, fully illustrating how entries should be made on ruled forms. Explains all about notes and endorsements, checks, drafts, etc., fully illustrating each. Forms for Bills of Sale, Deeds, Mortgages, Wills, Contracts. etc., etc. Parlimentary Rules and Usages. Important points of Law by Hon. E. T. Roe, a noted U. S. District Attorney.

The following subjects selected from the Index will give some idea of the scope of this work and of its great value to every farmer:

Abbreviations, business; Acceptance of drafts; Acknowledgments; Affidavits Agreements; Animals, trespassing; Applications, letters of; Army pay table; Assignment of mortgage; Attorneys, authority of; Baggage, liability for; Bank, notes payable at; Bank account; Bank checks; Bank checks as payments. Bank drafts; Bank forms; Banking business; Banks and banking; Barb-wire fences; Barrels, how to find contents Bill book; Bills of exchange; Bills of lading; Bills of sale; Bookkeeping; Book subscriptions; Breach of promise; Breach of trust; Brickwork; Builders, facts for; Builders' tables; Building and Loan Associations; Business dictionary; Business failures; Business letters, examples of; Carpenters' rules; Carriers, common; Cash book; Certificate of deposit; Certified check; Chattel mortgage; Cisterns, how to measure; Clearing houses; Coins of the U. S.; Coins, value of foreign; Collateral notes; Collecting notes; Complement rule; Compound interest; Contracts, law and form of; Correspondence, business; Damage to goods (Transportation); Dates of admission of States; Days of Grace; Debit and credit; Debts, how to collect; Debts, when outlawed; Deeds, different kinds of; Delivery of goods (Sales); Deposit ticket (Banking); Discount (Banking); Division fences; Dog, responsibility of owner; Double entry; Drafts, rules for writing, etc.; Due bills; Employer and employee; Envelope trick; Erasures in contracts; Express companies; Express money orders; Fares, railroad, from Chicago; Fares, railroad, from New York; Fence laws; Finder of lost property; Finder of note; Foreclosure of mortgage; Forged checks; Fraud by buyer of goods; Fraud, theft, etc. (Promissory Notes); Goods, how shipped (Sales); Green Goods swindle; Grocers' tables; Guaranty; Holidays, legal; Holidays, working on; Husband and wife; Illegal contracts; Improvements on rented property; Indorsement, letters of; Indorsements of checks; Indorsements of notes; Indorser's liability; Interest laws, legal points concerning, when a note bears, tables; Introduction, letters of; Judgment notes; Judgments, interest upon; Land, rules for measuring; Landlord and tenant; Leases; Ledger (Bookkeeping); Legal tender value of coins; Legal tender value of bills; Letters of credit; Lightning-rod swindle; Loss or injury by carriers; Lost notes; Lost property; Miscellaneous tables; Mischievous animals; Mistake (Contracts); Money; Money, how to send; Monopolies, natural; Mortgages, real estate; Mortgages, chattel; National bank notes; National banks; Notes, promissory; Orders; Paper, sizes of; Paper money of the U. S.; Parliamentary rules; Partial payments (Notes); Pass book (Banking); Payments, letters requesting; Perishable goods; Posting (Bookkeeping); Post-office order; Practical law and business pointers; Promissory notes; Protest (Promissody Notes); Railroads liable for stock killed; Raised checks; Receipts, all kinds; Recommendation, letters of; Registered letters; Rents, how payable; Resignation, letter of; Roof, shingles required for; Sales of personal property; Savings banks; States and Territories; Stonework, facts concerning; Stopping goods in transit; Swindling note scheme; Table of things, distances, books, etc.; Tables for builders; Tables for lumbermen; Tables, miscellaneous; Telegraph, how to send money by; Tenant, rights of; Tender (Contracts); Tender (Mortgages); Transportation; Treasury notes; Tree, how to find height of; Trespassing animals; Trusts and monopolies; Valuable miscellaneous matter; Warranty (Sales); Weights and measures; Wife living apart from husband; Workmen, contract with; Writing, contracts that must be in; Wrongful levy.

The price of this great book is ONE DOLLAR. It is worth the money, too, but we are offering them with one year's subscription to Up-to-Date Farming for only 75 cents. Think of it! Or, we will allow you to sell them to members of Local Unions of the A. S. of E. at a reduction.

AGENTS WANTED in every school district, and on every Rural Routs LIBERAL COMMISSIONS allowed. Write today for outfit and enclose 25 cents for sample book of FACTS AND FORMS. When you send us TEN subscriptions you may deduct this amount from your remittance.

Chicopee Falls, Mass., U. S. A.

A man may be a monkey or make a fool of himself, but has no right to abuse the privilege, which a farmer does when in these days of grab he tries to make a success of farming without scales. This being such a self evident proposition that the only question is what scale is it for his best interest to buy. We of course say the Jones. Why? Because that will put money in our pockets and because we honestly believe it to be the best scale and we know that it is sold at a lower price than any other scale that comes anywhere near it in value, and don't you forget that Jones he Pays the Freight, and if lost, broken or stolen it is his loss, not yours, and another condition is satisfaction or no sale. Think of it, a strictly first-class wagon scale 8x14, steel levers solid brass double beam, beam box, fully warranted, and a boy to tend it if you wish, for only $35.00.

397 of these scales sold and not one has been sent back. All sizes, as low. ADDRESS

Quantity prices quoted on application.

AMERICAN SOCIETY OF EQUITY

INDIANAPOLIS, IND,

9 TOOLS IN 1

One of the most useful tools of recent invention is the

C. & F. WONDER KNIFE

—9 tools in 1. It successfully combines in one article nine perfect tools, all of which are used every day by the average man and boy. In reality it puts nearly all the tools of a work bench in your pocket. It is so handy that no one will be without after using once.

The knife-blade is of the finest steel and made to stand bad usage. The other tools are: Wire Cutter, that will cut barbed wire; Wire Pliers useful always; Swedging Awl; Leather Punch and Gimlet, for Harness mending and other jobs; Screw Driver, that is always handy; Alligator Wrench and Hoof Hook. The latter is something new and every horse-owner will appreciate it. This alone is worth more than the price of the Knife. Horses hoofs are very quickly cleaned out. All of these useful tools make a bulk no more than the average three-bladed knife.

CUT 1-3 ACTUAL SIZE

We receive letters with expressions like these: "Greatest little article I ever saw," "Never saw its equal," "All my friends want one," "Don't see how I ever got along without it." You will agree when you see the knife.

"C. & F. Wonder Knife received. It is certainly a wonder. I want to buy them by the dozen."—J. Barnhart, Wilmington, O.

The regular price is $1.50 each. But we want to introduce them and make an offer of only $1.25 each. With each order we send wholesale price list. Agents will find the C. & F. Wonder Knife a wonderfully fast seller. No free samples. Send $1.25 for a sample and get the attractive agents price.

C. & F. Wonder Knives—9 tools in 1—are made to sell on their merits. Made to gain friends and keep them. One sold sells many others.

COONER & FORTUNE CO., Dep. A, Indianapolis, Ind

UP-TO-DATE

Field Crops

PRODUCTION AND MARKETING

Will It Pay to Hold Corn?

In Oct. 15th issue we printed the following:

Farmers should not lose sight of the fact that corn marketed in the fall contains considerable weight that later disappears. Hence 5 cents a bushel less in the fall, or 7c or 8c less right out of the field, and no extra handling, might be advisable.

Now comes a bulletin from the Missouri Agricultural College which emphasizes the above statement and confirms it by actual test reported to have been made at the Iowa station. Part of the bulletin follows:

At the Iowa Station, for example, seven thousand pounds of corn were husked and stored October 19, in a crib built upon scales in order that the weight might be taken without disturbing the natural condition of storage. There was a shrinkage of nine per cent. for the first quarter year, five per cent. for the second, three per cent. for the third, and two and five-sevenths per cent. for the last quarter (Practically 20 per cent.) The experiment was conducted under the conditions that normally exist in this section of the United States and the results may, therefore, be taken as typical of those that will obtain on the average Missouri farm.

The Missouri College of Agriculture, however, does not advise farmers to sell their corn, but to feed it to some class of animals, thus returning as much of it as possible to the soil. Careful estimates show htat where corn is fed, eighty-five per cent. of it can be sent back to the field to preserve its fertility. Selling the crop means taking this eighty-five per cent. from the farm and thus, needlessly, reducing its fertility.

Here is the report of a test where corn lost 20 per cent. by holding 12 months. It seems incredible that good sound, well matured corn will lose so much and we doubt if it was well matured and reasonably dry when the test began.

At least farmers cannot take these tests as guides in their own cases. When they read of them they ought to be hints to make tests themselves. If a farmer who wants to know where he stands, and who wants to always do the best thing about selling or holding his corn will begin at once to carry out tests, he will in a few years be able to judge very closely how much any crop of corn he produces will lose in weight by having in mind or of record the condition of the various crops as regards maturity, dryness, etc.

A Monster Corn Show for Indiana

(Contributed)

At a recent joint meeting of the committees of the Indiana Corn Growers' Association and the program committee of the Corn School, it was unanimously decided to hold a corn show in connection with the fourth annual Corn School and Stockmen's Convention at Purdue University next January.

The object of the Association in getting up this corn show is to arouse a greater interest in corn improvement throughout the State. The educational features of such a show are obvious. Samples of the best corn from all over the state will be brought together where the hundreds of farmers who will be in attendance at the Corn Schol can study and compare them and learn where good types for use on their farms can be secured. The exhibitors themselves will learn the weak points of their corn and see wherein improvements can be made. It will be a great object lesson in the selection of good types of corn and will help many farmers towards securing better seed.

All entries will be free and every farmer in the state is hereby invited to show a sample of his corn and enter the competition for honors and premiums.

The state will be divided into several sections and handsome premiums will be offered in each. The exhibitors from each section will first compete against each other for premiums offered within their section and the winners in the various sections will then compete in sweepstakes classes.

It is confidently expected that this will be the greatest corn show ever held in Indiana and that the interest aroused will do a great and far reaching work in the way of encouraging the production of better types and more profitable crops of corn.

Standards of perfection and suggestions for the guidance of exhibitors in selecting their exhibits will be furnished upon application to Prof. A. T. Wiancko, Purdue University, Lafayette, Ind., to whom all questions and correspondence concerning the corn show should be directed and refer to Up-to-Date Farming.

Further particulars concerning the division of the State into sections, classification of exhibits, premiums, etc., will be published in the near future. Intending exhibitors should begin at once to make their selections.

(With very good control of crops and the ability to get good prices for large crops as has been demonstrated, we think the farmers can now safely attempt to increase their crop.—Ed.)

FREE TO BOYS AND GIRLS

THESE COSTLY PREMIUMS GIVEN AWAY TO BOYS AND GIRLS

BOYS' FOOTBALL OUTFIT

PANTS, JACKET, BELT, HELMET

The Pants are made college style, of regulation cloth, full padded, at hip and knee; lace front sleeveless Jacket, Belt and complete Head Harness, consisting of Leather Helmet, with Earguards.

Free for Selling 32 Hkfs.

Best pliable leather, hand sewed with double thread, lined and reinforced with leather, each has fully tested rubber bladder, also fixtures for hanging to platform, all in sealed box and guaranteed.

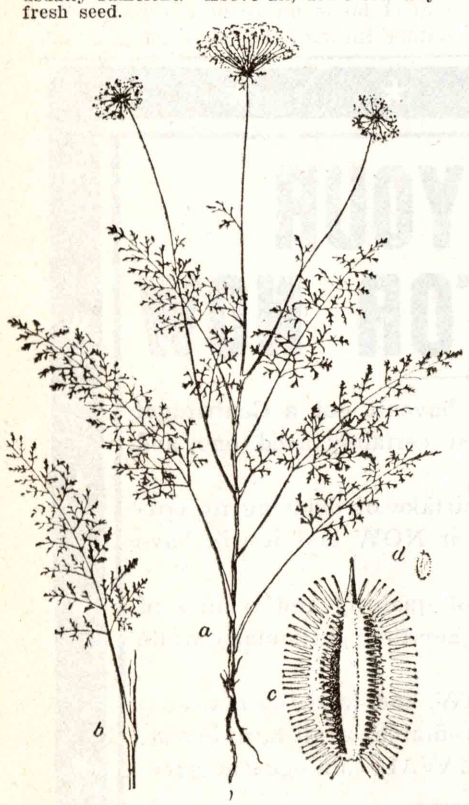
Wild Carrot

The wild carrot is a very troublesome weed and is spreading over the country at a very rapid rate. For years it has been common in the eastern states and has spread west of the Mississippi river. (We will esteem it a favor if our readers west of the Mississippi will report if it has reached their locality. By the illustration and description it will be recognized—Ed.) It thrives in nearly all soils consequently without restrictions it will continue to be one of the most troublesome weeds.

The plant is well represented in the illustration. The flower bunches are made up of many small white blossoms usually with a small purple flower in the center of each bunch. They bloom from June to September. The blossom is followed by a bur-like product as shown. These readily attach themselves to passing animals or objects and are carried from place to place in this way. Also they are very tenaceous to hang to the plants until winter and are then blown by the high gales across the country.

The seed may be found in clover and grass seed and they retain vitality several years.

TO ERADICATE. Quit sowing the seed. Don't allow any to ripen seed or nearly approach the ripe condition. By repeated cuttings in this way will finally exhaust the plant. Pulling by hand when the ground is wet usually ends them. Cultivating the field thoroughly for a season is usually sufficient. Above all, don't sow any fresh seed.



Wild carrot

Potatoes

No crop is more generally raised than are potatoes, yet three States practically control the situation so far as making prices are concerned. They are New York, Michigan and Wisconsin. It is the great bulk that makes or breaks prices.

The New York crop this year will be much below the average, while at this writing it does not appear that more than normal crops will be harvested in the other two States. Our crop reports are not all in, so we are only estimating from the few who have written us regarding conditions in their respective localities.

We hope every potato grower who reads Up-to-Date will report on this crop this year, and if possible enable us to get at facts that will prevent such a loss as many sustained last season. Our advise at this time would be not to sell under 50 cents a bushel, while our belief is that the average price for this year's crop will be even higher than that. Don't think because the price was lower last spring than the fall before that this condition will be repeated. If it had not been that some growers controlled their marketing last fall the price would have been very low then also. The trouble with the 1904 crop was that they were not wisely distributed or all would have sold for good prices.

As we have often said there is an enormous quantity of food products consumed every day. In further support of this statement we give below a list of some of the food products used daily in the city of Indianapolis, as reported by the market and commission houses to the Indianapolis Sentinel. The list follows:

"One hundred and thirty head of beef cattle, 300 head of sheep and lambs, 400 head of pork, 13,000 pounds of fish. 200 barrels of spring chickens, 4,000 pounds of turkeys, 1,000 pounds of ducks, 250 tubs of butter, 135,000 eggs, 225 barrels of flour, 225 tons of garden truck, 875 baskets of peaches, 500 bunches of bananas, 50 bags of peanuts, 750 crates of oranges, 50 boxes of lemons.

"In the 225 tons of garden truck are included 1,000 barrels of Irish potatoes, 500 barrels of sweet potatoes, 300 barrels of beans, 400 barrels of onions, 2,000 dozen radishes, 200 dozen cucumbers, 5,000 bushels of tomatoes, 350 barrels of cabbage, 2,000 barrels of cantaloupes, 90 barrels of turnips, 125,000 pickels and 400 dozen bunches of celery."

This, of course, is not all, but when it is considered that there are 365 days to duplicate the above bill of fare, and that there are in the United States the equivalent of EIGHTY cities as large or larger than Indianapolis, counting none smaller, it begins to dawn upon us that the daily requirements are almost beyond comprehension. We will figure on Irish potatoes only. 365,000 barrels used in Indianapolis every year, 29,200,000 barrels in the cities as large or larger than Indianapolis. Fully as many more in the two hundred or more smaller cities, to say nothing about those used in the thousands of villages.

Or take our largest city, New York, with a population over twenty times that of Indianapolis, and think of its consuming over 7,000,000 barrels of potatoes annually. Chicago next, with an annual consumption of over three and a half million barrels, and Philadelphia using about three million barrels. Surely it only remains for farmers to get in position to know what is produced and how much and where consumed in order to command a profitable price for what they have to sell.

The Harvest Teaches a Lesson

The great harvest that has been gathered this year has done something more than temporarily swell the farmers' bank accounts. It has been an education. Like all their great harvests it has taught its lesson to those who had not prepared themselves properly for taking care of it and are now regretting their lack of foresight and making new resolutions for next year.

In spite of the universally heavy crops there are many farmers who are disappointed in the season's work, and it is safe to say that the fault, in ninety-nine such cases out of a hundred, can be laid at the door of imperfect machinery. Breakages, long delays for repairs, or faulty operation in any kind of harvesting machinery cuts deep into the profits.

Every hour lost when the meadows or grain fields are ripe runs into money mighty fast, and every farmer ought to realize the great importance of guarding against emergencies in every way possible. There should be no guess work or experimenting in connection with your farm machinery equipment, and while you may feel reasonably sure that everything is in good order, accidents will happen and you should see to it that facilities for quick repairs of all kinds are close at hand.

The corn is still standing, and those with a crop of any size to cut might take a suggestion from this and overhaul their corn harvester. Since the plant contains 40 per cent. of the feeding value of the whole crop, and as it is necessary to cut it just in the nick of time in order to keep all the valuable nutrients stored in the stover, no one can afford not to be properly prepared to go over the field without delays.

A good, substantial, standard line, such as the International Harvester Company manufactures, offers the opportunity of securing both of these advantages, and yet, owing to their remarkable facilities for keeping down the cost of production, these advantages cost the farmer nothing. For instance, if you buy a binder, mower, header, or corn harvester, from the International Harvester Company, you are sure that you have a perfect machine to start with and that even if an accident should occur while you are in the midst of your work you can go to a nearby dealer and secure any necessary repairs.

This company has a representative, carrying a complete supply of repairs for each line they manufacture, in nearly every community in the country.

The same holds good with the whole line of farm machinery manufactured by the International Company, including, in addition to those machines already mentioned, Hay Balers, Shredders, Gasoline Engines, Wagons and Manure Spreaders. If you do not know the representative of this company in your neighborhood, you can write to the home office in Chicago, mentioning Up-to-Date Farming, and they will send you a letter of introduction and any other information you desire.

A TELEPHONE IN YOUR HOME SAVES TIME AND MONEY

THIS 80 PAGE RURAL TELEPHONE BOOK FREE

A telephone in the home is an investment—not an expense. It will pay for itself over and over again. In reality it costs you nothing to install a telephone in your own home. Aside from the time and money a telephone will save you — think of the convenience—think of the comfort there must be to know that at any moment you can be in instant communication with any of your neighbors, or that you can call your physician at any hour day or night. Perhaps the time saved will save the life of one that is dear to you. Think of the advantage there is in sending orders or messages to any of your nearby cities. Can you not see what it will mean to you to be in close touch with all market quotations? All those and many more advantages are fully explained in our 80-page Rural Telephone Book which is free for the asking. Write before the supply runs out. This valuable book tells how to organize, secure subscribers, build lines, and install instruments. Advises what to use and where to buy. Shows cost per mile. Contains franchises, by-laws, rules, code of signals, contracts, cuts of telephones, switchboards, tools, supplies and wiring diagrams. Teaches how to remedy telephone troubles. Largest and most complete book on rural telephones and lines ever published. Valuable and instructive. Worth writing for. Write while your mind is on it.

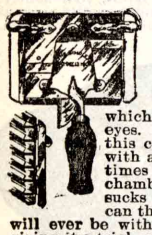
The Simplex Dustless Curry Comb

The Only Carpet Sweeper Curry Comb on the Market.



A Curry Comb that catches and holds the dust the same as a carpet sweeper and when filled can be opened and emptied by pressing the thumb lever. The invaluable feature of this comb is that it entirely does away with the dust nuisance which is so injurious to lungs and eyes. A horse can be groomed with this comb in half the time required with an ordinary comb and with ten times more comfort, as the closed chambers form a vacuum which sucks the dust into the comb, which can then be emptied. No horseman **will ever be** without one of these combs after giving it a trial, as it saves health, eyes, clothes. Made of the best steel, is finely nickel plated and will last a lifetime. Sent prepaid anywhere for $1.00. Send stamp for full particulars.

PRODUCTION AND MARKETING

SELLING HORSES

A Face to Face Talk With the Farmers

(Copyrighted)

While you are getting the young stock ready for the buyer, take them up, stable them and blanket them, and have them well groomed. It pays to give them plenty of "elbow grease" to make their coats sleek.

If you have any mongrels on your farm, cut them loose. It costs no more to feed a good colt than a bad one, and remember about feeding—that to stunt your horses especially those for sale is a "penny wise and pound foolish" policy. It may be necessary once in a while to mix a little ground linseed cake with the feed and always have a piece of rock salt in the manger.

Always treat a horse with kindness. Never abuse him and the practice of that virtue is more than its own reward. The animal will reward you for this he will love, serve and be a faithful friend to you.

Have your horses nicely shod in front, and when you go to town take along your best horses and your Sunday harness. Neither one will "wear out" very readily if they are the right sort, and appearances go a long way. Take a wholesome pride and pleasure in having your outfit all looking speck and span. Make it your business and take pride in doing it to show your stock to the local liveryman and veterinary surgeons and if you have something good they are likely to send you plenty of buyers. If you decide to make a shopping expedition before leaving home write for the state of market when large combination sales are to be held and you then get the benefit of their extensive advertising. Make all your acquaintances in advance, giving them a general knowledge of what you are bringing. Don't be afraid of a few postage stamps to your friends. They can do some advertising for you. Put your horses in nice condition. Condition beds and good grooming goes a long way. Don't ship any rough coated or thin horses as they are not wanted and do not pay to ship.

Another thing, you, my friends, have felt without doubt the effects of a draught from an open car window or door on a train running forty miles an hour. Well, how do you suppose your stock get along in the ordinary car in which horses are shipped? If you are a wise man you will order a combination car, where the animals will be as comfortable as in their own stable, landing without accident and as well and hearty as when they left home. These cars are fitted up to hold eighteen horses and the small extra charge will be an investment well made and which will amply repay you.

How often do you hear the auctioneer cry out about a valuable horse that was shipped as sound as a dollar, serviceably sound, "car bruised," when otherwise the sign "sound" would have been hung up? This means a matter of $30 to $50 difference in his price and is worth considering.

Don't forget to bring along your warm blankets in winter, and summer ones in summer. After you arrive at your destination have your horses put away quickly; see that they have nice warm bran mashes, and if they have come a long journey, under no conditions show them to any one as they are not up to themselves. Many a good sale is lost because of anxiety to sell the moent of arrival. Be firm on them and remember that "first impressions to a buyer go a long way." Your first business upon arriving should be to have your horses trimmed by an expert trimmer. Trimming gives a finish to a horse as much as a clean shave does to a man.

When your horses are fit to show be up bright and early for business and don't refuse a profitable offer, remembering always that "a bird in hand is worth two in the bush." At the same time it is well to always ask more than you are prepared to accept. as a buyer will almost invariably want to buy cheaper. You can come down gracefully but you cannot go up.

When you come to town to sell horses don't go downtown to buy your best girl a frock; you can do that when the "tail ender" is gone, also "see the elephant" and "fight the tiger." Don't leave your business to a substitute. Stay right alongside of your stock, never leaving them except for meals and making that time as short as possible. Buyers like to run through the stables when everything is quiet. Then again you have more time to talk with them. Always carry a whip in your hand and have handy a neat show bridle and brush to smooth the manes of the horses, and when they are trotted out the whip comes handy as the animals are apt to be sluggish after a journey and want waking up. Keep your horses up in their stalls; buyers sometimes miss a good horse on rushing through the stables through the horse hanging his

BUY YOUR SEPARATOR NOW

If you have cows and haven't got a Centrifugal Cream Separator you almost certainly need one and doubtless know that you do.

If so, don't make the mistake of delaying its purchase "until spring." Buy it NOW and it will have half paid for itself by spring.

Don't let your waste of quantity and quality of butterfat go on another six months, particularly while butter values are highest.

Buy your separator NOW, and take the first step toward making this most profitable of all farm investments by sending for a DE LAVAL catalogue at once.

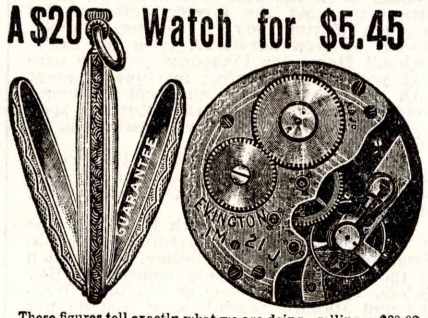
A $20 Watch for $5.45



These figures tell exactly what we are doing—selling a $20.00 watch for **$5.45.** We don't claim that this is a $40.00 watch or a $50.00 watch, but it is a **$20.00 watch.** A leading watch manufacturer, being hard pressed for ready cash, recently sold us 100,000 watches—watches actually built to retail at $20.00. There is no doubt that we could wholesale them to dealers for $12.00 or $13.00, but this would involve a great amount of labor, time and expense. In the end our profit would be little more than it is at selling the watch direct to the consumer at $5.45. **The Evington Watch,** which we offer at **$5.45** is an im. **21 jeweled,** finely balanced and perfectly adjusted movement. It has specially selected jewels, dust band, patent regulator, enameled dial, jeweled compensation balance, **double hunting case, genuine gold-laid** and handsomely engraved. Each watch is thoroughly timed, tested and regulated, before leaving the factory and both the case and movement are **guaranteed for 25 years.**

Clip out this advertisement and mail it to us to-day with your name, postoffice address and nearest express office. Tell us whether you want a lady's or gent's watch and we will send the watch to your express office at once. If it **satisfies** you, after a careful examination, pay the express agent $5.45 and express charges and the watch is yours, but if it doesn't please you return it to us **at our expense.**

A 25-Year Guarantee will be placed in the front case of the watch we send you and to the first 10,000 customers we will send a beautiful gold-laid watch chain, Free. We refer to the First National Bank of Chicago, Capital $10,000,000.

STATIONERY

For Up-to-Date Farmers

Every farmer should use neatly printed stationery. It is business-like and gives a tone to your correspondence. Some business houses sort out the printed envelopes from their mail and open and attend to them first. Members of the A. S. of E especially should use up-to-date letterheads and envelopes. We offer special stationery containing the seal in a beautiful design. Your name and address, and name of your farm or business also if desired, nicely printed. On the reverse side of the paper are printed appropriate circulars, such as "Farming Exists by Divine Right," "Where Duty Lies", etc. You will spread the movement with these messages if you order some stationery. Price, PREPAID

Of advertisers on page three. Advertisers in Up-to-Date Farming deserve your support. You will profit by buying from them.

head and thus not taking the passer's eye. Be on hand at all times to answer questions, and don't be afraid to accost people who pass and repass. Don't judge a man by his clothes. Be pleasant to all, even to the stable lads; a kind word now and then and an occasional tip is never thrown away—they can all do you a good turn even if they themselves don't want to buy. "Civility costs nothing" as the Dutch say of paint. Have your bridle put on the pick of your lot and trot him out. You cannot do this too often, even though it is a little trouble, for it attracts attention and you do not know who may be around and it leads to business.

Don't misrepresent your stock; tell the truth and you will make friends. Lastly, if you attend to this business in a proper spirit, you will sell your shipment at a price which will well recompense you for your extra pains and trouble.

A Necessity, Not a Luxury

No longer is the telephone considered a luxury in rural communities. It is a necessity for which new usefulness is being daily developed. One of the great independent companies—in fact, the trust's most formidable rival—is the Swedish-American Telephone Company, Rural Dept. G, Chicago, which for years has specialized on telephone systems for rural communities. If you and your neighbors are interested in establishing a line in your locality, you should outline the situation, giving the possible number of subscribbers, distances, territory to be covered, and whatever you think would help the company to arrive at an understanding of your wants, and they will send you the special information you desire, together with their free book, "Rural Telephone." The company makes no charge for advice or information. A telephone in the house enables the farmer to keep informed on the market conditions, the price of his products, and practically puts him in touch with the city. It saves time when machinery breaks down, when a doctor is wanted, when you want to talk to your neighbors on business or pleasure. The establishment of a telephone system isn't half so expensive a proposition as many people believe, and comparatively little cash capital is required by the plan of the Swedish-American Telephone Company.

Paint from the Factory

Two entirely new features in selling are introduced by Mr. Chase, in first that he ships his paint direct to the user, paying all freight; and when the order of paint has arrived the user has the privilege of using two full gallons to test the paint in any way he may desire, and then if the paint in any way he may desire, and then if not satisfied he may return the balance of the order and the two gallons he has used is given to him absolutely free for making the test.

Second: Mr. Chase sells his paint either for cash or he allows six months time. This enables the purchaser to paint when he wants to and pay for his paint when it is most convenient to do so.

A proposition like this is well worth looking into, especially when we consider that a paint guaranteed to last 8 years saves two or three repaintings, which means a great saving of paint, labor and time.

We have printed in Up-to-Date Farming an advertisement of Mr. Chase's, and to those of our subscribers who have painting to do, we certainly recommend that they write to Mr. Chase for further particulars of his new plan of manufacturing and selling paint.

He can be addressed at 415 Sixth Street, St. Louis, Mo., and we are certain he will give our readers fair and courteous treatment.

Farmers' Question Box

Mr. J. A. Everitt, Editor:

Dear Sir: I am a most interested reader of what I might call the king of all farm journals—Up-to-Date Farming. It is the only farm paper that is worth the time and attention of a busy farmer.

I want to make a suggestion, of which I have been thinking about for some time. Can you not have a "Farmer's Question Box" in every number of Up-to-Date Farming, and have a particular space of the paper allotted for that purpose, with questions and answers respectively?

My reason for this idea, is that many doubtings can be put to an end for the good of the farmer, by a direct question and answer.

Now, for instance, like this:

Question—Why did some non-union farmers put out much more tobacco this year than usual?

Answer—Because they firmly believe that a reduction of the tobacco crop will naturally force the price up quicker than anything else, but through their selfish motives, they send up a false wail "It can't be done" and "It will not amount to anything" and wait for the first chance to sell to a trust buyer for about seven, seven and two, and thereby reap the benefits of the hard working organized farmer, and at the same time tear down the work of the Union. If any one says something to him about selling before he ought to, he will answer "Oh well, I got a very good price; seven, seven and two." He did not get seven, seven and two for his tobacco from anything he did, but it was the Union that sprung his price up to seven, seven and two, instead of about five, five and one.

Question—Why does the price of wheat get so low at threshing time?

Answer—Because the wheat is in the hands of the producer, and not the speculator, but when Mr. Speculator gets it in his possession, look out! The farmer who sold his wheat cheap, will pay a big price for flour, and the laborer who is cramped by the capital power will pay a dear price for flour.

Question—Why have other farm movements been far less successful than the A. S. of E.?

Answer—There are many reasons. One of the principal reasons is this. The farmers in The American Society of Equity attends to their own business, and do not attempt to tear down business men's industries, in order to build up their own, as some organizations have done heretofore. The A. S. of E. does not dabble in politics or religion, which would undoubtedly be fatal to it. Its object is "Equitable prices for all products" and its plan is "Controlled Marketing." Two of the most necessary things for success.

Now, Mr. Everitt, the above three questions and answers are similar to what I refer to as a "Question Box." I, as secretary of a large local union had twenty-five questions for a meeting which was held yesterday. These questions were handed in by first one and then another.

I expect to be at the National Tobacco Growers' Convention of the A. S. of E., at Owensboro, during the whole time of October 18th, 19th and 20th.

Yours sincerely,
LOUIS E. CANICO.
Knottsville, Ky.

The "Question Box" is open. Hand in your questions and we'll answer them to the best of our ability and as our space will permit.

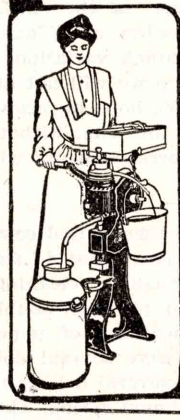
5 Cows and a U. S. made $45.00 month
7 Cows but no U. S. made $11.00 month
The U. S. makes the difference $34.00 month

STAUNTON, ILL., SEPT. 25, 1905.

I hereby certify that on April 20th, 1903, I bought of your agent one of your No. 7 U. S. Cream Separators, and after using it for more than two years, I am more than satisfied. In 1902 I sold the milk of my seven cows to the creamery and realized from said cows an average of $11.00 per month. From the herd in the spring of 1903 I sold two of the seven cows and milked the other five, and my income from the five cows was $45.00 per month, a difference of $34.00 in favor of the U. S. Separator. If necessary I will make affidavit as to this statement.

E. D. BRUCE.



Now, how quick did Mr. Bruce get his money back? Well, the *extra* profits alone paid for his U. S. in just about 10 weeks. Many thousands of satisfied users prove the

Dan Patch 1:55¼ COLORED Lithograph ABSOLUTELY Free

This Splendid Picture is a Reproduction of a Photograph which was taken by our own artist. It is 18x24 and in Six Brilliant Colors. It is as life like as if you saw Dan coming down the track and shows him pacing a 1:55¼ clip with every foot off of the ground. Every Farmer and Stockman should have a picture of the Fastest harness horse that has ever appeared on earth. Dan is in better shape than ever this year. In his first public appearance in 1905 he paced a mile in 1:59½ at the Minnesota State Fair and he followed this up in four days with a mile in 1:57½, with the last quarter in :27½ seconds, which is a 1:50 gait. On Saturday, October 7, at Lexington, Ky., Dan Patch again startled the world by lowering his own World's record from 1:56 to 1:55¼. Dan has been eating "International Stock Food" every day for three years and it has given him better digestion and assimilation and more strength, endurance and speed. He was not a champion when we bought him but has broken nine world records since that time.

UP-TO-DATE Poultry and Bees

PRODUCTION AND MARKETING

Do not leave the windows open too long. Hens, like people, take cold easily if exposed to cold draughts.

The Thanksgiving turkeys should be fed liberally, but do not make the mistake of attempting to crowd them by over-feeding. They eat little at a time but will eat often. Plenty of fresh water, grit and lime or oyster shells must be provided.

Get rid of the old-old hens in some way. They can be sold at some price and it is positively a loss to winter them. They will not lay and their room is valuable for young stock. Hens two or three years old are better for breeders than pullets, but will not lay so many eggs.

If you cannot get a good price for eggs now it will pay to keep them. They may be kept at this season very nicely by simply tying up a dozen or two in a common paper sack, and turning the sack to change position of the eggs about once a week. Care must be taken that they are not in close proximity to any bad odors, as eggs, like butter, become tainted very easily. They should also be kept in a cool place.

We again want to call your attention to our postal card requesting prices in October 15th issue of the official paper. "Prices of Poultry and Eggs." That there will be much variation is certain, but how much we will not attempt to estimate. We hope to receive thousands of reports and can, without any trouble if our correspondents will just remember.

Make the hen houses warm and comfortable. A day or two spent in fixing them up—whitewashing, cleaning, battening cracks and possibly double boarding, with a sheathing of paper between, will likely save several dollars in feed and add several dollars to the egg-basket before next spring. This is not all. The added comfort to the chicks ought to be a great satisfaction to our Up-to-Date Farmers.

Those having turkeys for market need not fear regarding price. Remember the consumers will not get them for less than 18c or 20c per pound picked. They may go as high as 25 cents. Such prices ought to allow the grower 14c or 16c live weight. It has been the habit of some local butchers to contract for turkeys about November 1st at 12, 12½ or 13c a pound live weight, make a small advance to bind the bargain and save to themselves two or three cents a pound for their accommodation. (?)

The Value of Ferrets on the Farm

Ferrets are small, slim animals which are used for hunting rats, ground squirrels, rabbits and other borrowing animals. They are very useful to the farmer, to protect his grain and poultry from being destroyed by rats. Their work of destroying and clearing out rats is much more effective than that of a rat dog or cat, as ferrets can enter the rat holes, kill and pull out the rats.

To hunt rats, liberate the ferrets where the rats are working. They will soon enter the rat holes. Be ready with clubs to kill the rats which escape from the ferrets. After the ferrets have hunted an hour or two, pick them up and put them back in their pen. Give them a few such hunts and the rats will all leave.

Ferrets make fine pets. They become as playful as a kitten and can be carried in your pocket for chasing out rabbits.

They are easily cared for. A box three feet by four feet put in a dry place makes a good home for a pair of them. Bread and milk is a good food for them. They eat almost anything a cat or a dog will eat.

Ferrets are very prolific, usually raising two litters of young each year. These litters range in numbers from five to twelve.

There is a ready demand for these little animals and they bring from $2 to $3.50 each, according to their age and the season of the year.—S. F.

Keep an Egg Record

Records and accounts are always interesting and desirable but the "Egg Record" is perhaps the most interesting and withall the one most filled with surprises. A well kept flock of hens do business every day in the year and while, perhaps, the daily volume of business is not large the aggregate for the year represents a total far in excess of one's expectations.

The account should show a profit, above feed at market prices, of from 75c to $1.00, for each hen, and if it does not, there is something wrong with your breed or your method of handling. Many poultry keepers show a still larger profit, but the above figures are a fair average.

A BRAND NEW DOLLAR BILL And a Year's Subscription Free

We want our poultry readers to enter into a little friendly contest for our mutual good.

We want you to write to us on a postal card (don't write a letter and tell us how many chickens you had a year ago and how many now. How many eggs they have laid in twelve months and what the eggs and chickens brought you. Any that were used at home should be rated at the average price of those sold. After giving the receipts and number of chickens you have then tell us what it cost you to keep the flock. Send this report to us by December 1, 1905.

For the best report we will pay $1.00 and for second best we will give a year's subscription to Up-to-Date Farming.

Other contests will be announced later.

NEWTON'S Heave, Cough, Distemper and Indigestion Cure. A veterinary specific for wind, throat and stomach troubles. *Strong recommends.* $1.00 per can, of dealers, or Exp. prepaid. The Newton Remedy Co., Toledo, Ohio.

To Hide and Fur Shippers $1. Hides tanned into beautiful robes, also other tanning. ANDERSCH BROS., Dept. 98, Minneapolis, Minnesota.

That New Press

President Everitt's Picture

Every person who has contributed 25c or more to the PressFund FREE WILL OFFERING is entitled to one of these beautifully vignetted half-tone reproductions of President Everitt. We will begin mailing them about November 1st. They will be 11x14 inches in size and entirely suitable for framing. THIS OFFER STILL HOLDS GOOD. We will send one of these fine pictures, prepaid, to every Free Will Contributor of twenty-five cents or more to the A. S. of E. Press Fund. This will serve as our acknowledgment of the receipt of your remittance besides being something you will prize very highly. Remember, also, that your name will be listed in the "Roll of Honor" if your contribution is one dollar or over.

WE MUST HAVE THE EQUITY PRESS. It will pay you to help us get it. We can give you a bigger and better paper and we can then afford to send out more sample copies for educational purposes. There are still hundreds of thousands of farmers who have never heard of the American Society of Equity and know but little of the principles of controlled marketing. It will be much easier to force prices to an equitable —profitable price at harvest time if all farmers know what YOU know.

Hundreds of dollars may be saved and will help to buy the new press if our subscribers will renew promptly so it will not be necessary to mail statements. If you do not know just when your subscription expires send us the amount you want to apply on subscription and we will give you full credit.

1907. Any subscriber who will advance their subscription to some date in 1907 will be sent free and postpaid one of the above described pictures or any subscriber who will send in ONE NEW SUBSCRIBER—just one—will receive one of the pictures. This offer to subscribers should place President Everitt's picture in every farm home and insure proftable prices for all farm products.

Where Is Kentucky?

"I'd like to know what ails Kentucky," said Secretary Taylor of the Tobacco Dept., on looking over the list of contributions to the New Press Fund. "Those fellows have done more organizing and made more money than any other state, but they have let a dozen other get ahead in the New Press matter. They have made enough extra money this year to buy several dozen presses, such as the Society needs to do its work properly. and I'll bet as soon as they take the press matter in hand, we will have a new press in a jiffy. They never do things by halves down in Kentucky." So saying the tobacco editor took up his pen to record a new local union organized by Mr. M. J. Cox, in Marshall County, fully confident that the Blue Grass state will eventually carry off the honors in the "New Press Fund."

"How Money Grows"

Is the title of a book which tells:

How to invest small sums
How to tell a good investment
How you can convert $100 into $358.83
How to choose between real estate and stocks
How savings banks make their money
How to choose your partners
How to guard against uncertain "prospects"
How to protect yourself in case you should not care to hold an investment indefinitely, etc

This book is not an advertisement of any particular investment. It is a general "talk" about investments, based upon my experiences and observations. My book will interest every one who can save $10 or more per month from their income. Write me a postal, saying, simply, "Send How Money Grows." You will receive the book, free, by return mail.

W. M. OSTRANDER (Inc)
406 North American Building
Philadelphia

KEEP YOUR FEET DRY

Do you know that ordinary rubber wear has but little pure rubber in it? They are "filled" rubber—largely cheap substitutes with absolutely no toughness or wear in them. That's why they "give way" and leak so soon. There is one kind not made that way.

Buckskin Brand
Rubber Boots and Shoes

(Awarded the Grand Prize at St. Louis Exposition.)

outwear all other kinds because they are made of absolutely pure rubber. Moreover, they are reinforced at every point where the ordinary kind breaks. Look at the cut. See the many thicknesses where the wear comes. Guaranteed and sold on Ten Days Trial. Be sure you ask your dealer for Buckskin Brand. They will save you money and save your health. Trade mark brand on every boot leg and shoe heel. We'll sell you direct, if your dealer does not have them. Write for book and learn the difference in wear between all rubber and substitute rubber. Mailed free.

BANNER RUBBER CO.,
400 Biltmer Street, St. Louis, Mo.

Own A Farm

Easy Payments

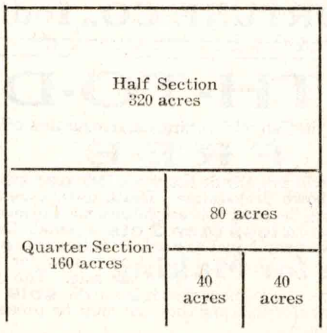
$1.50 per acre down and 10c per acre each month

Values Going Up all the Time

Farm lands never go down but up

GOOD LAND

FINE CLIMATE, PURE WATER. These lands are in the Park Region of Central Minnesota—20,000 acres to select from—raising wheat, corn, oats, rye, and the finest vegetables you ever saw. Clover grows without reseeding; a perfect dairy and sheep country, with the markets of Minneapolis and Duluth near at hand. Don't pay rent any longer. You can own a farm. This land now sells for $8.00 an acre.



MY PLAN

YOU CAN BEGIN WITH 40 ACRES; but if you can pay more you should take 80 or 160 acres. 40 acres would cost you $60 cash and $4.00 a month. Why not begin today, if you want a farm? Send postal card, write your name and address, and I will send you the booklet that will tell you how. The farm renter appreciates my plan, and so should everyone who wants a home of his own.

Just Write and Say: Send me your booklet telling how I can buy a farm on easy payments.

ADDRESS ME LIKE THIS:

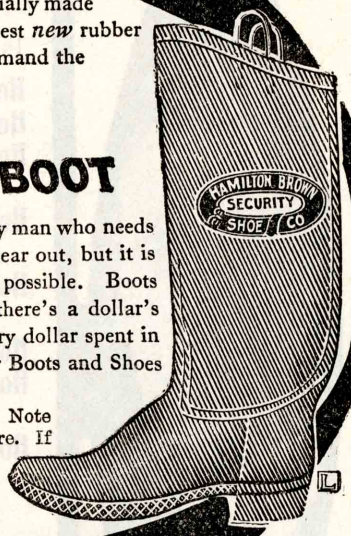
Franklin Benner
569 Bank of Commerce Bldg. MINNEAPOLIS, MINN

A POSTAL CARD WILL DO

A Real Rubber Boot—every inch of it

This boot is especially made for hard wear. Only the best *new* rubber and duck are used. We recommand the

Security LYCOMING DUCK BOOT



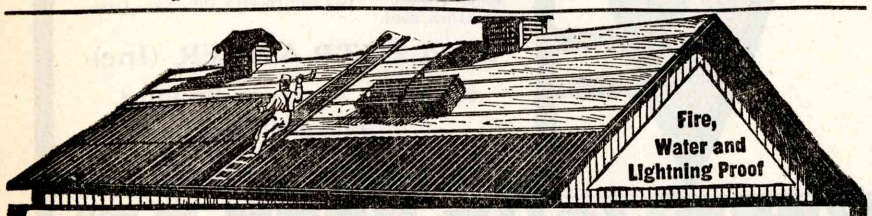
to Farmers, Stockmen, Fruit-growers and every man who needs a *good* boot. Like everything else, it will wear out, but it is built to give the greatest amount of satisfaction possible. Boots made of *old* rubber cannot stand the wear—there's a dollar's worth of pure rubber and good duck for every dollar spent in the "Security." All "Lycoming" Rubber Boots and Shoes are of the highest quality only.

Go to your dealer and *try on a pair.* Note carefully how well made they are. If your dealer does not have them in stock he can easily get them for you.

HAMILTON BROWN SHOE CO. LARGEST IN THE WORLD

HAMILTON BROWN SHOE CO. St. Louis.

Audited Sales 1904 $9,018,587.45



Steel Roofing, $1.50 Per 100 Sq. Feet

Painted red both sides; most durable and economical covering for roofing, siding or ceiling, for barns, sheds, houses, stores, churches, cribs, poultry houses, etc.; easier to lay and cheaper than any other material; no experience necessary to lay it—a hammer or hatchet the only tools you need. At this price **WE PAY THE FREIGHT** to all points east of Colorado, excepting Oklahoma, Texas and Indian Territory. At this price we furnish our No. 15 semi-hardened flat steel roofing, sheets 24 inches by 24 inches. At $1.60 this same material currogated as shown in illustration, or in "V" crimped, or standing seam. At 50 cents per square advance over above prices we will furnish this material in 6 and 8 feet long; $2.25 for brick siding or beaded ceiling or siding. Send us your order for immediate shipment. Time will prove its enduring qualities. It withstands the elements the best of all coverings. Ask for further particulars. **WRITE FOR FREE CATALOGUE NO. A. M. 204** on building material, wire, pipe, plumbing material, furniture, household goods, clothing, etc. We buy at SHERIFFS' AND RECEIVERS' SALES. 100,000,000 feet of lumber from the World's Fair.

CHICAGO HOUSE WRECKING CO., 35th and Iron Sts., CHICAGO, ILL.

RURAL ROUTES

Are being established very rapidly. Supply your entire route with Ideal Rural Mail Boxes and make the carrier happy. We are selling Ideal Boxes so cheap that you cannot afford to **not** buy them. They are cheap only in price. **Best Box Made** and sold for less than $2.00. Send 80c for sample before route is established.

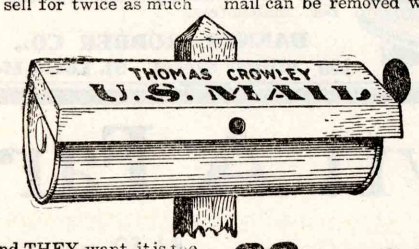
The Ideal R. F. D. Mail Box is the best medium-priced box on the market and is far superior to most of the $2 boxes. It is more convenient for the patron and the carrier than the old-fashioned square boxes, or any box that opens at the end. It is neater, more handsome and better than any of them, even though they sell for twice as much as the Ideal. The Ideal will give better satisfaction in every way.

The Ideal box has no "jim crack" attachments to get out of order, break or freeze shut. It's the kind of a box the farmer wants and the kind of a box the carrier wants, for he don't have to nearly break his neck to look inside, or get out of his rig to serve. If it's the kind THEY want, it is the box that YOU want. Any carrier or farmer will tell you that the Ideal box islike its name, IDEAL.

It is made of honest materials throughout. Lid is made of 20-gauge galvanized steel, (very heavy) and body of 24 gauge galvanized steel, thoroughly reinforced. Size of box 6¼ x 6¼ x 19 inches.

It has automatic signal painted bright red and poised above the box, making it easily seen by the carrier. Lid cannot blow open or freeze shut, nor can it be left open by mistake, as it is self-closing.

The body of the box being round, pennies or mail can be removed with gloves or mittens on. There are no cracks in it around the edges, as in the square boxes, for postal cards and change to lodge in. Both mail and change are always in plain sight of the carrier. The Ideal is rust proof. Screws for attaching to post sent with each box.



80c each

The Ideal Mail Box is made and sold at $1.50 and even more every day. Because we want to move this lot at once, the price is 80c each; $8.00 per doz.; $15.00 for twenty-four. We have only a limited number and the first orders get the preference. Order today.

FREE We will put names of patrons on boxes free of charge. Write names plainly. Boxes sent same day order is received. Send orders promptly. **FREE**

COONER & FORTUNE CO., Indianapolis, Ind.

DEATH-TO-DIRT

The preparation that has made the Capitol Cleaning Co. famous now offered to the public on trial,

FREE

For all kinds of cleaning it will actually do the work **50 per cent easier, quicker and better** than any other known preparation. Death-to-Dirt contains no injurious chemicals and positively will not injure the most delicate fabrics nor the most sensitive hands.

It Is Cheap, costing **less than 2 cts.** a pound. Every family can make their own supply just as needed. It is only neccessary to **know how.**

The Formula for Making is now for the first time, offered for sale. The price of the Formula is **One Dollar.** It is sold only on agreement that it is for the **sole** use of purchaser and his or her family. They are not transferrable and they can only be procured through our regular authorized agents or direct from us.

FREE TRIAL Order a Formula today, make a batch of **Death-to-Dirt** in your own house—try it thoroughly. **If not entirely satisfactory return the Formula to us.** We know it cannot fail. After you have become convinced of its merit **we want you to act as Agent** in your town or county. **Liberal commission allowed.** If interested write for terms when remitting for the Formula.

Send ten cents in stamps as a guarantee of good faith with the understanding that you will not make known the Formula outside your own family and we will at once issue a Formula to you. If it is satisfactory send 90c more. If not, return Formula and we will send back your dime. Full printed instructions and particulars sent with each order.

THE CAPITOL CLEANING CO., 433 N. Illinois St., Indianapolis, Ind.

With Our Advertisers

By the Advertising Manager

Investigate cream separators sold by our advertisers. I advise you to send for catalogs. It is always well to mention Up-to-Date Farming when you write.

A Stevens Rifle has made many a boy's heart glad. And made him manly, too. Send a stamp for 140-page book about out-door life. J. Stevens Arms Co., 225 High St., Chicopee Falls, Mass.

Any reader of Up-to-Date Farming can get a fine telephone on 30 days free trial. The manufacturers want to prove this telephone the best made for farmer's use. Write to the Standard Telephone and Electric Co., 352 Jefferson St., Milwaukee, Wis.

Don't allow stumps to annoy you and cost you money. Pull them out. We have received a catlog from the W. Smith Grubber Co., LaCrosse, Wis., that our readers should have. Send for copy, free.

Christmas and New Years are approaching. When you buy Xmas Cards, Calendars, Children's Books, etc., see that they bear the name of Raphael Tuck & Sons, New York. Their color work and embossing is very fine.

It is not necessary to have spectacles fitted by a personal visit to an optician. Hundreds of people are daily getting Perfect Vision Spectacles by mail. Dr. Haux Spectacle Co., St. Louis, Mo., is the largest house of the kind in the world. Their business is national; their equipment is best and they guarantee satisfaction.

Learn all about telephones for farmers. Send for free Telephone Book telling how to organize, etc. Swedish-American Telephone Co., Rural Dept. G 1, Chicago.

Before buying fence send for free Fence Book issued by Advance Fence Co., 7666 Old St., Peoria, Ill.

A poor gun is abominable—a good one a lasting pleasure. Guns made by Union Fire Arms Co., Desk T, Toledo, O., give satisfaction always. Send for a catalog about all kinds of guns—it's free.

Low-down Handy Wagons are fast coming into general use. That is because they are superior to high awkward vehicles. Send for a catalog explaining. Empire Mfg. Co., Box 68 F, Quincy, Ill.

Write for separator catalog N-136 describing the up-to-date Sharples Cream Separator. The Sharples Separator Co., West Chester, Pa.

Buy paint from the factory. I never heard of a more liberal proposition than that of O. L. Chase, "The Paint Man" 415 B Sixth St., St. Louis, Mo. Write him.

You can make Christmas money by taking subscriptions among your friends for the Saturday Evening Post and the Ladies' Home Journal. Every month the publishers divide $5000.00 in prizes among those who do good work. Get a share. Write The Curtis Publishing Co., E 29 Arch St., Philadelphia, Pa.

Fleming Spavin Cure will cure your horse. The makers give money back if it fails. Send for free Horse Book, Fleming Bros., 207 Union Stock Yards, Chicago, Ill.

Every house-wife should have the book, "Enterprising Housekeeper," containing 200 recipes and "Kitchen Helps." Sent free by The Enterprise Mfg. Co., 319 Dauphin St., Philadelphia, Pa.

You can save 100 per cent. in buying soap, coffee, spices, etc., etc. $10.00 worth of goods and a fine $10.00 premium for $10.00. Send for catalog No. 16 describing hundreds of useful household articles. Larkin Co., Buffalo, N. Y.

The making of rubber boots and shoes is described from the tree to the completed product in a book sent free by the Banner Rubber Co., 400 Bittner St., St. Louis, Mo. It will instruct and interest everyone.

Learn to mount animals and birds. Send for catalog of N. W. School of Taxidermy, 34 N. St., Omaha, Neb.

A handsome suit of latest style made to order costs $10.00 And they send free an extra pair of trousers and an extra vest. This is the offer of The Fifth Ave. Tailors, F 159 Fifth Ave., Chicago.

Make money by weaving carpets. Interesting, pleasant work. Send for particulars to the Newcomb Loom Co., 225 Taylor St., Davenport, Iowa.

Sample of X-Ray Stove Polish free. Address, Lamont, Corliss & Co., Dept. 36, 78 Hudson St., N. Y. City.

If troubled by eye or ear send for the free book of Dr. F. G. Curts, 532 Gumbel Bldg., Kansas City, Mo.

Write Joseph Dick Agri. Works, Box 80, Canton, O., about ensilage cuters.

That New Press

[Continued from Page 13]

Enclosed one dollar to renew my subscription for two years to Up-to-Date Farming and to help get "That New Press." I hope you will succeed in obtaining your object. The principle is bound to win.—Henry Coots, R. R. No. 3, Hornellsville, N. Y.

Please find enclosed $2.25 for Press Fund from Henryetta (Ind. Ter.), L. U. No. 1. We are anxious to help all we can.—C. J. Hill, Sec. Henryetta, Ind.

Enclosed please find $1.00 to help pay for "that New Press." That is just what the farmers want. Up-to-Date Farming is the best paper I ever read. It tells just what farmers ought to know. Will send in my renewal later. —John F. Brady, Pulcifer, Wis.

I see on Roll of Honor only one contributor to the New Press from Logan county and only two from this state. That don't speak very well for Ark. when our membership is headed with our Governor. I am one of the first A. S. of E. men in this state and shall help the cause by inclosing a dollar bill for the New Press.—S. D. McKenzie, Booneville, Ark.

I have the pleasure of sending you $2.80 more for "That New Press," amount contributed by eleven more of the members of Okeene L. U. No. 6. We are all very hopeful that you will soon be able to order that big press and are willing to do our part.—Charles Julius, Sec. Pro. Tem., Okeene, Okla.

Enclosed find M. O. for $1.00 for Free Will Offering to the Press Fund. Up-to-Date Farming has done so much good in educating the farmers while printed only twice a month it will certainly revolutionize agriculture and insure complete success when printed weekly.—Mrs. Fannie E. Pool, R. R. No. 3, Hobart, Okla.

I enclose herewith $2.00 to apply on the New Press. This shows my appreciation and approval of your efforts and my willingness to do my part.—J. C. Hedstrup, R. R. No. 3, Bowbells, N. Dak.

I enclose herewith $2.00. Credit $1.00 to renew my subscription for two years and $1.00 goes to help on "That New Press."

I like Up-to-Date Farming best of all my farm papers and I take several. I always read Up-to-Date first and the A. S. of E. is all right. I always believed in holding my grain and am now thinking of building another granary so I can hold more than in the past.—Milcher Schellenberger, R. R. No. 1, Georgetown, Ind.

I enclose $1.00 contribution to Press Fund also 75c for Booklet E, 37 for educational purposes also quarterly dues for some of our members.—James De Young, R. R. No. 2, Stanton, Mich.

Enclosed find one dollar and twenty-five cents ($1.25) for New Press.—A. L. Leithoff, Harrison, Neb.

I am now a member of Cincinnati (Iowa) Local Union and have a subscription credit of 25c which you may apply to that new press. Also $1.00 which I am enclosing herewith. Yours for the upbuilding and extension of the cause of Equity.—Adam Burkhiser, Cincinnati, Ia.

I know the society has many very warm friends here at St. Clairville as well as some doubters. Find enclosed my mite, $1.00 to help get the New Press.—Joseph H. Hall, St. Clairville, Ohio, R. R. No. 3.

Find enclosed $1.00 for "that new press." Keep on with the good work. You are doing more good for the country than any other editor ever did.—A. C. Hilbert, Bonnots Mills, Mo.

Please find enclosed $1.00 for "that new press." I wish I could make it five instead of one.—Henry Horton, Cleveland, Tenn.

The Hamilton Brown Shoe Co., the largest shoe house in the world, bids fair to become the largest rubber house as well. The honest quality to be found in their Security Lycoming Duck Boot is maintained in all Rubber Boots and Shoes bearing the Lycoming brand. The motto of this concern has always been "Keep the quality up" which is no doubt responsible for their wonderful success.

A Fair Booth Free to Any Church

THE church people of America have done much for THE LADIES' HOME JOURNAL. The magazine is glad to do for them when it can. To any church which expects to hold a fair this fall or winter THE LADIES' HOME JOURNAL will send, without charge, a beautiful booth measuring eight feet square and eleven feet high. Accompanying it will be sent, also without charge, twenty large reproductions of some of the most famous pictures which have appeared in the magazine. The pictures should bring Twenty-Five Dollars easily, and on every new subscription and renewal for the magazine taken at the fair a liberal cash allowance will be made.

Almost four thousand churches took advantage of a similar offer made last fall. One church made over Two Hundred Dollars, another One Hundred and Eighty Dollars, and so on. All of them made money.

If you are interested in a church fair to be given this fall or winter write now. We shall give only one thousand of these booths this fall. "First come, first served."

UP-TO-DATE Home on the Farm

HOW TO KEEP IT BRIGHT, HAPPY AND CHEERFUL

A True Story

[The readers of Up-to-Date Farming are permitted to read a page plucked from the life history of one whose daily motto "Let a Little Sunshine In" was lived up to in a simple farm home.]

"Sunny without and sunny within,
Keeps a heart merry and free from all sin."

"Just the other day I heard those lines sung by a quaint, old-fashioned little lady who looked to be about fifty years of age, but who had very recently celebrated her golden wedding. On her brow the burden of sixty-eight years sat lightly. In those lines I read the cause of her youth and happiness.

"She was deftly wiping off the windows as she sang, and stopped to greet me with that cheeriness of manner that makes her the most welcome visitor in our neighborhood, as well as the one most often visited.

"I'm living up to my motto, you see," she remarked as she returned to her task after seeing me comfortably seated where I could watch her work."

"I put a tablespoonful of coal oil in this water before I began wiping the windows and it makes cleaning ever so much earier, and after I am through there is nothing on the glass to prevent a single ray of sunlight coming in."

I laughed merrily as I replied "Aunt Charity, I don't believe you can say anything unless you say something you think may be of help to some one, and yet I never knew you to "preach" at anybody.

Aunt Charity's face softened into a motherly smile as she said, "No, dear, I don't preach, but I never miss a wide open opportunity to say a helpful thing in a helpful way."

On my return home I thought over what Aunt Charity had said, and recalled many, many little instances that were undoubted proof of her ability to teach without preaching. I hope my readers will forgive me for "preaching" Aunt Charity at them but what has made her life both happy and long, and herself loved and respected will be of some value to others, if they will use their opportunities as she did.

Last spring when Johnnie was ill with fever I could not prevent the room in which he lay from smelling as sick rooms always do, especially when it must be kept closed. Aunt Charity came over one afternoon with some flowers for our sick boy, who loved them dearly, and she noticed the unpleasant odor at once. She asked me for an old newspaper, and twisting it into a torch, set it on fire and carried the blaze about the room. The odor was removed entirely, and I have since been able to keep the atmosphere sweet in a sick room.

Another time, I was engaged in removing fly specks from a piece of furniture father had purchased at a sale, and was having considerable difficulty. Aunt Charity came in, and made a wash of equal parts of vinegar and warm water and the specks were removed with ease.

One day I asked "Aunt Charity, how do you keep your temper so sweet?"

"The same way I keep house," was the reply. "I make the best of what I have, and have the best of what I make. I save myself from many annoyances by preventing the cause" and she took me down into her cellar and gave up" she remarked, "and it isn't so much trouble to keep my life the same way. I induce the children and the menfolks to help me, and as a result we have taken pride in having a home we can be happy in, there is no trouble in being happy under those circumstances."

And Aunt Charity is right.

Centralization of Schools

The education of the boys and girls on the farms is receiving more and more attention. A great many of the leading farmers and prominent educators favor the centralization of rural public schools, and giving the country boy equal educational facilities with his city cousin. There is also a tendency to arrange the public school system so that the farmer boys and girls may be taught early in life the scientific principles of plant growth.

All this indicates that the farmers are becoming more and more alive to the fact that they are not receiving their full share of the good things of life, and that they demand every opportunity for their children.

Building a large graded school in the center of a township, and providing transportation for the children is a matter receiving earnest thought in a great many localities. The basement of such a central school building could be arranged for the meeting place of local unions, and would increase the farmers' interest, not only in the school but in his organization as well.

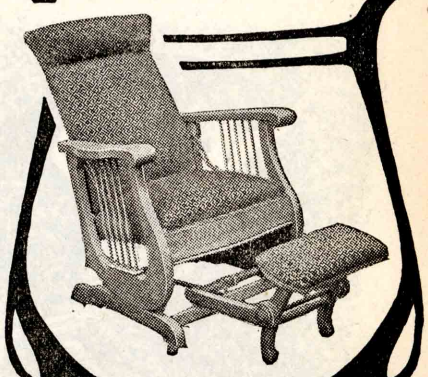
As for teaching agriculture in public schools, some farmers may be inclined to scoff at the idea, saying that their boys can learn all about farming at home. There is a difference, however, which we believe to be favorable to the school idea. On the farm, the work of farming is very apt to be looked upon as drudgery, and too hard and prosaic to be interesting. Again, labor is about all the children learn, and they know little of the habits of the valuable plants that grow on the farm. On the other hand, farming at school would be a recreation and the facts pertaining to plant life, seed germination and the reasons for cultivation of the soil with explanation of the various methods of doing it would awaken an interest in the minds of the children that would be lasting, and the knowledge gained at school would help make the farm work at home more interesting.

Talk these matters over around the fireside, while you eat rosy-cheeked apples and crack nuts, and see what conclusions you come to.

Remedy for Colds

Cold, chilly days, cold winds, cold rains, snow and sleet are all conducive to cold on the lungs, and threatened pneumonia. In preparing for such provide two large flanner cloths, flannel pads eight inches square, and a bundle of dried smart weed. When a member of your family is a victim of a cold on the lungs, place a sack of smart weed in a small iron kettle and cover with boiling water. Let it boil until the water is strong with the herb, then remove the sack and put the pads in. Take out one of the pads, put it in a thick towel, and wring it out. Lay it on the chest of the patient, as hot as it can be borne, cover quickly with a flannel cloth, and draw up the bed clothes closely. Change every five minutes for two or three hours, then rub the chest dry, put on a warm dry flannel, and leave the patient alone. Threatening pneumonia flees before such an onslaught, and the cold is broken.

RECLINING CHAIR FREE WITH $10 WORTH OF LARKIN PRODUCTS



THE Larkin Idea of Factory-to-Family dealing saves money for thousands of families annually; it would help you. No retail dealer can afford to give $20.00 worth of goods for $10.00—we do. By purchasing from us, the manufacturers, $10.00 worth of your selection of

NATURE'S ESSENCE

Extracted from the Roots of Native, Forest Plants. Go Straight Back to Nature for Your Health. There is Your Strength.

Consider your body as an engine which supplies you with all activity of mind and body. Keep the machinery well oiled and it runs smoothly. It does not groan in doing its work. But let the stomach, which is the fire-box to the human engine, get "out of kilter" and we soon meet with disaster. The products of undigested and decomposing food is *poison* to the system.

We do not live on what we eat but on what we digest, assimilate, and take up in the blood. The blood in turn feeds the nerves, the heart, and the whole system, and all goes well with us if the blood be kept pure and rich. If not, then the liver, which is the human filter within us, gets clogged up and poisons accumulate in the body from over-eating, over-drinking, or hurriedly doing both. The *smash-up* occurs when the blood is poisoned by the stomach and liver being unable to take care of the *over-load!* The red flag of danger is thrown out in the shape of eruptions on the skin, or in nervousness and sleeplessness, the sufferer becoming blue, despondent and irritable, because the nerves lack nourishment and are *starved.*

Nature's laws are perfect if only we obey them, but disease follows disobedience. Go straight to Nature for the cure, to the forest; there are mysteries there, some of which we can fathom for you. Take the bark of the Wild-cherry tree, with Mandrake root, Stone root, Queen's root, Bloodroot and Golden Seal root, make a scientific, Glyceric extract of them, with just the right proportions, and you have *Dr. Pierce's Golden Medical Discovery.*

It took Dr. Pierce, with the assistance of two learned chemists and pharmacists, many months of hard work experimenting to perfect this vegetable alterative and tonic extract of the greatest efficiency. To make rich, red blood, to properly nourish the nerves and the whole body, and cure that lassitude and feeling of weakness and nerve exhaustion, take Dr. Pierce's Golden Medical Discovery. It bears THE BADGE OF HONESTY upon every bottle in the full list of its ingredients, printed in plain English, and it has sold more largely in the past forty years than any other blood purifier and stomach tonic. The refreshing influence of this extract is like Nature's influence—the blood is bathed in the invigorating tonic which gives life to it and the vital fires of the body burn brighter and their increased activity consumes the tissue rubbish which has accumulated in the system.

The "Discovery" cures all skin affections, blotches, pimples, eruptions and boils; heals old sores, or ulcers, "white swellings," scrofulous affections and kindred ailments.

The "Golden Medical Discovery" is just the tisue builder and tonic you require when recovering from a hard cold, grip, pneumonia or a long siege of fever or other prostrating disease. No matter how strong the constitution, our stomach and liver are apt to be "out of kilter" occasionally. In consequence our blood is disordered, for the stomach is the laboratory for the constant manufacture of blood.

It is a trite saying that no man is stronger than his stomach. Dr. Pierce's Golden Medical Discovery strengthens the stomach—puts it in shape to make pure, rich blood—helps the liver and kidneys to expel the poisons from the body and thus cures both liver and kidney troubles. If you take this natural blood purifier and tonic, you will assist your system in manufacturing each day a pint of rich, red blood, that is invigorating to the brain and nerves. The weak, nervous, run-down, debilitated condition which so many people suffer from, is usually the effect of poisons in the blood; it is often indicated by pimples or boils appearing on the skin, the face becomes thin and the feelings "blue." Dr. Pierce's "Discovery" *cures* all blood humors as well as being a tonic that makes one vigorous, strong and forceful. It is the only medicine put up for sale through druggists for like purposes that contains neither alcohol nor harmful drugs, and the only one, every ingredient of which has the professional endorsement of the leading medical writers of this country. Some of these endorsements are published in a little book of extracts from standard medical works and will be sent to any address *free*, on receipt of request therefor by letter or postal card, addressed to Dr. R. V. Pierce, Buffalo, N. Y. It tells just what Dr. Pierce's medicines are made of.

The "Words of Praise" for the several ingredients of which Dr. Pierce's medicines are composed, by leaders in all the several schools of medical practice, and recommending them for the cure of the diseases for which the "Golden Medical Discovery" is advised, should have far more weight with the sick and afflicted than any amount of the so-called "testimonials" so conspicuously flaunted before the public by those who are afraid to let the ingredients of which their medicines are composed be known. Bear in mind that the "Golden Medical Discovery" has THE BADGE OF HONESTY on every bottle wrapper, in a full list of its ingredients.

Dr. Pierce's Pleasant Pellets cure constipation, invigorate the liver and regulate stomach and bowels.

ONLY A DIME-10 CENTS

This small amount will buy a Zobo—the wonderful musical novelty. It affords more amusement and pleasure to old and young than costly instruments. Anyone can play in a moment without practice. "UNCLE SAM'S" ADDRESS

Advises Farmers to Stand Pat for 12 Cent Cotton

To the Farmers of the South Greeting:

As general organizer of the American Society of Equity for Oklahoma, Indian Territory, Arkansas, and Texas, I deem it my duty to issue a public address to the Co-operating Farmers of the South, and bring to their attention what I believe to be a conspiracy of the gambling dens, falsely called "Cotton Exchange," to despoil Southern Farmers of half the value of their staple crop—cotton.

The prevailing custom of these exchanges for the past thirty years, has been to fix prices, and to contract and sell your cotton, and all other crops, to the mills of England and of this country.

These contracts place the people of the South solely at the mercy of the exchange gamblers, gives them a monopoly of our products, and forces the farmers to patronize said exchanges or have no markets whatever. Thus giving the exchanges the unbridled opportunity to exploit the producers of cotton, of the wealth they and their families have created and justly entitled to enjoy.

This system of robbery has continued for more than thirty years, pauperizing our farmers, menacing our homes, devastating the entire Southland and rendering our farmers helpless victims in the hands of a set of consciousless speculators.

Shall our farmers continue in servility to these gambling dens? Gamblers which have assumed the prerogative to barter, bargain and fix prices for the greatest and most important class, and to exploit their labor to the limit of their greed?

I appeal to farmers, ginners, merchants, bankers, landowners, and all others to line up against such a conspiracy and stop this system of exploitation now practiced by non-producers on the gambling boards and exchanges of this country.

Over a million farmers are now united in the various farm organizations, and millions more are standing ready to help strike the decisive blow to the gambling system of selling, which will forever put the bulls and bears out of business. The plan for doing this is simple, but must become universal with the farmers, and it requires no capital stock, only good common sense and a little back-bone.

Farmers, you must have the "Unity of Prices." This the national union of the A. S. of E. has made, and every farmer should know the price. The minimum price on cotton is 12 cents per pound at New York, and no farmer should sell a bale of cotton until the market reaches 12 cents or say 11 cents in the country. All farmers knowing the unity of price and all standing pat at the same time will compel this desirable price in a very short time.

The bulls are your benefactors in this fight and if you will help to kill the bears, the bulls will die also, as one cannot exist without the other, and you will then have a clear-cut, unobstructed, open market with the mills of the world. The gambling dens at present own the markets, but if you will "stick" together and control supply and stay off the market until 12 cents is reached, and then market only as the price is paid a profitable price will be maintained all the time.

The world is approaching a cotton famine, and one of the greatest cotton operators has said "that 20 cent cotton is in the range of possibilities in the very near future," and he advises slow marketing, and says, "why not take nine months to sell, instead of 90 days?"

I have traveled extensively through the cotton belt and you will miss your greatest opportunity if you fail to control marketing, and should "dump" your present crop at prices made by the exchanges. Don't forget that cotton seed is also a very important item, and should command a good price this year, all the way from $15.00 to $20.00 per ton. The latter price could be easily reached, if you should arrange to hold the seed on the farm a few months.

Remember, controlled marketing is everything to you, and is the key to profitable prices for all crops.

The A. S. of E. makes the "Unity of Price" on all crops, and publishes them in the official paper. Every farmer should become a member of some farmers' organization, and I believe all should be members of the A. S. of E., and know the "Unity of Price" on all crops.

Farmers, if you play the "dump" act this year and destroy the market, don't blame any one but yourselves. The merchants, bankers, ginners and all other classes have lined up on your side, and I appeal to you to do your duty and witness your own salvation.

Yours for equity,
SAM J. HAMPTON,
General Organizer A. S. of E. Durant, I. T.

Stand Firm

Editor Up-to-Date Farming:

Dear Sir and Brother—If you please sir, I wish to say a few words to our brother farmers through the columns of your most valuable paper. First of all, I praise God from whom all blessings flow. I believe with all my heart that the A. S. of E. and The F. E. & C. U. of A. are two of the grandest organizations of America today working in and for the interest of the laboring class of people. Therefore we, one and all, as farmers ought to go hand in hand working for one common cause that is Equity. We must rise in the strength of our power and contend for what is right and no more. There is no reason why the farmer should be the poorest class of people on earth. Neither will they be so soon as they get together and claim their rights. Brethren, let's stand firm to each other and see the salvation of the Lord. To do this I think the secret is here. For those who can possibly hold their stuff to do so and let those who are forced to sell have the benefit of your holding. Well, why you may say. Because it is to your interest as well as theirs. How can it be, you say. It's simply this: The class that is forced to sell is the class that moves the universe. Unless they can pay their debts the wheel that reels all commerce is stilled. But you give them good crops and good prices for two or three years and see how things will move. They will pay you what they owe you and then pay you cash for what you have to sell. Then they won't have to plant so much stuff to meet the demands upon them. But let's be reasonable about it. Also honest. Ten cents for cotton is all right. $1.00 wheat is all right, too. But nothing less is right. We can get it if we will only stand together and contend for it. I was sorry to know about the contention between the F. E. & C. U. of A., and the A. S. of E., in Oklahoma, published in August 15, number of the Up-to-Date Farming. This ought not to be, but to the contrary. They ought to help each other do all the good possible. The crops in Faulkner county, Ark., will be light in 1905.

J. J. BLESSING.

Hanna, Ark.

Why It Is So

To the President of the A. S. of E.:

In Up-to-Date Farming, issue Sept. 1st, the writer made a note of an article under the head of "Why Is It So." It seems that national organizer Sherman feels somewhat discouraged that farmers do not respond to the call for organization more freely. In answering the question, the writer feels that something in the way of an excuse for them should be given. That while the farmers generally, feel the necessity for something that would redound to their interests, there are in every community a few of them, that speak discouragingly of any thing being said in the way of them organizing for controlled marketing, that it seems has a tendency to keep others from taking hold. There is another point that makes it more difficult for the organizer. Farmers, as a general rule, work from early morn til late in the evening. At night fall they are weary, and feel the want of rest. That will have a tendency to cause them to be less active in the work of organization. The one thing needful, is to get the farmers aroused in a way that they will see the great benefit to be derived.

That is what National Organizer Sherman lay awake nights thinking about, and right there is the main point. The writer suggests to every reader of Up-to-Date Farming who has given the matter any thought, that it is their duty to give an idea on this very important question. The following idea is given for what it is worth.

the rural towns could be made to feel
the rural tours could be made to feel

that it would be a benefit to them if the farmers were given control of the market of all farm products that they (the dealers) could do more toward getting the farmers organized than the farmers themselves. They reside in the towns, could learn from headquarters, and could, through the local papers, notify the farmers. How can said dealers be made to feel a deep interest in the organiaztion of the A. S. of E.? The following is an idea, the writer has never seen offered:

Being a citizen of Illinois, I take that state as a sample. In taking Rand McNally & Co.'s map, published in the year 1891, it was learned that in the state of Illinois, there were at that time 1656 cities and towns. And in counting the cities of 5,000 inhabitants and above, it was learned that there were only 38. That would leave 1618 with a population less than five thousand down to the village at the cross roads of say 25. Now, those small cities and towns have no dealers other than retailers. Does it not stand to reason that the farmers, laborers and dealers, should stand together because they are located in the rural districts in every township in the United States? They should help one another because it is their home. They should go hand in hand. The farmer to buy all his goods if possible, of the dealer at home, and in turn said dealer should stand by the farmer, and do all in his power to advance the welfare financially of said farmer, but how is it today? We find that in Chicago and other large commercial centers, great department stores, such as Sears, Roebuck & Co., Montgomery Ward & Co., sending their catalogues broadcast over the United States, telling the people that they can sell to the consumer goods much better quality and cheaper than can any retail dealer in their own town, and giving excellent reasons for the statement. There are hundreds and thousands of people that reside in the rural districts all over this country that patronize them. Montgomery Ward & Co., refuse to send their catalogue to any in very large cities or in Cook county.

Now, Mr. President, what is the one thing needed? What should be done? The writer gives a very emphatic answer. That so long as the present regime is allowed to continue, we bid Montgomery Ward & Co. God speed. So long as the farmer must haul his wheat, his corn, his cotton, tobacco, in fact, every product of the farm to town and ask the purchaser, how much he is paying for it, and then when he buys any from the purchaser, he must ask, what are you selling it at per pound or yard. We most emphatically say, that as long as such a system is to be continued, the consumer must not be blamed for buying his goods in the very cheapest market he can find. So we say let the retail dealers take hold in the interest of the farmers. Let them see to it to organize the farmers. That those 1618 towns in the state of Illinois and all other small cities and towns in the United States, are made to flourish by pushing the grand organization, the A. S. of E., to the front. Let them say to the farmers, we desire that you shall have the same privilege we claim for ourselves, i. e. to set the price on the products of your farms, as we set the price on the goods we sell to you. And then you can feel, Mr. Farmer, that we are your friends, and in turn you should give us your friendship. We should feel it a duty we owe each other to stand together. Let us build up those small cities and towns in the rural districts of this country and let the department stores go out of business so far as we are concerned. We can let the great cities of their location take care of them; that we have no war to wage with them regarding price; that we are going to take care of home. One thing, Mr. Farmer, if they do succeed by your patronage by selling you goods cheaper than we do in some lines, on account, as they say, of saving to you the agent's per cent., also the jobber's per cent., and finally knock all three of us out, i. e. the agent, the jobber, also we retailers, then does it not stand to reason that they will knock you out by charging you all the trafic will bear on account of having a monopoly?

In conclusion, Mr. President, we say that it does seem that should the retail dealers throughout the country espec-

POPULAR MUSIC

SHEET MUSIC

3½c a Copy

Each number contains one piece of full size Sheet Music, unabridged, consisting of from four to ten pages, and is in every particular the same quality of sheet music as is usually sold in music stores at from 30 cents to 75 cents per copy. The composers' names are household words all over the continent. None but high-priced copyright pieces, or the most popular reprints. It is printed on regular sheet music paper, from new plates made from large, clear type—including colored titles—and is in every way first-class and worthy of your home. 3,000,000 copies already sold!

In Blacks, Black-and-Whites, Light Indigo-Blues and Silver-Greys, Shepherd Plaid Effects and a large variety of new and beautiful designs.

Thousands of first-class dealers sell them.

The Eddystone Mfg Co (Sole Makers) Philadelphia

ially in those smaller cities and towns, unite their strength, get together, and work for their mutual benefit they could soon build up and make independent the farmers of this land. Let them join together and work out the plan of the A. S. of E., and the writer firmly believes that ere olng we will have Equity and justice.

One thing certain as it takes two to make a bargain, to undertake to do business in the way of trade, where one has everything to say, in making every trade that fellow will wax rich and the other will generally remain poor. From time immemorial, the case has been like the handle of a jug—all on one side. The other fellow has been making the bargain for the farmer in marketing his products.

O, Farmers and Dealers of those smaller cities and towns of this great country, can we not get together in the A. S. of E. for our own mutual benefit and then, it seems, it won't be long until we will be a happy and prosperous people.

JAS. FARMER,
Barry, Ill.

The Cradle of Controlled Marketing

Dear Editor: I write of an instance of Controlled Marketing that occurred in your city (Indianapolis) sixty years ago.

The town then had a market house and the council passed an ordinance that every person bringing produce to town should go to the market house, back up into a stall until eleven o'clock and was not allowed to sell on the streets or to stores until after that hour.

I had a bushel basket of eggs in my marketing and I backed up according to the order. Old Mother Hamers backed up in an adjoining stall with butter.

Pretty soon the market master came along to weigh the butter, as the council had also made a law that all butter should be in one pound cakes and if any was found short he might confiscate it. He was weighing Mother Hamer's butter and one cake didn't weigh a pound so he was putting her butter in his basket with 15 or 20 pounds he had already confiscated. This was more than Mother would stand for, so she grabbed a cake, struck him square in the face with it, and smeared the butter all over his white ruffled shirt. She then returned her butter from his basket to hers, placed the basket in the wagon, jumped in, laid whip and left town.

This incident attracted quite a crowd and they began to holler "egg him." Perz Stuck kicked the market master off the platform and the eggs flew after him. When he got out of reach my egg basket was almost empty. Perz Stuck then called out for everybody to come he wanted to talk to them which he did as follows:

"Friends and Neighbors: It is an imposition to be required to back up here until 11 o'clock. It is an outrage to force our wives to put butter up in 1-pound cakes and then have a silk hat and ruffle shirt dude for a market master. Now I move that no person will bring anything to eat to this town until the objectionable laws are repealed. We can live without the town but they can't live without the farmers."

Everybody seconded the motion and voted it through also it was agreed that as butter was bringing only 4c a pound it must bring 6c, and as eggs were bringing 2c they must bring 4c, and nobody would sell for less. We all gave three cheers for Mother Hamer and all left the market.

The result was, in two weeks the obnoxious laws were repealed and the town people begged the farmers to bring their produce to town at our own prices. C. L. M'DOWELL.

Giel, Oklahoma.

Taught How to Throw Off the Yoke

To the Editor:

I have read the National Reciprocity article with much interest. It is natural for most people to deceive and cheat. Pirates, highwaymen, thieves, and robbers are of one class; gamblers, conspirators, speculators and financiers are of another, by some considered more genteel or aristocratic. All are after something for nothing. The class legislative government by all tricks, frauds and deceptions is but little better and seeks to protect one class while robing another; both in the same nation, under one constitution and beneath the flag of freedom.

This is too much. Cattle in close-eaten pastures will break through their enclosures even though punishments follow. The chambers of commerce and Boards of Trade engaged in gambling in farm products and protected or tolerated by our government supported and maintained to protect us, are the most iniquitious gangs of robbers ever operating in this country. In one sense they are slave traders. If they buy continuously human toil, no difference if indirectly, it amounts to the same thing. When they furnish bare-existence prices and the laborer the unpaid-for toil it is indirect slave trade.

Where are the multi-millionaires coming from? From back of legislative restriction upon those who are exploiting the toiling masses. What right has anyone to put a price, without my knowledge or consent upon any of my products? The pirates on the Boards of Trade have been doing this right along and in such manner that there can be no certain stability of the prices they fix. It would be well if these vultures were chained.

The producers can do this through organization and co-operation but the tillers of the soil are like the ox, they meekly submit to carry the unnecessary burden and will not expend a cent for bettering their condition unless they see ten cents in return—fearing somebody will get immensely rich from the penny investment.

I have tried in congress to secure the enactment of laws for the common people. I had only prayers; the lobbyests had gold and plenty of it. They were successful. I failed. The big manufacturers and financiers are the government in fact. They, through the United States treasury, rob the public by a protective tariff and through state, county and municipal government by direct taxation. The homan cattle meekly maintain such a system by following political tricksters, just as a blind horse in a tread-mill works on unmindful of no progress.

I send you herewith $1.00 on the "new Press." You are the only man in the United States since Philip Wendell daring to protest against such robberies. God bless you. You have taught the agricultural slaves how to throw off the yoke. May they not refuse to do it. OLF SWENSSON.

Wegdahl, Minn.

Give Us Our Rights

To the Editor:

You are working hard to bring about results beneficial to the farmers. I am sorry to say that the farmers, as a class, are not doing their part. The majority of them expect great results from this movement, but are willing to reap the benefits without raising a finger themselves, not even encouraging the movement by their good wishes. Those luke warm farmers will, however, repeat with great industry any adverse criticism thrown out by some railroad magnate or the hirlings of such interests.

If all the farmers could hear Gov. LaFollett's talks on Representative Governments or read Russell's "Greatest Trust in the World—The Food Trust," they would rally around the standard of the A. S. of E. and try and protect themselves from the highway robbery to which they are now subject.

I hope that God will raise up more men like J. A. Everitt, Gov. LaFollette, Thos. W. Lawson, Edward Russell and Theodore Roosevelt to carry forward a second emancipation freeing the toiling millions from the exploitations of all types of grafters so that future generations may be left the patrimony earned by their hard-working but two trusting forefathers.

Let all men with honest and freedom-loving mothers capable of using voice or pen proclaim from the hill tops and the valleys a modification of those immortal words of Patrick Henry, "Give us Equity or give us death."

Let the Annual Convention of the A. S. of E. on the 23d of October be a record day in the history of industrial regeneration and let the cry go forth to every state, every county, every hamlet, aye, to every home—"give us our rights." We ask no favors but our rights we shall and must have, even if every grafter, trust speculator and extortioner in the land has to be burned on the funeral pile of their iniquities. J. F. SPENCER (farmer).

NAMES WANTED

Send us a list of farmers' names and we will send them some copies of Up-to-Date Farming. When you send the list, please use a separate sheet for each post-office also write the name of county on each sheet. Do this so we may have a large field to work in this fall and next winter.

It Makes Stock Thrive
STANDARD STOCK FOOD
It Makes Money for You

Feeding Standard Stock Food is an economy, not an expense. A very little of it makes the animal digest its feed better and more thoroughly—stopping the waste of undigested feed—putting unthrifty stock in a thrifty condition and making thrifty stock do better and pay better. Compare the Standard with others and you will find it looks better, smells better, tastes better and is better—purer, richer, stronger, more concentrated. It costs less to feed it than any other, because it contains more feeds to the pound. It goes farther and lasts longer. Sold on a money-back "Square Deal" Guarantee.

Ask Your Dealer.
If he won't supply you, send his name, tell how much stock you keep and we'll send you free our big 50c book, "The Standard Feeder," 160 pages; 200 illustrations and full directions for feeding and care of stock of all kinds. Write for it to-day. **Free**

STANDARD STOCK FOOD CO.,
1569 Howard St., Omaha, Neb.

It Has No Equal.
E. G. Baird of Jefferson, N. Y. writes:—I have fed Standard Stock Food to my entire dairy herd and am confident it will increase the flow of milk per cow from one to two pounds per day. I also feed it to my calves with good results. Will say further, there is nothing equal to Standard Stock Food for horses as it will give them a smoother coat and will put them in the best condition of any stock food I know of. It does make stock thrive.

FREE TRUSS The U. S. Gov. granted me patent for truss. It's cured hundreds of ruptures. Safe, sure, easy as old stocking. No elastic or steel bands around body or between legs. I want it used in every part of world at once. Get one free—don't send any money. Every sufferer write now. ALEX. SPEIRS, 719 Main St., Westbrook, Maine.

PILES CURED WITHOUT THE KNIFE. Send for free illustrated treatise on rectal diseases, with names of prominent men cured. L. P. HOSPITAL, 502 LaSalle Ave., Chicago. **NO MONEY TILL CURED**

Farmers Income and Farmers Taxation

[Concluded from Page 5]

tricts of the country are threatened with becoming pauperized and degraded in not a distant future unless something is given them back in return for the loss of wealth by such exodus. In order to make the taxation in this country as eqiutable as possible by proper distribution of its burdens between the various localities and producing classes the money earned on the farm which has moved to the city must be taxed for the benefit of the farming districts, for several years at least.

Many remedies could be suggested by us for the flagrant evils of the existing system of taxation in the United States which is injust and inequitable as well as oppressive to the farmers. As, however, we want to offer just practical measures of present importance we will limit ourselves to two suggestions only. The suggestions are: The exemption of personal property and the exemption of taxes on improvements.

The proposal to exempt personal property from taxation has never been generally popular among the American farmers. They usually imagine that, as they own so large a portion of the land of the country exemption of any other form of property and the consequent increase of the taxes on land would fall most heavily upon them. But in order to determine whether the American agricultural classes as such would gain or lose by the exemption of personal property generally, which must result in heavier taxes on real estate, it is necessary to determine whether the present assessment of this property is a greater or lesser proportion of the total assessment of farms than it is of the total assessment of cities and towns, and consequently whether their total assessment will be diminished more or less proportionately, than the total assessment of cities and towns. By the foregoing facts and statistics we have proved already beyond any dispute that the present assessment of personal property of farmers constitute a considerably greater proportion of their total assessment than the present assessment of personal property of the inhabitants of cities and towns of the total assessment of the latter. Thus it is apparent that by the exemption of personal property generally the agricultural classes and interests of the country will gain more or less considerably. There is not the slightest doubt that such exemption will give to the American farmer a considerable relief from the burdens of taxation or, speaking more correctly, inequitable taxation.

What concerns the exemption of taxes on improvements, so far back as in 1879 the constitution of the state of California introduced the principle that cultivated and uncultivated land shall be assessed alike. In its application to farms this principle means that each farm must be assessed at what it be worth without any buildings, fences, drains and cultivation. A special committee on taxation organized of representatives of different granges of the state of Pennsylvania in 1894, reached the conclusion that if the California principle of assessing cultivated land no highen than uncultivated land were adopted and all buildings, fences, planted trees and other improvements upon land were exempt it would be a great benefit to farmers. As we have proven already that assessment of land on the uncultivated basis would reduce valuation and taxation of farm land 60 per cent and city land 40 per cent, it is unnecessary to argue that the conclusion reached by the farmers' committee of Pennsylvania is perfectly correct.

A Strong Man in Minnesota

Mr. Olof Swensson, a prominent and wealthy resident of Chippewa county, Minn., formerly a European, writes us that he advocated the doctrines of the A. S. of E. 25 years ago in his native country, but that the nobility there forbade the publication of such doctrines. Mr. Swensson has erected at his own expense in his adopted State a hall 40 x 40 feet, to be used free for preaching A. S. of E. gospel and other reform doctrines, and he proposes to not only furnish the hall, but to do a good deal of the preaching himself. He wishes the Third Power translated into the Norwegian, Swedish and German languages, and believes it would result in the rapid organization of these important elements of our northwestern population. Further, Mr. Swenssen says:

"This country is not the land of the free and the home of the brave, but rather the land of the rich and the home of the slave. Am I any less a slave whether I am sold on an auction block in New Orleans or the products of my labor are taken at a price fixed by the Chamber of Commerce in Minneapolis without consulting me or considering the labor and money it cost me to produce them? There is this difference: If I myself am sold the purchaser must feed, clothe and care for me, but if only the product of my labor is taken, I am left to shift for myself."

The Larkin Idea Helps Home

While all realize that comfort and happiness are essential to every home, many may not know that over a million families attribute much of their happiness to the Larkin Co. of Buffalo.

The story is, that over twenty-five years ago this firm thought of a co-operative plan of selling their Soaps direct to families at a saving of one-half to the consumer.

"You can't do it," said some.

"How absurd to think of ordering a little thing like soap through the mails from the factory," said others.

The thought developed into the Larkin idea of Factory-to-Family dealing—people became interested. A customer ordering $10.00 worth of Laundry and Toilet Soaps and some Toilet preparations received as a Premium the saved middlemen's profits and expenses in a free $10.00 Desk, Chair, Table, Couch, or other selection from twenty-five $10.00 Articles. They got good Soaps and good furniture; in fact, these Premiums alone couldn't be purchased at retail for less than the amount paid for both Soaps and Premium. This interested people still more; for homes could be furnished without cost.

To get a $20.00 retail value for $10.00 was true economy years ago and always will be.

Today the Larkin Co. has increased its Products to include over 100 articles embracing Laundry and Toilet Soaps, Starch, Toilet Articles, Coffee, Teas, Spices, Extracts, Baking Powder and many other home needs. The latest Larkin Premium List contains nearly nine hundred Premium offers which include everything most homes require if furnished completely, comfortably, even elegantly.

The name "Larkin" is a household word, made so by fair and liberal dealing, and Larkin customers appreciate the many advantages of buying direct from Factory-to-Family. One woman expressed the opinion of a good many when she wrote:

"Because of the excellent quality of your Products, the thoroughly honest and upright dealing I know I shall always receive, and the many benefits to be derived, it gives me pleasure to send you my orders from time to time."

Every housewife will be interested in the Larkin New Premium List No. 16. Send for it to Larkin Co., Buffalo, N. Y.

Editor Up-to-Date Farming, Indianapolis, Ind.:

Dear Sir: To give you a better understanding of the merits of International Stock Food we call your atention to these facts: Our world famous stallion "Dan Patch" has eaten International Stock Food every day for three years. On September 4th he made his first public appearance this year on the opening day of the Minn. State Fair and drew sixty thousand people. He paced a mile in 1:59½ over a track slow on account of rain. On the following Saturday, September 9th, he closed the Minnesota State Fair by pacing a mile in 1:57½ before forty thousand people. He was shipped to the Indiana State Fair and paced a mile in 2:00½ in a strong breeze and before over fifty thousand people. He was shipped to Allentown, Pa., and on September 21st he broke two world records in the presence of over sixty thousand people. At this time he reduced the half mile track record from 2:03 to 2:01, and within forty minutes he reduced the half mile track wagon record to wagon from 2:11 to 2:05. Within seventeen days he paced five remarkable miles and was shipped twelve hundred miles. This is certainly proof that International Stock Food gives better digestion and assimilation, more strength, purer blood, endurance and speed.

If any of your readers want a beautiful colored picture of this world's champion horse we will send it postpaid free. We want to know how much stock of all kinds they have and that they read Up-to-Date Farming. We know they will be glad to frame the picture. Yours truly,

INTERNATIONAL STOCK FOOD CO.

Labor-Saving Hints

Carpets can be cleaned and freshened by being scrubbed on the floor with warm water, to which has been added two tablespoonfuls of borax to a pailful, then rinse and wipe dry.

Matting should be taken up, well swept on both sides, then wiped with a clean, damp cloth, wrung out of a solution of salt in water, finally wiped dry as quickly as possible. Wicker furniture can be cleansed in the same way. Never use soap on matting.

Poison

As far as shaving soap is concerned common soap ought to be marked poison. Shaving demands a special soap. If your face has been poisoned with cheap soap, if it burns and smarts and itches, stop using the poison and use Williams' Shaving Soap. It will cool your face and make shaving pleasant. The J. B. Williams Co., Glastonbury, Conn., will send you a free trial sample for 2c stamp. "For the sake of your face" send for it and mention Up-to-Date Farming.

A well-built press and a good apple year is the best kind of a combination to assure a fine run of cider. But you can never get the best out of this season's enormous crop if your press is out of date or not up to the requirements of the modern machine. The Boomer & Boschert Press Co., 474 W. Water St., Syracuse, N. Y., make the best cider press. They also make a full line of graters, evaporators, pumps, etc.—all fully explained in their latest catlog. Every manufacturer of apple products should secure a copy of this useful book.

Get This Gold Pair FREE

Listen! In the past year I received thousands of letters from spectacle-wearers all over the world, expressing their thanks and appreciation, and the one I give here is a good sample of what they all say. The Reverend O. C. Clark, one of the most prominent ministers in the State of Illinois, says: "I highly appreciate your famous "Perfect Vision" spectacles, for I can honestly and truthfully say that with them I now read the finest and smallest print both day and night, just as well as I ever did in my life Your spectacles are truly marvelous." Now I have no doubt but that the testimony of this noted minister of the gospel is sufficient proof to every fair minded spectacle-wearer that my famous "Perfect Vision" spectacles are really **THE BEST IN THE WORLD**, as I claim.

But I Want YOU to Judge Them For YOURSELF

and thereby get YOU to send me YOUR testimonial also. Hence, before placing them on the market for sale at their regular price of $5 per set, I make you the following special offer which will actually save you $4 cash: Just write me your name and address and I will mail you my Perfect Home Eye Tester, free, with which you will be able to test your eyes at your own home, perfectly. Then when you return me the Eye Tester with your test, I will send you a complete five dollar family set of my famous "Perfect Vision" spectacles for only $1 (which is an actual saving of $4 to you), and this will include a pair of my handsome Rolled Gold Spectacles absolutely free of charge. This set will last yourself and family a lifetime. With these famous "Perfect Vision" Spectacles of mine you will be able to thread the finest needle and read the smallest print, both day and night, just as easy as you ever did in your life, and this even if your eyes are so very weak now that you cannot read the **HEADLINES** in this paper. I also hereby agree to return you your dollar cheerfully if you **YOURSELF** don't find them to be the most perfect-fitting, clearest and best you have ever bought anywhere, at any price. Write today for my free Home Eye Tester. Address my company as follows:

DR. HAUX SPECTACLE COMPANY, Haux Building, ST. LOUIS, MO.

I WANT AGENTS ALSO And any man or woman (also storekeepers), without any previous experience whatever, can fit the weakest eyes with my Improved **Home Eye Tester. This is so simple that any one can work it with perfect satisfaction and easily earn from $25 to $100 weekly selling my famous Perfect Vision Spectacles, either in their own homes, traveling or in stores. My agents need no license as I furnish necessary documents with the Agent's Outfit.**

(NOTE.—The above is the largest Mail Spectacle House in the United States and perfectly reliable.)

UP-TO-DATE FARMING

Our Motto, FARMERS TO THE FRONT *Our Object,* EQUITABLE PRICES FOR ALL PRODUCTS. *Our Plan,* CONTROLLED MARKETING

INDIANAPOLIS, NOVEMBER 15, 1905

A group of delegates to the Third Annual Convention of the American Society of Equity
Indianapolis, Ind., October 23, 24 and 25, 1905

Nineteen States and Territories were represented at this convention. It was the first National Meeting of Farmers to agree on Prices for their own products. Minimum Prices were agreed on for each important crop and much other important business transacted.

A partial report of the Convention will be found in this paper and it will be completed in December 1st issue.

FOR THE CO-OPERATING FARMERS OF AMERICA

YOUR DOCTOR

MAY TELL YOU that your disease is incurable, may say that medical science or medical skill is unable to help you, may claim that all you may expect at best is a temporary or some slight measure of relief. He may go still further and say that nothing advertised in the Public Press can be of advantage to you, that all such are quacks and frauds, that no one was ever cured or benefited by an advertised treatment, that you will lose time and money by "fooling" with all such.

LET HIM THINK SO! He has had his term in college, has had his period of practice and is certainly entitled to and must be allowed his opinion. **You need not think so unless you wish to,** and if you are sick, if you are tired of constant suffering, if you want relief and want to stop this continual dosing with druggists and medicines, **You don't wish to.**

MANY PEOPLE, today living in this broad land of ours, enjoying health and happiness were told that their ailment was hopeless of recovery, yet Vitæ-Ore did cure them. Many, even up in the count of thousands, were told that the ravages of diseases would not stop, yet Vitæ-Ore commanded it to stop. Many also were told that they could only, by continual drugging, by constant dosing, secure and retain some slight relief, yet Vitæ-Ore stepped in, crept into the system, and brought entire relief, gave entire cure and made further medicines unneeded and unthought for.

It is an advertised treatment, oeffred direct to the masses, direct to those who need it, without prescription of the doctor, but how is it offered? Not like doctors' prescriptions, not like drug store inventions, not like other advertised treatments. The user, the sick and suffering person, often needy of money as well as health, takes absolutely no risk. He pays not a cent unless he is benefited. He judges for himself and by himself. He uses it, knows his condition after he has used it, and if cured, if enough improved, he pays for it. Otherwise his test has cost him nothing, and he is privileged to quit, to use something else, if he chooses. You can quit your doctor if he does not help you, but he will send in his bill on the first of the month.

What other medicine, was ever so offered?

What other medicine can be so offered. YOU ARE TO BE THE JUDGE. Six small words, but they mean a volumne to the sick and suffering man and woman who has paid dollar after dollar for sweet tasting alcoholic compounds without a penny's benefit. No sick and ailing person, no matter what has been his experience with the doctors, no matter what has been his experience with advertised medicines, no matter what may be his opinion of doctors' advertised medicines, will hesitate to try Vitæ-Ore on this remarkable offer, It must be advertised or the masses would not know of it, could not take advantage of the great boon of health which it offers to all, perhaps would never learn of it, but it is advertised honestly, right from the shoulder, **in a way no honest man can dispute, question or condemn.** Use it! Pay if it helps! don't pay if it does not help. How can we profit, how can we pay for this advertisement if it does not help? Does not this prove to you that we feel sure of its power to help you? Read our trial offer, read what Vitæ-Ore is, and write today for a package at our risk.

You Are To Be The Judge!

WE WILL SEND TO ALL Readers of Up-to-Date Farming **a full-sized $1.00 package of VITÆ-ORE by mail, post-paid,** sufficient for one month's treatment, to be paid for within one month's time after receipt, if the receiver can truthfully say that its use has done him or her more good than all the drugs and doses of quacks or good doctors or patent medicines he or she has ever used. Read this over again carefully, and understand that we ask our pay only when it has done you good, and not before. If not, no money is wanted! **We take all the risk, you have nothing to lose.** If it does not benefit you, you pay us nothing. We give you thirty days' time to try the medicine, thirty days to see results before you pay us one cent, and you do not pay the one cent unless you see the results. **You are to be the Judge!** We know Vitæ-Ore and are willing to take the risk. We have done so in thousands upon thousands of cases and are not sorry.

A Healing Mineral Spring At Your Door.

Medical Science has failed to improve upon or even equal the remedies found in a free state in healing mineral springs. Physicians, the oldest and best, the newest and most learned, acknowledge this to be a fact when they encounter a disease which is not amenable to the action of drugs, by packing the patient off to some one of the many world famous healing springs in America or Abroad, there to drink the water which contains the essential properties for the restoration of health, and the patient returns, fresh, healthy, in mind and body. If the sufferers cannot afford the trip—and few but the wealthy can—they must continue to suffer, as the waters when away from their source, deteriorate rapidly and if transported fail to produce the desired results. **A letter to the Theo. Noel Company** will bring a healing mineral spring to your door, to your own house, your chamber—will bring you VITÆ-ORE, a mineral spring condensed and concentrated, an ideal, pure, pleasant and wonderfully effective remedy for the relief and cure of the ills with which man is afflicted. Why continue to suffer when this CURING AND HEALING MINERAL SUBSTANCE, Nature's remedy, can be had for the asking, without a penny's risk.

What Vitae-Ore is:

VITÆ-ORE is a purely mineral, Non-Alcoholic, Non-Narcotic, Non-Injurious remedy, a combination of substances from which many of the world's noted curative springs derive their proven medicinal power and healing virtue. These known and proven properties of the springs come from the natural deposits of mineral in the earth through which water percolates on its way to its outlet, only a very small porportion of the medicinal substances in the mineral deposits being thus taken up by the liquid. Vitæ-Ore is a combination of Iron, Sulphur and Magnesium, three elements which are the chief curative agents in nearly every known healing mineral spring, three elements which are most essential for the creation and retention of health in the human system. One package containing one ounce of this Ore-substance, when mixed with a quart of water, will equal in medicinal strength and curative value hundreds of gallons of the powerful mineral waters of the globe drunk fresh at the springs.

Vitæ-Ore is a powerful constitutional tonic, a cleansing, reconstructing and healing agent. It exerts a wonderfully corrective influence upon the Blood, Stomach, Kidneys and Bowels, and its proper use produces exceptional results in most every case of disease whose origin can be traced to these organs, such as Rheumatism, Gout, Bright's Disease, Indigestion, Dyspepsia, Blood Poisoning, Dropsy, Catarrh, Anæmia, Female Complaint's, Nervous Prostration, etc., etc. It reaches the Nidus, the underlying lesion, the original disturbing cause, and the user, when cured, may confidently depend upon the cure being a permanent one.

It is unequaled also when used as an external application in Flesh Wounds, Bruises, Hemorrhage, Sores, Ulcers, Piles, etc. Still another quality of this Ore-substance is its efficiency in Throat Disorders when used as a gargle, swab or spray.

Hundreds of thousands of people from all parts of the world have testified to its remarkable efficiency, to the truth of our claims. Its very nature and its known record deserve consideration and a test by every thinking person who needs and wants a curative remedy. VITÆ-ORE HAS CURED more chronic, obstinate, pronounced incurable cases than any other known medicine. If yours is such a case, do not fear, do not hesitate, but SEND TODAY FOR A PACKAGE ON 30 DAYS' TRIAL!

VITÆ-ORE will do the same for you as it has done for hundreds of readers of Up-to-Date Farming if you will give it a trial. Send for a $1.00 package at our risk. You have nothing to lose but the stamp to answer this announcement. We want no one's money whom Vitæ-Ore cannot benefit. You are to be the judge! Can anything be more fair? What sensible person, no matter how prejudiced he or she may be, who desires a cure and is willing to pay for it, would hesitate to try Vitæ-Ore on this liberal offer? One package is usually sufficient to cure ordinary cases; two or three for chronic, obstinate cases. We mean just what we say in this anouncement, and will do just as we agree. Write today for a package at our risk and expense, giving your age and ailments, and mention Up-to-Date Farming, so we may know that you are entitled to this liberal offer.

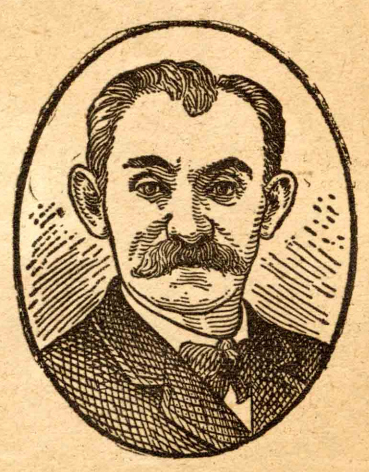
EXPRESSLY RECOMMENDED FOR

Rheumatism	Nervous Prostration and Anaemia
Lumbago	
Bright's Disease and Dropsy	Liver, Kidney and Bladder Troubles
Diabetes	Catarrh of any Part
La Grippe	FemaleComplaints
Blood Poisoning	Stomach and Bowel Disorders
Piles, Sores, Ulcers	
Malarial Fevers	General Debility

YOU CANNOT LIVE

Said the Doctor

READ WHAT V.-O. DID.



BROWNSVILLE, MINN.

I have been ailing for many years, and was also unable to do any work, for pains came upon me as soon as I exerted myself in the least. The pains were mostly in the Stomach but my Heart was also affected. I consulted several physicians: one said that I had Consumption, the other that I had Liver Trouble and the third said that I had Heart Disease, but none of them helped me. I also tried various patent medicines and an electric belt, but all with the same result—some little relief and then it was the same thing over again. Every Fall I thought I would not live till Spring. I finally became so low that I once more consulted a noted physician, who cleansed my stomach thoroughly by means of a stomach pump and examined the stomach carefully; he then declared that I had Cancer of the stomach and said that he could not help me and also that I could live only a few months longer.

I read about Vitæ-Ore in my weekly paper, and like a drowning man grasps a straw, so I grasped at the trial package. I hardly had faith in it, but thought: "I will try it as a last resort, it will not harm even if it should not help me". After using Vitæ-Ore for two weeks I felt an improvement and after using one entire package, I could do some work. Then I ordered another package and after using it I could help along with all the work, I even assisted in harvesting and hay-making, and this winter I feel better than since a very, very long time, even though I am now 61 years old. I owe my life to God's help and this medicine,

FRANK HEMD.

NOT A PENNY UNLESS BENEFITED

☞This offer will challenge the attention and consideration, and afterward the gratitude of every living person who desires better health or who suffers pains, ills and diseases which have defied the medical world and grown worse with age. We care not for your skepticism, but ask only your personal investigation, and at our expense, regardless of what ills you have, by sending to us for a package. ADDRESS

Up-to-Date Farming

PUBLISHED TWICE A MONTH

J. A. EVERITT, Editor and Publisher

SUBSCRIPTION PRICE 50c A YEAR

Foreign Subscriptions $1.00 a Year

CLUBS. Five subscriptions, on any offer we make may be taken at the cost of four. This applies to five of one offer or it may embrace several offers. To illustrate, five 50 cent offers for $2.00 (40c each) or five $1.00 offers for $4.00 (80c each).

Many club raisers fail to indicate their names separate from the club. We want to know who our workers are, therefore always write: "This club was sent by (name)."

☞ Always state if a renewal or new subscription. **Don't Neglect This.**

Your Address should always be written very plainly, including **county.** Do not give street or box number when not necessary to facilitate delivery of your mail. If on a rural mail route use the letters R. R. before the number.

Renewals and Change of Address. Give the same name as before. If a change from one member of the family, so state.

If you change your postoffice, give old office as well as new.

If a mark like this appears on the first page it is to notify you that your subscription or renewal has been received. The publisher thanks you and he hopes you will be benefitted by Up-to-Date Farming and take it many years.

Advertising Rates will be quoted on application.

Only Reliable Advertisers are admitted to our columns. We guarantee that they will deal honestly with subscribers. However, should any advertiser in Up-to-Date Farming fail to keep his promise as advertised and not give a subscriber an honest deal, we will make good the amount of the loss, provided you were induced to deal with the party through his announcement in this paper only, and providing such transactions occur within a month of the publication of the paper, and that it is reported to us within a month of its occurence. It is understood that this offer is not binding on the publisher unless you mention Up-to-Date Farming when you write.

The Farmer's Union Label must be made the strongest link in the chain of organized farming, as it has long been the strongest link in the chain of organized labor. By the use of theLabel an article is recognized as a product of organized farmers, and those who use such articles know they are patronizing and sustaining organized effort for improved conditions. Use the Label on your letters, envelopes and on your produce.

18 The solution of the Farmers Labor Problems that will come through Profitable Prices means a demand for millions of union laborers.

Minimum Prices

Below are the prices decided on by the American Society of Equity. They are the minimum prices, *below which* farmers should not sell. They are all based on some central market, and the farm price will be enough less to equal freight and a legitimate profit to the handlers. Farmers should control their marketing so as to keep the market hungry and the demand seeking the supply, when they can make their own prices—control marketing so your crops go off of the farms over the period of a year instead of in a few months. *If those who can hold will hold all, and those who cannot hold all will hold part, then those who cannot hold may market and all will get the price.* This is the key to controlled marketing. The world must have your products at *your* price if it cannot get them at prices made by some other people.

Prices per bushel unless otherwise stated:

} COMMITTEE

The Annual Meeting.

—o—

It was a great event.

—o—

Great good was accomplished.

—o—

Probably a more determined lot of people, with more enthusiasm for their objects, have not met since the patriots met more than a century ago to declare for the political freedom of this country.

—o—

The farmers are meeting now to declare for their industrial freedom which is even more important.

—o—

Read President Everitt's speech.

—o—

Read the revised constitution and by-laws.

—o—

They will please every member and every local union.

—o—

Read the secretary's report and address.

—o—

Read the resolutions.

—o—

Do you think any convention ever passed resolutions of more moment or with a more ringing sound than these?

Will you do all you can to make them effective? See the resolutions themselves.

—o—

One important addition to the constitution is the provision for State organiaztion.

—o—

A good start has been made. Now let's us work for a monstrous demonstration for the 1906 meeting.

—o—

The report of the National Tobacco Growers' Association Branch of the A. S. of E., held at Owensboro, Ky., Oct. 18, 19 and 20th. was printed in the Tobacco Edition of Nov. 1st number.

—o—

There were many communications sent in by members to be read at the Annual Meeting, but time would not permit. Next year a full week should be taken for this meeting.

—o—

The newspaper articles that there is about to be a federation of organized labor with the A. S. o E. do not originate at the farmer's headquarters and they have not the sanction of the National Union.

—o—

Up-to-Date Farming, Controlled Marketing, Profitable Prices. These are towers of strength. Let us find them on every farm.

—o—

Fire a shot into the enemy's camp by clipping the resolutions and mail to the people or institutions as recommended. See last paragraphs of resolutions.

—o—

Order your bundle of convention numbers at once if not done already.

—o—

We will soon have the A. S. of E. literature published in the German language.

—o—

If this paper is new to you we hope you will read it carefully and then subscribe for it.

—o—

Read the resolutions passed at the Annual Meeting and then resolve to carry out the recommendations.

—o—

A demand exists in Canada for French literature of the A. S. of E. It will be provided as soon as possible.

—o—

If you skip a number of Up-to-Date Farming write a card and it will come.

—o—

Farmers institute season. Will "Profitable Prices" be on the program?

ANNOUNCEMENT

The National Union is preparing to issue quarterly publications or local union programs. That is, we will prepare six local union programs comprising many entertaining and instructive features, references to important articles in the official paper and the Third Power and to songs in the song book "Songs of Equity" and print the six in pamphlet form. This work will be done by a capable person and will be highly entertaining, instructive and beneficial. When the local features of business or social life that are present in each community are added, it will be a program that will attract all the people in your community and make the local union what we have always wanted it to be, viz., the bright social and business spot in your community.

This will furnish the necessary elements to keep local unions active and to revive any laggards. It will relieve the officers of the necessity to provide programs and as the same program will be carried out in all local unions you can imagine the fine advantages that will be gained.

A slight charge will be made for them of 5c each or 15c a year to go to the National Union treasury.

Lo! It Was Like Unto This

(Pearl Ulilla Davis)

Lo! the cloud-massed skies are bursting
with the streaks of rosy dawn;
Paths of blue are coming clearer with the
swiftness of a fawn.
All the flowers are wet with raindrops, all
the earth is draped in gray.
But with morning comes the glory of another triumph day.
Lo! the hard-worked farmers fearing that
their toil was all for naught,
Felt themselves on all sides cornered by
the low price grain had brought.
One by one they fought against it, but
they said, "What can I do?
"Speculators have the market and we can
not push them through."

Lo! a star shone in the heavens long ago
of faith and hope;
Something like this star came swiftly
lighting up the farmers' scope.
Faint it shone at first but greater grew
Its splendor ev'ry day,
Till it burst out in its glory like the
morning's dawning ray!
And the farmers like those people on the
desert long ago,
Saw this star shine high above them and
they recognized its glow!
Out they reached for it and grasped it,
and they knew their victory!
Brightly shines the star upon us—oh! this
star of Equity!

Co-operation reached the farmers and they
joined from ev'ry side;
This, their star of hope and profit,
strengthened like the rising tide,
Swept the prices up to triumph, and forever shines it's rays!
Dear God, bless the glorious meeting of
these great Convention days!

Organizers Wanted

The American Society of Equity wants one thousand people to assist in organizing this farmers' movement for profitable prices and all other good things that must result. Permanent or temporary employment given. Rate of compensation has been revised at the Annual Meeting and on present basis it will be a good business. Farmers, school teachers and others with some adaptability should apply at once to headquarters American Society of Equity, Indianapolis, Ind.

CONVENTION NUMBER

This Number

Have you ordered your bundle?

Of course you are going to help to educate the people.

We would not ask your help if we could get along without it. But we cannot.

We don't know your neighbors. Hence we cannot send a copy of this paper to them. You know them, you can hand them a copy with a good word and it will do immensely more good than if sent through the mail.

One hundred copies of this number distributed in your neighborhood will have a wonderful influence and should make prices better for every farmer's crops at once unless they are now at the minimums.

Ten copies judiciously placed should make ten converts and results in a local union which will be the best thing that ever occurred for any community.

Here's What We Will Do

A bundle of 10, 15 cents postpaid.

A bundle of 25, 30 cents postpaid.

A bundle of 50, 50 cents postpaid.

A bundle of 100, 75 cents postpaid.

Larger quantities at same rate.

Here's What We Want You to Do

We want you to order a bundle of the convention number at the special rate above quoted.

Each copy of this number cost over 1 1-2 cents to produce and mail. The publisher would offer them entirely free if he could afford to do so, but he cannot.

Come Now, All Together

EVERY READER order a bundle; EVERY MEMBER of the A. S. of E. order a bundle; EVERY ORGANIZER order a bundle, to convert new members. The president's address alone will do a great amount of good if read by all your neighbors.

This number will be a revelation to those farmers who possibly have not heard much about the American Society of Equity.

Cut out below and send.

Pub. UP-to-Date Farming.
Indianapolis, Ind.
Please send to me prepaid.....
copies of November 15th, Convention Number for which I enclose $.....

Address .....

.....

Price, 10 copies, 15c; 25 copies, 30c; 50 copies, 50c; 100 copies, 75c.

GROUP PHOTOGRAPH OF DELEGATES

The group photograph of Delegates as reproduced on first page of this issue is completed and will be furnished to Delegates, Local Unions or Members desiring them, size 11x14 in., prepaid at one dollar each. These pictures will have an historic value, representing as they do the first representative body of men ever gathered together for the purpose of deciding on prices of their own products.

Orders should be addressed:

THE AMERICAN SOCIETY OF EQUITY,
Indianapolis, Ind.

President's Annual Address

Delivered at the Annual Meeting of the American Society of Equity, Indianapolis, October 24, 1905

After some well chosen remarks appropriate to the occasion President Everitt, in a period of one and a half hours, delivered the following address:

Mr. Chairman, Ladies and Gentlemen:

In the spirit of the words of the immortal Webster, I exclaim: Here, where the American farmers raised their first voice for liberty and where this liberty has been nurtured, it is mete that representatives of American agriculture should meet now, as it is about to enter upon its manhood period.

Your efforts to gain liberty and commercial freedom have been opposed by your known enemies and by many of your supposed friends. Every step of the way out of bondage has been barred and made difficult by the opposition of these same enemies and false friends, who profited more by your old conditions than they can by your new. They feared to see you come to the front and take your place before all other people and classes, where you rightfully belong, as the owners of the earth and the producers of all on which our life, comforts, individual and collective wealth, and national greatness depends, because they would then be relegated to the rear. They dreaded the new order of things for which you are working for fear it would detract from their profits, no matter how inequitably obtained.

Difficulties like these have been encountered. You, who have been in the field laboring to convert your brothers, or on the farms reaping the bounteous harvests, know little of the toil, anxieties and disappointments experienced at headquarters, during the three years of educational work that have passed. It has, however, been so in all great undertakings and for all good causes. No brave general ever led his army to battle, but some coward at home was not sowing seeds of poison against his name and reputation. No person ever undertook to overthrow mighty wrongs that lay their heavy hands on millions of people, but the black heart of calumny and falsification was heard against him.

But if all these agencies have wounded, they have not destroyed. If their attacks have been vicious they have been hurled back with the power of truth, and results that were irresistible, and the next time they came to the attack with less courage, if not with less venom. Practically all criticisms have been silenced. Your plan to obtain freedom has been endorsed. In short, your freedom, and independence, in pricing your own goods, the fruits of your toil, have largely been won already. But you must remember, no man is free whose wages are set by others, as yours have been in all time past, and before the birth of the American Society of Equity.

PICTURES OF AGRICULTURE.

If I were to paint a picture of agriculture as it existed in America a few years ago, I would draw a gigantic tree with roots extending under every acre of cultivated soil and branches spreading above as far, and even over some foreign countries.

At the roots, gnawing the vitals, I would picture ignorance, jealousies and false teachers. In the branches, politicians, unfair middlemen, trusts, speculators and gamblers, who soon pluck all the fruit the poorly nourished tree bears.

If I were to paint a picture of American agriculture today, I would show ignorance, jealousies and false teachers at the roots routed and on the run; while the parasites in the branches are tumbling out, because of the violent shaking the limbs are receiving.

If I were to paint a picture of American agriculture of the future, I would show the same tree, with ignorance, jealousies and the false teachers all gone from the roots and in their stead, intelligence, confidence and co-operation, invigorating the tree of American Agriculture, while its branches are larger and its foliage greener. All the parasites are gone from the branches but the tree is loaded with fruit and food for all the people and it continues to bear the whole year around.

J. A. EVERITT, President American Society of Equity

FARMERS IN THE PAST.

In all times, with few exceptions, farmers have been the willing and unresisting victims for other classes to plunder. Yet they were called upon to fight the wars to make all people free, but themselves; to labor harder than any other class to feed all, and so that a few who produce nothing may make their millions.

In the past in this country and others, the name "farmer" carried with it much of reproach. This, not being sufficient, words were invented or appropriated and applied to farmers to designate, reproach or contempt. It is not my intention, however, to discuss this phase, but will say that it is the natural result where a class of people have remained the willing servitors of others, without an attempt to prove their own power or assert their commercial freedom, liberty and independence. "Who would be free themselves must strike the blow."

To emancipate the farmers from this awful thraldom required the same remidies as have been efficient for great reforms and uplifting of the human race in times past, viz.: Education and co-operation, coupled with a sufficient plan of action. Farmers have been the slaves of bad conditions and they never knew how to get from under them until of quite recent years.

The bad conditions were not imposed by God, although He did pronounce the curse: "And by the sweat of thy brow shalt thou eat bread all the days of thy life." But this curse was pronounced on all alike and not only on the farmers. Nor were the conditions imposed by nature. Agriculture is the oldest industry and the only one established when the world was created, and the first man was placed in a garden to care for it. But the bad conditions were brought about gradually, because of the modern development of co-operation by all classes except one—the farmers; and the law of human nature that always finds the strong preying upon the weak.

THE LAW OF SUPLY AND DEMAND.

We talk of the law of supply and demand and that the farmers are subject to it, hence it is folly for them to try to go adverse to it. But what is this law and how does it operate? To an extent, let us admit that it is a natural law. It may be said that the necessity for eating is a natural law and if we quit eating we die. Breathing is a function, or law of nature. If we refuse to breathe we die. The laws of nature say our body requires protection by clothing and care in the selection of food. If we don't protect our body, or if we eat poisoned food, we will be sick. Hence the laws of nature as they relate to life and health must be observed—must be controlled by man—or we will be sick or die. Outrage the laws of nature and you suffer for it. Hence in these respects the laws of nature are under human control. We control them.

Now let us see about nature's law of supply and demand. The demand for food and clothing is fairly constant and it is not in the power of man to materially change it. In the case of food the demand comes about three times a day with each man, woman, child and animal. It is constant day by day, week by week, month after month, and year after year; except as population increases, or decreases, or shifts.

If it was the same with supply there would be no problem to solve. That is, if our crops of grain, fruit, vegetables and cotton matured an equal portion every day for 365 days in the year, then it would not require any thought on the part of the farmers. Sufficient for the day would then be the supply. But our crops do not mature that way. They mature each crop in its season and all at once or nearly so. Therefore, the producer has his crop all on his hands at once, but only the three hundred and sixth fifth part of the demand is present any day.

Until a few years ago the world simply stood helpless and stupid over the problem of the distribution of farm crops. The law of nature brings the demand in little fractional parts daily, but the same law gives the supply in one great big bulk, and we know, if we outrage the laws of nature we suffer. The problem was to make one conform with the other and at the same time protect every man, woman and child; whether producer, handler or consumer; so that each may have their fair share and none suffer from lack or excessive price.

If it is necessary to control eating so the body may be healthy, to breathe so the body may not die, and thus cooperate with the laws of nature, why is it not equally important that we control the supply of farm products and thus regulate the law of supply, to conform to the law of demand, regardless of the fact that nature gives it all to us in one bulk?

This is the solution of the problem of the distribution of farm products. Controlled in the hands of the millions who produce it, so the wealth will be equally distributed, instead of letting it accumulate in the hands of the few who transport it, store it, or buy and sell it. Was it a natural law that in the past, and largely at the present, turned nearly all farm crops into the warehouses of the few and left little on the farms? No, it was not a natural law that did this, but it was the human ignorance and stupidity of one class, yielding to the human greed of another class.

NEED OF THE HOUR.

The pressing need of the hour is men to dispel the last vestige of ignorance among our producing class, arouse them from their stupidity and lead them in the way that will preserve to them the just fruits of their toil and guarantee to the consumers a bountiful supply of healthy food at equitable prices. The harvest in this field is

truly great and the harvesters are few. But I have ftith, that sufficient for the need will be the supply and for that purpose are we here gathered together. I beg your careful attention and your hearty co-operation all through the sessions of this meeting.

IMPORTANCE OF THIS MEETING.

I hope all who are gathered here appreciate the importance of this meeting. I try to realize its full significance, but in trying to measure its length and breadth and heighth and depth I am appalled at the dimensions and tremble at my own weakness. But then, when I consider the education that has been accomplished, that bring actually millions of the same mind to help, and the simplicity of the plan, that the schoolboy can understand and follow as well as the astute scholar; I take courage and can see that in working out the plan the effort will be almost automatic, and the magnitude of the problem is largely in the results obtained, rather than in their accomplishment. I want you to realize that this is the first meeting for the greatest and grandest object that can inspire mankind; justice, fairplay and equal opportunity, for the greatest class of our people—the farmers. That the objects sought are great, and good; and that, with your machine well built, properly maned and thoroughly oiled, it will run on forever, giving its reward to the present farmers, to their sons and daughters and to generations yet unborn. I pray that our work may be well done.

EFFECT OF THIS MEETING.

I believe that here, during this meeting, work will be done the effect of which will be felt around the world and be of benefit of all humanity. Here again, as of old, at Concord, where

"Once the embattled farmers stood
and fired the shots heard round the world."

the farmers stand. The work done at this convention will be heard around the world and will prove the uplifting of the most deserving class of people, but the most oppressed in all nations. Our object at this meeting should be to uphold and strengthen the arm of the society that has the right plan to gain for you your commercial freedom and independence, and has demonstrated its power in many and varied ways.

To this task all should unite. The sun of the American Society of Equity does not shine for one, but for all. It is not for the producer of one crop, but for the producers of every crop. Also it is not for farmers alone, but the manufacturer, the miller, the banker and the professional man will find their enterprise, their investments and their professions exalted; more certain in results and more substantial. Thus, this movement is not for a favored few, nor for one large class, but for the nations of the earth, and there is no ruler so high, no subject so low, but who may welcome the American Society of Equity as the exponent of universal fraternity, equity in business relations and good government.

THIRD ANNUAL MILESTONE.

While this meeting is not exactly the third anniversary of the American Society of Equity (the Society was organized Dec. 24th, 1902), it does mark the third annual milestone of the movement by farmers to take care of the distributing end of their business as well as the producing end.

In some respects this society is unique. First, because its birth inaugurated the first attempt by farmers to price their own products, although all other producers had been pricing theirs for many years. This meeting also is unique among farmers' meetings inasmuch as I do not expect one sentence to be uttered here toward teaching farmers how to grow more or better crops. When a newspaper reporter said: "I suppose, Mr. Everett, you will discuss how to grow all crops," I replied, "I don't expect one word to be said about producing crops. This meeting is for the purpose of agreeing on prices for the crops we have grown and how to get them."

THE RIGHT PLAN.

Three years ago only one man was bold enough or foolhardy enough, as you please, to proclaim that "Farmers can set prices on their own products and get them." But today the popular demand is, wherever farmers gather, "For an organized concerted movement on the right plan for the control of marketing of farm crops so farmers may always get profitable prices."

Notice, the demand is for "THE RIGHT PLAN." The right plan for what? FOR THE CONTROL OF MARKETING. To accomplish what? TO COMPEL PROFITABLE PRICES. The right plan for the control of marketing to compel profitable prices. This is my text. Farmers want profitable prices; they know it is possible to secure them, because they see examples all around them. They see manufacturers co-operating and they get profitable prices. They see bankers co-operating and they get profitable rates of interest. They see laborers co-operating and they get profitable wages. In fact you may look all over the fields of labor, finance, manufacturers and commerce, and you cannot find one important class that has not organized, and is not co-operating to protect its interests and make them profitable.

But you are careful this time. You have made mistakes before and don't want to make another one. You want to know you are right before you go ahead. You are determined to start out on the right foot then your steps need not be retraced. You are to be commended for the caution.

Three years ago the principal argument against another attempt to co-operate was, "We have tried the Grange, and Farmers' Alliance and other societies, and they failed, and we don't want to try again." All this is true, but did they have "the right plan?" Were they not domed to failure when they were born because they had the wrong plan? If your present plan is the right plan, success is assured, because of the universal desire by farmers to organize and to co-operate "on the right plan."

Let us see if you have the right plan.

About the time of launching the American Society of Equity, there were several old societies in the field and farmers co-operative societies were springing up all over the country, particularly in the middle west, west and south. Not one of them had for its object "profitable prices through controlled marketing," but since that time each of them have patterned after the American Society of Equity and have made their chief object the same as this society, viz., "profitable prices," and the plan "controlled marketing," coupled with a "minimum price."

The Grange through their national master at last recognizes that "the time has come when more atention must be given to the distributing end of agriculture so profitable prices may be secured," and so said in his annual address. The Grange has found the right plan—the plan of the American Society of Equity. Welcome, members of the Grange.

The Patrons of Industry, in annual session at Strasburg, Ohio, Oct. 11th and 12th, 1905, passed the following resolutions:

"Whereas, The farm is one of the nation's great wealth producers, and whereas, we believe the farmers are not receiving a rightful share of such wealth because of our present system of markting the products of the farm; therefore,

"Resolved, 1st: That we, the members and delegates of the Grand Association, Patrons of Industry of Ohio, do hereby endorse the declaration and purpose of the American Society of Equity and pledge ourselves, so far as possible, to support the same, to the end, that the official organ—UP-TO-DATE FARMING—may be a welcome visitor in the homes of many farmers where the same is not now known.

"Resolved, 2nd: That we recommend the American Society of Equity to all Ohio farmers so that they may get in on the ground floor in the sale of farm produce.

"Resolved, 3rd: That the Secretary prepare a typewritten copy of the above resolutions and present the same to J. A. Everitt, President of the American Society of Equity, which meets in National Convention at Indianapolis, Oct. 23rd, 1905.

"J. W. Elson, Sec. of State Association Patrons of Industry, Adamsville, Ohio."

THE RIGHT PLAN—the plan of the American Society of Equity. Welcome, Patrons of Industry.

When the cotton growers met at New Orleans in 1904 to organize the Southern Cotton Association, Harvey Jordan, who became their president, said in his speech: "Farmers may try other plans, but I want to tell you they will come to the American Society of Equity plan before they accomplish any good." This year 1905 this same society in their annual meeting at Asheville, N. C., fixed a minimum price on the cotton crop and unreservedly recommended controlled marketing as the only way to secure it—THE RIGHT PLAN—the plan of the American Society of Equity. Welcome, cotton growers.

The Farmers' Union of Texas, after floundering without any particular objects for more than a year, gradually adopted the good features of the A. S. of E., and this year came out plainly for controlled marketing and is naming minimum prices for the crops. THE RIGHT PLAN—the plan of the American Society of Equity. Welcome, Union farmers.

The National Farmers' Congress is an organization that held its 25th annual convention this year at Richmond, Va., and among the resolutions passed were the folowing:

"We regard the point made in the President's speech on the marketing of crops and the selling at profitable prices of all the products of the farm, to be of supreme and paramount importance to the American farmers, and we recomemnd that the ideas as advocated by the American Society of Equity be taken up and incorporated in all farm organizations; that they be carefully studied and be given a prominent place in the deliberations of the National Grange, the Farmers' Educational and Co-operative Union, the Farmers' Alliance and all other farmers' organizations. That the farmers of our country avail themselves of every source of information so that they may be educated in co-operative selling, to the end that profitable prices may be obtained on all products. And we further recommend that the question of profitable prices, by control of the supply, be given a prominent place on the programme at all the future meetings of the Farmers' Congress and that in every state and county institute throughout the United States this subject be given a prominent place on the programs. This latter recommendation we especially recommend to the careful consideration of the head of the Farmers' Institute at Washington, D. C.

These resolutions were adopted without a dissenting vote.

Think of it. Here is a farmers' sociey or congress with representatives from every state, that had held 24 annual conventions, yet it never realized before that "the selling at profitable prices of all the products of the farm to be of supreme and paramount importance." This Congress has also just discovered "the right plan," because the resolution continues: "We recommend the ideas as advocated by the American Society of Equity be taken up and incorporated in all farm organiaztions."

THE RIGHT PLAN—the plan of the American Society of Equity. Welcome, farmers of the nation.

Although the Farmers' Congress is the latest one to adopt the first great object of the A. S. of E., it is first in endorsing our plan to retain and enlarge our foreign markets and secure new ones, as shown by another paragraph of their resolutions, as follows:

"Higher prices of farm products which will be profitable to the American farmers are absolutely necessary, so that the surplus of American farm products will not go on the European markets at such low prices so as to prevent the European farmers from selling their products in competition with ours' at fair prices. The old system threatens to starve the European farmers unless they assess a heavy tariff tax against American farm products.

"The result is the closing up of foreign markets and it prevents the obtaining of new ones, while the cry of American statesmen and farmers is now, and has been, that we must have larger foreign markets for our surplus farm products."

This was the resolution of The National Farmers' Congress on our plan to hold and enlarge our foreign markets.

Then there are other farmers' societies that are seeking to join the A. S. of E., because "it has the right plan," and every week there are accessions of unions from other societies to this society.

I mention these things to encourage members that this society—their society—is built on the right foundation, and to inspire confidence in non-members who are present that it has the right plan. Or why is this plan becoming the only plan for all other societies, old and new?

Having the right plan, all that remains is to put it in operation. This is the prime problem before this convention. We have a plan that is sufficient to secure profitable prices; that is comprehensive enough to comprise every crop grown and that is broad enough to cover not only the United States and Canada, but the whole world where food crops and material for our clothing are produced.

Farmers, you must now put it in operation, you must organize. Can you do better than to organize in the American Society of Equity? You must co-operate as all other very successful industries do. Do you think you will ever have a better opportunity than to co-operate with the American Society of Equity? You have waited many years for the society, for the plan, for the objects. Now you have them all. They are presented to you in the American Society of Equity. This is your machine already built. All you need to do is to run it.

EDUCATION.

Three years have been devoted to education. This time has not been lost because it would have been impossible to operate the machine of controlled marketing, even though it were possible to build it complete in a day or a year.

Giants are never born life size. There must be the period of growth and development. Great ideas do not take possession of all the people at once. Some of them require centuries to be adopted. Great utilities are never adopted suddenly. Witness the developemnt of printing, of steam, of electricity, of improvements in farm machinery. So with the new and strange doctrines of CONTROLLED MARKETING. Time was necessary to educate the people. Has the time been well employed? Can you find a man anywhere in the United States who has not changed his ideas about marketing and who has not felt the effects of controlled marketing even though exerted to a small degree? To revolutionize a system of markting in a country as vast as ours—a system that has grown for generaions, and to perpetuate which all the combined and co-operating forces of middlemen and speculators were directed—are three short years too long? To understand the immensity of the task you must also take into account that at the beginning, besides the agencies mentioned, there were also arrayed against the proposition the entire press of the country, and all farmers' institutions up to the department of agriculture. They said "it can't be done." They branded the idea as "visionary," "impossible," "impracticable." Some said "Everitt is a dreamer;" others, "he is a schemer and you want to keep your hands on your pocketbook when he is around." "He's only after your dollar and nothing can come of his scheme for dollar wheat and profitable prices." They advised: "Depend on Providence," "work harder," "save more," but "don't try to set your own price." Such were the pieces of advice given the farmers. But we kept right along printing Up-to-Date Farming and organizing where we could. Consider these facts and then answer the questions: Has the time been well employed? Are three years too long?

I do not claim that all farmers and farmers' institutions have been converted, but I do claim that millions of farmers have been converted who are

not yet members of the society; many institutions are converted who will not admit it and some will hold out with a very lame leg to stand upon. Witness this, as the attitude of the National Department of Agriculture:

"The marketing of farm products is a matter we are studying here as we can and may, and we are getting facts with regard to the volume of the crops at home and abroad, and all that. But we hesitate to take the attitude that we are ready to fix prices. We do not say that we are not, but doubt whether this is one of the things we should become responsible for.

"I really think we need a good deal more information before we take that step."

"Getting facts with regard to the volume of crops at home and abroad." What for? Why are such facts needed before they are ready to say that the farmers of this country shall have fair prices and exert the influence of that department to help to get them? Are they afraid that more has been produced than will be needed, in the face of the known fact that all the farm products that have been produced in the past have been consumed? Is this the reason they are "getting facts at home and abroad about the volume of the crops?" But suppose there is a surplus, should this deter them? It should be an added inducement to help teach exactly what the American Society of Equity stands for. Viz., Controlled Marketing to keep the surplus, if any exists, in the hands of the first owner and out of the hands of middlemen. If a surplus exists and it passes into the hands of middlemen, it must be eliminated before the farmers' subsequent crops will bring fair prices.

The contention of the A. S. of E. is, that the farmers must have a fair price for their crops regardless of the size. We base the ability to get it on the fact that all the crops have been used in the past, and naturally will be needed in the future; and our theory, that as much will be used at a fair, profitable price as at an unfair, unprofitable price. If the farmers will count up the cost of producing their crops (taking the average acreage yield as a basis) and add to this a fair profit, this is what they should have regardless of the size of the crop, and they can get it.

PRICE AND CONSUMPTION.

Does a good price cause a decrease in consumption? Do you know that this country has raised the largest four corn crops of its history in the past four years? The price of the first one, 1902, was kept good on account of the smallest crop the country ever raised, the preceding year, 1901. The other crops came under the partial influence of controlled marketing taught by the A. S. of E. Now consider the prices. Have they not been good right along, and this notwithstanding the record-breaking crops which came in succession. I want to say that I verily believe, without the farmers controlling the supply to a large extent, that the price would surely have gone down to 25 cents a bushel at Chicago.

It always was so in the past. But, did the good price limit consumption? If so, there must be an enormous accumulation somewhere. But there is not. These bumper crops have gone into consumption as freely, yes, with more freedom, than big crops at low prices did formerly. You know how this is yourself.

EXTEND THE ORGANIZATION.

But I must progress. This is not the time for argument. The world has accepted the doctrine of controlled marketing as sound, and its power as sufficient to compel the prices. What is before us now is to build the machine of co-operation and operate it. At this meeting it is our duty to review what has been accomplished as well as to contemplate what is to be accomplished. If our plan of organiaztion has not been sufficient in the past to get results needed, we must revise it. It is not reasonable to suppose that a movement as good as this, that is now endorsed by the greatest thinkers of our times, and by old institutions, should languish. Instead it should sweep all over the country, like a tidal wave sometimes sweeps the shores, carrying all opposition before it.

The consideration of all matters relating to organization should be taken up at executive sessions. Therefore, I will refer to them only in a general way. It is evident, however, that the organization must be extended. If the crops are to sell at the price recommended at the beginning of the season there must be enough organiaztion to represent sufficient of the crops to prevent temporary oversupply.

THE POWER OF CONTROLLED MARKETING.

But "That can't be done," shouts the the dumpers and croakers, and the speculators, who are satisfied with present conditions. "Farmers can't control their marketing." But they do. The evidences are seen on every market page nearly every day. Every time the market price goes up, because the supply was short, or just enough, is proof of the power of controlled marketing. Every time the market price goes down because of large or oversupply, is a proof of the weakness of uncontrolled marketing—dumping. Every time a farmer refuses to take the price made by another, he controls his marketing. There is not one of you who has not done this. What we want is to make it possible for all to do it.

Will any person here contend that if there was no wheat to be had except at $1 per bushel that the price would not be paid? Or if no cotton could be had except at 12 cents a pound that no cotton would be bought?

Produce such conditions and I know, and you know, that the price would go there immediately and the same way with every other staple crop. As to the exportable surplus of our grain, I claim that conditions can be produced in foreign markets that it will have freer entrance at a fair price than at a low price, but I will refer to this later. But why let the export part influence you against a fair price? If you sell five hundred million bushels at home at $1 a bushel, you will have more money than if you sell six hundred million mushels at 80 cents, assuming such to be an export basis.

How can we produce such conditons so the supply will be controlled?

Every person wants a profitable price. To get profitable prices for farm crops a year's supply must be controlled to meet the demand that comes daily for a year. All farmers know these are truths. But all farmers cannot control their marketing for need of ready money at certain times.

Now, if we were to make it possible for all farmers to hold their crops and have the needed money too, don't it look as though the problem would be solved?

The merchant who has a stock of

Montgomery Ward & Co.'s Customer's Dividend Certificates

are now being issued with every purchase. These certificates are the wonder of the mercantile world, and call for valuable articles of all kinds; a stupendous profit-sharing plan.

Full particulars, with photographic reproduction of a genuine Dividend Certificate and 16-pps. of valuable articles that can be obtained absolutely free of cost, are bound in our famous 1200-page Catalogue, a book we want every intelligent purchaser to have. This Catalogue is sent free to any address as explained below, and in addition to our liberal Customer's Dividend Certificate plan, contains a page of

Below Cost Trial Order Coupons

which enable you to secure at less than cost prices many staple articles that you have to use every day. Our new Catalogue, No. 74 is now off the press and ready for distribution. Cut out the coupon below, fill in with your name and address, and send for this catalogue at once.

Our Dividend Certificate plan will interest you, the Below Cost Trial Order Coupons mean dollars to you, the entire book should be in every home.

This Catalogue is the most **Convenient,** the most **Economical** and the most **Reliable** way of **buying anything** and **everything** that you ever saw or human ingenuity ever devised. No store in the world ever offered for sale such a vast collection of goods of all kinds for every person and every purpose, nor goods of so high quality at anywhere near so low prices.

We Lead the World

The Convenience of having Montgomery Ward & Co.'s great Catalogue on hand and ordering all your goods from it cannot be too strongly stated. This massive Buyer's Guide and Illustrated Book of Daily Bargains when in the home is right before you every day in the year and every hour in the day with all the benefits of

A Great City Store Brought to Your Door

It is wonderful in illustrating and pricing the very things you want, cannot do without, use every day and must have, and quoted here at lower prices than any retail or wholesale dealer in the world can give you.

So convenient and handy is this great catalogue that millions of people all over the world use it day by day and month by month for all their shopping. Turn its leaves. Look at the pictures. Note the low prices. Here are the foods, medicines and clothes of every day's necessity, the tools of every trade, the vehicles, implements, books, furniture and house furnishings that all require, the sporting goods, toys, jeweiry, watches, harness and horse goods, the trunks, sewing machines, musical instruments, builders' hardware and the thousands of necessities and luxuries **here priced within your reach.**

No going to town to buy; no wearisome waste of time—and money. Look over the Catalogue; write us a letter. The goods are sent you at once, fresh, new—not shop worn—the newest style, city goods. That's the **Convenience** of Montgomery Ward & Co.'s plan of shopping.

The Economy of using Montgomery Ward & Co.'s Catalogue for making your purchases from, is shown you in **plain figures** on every page of that great book. **Get the Book.** Compare its printed prices with the prices that you have heretofore had to pay in your town stores. You will note with pleasure that **here** is your opportunity and **now** is your chance to obtain goods of the same or better qualities at prices lower by 20 per cent to 50 per cent than any you ever heard of. That is the great **economy** in patronizing the Montgomery Ward & Co. Catalogue.

There is **but one** Montgomery Ward & Co. Catalogue. **We alone** publish it. **We alone can supply it.** It is just off the press. Don't miss it. Don't miss this opportunity to secure your copy free.

The Large New Montgomery Ward & Co. Catalogue No. 74, for 1905-6, contains nearly 1200 large pages, thousands of accurate illustrations and descriptions of over one hundred and twenty-six thousand (126,000) articles, such as every one uses.

With each and every Catalogue will go to you our **Below Cost Trial Offer,** unprecedented and unapproached in its liberality. This offer is your opportunity, for it enables you, whether you have ever been a customer of ours before or not, to secure things you use and eat every day at prices you will know when you see them are really **below** the **cost** of the goods.

Every Catalogue, also, will contain full details of our **Customer's Dividend Certificates,** which Certificates we now present to you every time you buy a dollar's worth of goods. We give you a liberal choice of valuable articles to choose from, and redeem your certificates with such goods as you select, absolutely free. This is the greatest Profit Sharing Co-operative Plan ever inaugurated by any concern.

Our plans for your profit will surprise you. All told about in the No. 74 Catalogue, free.

We ask you to accept a copy of this large Catalogue **Free,** providing you are not a resident of a large city, or of Cook County, in which Chicago is situated. We positively will not send our Catalogue to large cities, so it is useless to ask it.

Montgomery Ward & Co.

are offering all **new** customers, an unheard of opportunity to secure goods on **Trial Orders** at prices absolutely **Below Cost** The goods offered in the **Below Cost Trial Orders** are such as **every** person uses **every** day and cannot do without.

Full Particulars in that wonderful new catalogue, No. 74. Sent **free** and **postpaid**—not a penny's cost. Get it **now.**

Montgomery Ward & Co.'s Customer's Dividend Certificate

exchangeable for many articles; issued **free** for every dollar's worth of goods you buy.

Full particulars in their great No. 74 Catalogue, which they **want** to send you **free.**

Just write and ask for it.

Sent by return mail, all paid.

All others are welcome to a copy, and one will be sent free and prepaid to you if you want it. All you have to do is to write us for it. Fill out the accompanying coupon, or send a postal card, or write a letter, whichever is easiest. Just say, "Send me free and prepaid one copy of your new No. 74 Catalogue." It is worth your while to do this **right now.** If you value convenience and economy in shopping, and wish to deal with a great house of established and proven reliability, where you can buy anything and everything at lower prices than others can possibly sell goods for, get the new, large No. 74 Montgomery Ward & Co. Catalogue at once, free, and profit by its bargains and its liberal profit-sharing and below-cost offers.

goods, or the manufacturer who makes his goods ahead of the season for sales, are in the same position as the farmer when he produces a crop of grain or cotton, or livestock, or fruit, etc. Now, the merchant and manufacturer must control their goods—keep them off the market until the demand is ready for them. If they have the means—money—within themselves, all is easy. But if they have not, they must warehouse their goods and secure advances on them and they do. But in the case of the farmer it is different. It has been impossible to secure advances in some cases and in some localities, and in all cases it has been difficult and expensive. The farmers who usually need the accommodations are the financially poor ones and oftentimes are renters. They cannot go to bank and get a loan on their personal note and to put their grain in elevators soon runs into expense, as many have learned. But when the farmers are organized into Local Unions of the American Society of Equity and co-operating, all for a certain object—profitable prices—each individual can have the support and backing of all the other members, and I believe a plan can be devised that will make the borrower's crop, on the farm, acceptable collateral by the local banker for reasonable advances.

Or a warehouse company may operate between the farmers seeking the accommodation and the financial institution that loans the money. There are such warehouse companies that do business with merchants, manufacturers and others. The field is so large with the farmers that they may be induced to enter it.

With a simple system in operation that will enable the owner of staple farm products to realize a part of its value and still be held in his possession without expense, or only nominal expense, it seems to me, organiaztion would go forward more rapidly, crops would be controlled as soon as harvested to an extent that would compel the minimum price at once. Farmers who can hold within themselves would be benefited by their weaker brothers being made strong. The expense would be very small, bankers would find a new field open to them to loan money on good security, and, not least by any means, the stability of prices that would be secured, by taking the supply entirely out of the hands of speculators, would benefit every legitimate business.

But you say some farmers would be stubborn and they would not control their crops, even though the means were at hand.

In all farming neighborhoods there is much interdependence of farmers, one on the others. Now, we will assume that some of the farmers are doing their part to break up the bad, vicious system of dumping their crops. These are the organized farmers.

Then there is the other part who are not in the organization, and some of them don't propose to control their crops. Would it not have a powerful effect on them if they were notified that they could not have the co-operation of the oragnized farmers in their farm work? Also if they will not help, why should they share the benefits—the result of controlled marketing by their neighbors. To receive benefits and render none is too base a thing for any farmer to be guilty of. Am I not right? We may not be able to prevent them sharing the benefit, but it will be the duty of the co-operating farmers to consider them in anotehr class, and they must be known by a distinguishing name.

In the time of the Revolutionary war there were "Tories," who were deservedly hated and despised by the patriots. In labor circles the hated element are called "scabs." Among farmers let us call them—what? "Dumpers?" If this word is agreed upon it will take on a new significance. In degree of opprobrium it will come to exceed any word in the English language. For what could be a greater reproach, than to be known as a "dumper," which means robbing not only all his neighbors of hard earned rewards, but himself as well. To be a "dumper" will signify everything that lacks of manliness, independence and fraternity. Such a person will be despised and spoken of with contempt. The finger of scorn will point at the "dumper," and children will shun him as they would a dangerous animal, because if he exists in a neighborhod, he will be dangerous to its peace, prosperity and social life.

But with the warehousing plan, either with the local unions or a warehouse company, if they can be worked out, there will not be any of these awful creatures—"dumpers"—abroad in the land, because all can then easily control their crops.

So much for the consideration of staple farm crops, grain, cotton, etc. We will now consider a different class.

LIVE STOCK.

This product of the farm cannot be handled like grain, cotton and non-perishable products. When cattle, hogs, sheep, etc., are "finished" they should be marketed with reasonable promptness. Also they cannot be held by the middle men any better than by the first owners.

While the middlemen may accumulate many millions of bushels of grain, and they did in the past, which they could hold indefinitely, they cannot hold the fat cattle, hogs, etc. For this reason the stockmen have an advantage when it comes to solving their problems that the grain growers do not have. The dealers in grain, tobacco and cotton can accumulate supplies that will last weeks, months or a year, but the buyers of live stock, and the packers, must have their supply almost daily. While a condition might exist that it would require considerable time to force the buyers or consumers of non-perishable products, grain, etc., to pay the minimum prices, the stockmen could positively enforce their demands in a few days by concert of action.

Hence, here, as with the other farmers' products, co-operation, concert of action and controlled marketing are the things needed. The plan is found in the American Society of Equity, but a special utility that the stockmen will need will be stockmen's stockyards. I will explain.

It would be difficult, and perhaps impossible, at any rate at present it would be impracticable to so control the supply of stock so that there would not be days when there is an over supply on the markets. Therefore, there should be opened, adjacent to each large market for live stock, the stockmen's stockyards. Here all the supply would come first. Each day just enough will be let out to equal the demand, which must come to the supply and pay at least the minimum prices. Some days there would be too many and they would be held over. They would be fed (with feed at market price), and cared for at cost. When there is an over-supply iminent, word would be sent out to stop shipments. When the stock leave these yards they will not be the property of the stockmen or the country shippers, but of the packers and their agents, who can pay the customary exorbitant charges in the old yards, if they like, or take them direct to slaughter.

I am told that the grass-fatted cattle of the Southern ranges could not be controlled in these yards because they are not accustomed to dry feed. If this is correct, then some other plan must be devised for them. However, as they are in a different class from the grain fed animals, they will not interfere with the Northern stockmen trying to work out their problems. Also if the one important class—the grain-fed cattle—is controlled it will go far toward making equitable prices for all.

This may not be the best way to solve the stockmen's problems, but it looks the best to me. Organization, co-operation and controlled marketing with the aid of telephones, representatives on markets and direction from a central headquarters I believe will solve the problem of profitable prices for live stock, secure equitable transportation and put an end to the meat trust, thus guaranteeing equitable prices also to consumers.

It is probable that the stockmen are not largely enough represented at this meeting to advise any definite action toward putting the plan in operation, but if it is considered sufficient, resolutions should be passed to that effect and a convention of stockmen assembled to consider it and organize and carry it out.

SPECIAL CROPS.

It is my desire to at this time touch briefly on a few representative crops grown by the American farmers (the word "American" includes Canada, where are many members, as well as the United States), and briefly explain, what is necessary in connection with the general plan of the A. S. of E. to control the marketing of each and secure profitable prices for each. My reference to them must, however, be very brief in this address.

Besides the grain, cotton, wool and other non-perishable crops—such as may be kept for months or some even for years if necessary—I have also referred to live stock. But there is another class comprising fruit, vegetables, poultry and eggs, dairy products, etc., which may be classed as perishable crops.

We will require in time a very complete system of telephone and telegraph service from central points which may be called clearing houses, to all producers, through their county and local unions, and with the chief markets of the country. The object will be to know the demand at the market end and the supply at the producing end. Then demand and supply may be compared and suply controlled, or limited, so that it will never overwhelm the demand and good prices for everything sent to market secured. Warehouses and cold storage houses owned by the producers will be a part of the system.

But one of the greatest advantages of this plan will come through the ability to seek out all the possible markets and supply all with what they will consume. Only in this way will producers ever secure the maximum markets, and consumers in all parts of the country secure supplies at uniform and fair prices.

The enormous waste and lack of definite results by the present abominable system, or lack of system, of handling delicate fruits and vegetables is nothing short of criminal. That hard working people would continue, year after year, to grow their fine products and dump them into the hopper of the rotten machine of marketing, run mainly by a set of consciousless commission men, can only be accounted for by the fact that there was no remedy in sight. But now, with the remedy, will they continue the ruinous system or will they rally to the A. S. of E.

I care not what the crop is, a profitable price can be gotten for every bushel or pound the legitimate demand will take, and if there is more produced it has no right to go on the market at any price, and it must not.

A LARGE MACHINE.

Thus it will be seen that the Ma-

A Real Rubber Boot—every inch of it

This boot is especially made for hard wear. Only the best *new* rubber and duck are used. We recommand the

Security LYCOMING DUCK BOOT

to Farmers, Stockmen, Fruit-growers and every man who needs a *good* boot. Like everything else, it will wear out, but it is built to give the greatest amount of satisfaction possible. Boots made of *old* rubber cannot stand the wear—there's a dollar's worth of pure rubber and good duck for every dollar spent in the "Security." All "Lycoming" Rubber Boots and Shoes are of the highest quality only.

Go to your dealer and *try on a pair.* Note carefully how well made they are. If your dealer does not have them in stock he can easily get them for you.

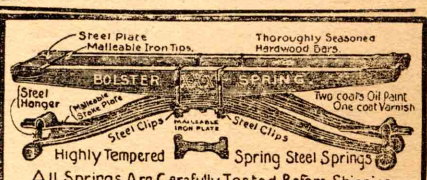
30 DAYS TRIAL FREE
BOLSTER SPRINGS

We want the name of everyone who can use Harvey XXX Bolster Springs. To get these quickly and advertise the Springs we make a **special introductory offer.**

Fifteen years hard usage over all kinds of roads in every state of the Union have proven Harvey XXX Bolster Springs a profitable investment and the **best** spring on the market. Relieves the jolt, jar and noise of a farm wagon, saves damage and shrinkage of fruit, vegetables, eggs, livestock, grain, etc. Wagon rides easier, wears longer. No **spring** wagon needed with Harvey XXX Bolster Springs on the **farm wagon.** Over 150,000 in satisfactory use. The shrinkage on **one load** of hogs, vegetables, fruit or other produce hauled **without** springs is more than cost of Harvey Springs. To convince you we offer set on 30 days trial **FREE.** If not as represented and **perfectly satisfactory** return them **at our expense.** Surely if they were not **all right** we could not make this offer. Drop us a card stating wagon capacity and length of bolster between stakes. We will send you a set **On Trial.** You can't lose on this proposition.



All Springs Are Carefully Tested Before Shipping
WE PAY THE FREIGHT

HARVEY SPRING CO., 108 S. Carver Ave., Racine, Wis.

RURAL ROUTES Are being established very rapidly. Supply your entire route with Ideal Rural Mail Boxes and make the carrier happy. We are selling Ideal Boxes so cheap that you cannot afford to **not** buy them. They are cheap only in price. **Best Box Made** and sold for less than $2.00. Send 80c for sample before route is established.

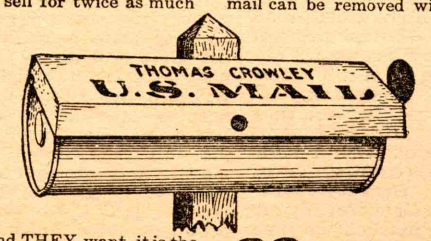
The Ideal R. F. D. Mail Box is the best medium-priced box on the market and is far superior to most of the $2 boxes. It is more convenient for the patron and the carrier than the old-fashioned square boxes, or any box that opens at the end. It is neater, more handsome and better than any of them, even though they sell for twice as much as the Ideal. The Ideal will give better satisfaction in every way.

The Ideal box has no "jim crack" attachments to get out of order, break or freeze shut. It's the kind of a box the farmer wants and the kind of a box the carrier wants, for he don't have to nearly break his neck to look inside, or get out of his rig to serve. If it's the kind THEY want, it is the box that YOU want. Any carrier or farmer will tell you that the Ideal box islike its name, IDEAL.

It is made of honest materials throughout. Lid is made of 20-gauge galvanized steel, (very heavy) and body of 24 gauge galvanized steel, thoroughly reinforced. Size of box 6¼ x 6¼ x 19 inches.

It has automatic signal painted bright red and poised above the box, making it easily seen by the carrier. Lid cannot blow open or freeze shut, nor can it be left open by mistake, as it is self-closing.

The body of the box being round, pennies or mail can be removed with gloves or mittens on. There are no cracks in it around the edges, as in the square boxes, for postal cards and change to lodge in. Both mail and change are always in plain sight of the carrier. The Ideal is rust proof. Screws for attaching to post sent with each box.



The Ideal Mail Box is made and sold at $1.50 and even more every day. Because we want to move this lot at once, the price is 80c each; $8.00 per doz.; $15.00 for twenty-four. We have only a limited number and the first orders get the preference. Order today.

80c each

FREE We will put names of patrons on boxes free of charge. Write names plainly. Boxes sent same day order is received. Send orders promptly. **FREE**

COONER & FORTUNE CO., Indianapolis, Ind.

chine of Controlled Marketing for all the crops will be quite a large one. But what else would you expect? Is it not for the greatest and most important industry on the continent that you are attempting to build?

Also it is evident that it will cost something to run it. But what if it does? Won't the ends justify the means? It may cost farmers $1.00 each a year to run their Machine of Controlled Marketing, or more while organization is small, but they are losing tens, hundreds and thousands of dollars each year because they have not got it.

If the railroads of the country need a great system and a great machine of co-operation that requires thousands of officers and hundreds of thousands of employees, immense offices and shops in many places, and great and small depots every few miles all over the country to care for the passengers and freight, largely contributed by the farmers, and at a cost of hundreds of millions of dollars, why should the industry of agriculture be absolutely without a head, a system, or a machine to operate at its revenue producing end?

Who pays the expense of the great railroad machine that works nearly like clock work and pays good dividends year after year? Why the dear public. The farmers contribute the largest share because they furnish the most tonnage to haul.

If you had a machine such as I have tried to picture in this very brief outline, the cost in the first place, we will say, need only be a dollar or two, where the railroad machine costs thousands. To operate it would be in the same proportion and the other people would pay the bill. Yet, while you could pass the tax along to the consumers, you would then be in position to correct so many evils that are now present, that the tax would come to them in the guise of blessings.

With an inexpressive plan to secure loans with crops as security; with the organized farmers to bring their influence to bear against the unorganized neighbors, will there be many dumpers in any neighborhood and cannot supplies be controlled and equitable prices made and maintained?

With these things accomplished, and they can be realized wherever there is a local union of the American Society of Equity, will not the inducements be great to join this society? Controlled marketing possible in every locality for practically every crop; the speculators reign at an end because the farmers no longer supply the "chips" with which he played the game and the fair minimum price for the grain as it runs out of the thresher, for cotton, live stock, fruit, eggs, etc., every week in the year, these are inducements that should attract every American farmer to join this movement. Are these things worth the small expense required to build and maintain your machine? But it matters not what the price asked, be it little or be it much, there is not a farmer in the country who has not already drawn dividends from the A. S. of E. greatly in excess of the membership fee and yearly dues. When you join this society you are not paying out something for nothing. It will pay bigger dividends than any other investment you can make. One speaker in the Owensboro convention stated that he had made enough already because of the A. S. of E., and by taking the advice of its official paper, to pay all the probable cost it will be to him if he lives to an age equal to Mathuzalah's.

OUR FOREIGN MARKETS.

The export trade of farm products is of the very first importance to our farmers. With superior machines and the natural richness of the soil in the United States and Canada the farmers of our country have excelled those in all others in their ability to turn off crops. With the rapid dissemination of knowledge that is going on among our farmers, the development of their faculty of thinking and reasoning, and the great increase in intelligence; they are beginning an era of intensive farming that will be fraught with results in production that the country never witnessed before. It, therefore, behooves us that we look carefully to the retention of every market we now possess, increase them whenever possible and secure all new ones possible.

Object No. 5 of the American Society of Equity is as follows:

"To open up new markets and enlarge old ones."

It is time that farmers act in this important matter because the populous countries of Europe which are unable to produce enough food supplies within themselves are gradually increasing their tariff duties against American farm products, and our foreign markets are gradually decreasing instead of increasing.

Germany has prepared a new tariff schedule, which it is proposed to vote on about next March, and if it becomes a law, it will almost close the doors of that country against our grain and meat, and this at a time when our farmers are anxious for larger markets, and the German consumers are crying for more and cheaper bread and meat.

As this address is very lengthy, I will not attempt to explain the A. S. of E. plan to hold the German and other markets now, but refer all to a printed folder that can be had of the attendants at the door to this hall entitled "The American Peril." *Read this carefully, study and comment on it. One of the soundest writers on political economy in the country said: "I believe your theory is correct and your arguments are unassailable. I am satisfied it will be accepted by the nations and will form a new basis for shaping international policies."

This question should be taken up later at this meeting and given the careful consideration the importance of the subject deserves. Also this convention should go on record as demanding that every farmer's institution in the country help to educate the farmers that it is only through liberal prices uniformly maintained, that our foreign markets can be retained and increased.

CROP REPORTING AND MINIMUM PRICES.

The American Society of Equity plan for reporting crops is one report a year. It is the correct way. The government monthly reports are wrong. They have never benefitted the farmers, but have worked them incalculable financial injury. They are, and can be, only in the interest of speculators and gamblers and their accomplishments are to upset business in hundreds of lines.

This should be the subject for a resolution to our President, Mr. Roosevelt; also to the Dept. of Agriculture and to Congress. Also we should call on all farmers to co-operate to work through the Congressmen to stop the monthly reports and make but one complete report a year.

Minimum prices must have a fair relation to the yields of the crops, but the first consideration is a profitable price based on the AVERAGE yield so the greatest number will get profitable prices.

THE OFFICIAL PAPER.

I believe no one doubts the expediency, yes, the absolute necessity, of the official paper to present the doctrine of Controlled Marketing, defend it and carry out the plan of the American Society of Equity. What the Society is today, all that it has accomplished and all that farmers have won in victories of price making, the official paper—Up-to-Date Farming—is responsible for. Without this paper, or another paper to fill the same place, the doctrine of Controlled Marketing, that has swept over the country appearing in every branch of the farmers' business, might not have been started and would never, at best, have been more than a ripple on the mighty sea of agricultural production.

The official paper was needed during the campaign of education and it will be needed always while the Machine of Marketing is building and when it is completed. As organization progresses, as the matter of finding the best markets, and all the markets for farm produce is taken up, and the directing of the supplies from the farms to the markets is undertaken, there will be more need of the official paper than in the past.

Up-to-Date Farming is the only paper that has unswerving stood in the past as the champion of the farmers' rights to price their products, and their defender against the raids made by the bears on their profits. The folly of monthly crop reporting by the government it has exposed and numerous bad policies, sharp practices and even frauds practiced by exploiters of your products have been pointed out, and the farmers taught to defend themselves against them.

Ignorance, the lack of information and good advice at the right time in the distributing end of farming, have cost the farmers of America uncountable millions. You know it is so. Up-to-Date Farming alone has been dispelling the ignorance, furnishing the information needed and giving advice about marketing as it could with the limited facilities in its hands. The education Up-to-Date Farming has given the farmers of America has brought to them that independence and respect, in and for themselves, that is forcing the world to respect them as it never did before.

Originally the official paper was monthly. Two years ago it was changed to semi-monthly and it must be made a weekly just as soon as possible.

The official paper is not now what it should be. I admit this frankly, and I know many of the members would be as free to criticise it if given an opportunity. But it is about as good as we can produce with our present facilities. One year ago a house here put in a perfecting press fully capable of producing all the papers we need and doing it promptly. We thought the problem of printing was then solved and we so stated in the paper. But the printer has since taken other jobs beyond the capacity of the press, with the result, that the paper is frequently delayed. It is the only press in the city at all suited for an edition of our size. Hence at present we are powerless. But it will not be long until this difficulty will be solved, particularly if subscribers and members will pay their subscriptions promptly. I stated, when first starting this movement, that the time would probably come when the society would want to acquire the official paper. I stand in the same position today.

OTHER FARM PAPERS.

Why don't other farm papers help to get profitable prices for farm crops? This is a natural question. Anyone would think that an object of such immense importance would enlist the hearty support of every farm paper in the country. What excuse can a farm paper have for existing, and to ask farmers' support, if it will not help them to get profitable prices? I will try to reply.

There are various reasons. Some don't understand the plan. Some want to wait until it is an assured success. Some say that farmers have no right to price their crops. Some want farmers to wait until Divine Providence gets good prices for them. Some say prices have been good enough and farmers don't need anything better. Some have other plans to accomplish, the same results, some are in the hire of the class of people who are now realizing the profits from the farmers' hard work. Some are too ignorant; some are too smart. Some are jealous, and scome are vindictive. One editor of a farm paper wrote a letter in which was this statement: "I do not know that I want to go into an open fight with Everitt, but if I could see a chance to give him a neat stab under the fifth rib, I think I would rather enjoy it." And all because I was teaching the farmers how to get more money for their crops, how to maintain uniform prices, and because some farmers had stopped the aforesaid editors paper because it did not help.

Why don't other farm papers help to teach farmers how to control marketing and compel a fair price for their products? The principal reason is that the society must have an official paper. The plan was originated by the publisher of Up-to-Date Farming. Naturally that paper became the official organ. They know the success of the society and the success of the farmers means a large circulation for the official paper. They have been assured that it was not the intention of the publisher of Up-to-Date Farming to monopolize the agricultural field, that the official paper would become a society paper. But this does not appease them, and many of them have done all they could to injure the movement. They have not the welfare of the farmer close enough at heart to lay aside all petty jealousies, excuses and telfish interests and help the farmers to try this plan.

Farmers should know their friends in a time like this. Any editor and publisher who opposes this movement is your enemy, and every editor and publisher who won't help you to get equitable prices always, by the only plan that is practicable, is not your friend. When a cowardly editor will not fight in the open, if there was anything to fight for, but seeks an opportunity to stab in the dark, he is expressing a wish to stick a dirk into the vitals of the farming industry of the country. Every farmer who loves fair play and is seeking for independence in his business as advocated by Up-to-Date Farming will stretch forth his arms to ward off the blow.

Up-to-Date Farming and the A. S. of E. do not antagonize any farm papers. We want their co-operation to establish a better system of marketing farm crops. I appeal to them as a brother

*"The American Peril" was printed in September 1st and 15th numbers of Up-to-Date Farming. It will be sent free to interested people on receipt of a two-cent stamp or at rate of 10 cents a dozen.

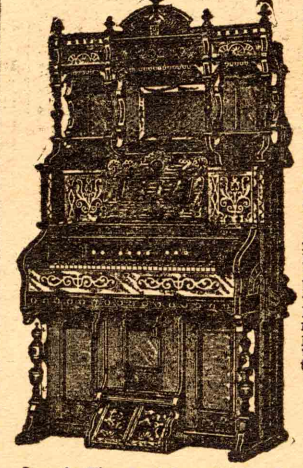
FREE

I will send FREE OF CHARGE, POSTPAID, to every reader of this paper who sends me the coupon printed below, the FINEST and most COMPLETE PIANO AND ORGAN CATALOGUE and book of information ever printed for piano and organ buyers. Do you want it? Shall I send it? When you send the coupon to me, will you please mention whether you would like a PIANO or an ORGAN? If you want an ORGAN I will show you how to save from $25 to $50. If you want a PIANO, I will show you how to save from $100 to $200. I just want you to tell me whether you want a piano or an organ so I can send you the greatest offer and buying plan you ever heard of.

The PIANO and ORGAN MAN

No matter who you are or where you live or what your occupation is, my offer is open to you. All I ask is that you be as honest with me as I am with you.

By my plan I give you over 1 year to pay me for any organ you select and over 2 YEARS to pay me for any piano you choose.



I give you FREE use of the instrument in your home so you can try it and test it before you decide to keep or buy it. It is the most remarkable buying plan ever made to the readers of this paper.

I am the Piano and Organ Man. I supply a thousand homes a month with the finest instruments manufactured. I do the greatest business in the country and my buying plan is the greatest ever sent to a piano or organ buyer.

publisher. The cause for which I have labored so hard appeals to them. The farmers of America appeal to them. Establish the American Society of Equity completely and every meritorious farm paper in the land will take on such prosperity, both through subscriptions from the prosperous farmers and advertisements from prosperous manufacturerers and merchants, as they never dreamed of.

This matter should be put in the form of a resolution, endorsed by this convention and on account of the reasonableness of the demand it should have the endorsement of every farmer in America. This resolution should then be sent to every farm paper to show your sentements with a notice to help your movements for steady and fair prices on the penalty of canceling your subscription.

FARMERS' INSTITUTES.

There is no institution in the country capable of doing more for the farmers than the farmers' institutes, if rightly conducted.

In their ramifications they reach nearly every agricultural county in the country and give an opportunity for every farmer and his family to attend.

In the past instead of giving at least one-half of their program to the subject of "profitable prices" which is more than half of profitable farming, they have devoted all the time and money to teaching farmers how to produce more and better, notwithstanding the well known fact that the larger the crops the lower the prices.

Since the American Society of Equity has been teaching the strange (to them), but true doctrine of Controlled Marketing, they have studiously avoided any reference to it in their programs and even, in some institutes, forbid the discussion on the ground that there is a law against farmers attempting to make their own price. So opposed are the head officers of farmers' institutes to discussing this subject that the institute speakers are warned to desist on penalty of the services being no longer needed.

Farmers here assembled. What do you think of this state of affairs? Farmers have no right to make prices on their own stuff, yet somebody does make the price? If there is a law against the farmers making prices (which is false) show me the law that gives that right to gamblers on boards of trade? There is a way to change this condition, and that is through the farmers themselves. First demand that the subject of Controlled Marketing and Price Making be placed on your institute programs. If it is not done stay away from the meetings. If the present officials refuse to help you at the distributing end of your business, then do all you can to help organization along so you may overthrow the institutions that are against you, and establish in their stead those that will be for you and your interests.

This matter should be the subject for resolutions which should be endorsed by this convention and will also be endorsed by every American farmer. These resolutions should then be sent to every officer, director and lecturer of farmers' institutes so they may know the universal sentiment and temperament of farmers on this extremely important subject.

BOARDS OF TRADE.

Boards of Trade have been called the "Devil's Workshops." I believe gambling on boards of trade and in bucket shops (the latter can exist only because the others exist) have been responsible for more misery in this country than all other forms of gambling and whiskey drinking combined.

They have been the farmers' greatest curse ever since established and they are practically the only American institution against which the American Society of Equity from the start has declared war. Gambling in farm products on boards of trade must stop. The farmers must stop it if Congress will not. Congress can stop it quickly by a law forbidding buying and selling futures and make every transaction on stuff actually owned by the seller. The farmers can stop it by maintaining uniform prices on all crops and controlling the supply. There will be no speculation where certainty of supply and value exists. This should be the subject for a resolution and such resolution should be placed before President Roosevelt, the Secretary of Agriculture and sent to all leading papers of the country.

There are many other subjects that I might refer to in this address and which properly come in the province of this important and representative body to consider, but I will refrain. The two remaining days of our meeting will be more than full of business, besides if we undertake a few of the important problems and handle them well we can leave others over until some future time.

IN CONCLUSION.

I want farmers here and all over this country to understand that they will accomplish nothing if they do not help themselves. They who esteem themselves lightly will be lightly esteemed by others. The Divine promise is, "God helps those who help themselves." Notice you must first help yourselves. Also "Seek and you shall find" and "Knock and it shall be opened unto you." Thus in all cases God promises rewards only as we do our duty. Also Congress would act on a demand from a million organized farmers while it would not hear the demand made by a single farmer. The railroad companies, the stockyards, the meat trust, tobacco trust and others will be very condescending and accommodating to the organized farmers speaking through their own head while they would not deign an audience to a single farmer with a grievance. It was always so and always will be so until the farmers themselves will have it otherwise.

The time has come when it is possible to right every wrong the farmers have suffered, and we'll do it in spite of the stubborn farmers.

Let us only organize the farmers as some other industries are organized and they will not only be masters of industrial America, but through their power of members and concert of action, reforms would be brought about that now appear to be impossible. Then Congress and the legislatures would tremble before you, as they never trembled before the combined wealth of corporations and trusts, and would hasten to do your bidding.

Organization is all that is necessary. Therefore the chief duty of the delegates to this convention is the matter of organization and how to be accomplished. We may get wisdom from that book of books, the Bible. When the Jews returned to Jerusalem after their captivity and found the city destroyed they were inclined to go about the rebuilding without any particular system and all wanted to be bosses. But Hezekiah advised them saying: "Let each man build over against his own house," and soon the city was rebuilt.

So we can accomplish much if each member will build up the society in his own neighborhood, and if each local union will organize others over against its own, and each organizer will go to work at once and organize solidly his own district. As we build up the farmers organization, there will be a leveling of all industries up or down, until, I hope, equity will meet in all industries and the ideal business conditions will prevail.

Also, I want to urge that each subscriber to UP-TO-DATE FARMING will keep his or her subscription paid up and in advance and every member pay his or her dues promptly in advance. Every dollar of income from the paper goes to promote this movement. The society has never been charged a dollar for advertising in the official paper nor for any share of the expense of the publication, although it is largely given to the work of the society. We must not lose any ground we have gained. This means that we must have necessary funds, and revenue comes only from memberships, subscriptions and advertising. All of these must be promoted. The cost will only be about $1.00 a year per member. You pay $1.00 a year, we will say for oil to lubricate the machines on the farm, so they will run smoothly and without much wear. Won't $1.00 a year to keep the wheels of the machines of marketing running smoothly be an immensely better investment.

I also recommend, that following this national meeting, state meetings be held as soon as possible in each state to educate the farmers in the important matter of controlled marketing and price-making, and particularly as they relate to our foreign markets. I would like to see this recommendation be made one of the chief matters of consideration at this meeting and I will hope for wise action and good results.

And now at the close of this annual address I want to express the wish that the goddess of agriculture will give you good crops in the future and the spiritual God in Heaven will give you wisdom to so husband them so they may be real blessings to you and all the world.

I thank you.

POPULAR MUSIC

SHEET MUSIC

3½ ca Copy

Each number contains one piece of full size Sheet Music, unabridged, consisting of from four to ten pages, and is in every particular the same quality of sheet music as is usually sold in music stores at from 30 cents to 75 cents per copy. The composers' names are household words all over the continent. None but high-priced copyright pieces, or the most popular reprints. It is printed on regular sheet music paper, from new plates made from large, clear type—including colored titles—and is in every way first-class and worthy of your home. 8,000,000 copies already sold!

LIST OF PIECES OFFERED AT THIS TIME

Vocal

356	Am I Still Beloved,	Danks
27	Ave Maria,	Mascagni

SPECIAL OFFER You can get your music **FREE.** If you want some of this music send us some subscribers. You can get lots of subscribers in every neighborhood. Every country home you visit will join your club. We will give you any 6 pieces for each subscriber at 50 cents. Address:

UP-TO-DATE FARMING, Indianapolis, Ind. or J A. EVERETT, Publisher.

Mention Up-to-Date Farming

The Only One

There are more than Two Hundred Farm Papers in the Country Teaching how to Raise Crops but Up-to-Date Farming is the only Paper that Teaches how to sell them Profitably

Which is more important, raising larger crops or getting a fair and profitable price for every crop you grow?

Isn't it strange that an important industry like agriculture should have such a large number of papers to tell you how to produce crops, while you know this very well already, and there is only one that teaches the more important matter of marketing them profitably? Strange, but true.

Ask the merchant, the manufacturer, the banker, the professional man or the laborer, how he esteems the marketing of his goods, wares, skill or time. Each of these have learned that it is the most important to find and maintain profitable markets and often they spend large sums to market. You know this is so.

But farmers have not been spending a cent. They simply worked hard until they had the crops, then they "dumped" them into the hands of other people who have learned how to control, handle and market them profitably.

While the farmer oftentimes did not get decent wages for all the work he and his family and hired people did, the railroads, commission men, elevator interests, stock yards, packing houses, cold storage houses, food trusts, etc., on whom he dumped the crops, who stood with outstretched arms and hungry maw, ready to receive them, and who had learned the science of marketing, always made money. This was the case whether the crops were low or high priced.

But these things are changing. Farmers, many of them, have learned a simple plan how they can get a good price for their crops before the other people can touch them. The plan has been taught by UP-TO-DATE FARMING—this paper—and is being put in operation by the AMERICAN SOCIETY OF EQUITY. This society is at last on the right road to help the farmers. It has the right plan and it is the only plan that will solve the farmers' problems.

We want to teach this plan to every farmer in America. Then, no matter what you produce you will never need to sell it at a loss.

This is not an idle boast. The farmers can and will make their own prices through the AMERICAN SOCIETY OF EQUITY and they will always be profitable prices. The complete success of this movement is as certain as that the sun will continue to shine, or the seasons come in their regular order and that crops will be grown and that people and domestic animals will continue to get hungry and need to be clothed.

The people who we appeal to now to help establish the AMERICAN SOCIETY OF EQUITY may delay its complete success if they refuse, but they cannot prevent it. The only things that can prevent its final success are that the earth will cease to yield crops or that people can dispense with eating. Such conditions are, however, too remote to be probabilities.

Since the most important part of any business is finding good markets for the products, (you must admit the truth of this), and since the industry of agriculture has over two hundred papers devoted to the problem of PRODUCTION and only ONE to the problem of MARKETING, does it not follow that the one paper should have a circulation equal to all the other papers combined? Only in this way can the two important factors—producing and distributing—be on a balance. Every person who produces should know the RIGHT WAY TO MARKET. Therefore, every person who needs a paper to teach him how to produce, also needs a paper to teach him how to market.

Yes, the distributing end of your business is the more important. You have been learning how to produce for years, but the right method of marketing has been taught only three years and many farmers don't know the plan. Therefore, while you might possibly dispense with the papers on production, IT IS OF THE MOST VITAL IMPORTANCE THAT EVERY FARMER LEARNS ALL HE CAN ABOUT MARKETING.

THERE IS ONLY ONE WAY TO LEARN THE RIGHT PLAN TO MARKET FARM CROPS. It is taught exclusively by this paper—UP-TO-DATE FARMING. There is only one way to apply the plan. It is through the AMERICAN SOCIETY OF EQUITY. 'Tis said, "there is no royal road to success," and this is true. But there is a royal road to success in marketing farm crops and it is by the A. S. of E. route. You've got to travel this road if you ever expect to reach the best results on the farm, no difference what crops you grow.

Refuse to take this advice and you postpone the day of your independence from the price making powers and exploiters who have been on your backs all your life. REFUSE to read UP-TO-DATE FARMING and to work with the AMERICAN SOCIETY OF EQUITY, and your problems will remain unsolved. REFUSE to contribute the very small sum required to establish and maintain the A. S. of E. and you will continue to be kept out of hundreds or thousands of dollars that you may as well have, and contribute hundreds or thousands of dollars to that class of people who produce nothing but make millions off of what you produce.

But you are not asked to contribute in advance. There is not a person who raises any farm crop, who has not already been benefitted because of the existence of THE AMERICAN SOCIETY OF EQUITY and the work done by UP-TO-DATE FARMING. These benefits run from a few dollars to hundrers with each farmer. We have had thousands of letters making such statements. We ask only a small contribution of the extra prices you have received to extend this movement and keep it running so that in the future it can do immensely more for you.

Somebody said: "There are three kinds of people in the world, the wills, the won'ts and the can'ts. The first accomplishes everything; the second oppose everything; and the third fail in everything."

To which class do you belong? Are you willing to be put in any class but the first?

We are seeking the people who arre in the first class. We want people who will say "I WILL help this movement that will help ME as much as anybody. And when it is completed ALL the other farmers will help poor, weak ME immensely more than I can help myself." This is the true sentiment of co-operation. EACH HELP ALL AND ALL HELP EACH.

Here's What We Want You To Do

1st. If a member of the American Society of Equity, pay up your dues promptly, ($1.00 a year if a member at large; 30 cents quarterly, if in a local union). These payments include subscription to the official paper, Up-to-Date Farming.

2d. If a subscriber to Up-to-Date Farming, renew your subscription promptly and you should become a member of the society also.

3d. If, dear reader, you are not a member of The American Society of Equity or a subscriber to Up-to-Date Farming, won't you come with us at once. Please remember what we said about the importance of the distributing end of your business and that there was only one paper representing it on the right plan. Up-to-Date Farming is the paper. If you will take the advice, which you will get by regularly reading Up-to-Date Farming, you will make enough extra off of each crop to pay the cost of the paper and society for many years. Tens of thousands of others have done it and we're getting stronger all the time.

We might multiply such arguments to fill volumes, but what's the use. Everything is in favor of establishing the A. S. of E. and abolutely not one good argument against it. Therefore, let us establish it now.

No matter how many other papers you are taking, you cannot afford to be without Up-to-Date Farming.

Read this issue all through and then fill out below blank and send to us before you forget it.

[For the information of interested people we will say that only 25 cents a year goes to pay for Up-to-Date Farming to members of the A. S. of E. The balance goes into the treasury of the society for extension work and every dollar is strictly accounted for.]

Third Annual Meeting

--of--

The American Society of Equity of N. A. Indianapolis, Ind., October 23, 24 and 25, 1905

Report of Proceedings

MONDAY, OCT. 23, 1905, 1:30 P. M.

INVOCATION.

Rev. Albert Hurlstone, Pastor of Robert's Park M. E. Church.

ADDRESS OF WELCOME.

Mayor Holtzman, Indianapolis.

RESPONSE

H. B. Sherman, National Organizer.

Mr. Sherman spoke as follows:

"We are simply here as representatives of a great National organization from many states. This is not a campaign meeting, but rather a representative meeting and we are here in the greatest railroad city in the United States. The greatest inland city in the United States. Too large for this convention, and because of this it has not come led by a great brass band.

"We are here to devise ways and means by which we may carry into effect plans of action. All have admitted that this plan is practical, and that the work is as perfect a piece of machinery as has ever been laid before the farmers of our country or any other class of people. We are not here for the purpose of announcing a plan of principle to the world. We are here for the purpose of putting our brains together and for the purpose of putting this machinery into active and perfect operation.

"I think that it is fitting for the Mayor of the city to welcome you and that it would be fitting for the Governor of our state or any other officer to welcome you should be glad, and honored, to come to a meeting like this and welcome the farmers into the city of Indianapolis to hold a convention.

"Fellow delegates and brother farmers you have done well to come to Indianapolis, to come to headquarters, to come to this place, and while men may die, organizations may pass away, every farmer that has learned the idea of controlled marketing in order to control prices, every farmer that has learned to believe that the farmer has a right to set the price on his products as well as any other man, and that it can be done only through organization and education, I say that this organization may pass away, but the idea once turned loose will go on forever and will never stop until it is maintained and completed throughout this country.

"I don't believe that I am called upon to make a very long speech in answer to this address of welcome. I think that there is too much work to be atended to. We know that we are welcome, that we have a right here. Look at the great buildings throughout this city and if some of the people would ask you 'Do you know who built them?' You would say that you know. The farmers built them. We are here for the purpose of devising ways and means by which we may be able to get the benefit of some of these immense buildings. Now that is the purpose of this convention. I want you farmers to get a profitable price. You are entitled to it and when you do, you will be prosperous and when you farmers are prosperous, then the business men will prosper and all of us will prosper and every one wants to be prosperous.

"Now let us consider ouselves welcome here and let us act on that welcome and let us get down to business because the agricultural eyes of the world are on this convention and will be on the convention until the adjournment. We should not spend the days here in little things and do not do anything that would cause the business men of our country to say 'Well, you met in a convention, but you did not devise any ways and means that amounts to very much.' You are going to have some up-hill work. A great deal more than in years past. The work of this convention is going to prove the weal or woe of this great organiaztion. So get down to work and devise ways and means that will appeal to the people of our country, and if we do that in a year from today, when the next annual convention meets there will not be 75 or 100 delegates present, but a hall like this will be crowded to the door and the papers will herald it and will give close attention to its proceedings.

"Therefore I ask of you give strict attention to the business of this convention, because of its importance."

APPOINTMENT OF COMMITTEES.

The following committees were proposed:

On Credentials; on Revision of Constitution and By-Laws; on Organization and Finance; on Official Paper; on Equity Press; on Officers and Salaries; on Mileage and Per Diem; on Auditing; on Insurance; on Warehouses, Clearing Houses and Stockmen's Stock Yards; on Farm Telephones; on Minimum Prices of Farm Products; on Annual Meeting; on Insurance.

The president requested that he be allowed to appoint a committee on committees. Permission being given he selected the following:

N. C. Crawley, Wisconsin.
C. O. Drayton, Illinois.
Sam J. Hampton, Indian Territory.

who in turn selected one delegate from each state to co-operate with them.

Motion made by N. C. Crawley that the proposed Committee on Credentials be dispensed with, owing to the fact that the delegates have already given evidence of their authority and through the roll call have properly responded.

Carried.

Motion made by Mr. Stacey of Virginia that the motion to dispense with the commitee on credentials passed by the convention be reconsidered as the committee on credentials have further duties and should not be discharged.

Defeated.

Motion made by N. C. Crawley that the proposed Committee on Insurance be stricken out for the reason that the farmers have their own insurance companies already.

Carried.

Motion made by N. C. Crawley that the delegates from each state form themselves into a committee by themselves and work with this committee.

Carried.

While waiting for the report on the Committee on Committees the time was occupied by various delegates reporting the condition of the A. S. of E. movement in their respective states, as follows:

J. B. Whiting, New York.

"We have perhaps in the state of New York some 20 or 30 Local Unions that have been organized. Some of them were organiezd by those who are not really competent to do the work. But unfavorable conditions prevailed and a large majority of the Local Unions became inactive. But since the call of this National meeting, I have made a little effort in my own county and adjoining counties and they are doing better and more intelligent work today than ever before. I will say to you that they were anxious to be represented, and it is not because I am the smartest man in the state of New York but I was the choice and they put over $60.00 into my pocket to pay the expense. They are looking with earnestness to what you will do here during this session, and if satisfactory the A. S. of E., will pass over the state of New York like a whirlwind."

N. C. Crawley, Wisconsin.

"The state of Wisconsin started to organize about a year ago. I want to say to you here gentlemen, that we have got thousands of members there. We have Local Unions there runing from 15 to 280, and there are men in the state of Wisconsin who are not afraid to sacrifice money or time. We have many men who stand ready to help farmers. And, gentlemen, I want to say to you "Don't down a man because he does not always attend the meetings. He may be too busy.

"It is up to you. If this convention is a failure who is to blame? We. If it is a failure the National Union is a failure. If the National Union is a failure, you are then at the mercy of your enemy. I organized a Local Union last spring with three members. Today it has 137 members. Gentlemen, they have ware houses, they have creameries, and now they are going to buy a starch factory and put in their own bank in the town. The people are running their own local business as the local conditions exist in their territory.

"I can say that wherever the plan of this society is understood the people are heartily in accord. Wherever it is not understood they think they are opposed to it."

J. C. Eisenmayer, Illinois.

"Ours is a wheat country and I know that it is much better to get $1.00 for wheat than 50c and if you people are wise you will take hold of this matter and act on it. The princi-

ALL WINTER LONG

As a Free Test

YOU can get McCLURE'S MAGAZINE all winter long—FREE—as a TEST—I mean just that.

I want you—your wife—and your children—to get well acquainted with McClure's Magazine.

I want to start—right away—sending it to you every month for 3 months *on approval*.

Not a penny down—not a deposit of any kind—not even an agreement to keep taking it—just your word that you will do one of two things at the end of three months—either notify me to stop sending the magazine, or—send me just one dollar, for the full year's subscription.

You see, I know the majority of people, once they start reading McClure's, will feel they could not do without it.

A certain number may write me to stop sending it—but I'm willing to send it *3 months free* to these few, in order to get McClure's into the great number of homes where it will be appreciated and looked forward to from month to month.

Now, McClure's is *bound* to please you, because it is clean, vigorous, fearless, progressive—always truthful and accurate.

It is beautifully illustrated, many plates are in colors, and there are always good stories by the brightest, most entertaining writers.

It is different from any other magazine. McClure's keeps you in touch with *the world*—the *whole* of it.

There are solid articles for thinking men, newsy articles concerning events of the day, entertaining articles and stories for father, mother, son and daughter. Even the little folks are not forgotten.

McClure's has its own permanent staff of writers and artists who aid in furnishing, each month, its 300 pages of matter which cost more, to prepare, than any other periodical in the world.

For three years McClure's has been publishing a series of articles describing the successful overthrow of the criminal political machine in one city after another. These articles will be continued along a little different line, discussing the problems of Life Insurance. You can't afford to miss them.

A new series is just announced—*The Railroads on Trial*—by Ray Stannard Baker. These articles vitally concern every cultivator of the soil, as well as manufacturers, because they handle fearlessly the matter of railroad rates, rebates, etc. You who are shipping grain or stock want to know about these things.

Names familiar to our readers as former contributors are Theodore Roosevelt, ex-President Cleveland, Mark Twain, Gladstone, Huxley, Tyndall, Rudyard Kipling, Gen'l Miles, Arch Deacon Farrar, Robert Louis Stevenson, Booth Tarkington, Nansen, the great Arctic explorer, Dr. A. Conan Doyle (author of the famous Sherlock Holmes stories), Walt Whitman, Bret Harte and others.

Among those who will write this next year are Lincoln Steffens, Jack London, Booth Tarkington, Myra Kelly, William Allen White and others equally famous and entertaining.

The stories and articles in lighter vein are *all* by leading writers and are *suitable* reading for the young.

McClure's Magazine cultivates a taste for right reading and right living. It is the biggest reading bargain in the world; and every article may be read by every member of the family.

Send me the coupon.

ple of the A. S. of E. is all right. If the farmer has not a right to set the price on his stuff who has? The farmers must take hold of this matter. The principle is all right and go ahead and see what your stuff is worth and keep out of politics. Let this be a society of equity. Our county is solidly organized. We have got results and we're out for more victories."

C. H. Calvin, Sullivan, Mo.

Brother farmers there is one thing I want you to believe and it is this: It was about a year ago that Missouri first heard of the A. S. of E. About three months ago I first heard of it. I am a young man. I happened to pick up an Up-to-Date Farming lying on the counter of one of my grocery stores. I began to look over the columns and saw that it was one of the finest things I had ever heard tell of in the way of protecting the farmers. I said: 'I am going to try to see if I cannot become a member of this.' They said 'Yes, sir; you can come in.' About two weeks after the A. S. of E. Union had a meeting for the purpose of organizing the county. I happened to be there. I was called upon for a short speech. I made a little talk and was elected president of the county and a little later was elected organizer and lecturer for the county.

"We are on fire in Franklin County, Mo., for the A. S. of E. We have thirty Unions. There has never been an organizer in this state except among ourselves. I had fourteen men to hear me the first meeting, but I spoke two hours and stamped my foot just as hard as if there had been two hundred there. We have not had time to be thoroughly organized, but thanks be to Our Father, we are going to be organized. And then we will say to the Boards of Trade, "Don't tread on us."

Mr. H. P. Covey, Oklahoma.

Fellow Farmers and Members of the Greatest Organization in the United States: "I am here to speak for Oklahoma in the interest of our far distant territory where the principles of Equity in all business relations have reached. I am told that it has also reached beyond our country and into Canada.

"To much cannot be said of this man who has placed before the people a real understanding of their conditions. He has placed before the gambler the real understanding of his position as connected with the agricultural products. Why has this not sprung up before? Some men, if they ever thought of it, were simply waiting until the other fellow took the lead. Down there with us the A. S. of E. has made a more rapid growth than has any former organization. Our county extends about 54 miles one way and 60 another. But our county has been settled up rapidly. We have made improvements which would be surprising to eastern men. Brother Hampton has been in our county and I want to say that he has done us an immense lot of good and I want to say also that such men as he are needed all over the country.

"We have made a rapid progress in our county in the A. S. of E. We commenced organization about a year ago in the territory. It reached into our county sometime shortly after and now in our county of Woodward we have 39 locals.

"I am to stay until this convention is over. I am a young man in the A. S. of E., that is, I am young in the cause. I want to learn all of the good things that I can of you old war horses, I want to gather all the good things I can."

J. B. Whiting Speaks Again.

Gentlemen, it is about the time of the year when subscriptions are solicited and our members had a consultation and we have come to this conclusion. We will not subscribe for a single paper unless they will give our movement encouragement in their columns. The day before I left home a man came along selling the Rochester Herald. I said, "Well, sir, it is on one condition that I will take your paper for a certain length of time. I belong to the A. S. of E. I propose that in whatever paper I take I will be able to read something about our association. If you will give us space in your columns I will take your paper."

His reply was like this:

"You can have all the space you want for your society."

I believe that we should not support any paper that will not support us.

Motion was then made by Mr. Whiting that the farmers do not support any paper that does not support them in their effort to organize in the A. S. of E.

Carried.

The President: The committee on committees is now ready to report.

The consent of the convention being given to hear the report the following committees were announced:

Committee on Constitution and By-Laws.

J. B. Whiting, New York; Thos. Emmerton, Wisconsin; H. P. Covey, Oklahoma; Dr. P. W. Foote, Kentucky; C. O. Drayton, Illinois.

Commitee on Organization and Finances.

N. C. Crawley, Wisconsin; Sam J. Hampton, Oklahoma; Geo. W. Wilson, Illinois; Wm. E. Robinson, Michigan; J. W. Dunn, Kentucky.

Committee on Official Paper.

N. C. Crawley, Wisconsin; A. B. Peters, Mo.; Dr. P. W. Foote, Kentucky; Ernest Krost, Illinois; C. M. Stacy, Virginia.

Committee on Equity Press.

C. G. Billings, Wisconsin; Julius Phillips, Missouri; O. B. Shafer, Nebraska; D. B. Greathouse, Kentucky; J. T. Patterson, Arkansas.

Committee on Officers and Salaries.

Sam J. Hampton, Indian Territory; P. Remming, Texas; Otto Rumer, Illinois; W. L. Stevens, Kentucky; Wm. Hill, Wisconsin.

Auditing Committee.

N. C. Crawley, Wisconsin; C. O. Drayton, Illinois; Sam J. Hampton, Indian Territory; J. H. Burney, Kentucky; Gurley Taylor, Indiana.

Committee on Resolutions.

Scott, Claburn, Fincout, Anthony, Peters.

Committee on Warehousing, Clearing Houses and Stockmen's Stock Yards.

S. B. Robertson, Kentucky; Frank Ploetz, Wisconsin; C. H. Calvin, Missouri; H. P. Covey, Oklahoma; O. B. Shafer, Nebraska.

Committee on Farm Telephones.

J. W. Dunn, Kentucky; J. W. Engler, Wisconsin; Thos. Emmerton, Wisconsin; Julius Phillips, Missouri; Sam J. Hampton, Oklahoma.

Committee on Minimum Prices of Farm Products.

Geo. W. Wilson, Illinois; Wm. Hill, Wisconsin; Ottis Rockett, N. Carolina; C. F. Porter, Florida; John C. Koch, Indiana.

Committee on Place of Next Annual Meeting.

J. O. Adams, Kentucky; C. O. Drayton, Illinois; O. B. Shafer, Nebraska; Thos. Emmerton, Wisconsin, National Secretary.

The meeting was now adjourned until 7:30 p m.

EVENING SESSION, MONDAY, OCT. 23.

The program for this session was entitled "field work." The idea was to give several of the organizers an opportunity to address the convention with their characteristic speeches and explain how they conducted a meeting. There were six speeches on the program but all could not speak on account of lack of time.

The session opened with a speech by National Organizer Sherman, who spoke for one hour, followed by Sam J. Hampton and W. C. Webber, each of whom spoke about one hour. Space will not permit printing the reports in this number, but we hope to print them later.

MORNING SESSION, TUESDAY, OCT. 24.

The morning session was taken up by reports of committees and the president's annual address. Committee reports follow and the address will be found elsewhere in this paper.

Committee on place of next Annual Meeting:

We, the undersigned committee, report that we have the matter under consideration and will decide upon a place after hearing and considering all propositions and inducements offered by the various cities.

J. Q. Adams, chairman, Kentucky; C. O. Drayton, Illinois; O. B. Shafer, Nebraska; Thos. Emmerton, Wisconsin; M. Wes. Tubbs, Indiana.

Accepted.

Committee on Warehousing, Clearing Houses and Stockmen's Stock Yards:

Report of Committee.

We, your committee on warehousing, stockmen's stock yards and clearing houses.

Although the A. S. of E. must continue to advocate farming for the farmer and discourage interference with other lines of business, still the society recognizes the advantages to be derived, in some localities, by adopting some plan of warehousing, also stock yards or clearing houses, and where the need of such a plan is found to be imparative, the society recommends the plan advocated by Up-to-Date Farming.

Respectfully submitted: S. B. Robertson, chairman, Kentucky; Frank Ploetz, Wisconsin; C. H. Calvins, Missouri; H. P. Covey, Oklahoma; O. B. Shafer, Nebraska.

By vote the report was accepted.

Committee on Official Paper.

The Committee on "Official Paper" beg to report that we deem it wise, expedient and necessary for the promotion of the American Society of Equity in the great and fundamental principles of organization, price-making and Controlled Marketing, that this society takes steps to own and control its own official paper.

We recommend that the Committee on Committees which has been appointed by the president, appoint a committee at once to take steps to secure the absolute control and ownership of the Society Paper.

N. C. Crawley, chairman, Wisconsin; Ernest Krost, Illinois; C. N. Stacy, Virginia; Dr. P. W. Foot, Ky.; A. B. Peters, Missouri.

Carried.

The Committee on Committees reported as follows:

To the Chairmen and Members of the National Convention American Society of Equity.

We submit the following names as members of a Committee on Official Paper to confer with President Everitt to ascertain the probable cost and obtain an option on the official paper, if they deem it advisable, and report as soon as convenient. W. C. Webber, chairman, Minnesota; C. O. Drayton, Illinois; Dr. P. W. Foote, Kentucky; N. C. Crawley, chairman of The Committee on Committees.

Motion made that this report be laid on the table.

Carried.

(Mr. Everitt sugested, that when the society is ready to purchase the value of the official paper be determined by a committee of men who are experienced in publishing and advertising, which was approved of by the committee.)

Committee on Farm Telephones.

To the President and Members of the National Convention of the American Society of Equity: We, your committee on rural telephones, beg leave to submit the following report:

We recommend the use of telephones by farmers as one of the most available means of information to keep the farmers posted on the condition of the markets and keeping in touch with each other, and one of the most important factors in the progressive development of farmers organiaztions for the purpose of controlled marketing and maintaining profitable prices.

As a means to facilitate the establishment of rural telephone lines, we recommend that the national officers elected by this body shall take this matter up and ascertain the best sources from which telephone supplies can be had, and estimate the minimum cost per mile, and to furnish such information through the official paper, and such other means as will encourage the building and equipment of rural telephone lines.

Also that all local, county and district unions of the A. S. of E., shall take the question up immediately and secure the co-operation of county towns and villages in the development of this most useful service.

All of which is respectfully submitted.

J. W. Dunn, chairman, Kentucky; J. W. Engler, Ohio; Julius Phillips, Missouri; Thomas Emmerton, Wisconsin; Sam. P. Hampton, Indian Territory.

Motion made that report be received.

Carried.

Committee on Officers' Salary.

To the President and Members of the

National Convention of the A. S. of E.:

We, the committee on Officers and Salaries, submit the following report:

(1). The officers of the National Union shall consist as follows: A president, vice president, secretary, treasurer and five members of the executive board. The officers shall be ex-officio members of the executive board.

Their salaries and compensation fixed as follows: The president, $1000.00 per annum and all necessary traveling expenses while in the actual discharge of his duties, and office expenses as prescribed by the executive board.

The vice president shall be compensated only when called upon to perform the duties of the president at the rate of $3.00 per day and traveling and office expenses.

The secretary, $1000.00 per annum and office expenses, including such assistance as he may need in conducting the office.

The treasurer, $400.00 per annum and traveling expenses while attending the meeting of the National Union or meetings of the executive board.

The members of the executive board shall receive $3.00 per day and traveling expenses while in actual performance of their official duties.

Respectfully submitted: S. J. Hampton, chairman, Indian Territory; P. Ramming, Texas; Otto Rumer, Illinois; W. F. Stevens, Kentucky; Wm. Hill, Wisconsin.

Motion that report of committee be tabled until the report of committee on constitution and by-laws be received. Carried.

The balance of the forenoon session was taken up by the president's annual address.

AFTERNOON SESSION, TUESDAY, OCT. 24.

This session was largely taken up by the reports of committees on Constitution and by-laws. The report by this committee of practically a new one, precipitated much discussion in the attempt to amend and adopt it. Finally it was agreed on motion of Webber to take the old constitution and laws as the basis for revision and it was made the special order of business for a future session.

EVENING SESSION, TUESDAY, OCT. 24.

The special order of business was made the revision of the Constitution and By-laws which occupied the entire session and part of the next morning session.

The committee was assisted by one delegate from each state.

MORNING SESSION, WEDNESDAY, OCT. 25.

Continuation of revision of the constitution and by-laws.

As revised the constitution and by-laws are as follows:

ARTICLE I.

Name and Membership.

This organization shall be known as the American Society of Equity of North America, and it shall consist of farmers and other persons who favor and are willing to assist in the accomplishment of, the purposes of the society and who shall be accepted therein according to the prescribed rules of receiving members; also wives of members and their children not under fourteen (14) years of age and residing at home with their parents, who may become special members, with the benefits as hereinafter provided.

ARTICLE II.

Purposes and Objects.

The purpose of this society is to secure equity and fair dealing in all the business relations of human life, and its objects are fully set forth in the Articles of Incorporation, the chief of which is to secure equitable and profitable prices for all products of the farm, garden and orchard, including live stock and dairy products and poultry.

ARTICLE III.

Organized Forms.

The organized forms of this society are Local Unions, County Unions, State Unions and a National Union, whose membership and powers are fully defined herein.

ARTICLE IV.

Local Unions.

Local Unions shall consist of farmers and others as heretofore specified, accepted into the society according to its rules and usages. Each local union shall have exclusive control of its own affairs and may adopt special by-laws, subject only to this constitution and the laws enacted thereunder, and to official rulings in accordance therewith. by the National, State or County Unions.

How Organized.

To organize a local union at least ten (10) qualified persons may join in a request to be so organized, which request should be made to some chartered local union or authorized organizer, on receipt of which request the local union or organizer shall proceed to effect such organization, and make due report thereof to the National Union. Or, not less than ten (10) persons, as aforesaid, may assemble of their own accord and proceed to organize themselves into a local union by subscribing to this constitution, electing the officers therein provided for and making due report thereof to the National Union. Also to the State and County Unions if such exist.

Fees and Dues.

The membership fee to join The American Society of Equity is $1.00, to be applied as follows: 40 per cent. to be sent to the Secretary of the National Union for the general fund and 60 per cent. to be applied to the organization fund. All members subsequently joining the Society shall be required to pay the same fee as is paid by charter members of local unions or members at large.

Out of the 40 per cent the official paper is also provided for each member.

The dues to be paid by each member of a local union shall be ten cents per month payable ten cents monthly, thirty cents quarterly or in one payment annually as each local union may elect. All dues are payable in advance. The dues shall be apportioned as follows: 40 cents to be paid to the National Union, 30 cents to be paid to the county union when one shall have been organized and the balance of 50 cents to be retained in the local union treasury to meet the expenses of the local union. Dues must be remitted quarterly to the National and County unions, sending all their portions.

Special Members.

Special members are the wives of regular members and their sons and daughters. They will be admitted to membership in local unions free and are not subject to dues. They shall not have a vote in the election of officers nor in matters other than local. They should be allowed to vote on local matters but in this each local union is expected to make its own rule.

Charter, How Granted.

On receipt of the report of the organiaztion of a local union, accompanied by the charter fee, the secretary of the National Union shall make proper record thereof, under the name chosen by the charter members and the next consecutive local union number, and, without delay, transmit to the secretary thereof a charter duly and properly executed and attested by the seal of the National Union, together with an official seal for the local union, six (6) copies of the constitution and by-laws of this society, a certificate and badge for each member, and a set of record books, blanks, etc., and he shall cause each member's (other than special) name to be placed on the regular mailing list of the official paper, Up-to-Date Farming, which shall be sent to each member so long as said member shall remain in good standing, and which shall be paid for out of the publication fund of the National Union.

Changing Place of Membership.

Any member in good standing, wishing to change his or her membership to another local union may, by a majority vote, be granted a demit for that purpose, of which transfer the secretary must notify the National Union. A member thus demitted may return to his own local union or may become a member of any other local union, on a majority vote, by depositing his demit with the secretary of said union, who shall without delay notify the National Union thereof, being careful to give said member's past and present postoffice address. Members holding demits stand in the relation of members at large, as long as they pay the dues as provided.

Officers and Election.

The officers of a local union of the American Society of Equity shall be a President, a Vice President, a Secretary and a Treasurer, together with such other officers as local unions may decide to elect or appoint. The official term shall be six months, and regular elections shall be held at the first meetings in April and October, by ballot, except that in case of only one candidate for an office, election may be had by acclamation. All officers serve until their successors are elected and qualified.

Duties of Officers.

The President shall preside at all meetings, shall maintain due decorum, decide all points of order [subject to appeal] and see that the laws and usages of the society are observed and enforced. He shall neither make nor second a motion, nor shall he vote on any question except to give the casting vote in case of a tie, but he shall not be denied the right to vote in the election of officers. He shall fill all official vacancies by appointment pro tem.

The Vice President should assist the president in his duties when called upon, and in the president's absence, he shall perform the duties of that station. In case of the absence of both president and vice president a president pro tem, may be chosen by the members present.

The Secretary shall keep a correct record of all the proceedings of the union, and shall keep carefully compiled statistics thereof, including a complete and correct membership roll, showing date of joining, etc., an account with each member, showing dues and when paid, and everything necessary to keep a perfect record of each member's relation to the society. He shall keep all books necessary to the proper discharge of his duties, and he shall conduct all official correspondence. He shall collect all fees and dues from the members, keeping a correct account thereof and paying the same promptly to the treasurer. He shall be the custodian of all books, papers, etc., belonging to the union and shall promptly turn over the same to his successor in office. He shall make all reports required by the local, county, the State union, or National Union, and shall perform such other duties, as may, from time to time, be required of him. He may be allowed such compensation as his local union may from time to time, determine.

The Treasurer shall have custody of and safely keep all moneys belonging to the union, keeping a careful account thereof, and he shall pay out no money except on order of the union attested by warrant signed by the president and secretary. He shall make a complete and itemized report at the close of his term of office, and at any other time when required by the union to do so, and he shall promptly turn over all money, books, etc., to his duly qualified successor, in office. Before entering upon his duties he shall give good and sufficient bond, made payable to the union, in such sum as may be fixed by vote of the union, said bond to be approved by vote of the union.

Meetings.

Local unions should meet at least twice each month, and it shall be the duty of the president, vice president and secretary to see to it that there is an entertaining program or subjects

CASH FOR YOUR FARM

9 TOOLS IN 1

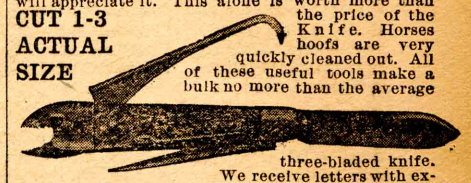
One of the most useful tools of recent invention is the

C. & F. WONDER KNIFE

—9 tools in 1. It successfully combines in one article nine perfect tools, all of which are used every day by the average man and boy. In reality it puts nearly all the tools of a work bench in your pocket. It is so handy that no one will be without after using once.

The knife-blade is of the finest steel and made to stand bad usage. The other tools are: Wire Cutter, that will cut barbed wire; Wire Pliers useful always; Swedging Awl; Leather Punch and Gimlet, for Harness mending and other jobs; Screw Driver, that is always handy; Alligator Wrench and Hoof Hook. The latter is something new and every horse-owner will appreciate it. This alone is worth more than the price of the Knife. Horses hoofs are very quickly cleaned out. All of these useful tools make a bulk no more than the average three-bladed knife.

CUT 1-3 ACTUAL SIZE



We receive letters with expressions like these: "Greatest little article I ever saw," "Never saw its equal," "All my friends want one," "Don't see how I ever got along without it." You will agree when you see the knife.

"C. & F. Wonder Knife received. It is certainly a wonder. I want to buy them by the dozen."—J. Barnhart, Wilmington, O.

The regular price is $1.50 each. But we want to introduce them and make an offer of only $1.25 each. With each order we send wholesale price list. Agents will find the C. & F. Wonder Knife a wonderfully fast seller. No free samples. Send $1.25 for a sample and get the attractive agents price.

C. & F. Wonder Knives—9 tools in 1—are made to sell on their merits. Made to gain friends and keep them. One sold sells many others.

COONER & FORTUNE CO., Dep. A, Indianapolis, Ind

South Dakota

The Land of Plenty

Rich soil, a mild climate, and abundance of water have made South Dakota one of the best agricultural states in the Union. The soil of Lyman County is unusually rich. It is a black loam with a yellow clay subsoil. The extension through Lyman County recently built by the

Chicago, Milwaukee & St. Paul Railway

has opened up a part of that state hitherto sparsely settled. Land is now selling at the rate of from $8 to $15 an acre, and it is altogether probable that valuations will increase 100 to 200 per cent. within a year. South Dakota offers great opportunities for the small investor. A book on South Dakota for two cents postage.

Santa Fe

Ask General Passenger Office
Atchinson, Topeka & Santa Fe Railway Chicago

for consideration at each meeting. Five regular members must be present for a quorum. The president shall call special meetings at the request of not less than ten members, but all regular members residing in the vicinity [not exceeding two miles from the place of meeting] must be notified of the time and place of such meeting, and of the object or objects for which it is called. Provided, that the president may call special meetings when he may deem the interest of the union or of the society requires it. At called meetings no business shall be transacted not mentioned in the call, unless all the members are present.

Executive Session.

In case it should be considered desirable to hold an executive session, a doorkeeper may be appointed, whose duty it will be to close and attend the door when required to do so by the president, and to admit no one except members, without the president's permission.

Grievances.

Local unions shall have power to deal with their members for offenses against the union or the society, and shall be governed by rules usually applied in such cases. The president shall preside at all trials (unless himself be the defendant, in which case the vice president shall preside), and the rules of evidence and methods of procedure shall, as near as may be, be the same as those observed in the courts. On conviction, to be determined by a vote of guilty or not guilty, punishment may be reprimand, suspension or expulsion, also to be determined by a vote, voting first upon the severest penalty. If that fail to carry, then on the next, and so on until a penalty be fixed. Should no penalty be voted after a vote of conviction, the presiding officer shall administer a mild reprimand and dismiss the case. Suspensions shall not exceed three months, and the National Union must be notified of expulsions. Appeal may be taken to the county union.

Arrearages.

A member six months in arrears for dues or other charges shall stand suspended without action of the union, but the secretary must report the same to the local, county, state and National Unions and correct the membership roll. A member suspended for non-payment of dues may be reinstated by the payment of arrearages, not to exceed one dollar, which shall be apportioned to the various funds the same as dues are apportioned.

ARTICLE V.

Members at Large.

Members not convenient to a local union or where no local unions have yet been orgainzed, may become members at large of The American Society of Equity on payment of the membership fee of one dollar ($1), and may maintain their membership by the payment of one dollar ($1) per year thereafter. Such members are entitled to the official paper, to a certificate of membership and badge, and to all other privileges and benefits of the society, but they are not required to pay quarterly dues. Members at large may become members of local unions without additional fee on application and acceptance, whereupon on payment of dues, as provided, they shall be entitled to all privileges and advantages of the local union.

County Unions.

County unions shall consist of their regular officers, standing committees and representatives from local unions.

How Organized.

Any county having not less than three chartered local unions that will join therein, may organize a county union. In meeting to organize, and in subsequent meetings each local union shall be entitled to one representative at large, and to an additional representative for every ten (10) members and major fraction thereof. The representatives shall meet at a time and place previously fixed and organize by electing the officers provided for in this constitution.

After organization the secretary shall report the fact thereof, together with the names and addresses of the officers, the names and numbers of the local unions joining therein, accompanied by a charter fee of two ($2) dollars, to the secretary of the National Union, who shall make due record thereof and forward to the secretary of the county union a charter duly signed and attested, giving to said union the county name and the next consecutive county union number. He will also furnish the county union with an official seal, and such other documents as may be ordered by the National Union. All local unions in the county, so far as known, must be notified of the time and place of meeting to oragnize a county union. Local unions may be subsequently admitted to the county union on evidence of charter and the payment of an admission fee of 30 cents per capita on the entire membership of such local union, 10c of which shall be held in the County Union treasury, pending the organization of a State Union.

Officers and Election.

The officers of county unions and their election shall be the same as those provided for local unions, except that the official term shall be one year, and the annual election shall take place at the first meeting in January of each year. Delegates to the State Union shall also be elected at the April meeting each year as hereinafter provided for.

Regular Meetings.

The regular meetings of county unions, shall be held quarterly in January, April, July and October of each year. Immediately after, the meeting in January of each year the secretaries of the county unions shall send to the secretary of the State and National Unions a carefully compiled statistical account of the work of the previous years, towit: The number of local unions in the county, of new local unions organiezd and admitted to the county union during the year, the number suspended or ceased to work, if any, and the cause; the number of members received into the society by the local unions, the number withdrawn, suspended, expelled or died, and the number in good standing belonging to each local union at the close of the year, together with such other information as may be at any time called for by the National Union.

The Committees and Reports.

Each county union shall have standing committees, consisting of five members each, on such crops produced in the county, as may be important who shall report when called upon to do so. The secretary shall report to the National Union a statement compiled from the reports of these committees, showing the condition, acreage and yield of each crop.

Work of County Unions.

County unions are charged with the general supervision of the work of the society in their respective counties, and they are, therefore, expected to complete and maintain the organization therein. To this end they should have active committees on extension work in all parts of the county, and even extending into other counties that are unorganized. To accomplish this work they are authorized to take whatever steps may be most effective, and may raise revenue to meet the necessary expenses thereof, the National Union and the State Union to aid therein in whatever proper way it may. County unions may, by vote, levy upon the local unions per capita dues to meet legitimate expenses.

ARTICLE VI.

State Unions.

State Unions shall consist of their regular officers, standing committees and representatives from county unions.

How Organized.

Any state having not less than five chartered county unions, that will join therein, may organize a state union. In meeting to organize and in subsequent meetings each county union shall be entitled to two representatives at large, and to an additional representative for every 100 members of the Society within that county. The representatives shall meet at a time and place previously fixed and organize by electing the officers provided for in this constitution.

After organization, the secretary shall report the fact thereof, together with the names and addresses of the officers, the names and numbers of the county unions joining therein, accompanied by a charter fee of five ($5.00) dollars, to the secretary of the National Union, who shall make due record thereof and forward to the secretary of the state union a charter duly signed and attested. He will also furnish the state union with an official seal, and such other documents as may be ordered by the National Union. All county unions in the state, so far as known, must be notified of the time and place of meeting to organize, and county unions may be subsequently admitted to the state union

Girlhood, Womanhood, Motherhood.

The first lesson that the young girl has of womanhood is usually a painful one. She learns to know what headache means, and backache, and sometimes is sadly borne down by this new experience of life.

All the pain and misery which young girls commonly experience at such a time may, in almost every instance, be entirely prevented or cured by the use of Dr. Pierce's Favorite Prescription. It establishes regularity. It tones up the general health, and cures headache, backache, nervousness, chorea, or St. Vitus's dance, and other consequences of womanly weakness or disease.

MOTHER OF THE FAMILY.

The anxious mother of the family oftentimes carries the whole burden of responsibility so far as the home medication of common ailments of the girls or boys are concerned. The cost of the doctor's visits are very often much too great. At such times the mother is invited to write to Dr. R. V. Pierce, of Buffalo, N. Y., for medical advice, which is given *free*. Correspondence is held sacredly confidential.

IT STANDS ALONE.

"Favorite Prescription" is the only medicine for women the makers of which are not afraid to print just what it is made of on every bottle wrapper. It is the only medicine for women every ingredient of which has the unanimous endorsement of all the leading medical writers of this country, recommending it for the cure of the very same diseases for which this "Prescription" is advised.

A MOTHER'S LOVE.

A mother's love is so divine that the roughest man cannot help but appreciate it as the crown of womanhood. However, motherhood is often looked forward to with feelings of great dread by most women. At such times a woman is nervous, dyspeptic, irritable, and she is in need of a uterine tonic and nervine, a strength builder to fit her for the ordeal. No matter how healthy or strong a woman may be she cannot but be benefited by taking Dr. Pierce's Favorite Prescription to prepare for the event. It makes childbirth easy and often almost painless.

DR. PIERCE'S FAVORITE PRESCRIPTION is a powerful, invigorating tonic. It imparts strength to the whole system and to the womb and its appendages in particular. For overworked "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appertizing cordial and restorative tonic.

A STRENGTHENING NERVINE.

"Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, prostration, neuralgia, hysteria, spasms, chorea, or St. Vitus's dance, and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the womb. It induces refreshing sleep and relieves mental anxiety and despondency.

A SCIENTIFIC MEDICINE.

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate organism. It is purely vegetable in its composition and perfectly harmless in its effects *in any condition of the system*. For morning sickness or nausea, weak stomach, indigestion, dyspepsia and kindred symptoms, its use will prove very beneficial.

CURES OBSTINATE CASES.

"Favorite Prescription" is a positive cure for the most complicated and obstinate cases of leucorrhea, excessive flowing, painful menstruation, unnatural suppressions and irregularities, prolapsus or falling of the womb, weak back, "female weakness," anteversion, retroversion, bearing-down sensations, chronic congestion, inflammation and ulceration of the womb, inflammation, pain and tenderness of the ovaries, accompanied with "internal heat."

HOW TO LOOK BEAUTIFUL.

Young women or matrons should not allow themselves to look sallow and wrinkled because of those pains and weaknesses which become chronic and are the result of colds, tight lacing, and the imprudent care of the womanly system. Many a woman would look beautiful, have healthy color and bright eyes if it were not for those drains on her strength and those weaknesses which come all too frequently and make her life miserable. There is a ready-to-use Prescription, used a great many years by Dr. R. V. Pierce in his large practice as a Specialist in women's diseases, which is not like the many "patent medicines" on the market, as it contains neither alcohol nor any narcotic, or other harmful drug. It is purely vegetable. It is known as Dr. Pierce's Favorite Prescription and is sold by druggists.

DR. PIERCE'S PLEASANT PELLETS

cure biliousness, sick and bilious headache, dizziness, costiveness, or constipation of the bowels, loss of appetite, coated tongue, sour stomach, windy belchings, "heartburn," pain and distress after eating, and kindred derangements of the liver, stomach and bowels.

Persons subjected to any of these troubles should never be without a vial of the "Pleasant Pellets" at hand. In proof of their superior excellence it can truthfully be said that they are always adopted as a household remedy after the first trial.

One little "Pellet" is a laxative, two are cathartic. They regulate, invigorate and cleanse the liver, stomach and bowels. As a "dinner pill," to promote digestion, take one each day. To relieve the distress arising from overeating, nothing equals one of these little "Pellets." They're tiny, sugar-coated, anti-bilious granules, scarcely larger than mustard seeds.

HEALTH AND HAPPINESS.

How to live in health and happiness, is the general theme of Dr. Pierce's Common Sense Medical Adviser. This great work on medicine and hygiene, containing over 1000 pages and more than 700 illustrations, is sent free on receipt of stamps to pay expense of mailing *only*. Send 31 one-cent stamps for the cloth-bound volume, or only 21 stamps for the book in paper covers.

DEATH-TO-DIRT

The preparation that has made the Capitol Cleaning Co. famous now offered to the public, on trial,

FREE

For all kinds of cleaning it will actually do the work **50 per cent easier, quicker** and **better** than any other known preparation. Death-to-Dirt contains no injurious chemicals and positively will not injure the most delicate fabrics nor the most sensitive hands.

It Is Cheap, costing **less than 2 cts.** a pound. Every family can make their own supply just as needed. It is only neccessary to **know how.**

The Formula for Making is now for the first time, offered for sale. The price of the Formula is **One Dollar.** It is sold only on agreement that it is for the **sole** use of purchaser and his or her family. They are not transferrable and they can only be procured through our regular authorized agents or direct from us.

FREE TRIAL Order a Formula today, make a batch of **Death-to-Dirt** in your own house—try it thoroughly. **If not entirely satisfactory return the Formula to us.** We know it cannot fail. After you have become convinced of its merit **we want you to act as Agent** in your town or county. **Liberal commission allowed.** If interested write for terms when remitting for the Formula.

Send ten cents in stamps as a guarantee of good faith with the understanding that you will not make known the Formula outside your own family and we will at once issue a Formula to you. If it is satisfactory send 90c more. If not, return Formula and we will send back your dime. Full printed instructions and particulars sent with each order.

THE CAPITOL CLEANING CO. 433 N. Illinois St., Indianapolis, Ind.

on evidence of charter and the payment of an admission fee of ten cents per capita for the entire membership of the local union of said county.

Officers and Election.

The officers of state unions and their election shall be the same as those provided for local unions, except that the official term shall be one year, and the annual election shall take place at the first meeting in July of each year.

Regular Meetings.

The regular meetings of state unions shall be held semi-annually, in January and July of each year. Immediately after the meeting in January of each year the secretary of the state union shall send to the secretary of the National Union a carefully compiled statistical account of the work of the previous year, to wit: The number of county unions in the state, the number of new county unions organized during the year, together with such other information as may be at any time called for by the National Union.

Work of State Unions.

State unions are charged with the general supervision of the work of the society in their respective states, and they are, therefore, expected to complete and maintain the organization therein. It shall be their duty to take up all the duties coming under the head of State Unions and shall elect delegates to the National Union at their meetings in July.

ARTICLE VII.

National Union.

The National Union of the American Society of Equity is the supreme head of the organization, and it shall consist of its officers (including the Board of Directors), its standing committees and representatives from county and state local unions. Each local union shall be entitled to one representative in the annual meeting of the National Union. Each county union shall be entitled to one representative for the county at large, and to an additional representative for each two hundred members in the county. Each State Union shall have one representative for each 500 members of the society in the state, said representatives being expected to represent every material agricultural interest in the country, including grain, live stock, dairy, fruit, garden products, poultry, etc.

Meeting.

The National Union shall meet once each year at a time and place to be previously determined.

Officers.

The officers of the National Union shall be a President, a Vice President, a Secretary, a Treasurer, a National Organizer, and four Directors, and may have committees representing all the crops and agricultural interests of the United States. Provided that any number of special vice presidents may be chosen that the National Union may deem conducive to the needs of the society.

The officers of the National Union, including the Directors, shall be elected at the annual meeting by ballot or (in case of but one candidate for any office) by acclamation, for a term of one year, or until their successors are elected and qualified. The several standing committees shall be appointed at the annual meeting, likewise, for a term of one year, or until they shall have reported at the next annual meeting.

The Board of Directors shall consist of the president, secretary, treasurer, and the four elected directors. They will constitute the executive board of the society.

DUTIES OF OFFICERS.

The duties of the officers of the National Union, aside from those special duties that may now or hereafter be required of them, shall be the same as usually devolve upon such officers respectively. The president shall have general supervision of the work of the society, and may perform any other acts and duties that properly devolve upon an executive officer.

The Vice-President.

Shall assist the president in the discharge of his duties when called upon, and in the president's absence, or incapacity for any cause, he shall perform the duties of that station.

The Secretary.

Shall keep a careful record of all the proceedings of the National Union, whether in annual meeting or acting through its officers or board of directors. He shall, with the president, sign all charters and commissions issued by the National Union, and attach the seal thereto, and see that the same are promptly transmitted to the proper recipients. He shall receive and receipt for all moneys transmitted or paid to the National Union, appportion the same to the several funds as herein provided for, and in a book or books kept for that purpose, make due entry thereof, and turn the same over to the treasurer with a statement, showing the amounts belonging to each fund, and take a receipt therefor. Before entering upon his duties the secretary shall give bond in such sum as may be determined from time to time by the board of directors of the National Union, payable to "The National Union of the American Society of Equity" for the use of the members thereof, conditioned upon the faithful discharge of his duties, which bond shall be approved by and held in the custody of the Board of Directors. At the close of his term of office he shall promptly turn over to his successor, when qualified, all books, moneys, papers, records, supplies and all other things belonging to the American Society of Equity, that may be in his possession as such secretary.

The Treasurer

Shall receive and receipt for all moneys belonging to The American Society of Equity, keep a careful account thereof, each fund separate as herein provided, and shall pay out the same only on warrants signed by the president and attested by the secretary. Before entering upon the discharge of his duties he shall give bond in such sum as may from time to time be fixed by the Board of Directors or the National Union, made payable to "The National Union of The American Society of Equity" for the use of the members thereof, which bond shall be approved by and remain in the custody of the Board of Directors. He shall make an itemized report of receipts and expenditures, showing the financial condition of the society at the annual meetings of the National Union or at any other time when requested to do so by the Board of Directors, and at the close of his term of office, or at its termination for any other proper cause, he shall turn over to his successor in offce, when qualified, all moneys, books, papers and other property belonging to said society that may be in his custody as such treasurer.

The National Organizer

Shall have charge of the general work of organization under the direction of the president or the Board of Directors.

Official Salaries.

The President of this society shall be paid $1000.00 per annum and all necessary traveling expenses while in

A $20 Watch for $5.45

These figures tell exactly what we are doing—selling a $20.00 watch for **$5.45.** We don't claim that this is a $40.00 watch or a $50.00 watch, but it is a **$20.00 watch.** A leading watch manufacturer, being hard pressed for ready cash, recently sold us 100,000 watches—watches actually built to retail at $20.00. There is no doubt that we could wholesale them to dealers for $12.00 or $13.00, but this would involve a great amount of labor, time and expense. In the end our profit would be little more than it is at selling the watch direct to the consumer at $5.45. **The Evington Watch,** which we offer at **$5.45** is an im. **21 jeweled,** finely balanced and perfectly adjusted movement. It has specially selected jewels, dust band, patent regulator, enameled dial, jeweled compensation balance, **double hunting case, genuine gold-laid** and handsomely engraved. Each watch is thoroughly timed, tested and regulated, before leaving the factory and both the case and movement are **guaranteed for 25 years.**

Clip out this advertisement and mail it to us to-day with your name, postoffice address and nearest express office. Tell us whether you want a lady's or gent's watch and we will send the watch to your express office at once. If it **satisfies** you, after a careful examination, pay the express agent $5.45 and express charges and the watch is yours, but if it doesn't please you return it to us at **our expense.**

A 25-Year Guarantee will be placed in the front case of the watch we send you and to the first 10,000 customers we will send a beautiful gold-laid watch chain, Free. **We refer to the** First National Bank of Chicago, Capital $10,000,000.

All other officers and members of the Board of Directors not already provided for, shall receive for their services $3.00 per day while in actual performance of their official duties, together with traveling expenses in connection with meeting of said Board.

ARTICLE VIII.

Powers Conferred.

County and local unions are given full power in the management of their own affairs, and are expected to be vigilant in carrying out the purposes of the society, and securing benefits to their members, by co-operation in all practical and profitable ways. They are the guardians of the society in their respective jurisdictions, are expected to build up and maintain the organization to its greatest possible strength, and they are hereby granted all necessary powers to accomplish these desirable ends. They may, by vote of their members, raise sufficient revenue to meet their necessary expenses and accomplish such purposes as they may legitimately undertake in the line of the objects of the society, but on all questions of levying per capita assessments or making appropriations, full and free discussion must be had, with due regard to the rights of all the members, but the right of majority rule must be recognized.

State Unions shall have the general charge of organization in their respective states, and are entitled to the full co-operation of all local and county unions and of the entire organization.

ARTICLE IX.

Organizers.

The National Organizer is the head of the organization force. In addition to the national organizer the president may appoint and commission organizers on such terms and conditions as he may from time to time determine with the approval of the board of directors.

ARTICLE X.

General Provisions.

1. The members of this society are expected to extend fraternal care to one another in sickness, misfortune or distress, and to their families in bereavement, but it is a cardinal principal that "He that will not work, neither shall he eat." Industrious habits are as important a qualification as any other, and while we advocate the principles of benevolence and charity, we do not require the industrious and provident to lightly bestow their substance upon the shiftless and improvident.

2. Members should favor each other in their business relations, and they should never go to law over their differences until all other means of agreement and settlement have been exhausted. In all such cases the society recommends arbitration.

3. Partisan and sectarian discussions in the meetings of the unions are prohibited, and members are under no obligation to support each other for political office because of such membership.

4. Due decorum must be observed in all meetings, and presiding officers are given ample power to enforce order. Cushing's and Roberts' Manuals are held as authorities in parliamentary rules and usage.

5. Every effort should be made to encourage young persons to take part in the exercises, and all should regard the meetings as schools of progress and advancement. The members are enjoined to faithfully attend the meetings, and to spare no pains to make them profitable and interesting.

6. Co-operation is the great means by which we are to overcome the evil effects of hurtful combinations, and members are urged to avail themselves of every opportunity for profitable co-operation with each other, but we should never let this purpose breed a spirit of antagonism between legitimate local interests. Farming is a business, and farmers should not antagonize other legitimate and proper business interests.

7. Controlled marketing is the means in our hands for compelling equitable prices for all products, and members should hold it their most sacred duty to adhere strictly to that principle and demand that their neighbors do the same even if not members. This will each strengthen all. Adherence to this principle is the test of good membership, and all are expected to direct their best efforts thereto.

8. The emblem of The American Society of Equity is a figure of a man bearing aloft in his right hand an equally poised balance with the word, "Price" on the beam, with "production" and "consumption" on the pans, and is symbolic of price being on an equality with production and consumption. On the left arm is a sheaf of wheat and reap hook, representing the farmer's calling, all is within a circle, while the words "The American Society of Equity," above, and "To secure profitable prices for farm products" below complete the seal. The official seal of the National Union is the emblem with the word "seal" added.

The seal of a county or local union must contain the name and number of the union and the word "seal."

The Union Label has the monogram composed of the letters A. S. of E. surrounded by the name of the society for a center piece, enclosed by the band of fellowship in a protected field, bearing the words "National Union" above and "American Farmers" below. On the arms, stretched out, as to take in the world, is "Union Label."

9. Up-to-Date Farming, published at the headquarters of the society, is the official paper of The American Society of Equity, and it is furnished to each regular member and member at large at the expense of the National Union as long as he or she is in good standing.

10. This constitution and laws may be altered or amended at any annual meeting of the National Union, but proposed alterations and amendments shall not be finally acted upon on the day of introduction.

The motion was made that the Constitution and By-laws be adopted as a whole, as each section had been passed on as considered.

Carried.

Mr. Dunn moves that the new Constitution and By-laws go into effect at once.

Carried.

Next was the election of officers with the following results:

Officers for 1905-06.

President—J. A. Everitt, Indianapolis, Indiana.

Vice President—J. B. Whiting, Interlaken, N. Y.

Secretary—M. Wes. Tubbs, Indianapolis, Indiana.

Treasurer—Andrew J. Smith, Indianapolis, Indiana.

Directors—President, Secretary and Treasurer (ex-officio) also W. C. Webber, Rochester, Minn.; C. N. Stacy, Amelia Ch., Va.; C. O. Drayton, Greenville, Ill.; Dr. W. C. Ballinger, Royal, Ala.

Report of Committee on Equity Press. Gentlemen:

This body having decided to own its official organ, therefore, we, your committee, recommend that steps be taken immediately to purchase and install press and necessary equipments to the end that this organization may be fully equipped to herald forth to the world the grand truth of controlled marketing, and we further recommend that there be one assessment made on each member of the society of 25 cents and that each member of this body be a committee to wait upon its respective union or unions setting forth the necessity of this important move; excusing all who have heretofore donated to this fund.

Respectfully submitted: C. C. Billing, chairman, Wisconsin; Julius Philips, Missouri; A. C. Shafer, Nebraska; D. B. Greathouse, Kentucky; J. T. Paterson, Arkansas.

Mr. Crawley made the motion that this report be accepted and the committee discharged.

Carried.

Report of Committee on Resolutions.

Mr. President and Gentlemen of the Convention:

We, your committee on resolutions report the resolutions which I, as chairman, will proceed to read:

RESOLUTIONS.

Our Foreign Markets.

The following resolutions were passed by The American Society of Equity at its Annual Meeting at Indianapolis, Ind., Oct. 25, 1905, Delegates representing the organized farmers of nineteen states and territories being in attendance:

Whereas, The agricultural possibilities of the United States in line of production of grain, meat, cotton, fruit, tobacco, etc., are practically unlimited under intelligent development and with good prices maintained; and

Whereas, It is of the first importance that we should have the markets of the world in all countries where the home farmers are not able to produce enough for home consumption; and

Whereas, Foreign markets have gradually been closing against our surplus agricultural products, and new ones have not been developed as rapidly as we think will be possible with wisdom on the part of our farmers and our Congress; and

Whereas, Foreign countries, and notably the German nation, is proposing to erect even greater barriers against our agricultural products in the nature of a greatly increased tariff tax, so high, as we fear, will be prohibitive against our goods and certainly will make prices so high in that country as to greatly limit consumption; and

Whereas, We believe Congress will be powerless to treat with Germany and other foreign countries, to agree on equitable tariff taxes for those countries and which would have the desired effect in this country while our prices are subject to frequent and violent fluctuations.

Therefore be it Resolved:

First. That this convention recognizes the necessity of fair and uniformly maintained prices as the first requisite and as a basis for negotiation with any foreign country for the entry of our surplus crops.

Second. That we endorse the argument set forth in a circular entitled "The American Peril" by our president, Mr. J. A. Everitt, and believe the idea expressed therein is the correct one and should be taken as the basis for international negotiations for the extension of our export trade in farm products.

Third. That we recommend that conventions be held in every state and territory in the country, so the farmers themselves may be educated up to this new idea, and so they may co-operate to bring the conditions about that will make its accomplishment possible.

Fourth. That we urge President Roosevelt to consider this important matter from the American Society of Equity plan view-point, so that he may refer to it in his message to the next congress, also we ask the co-operation of the Department of Agriculture at Washington, tne officers of farmers' institutes and all institutions in the interest of agriculture.

Fifth. That a copy of these resolutions with a copy of "The American Peril" be sent to the President of the United States, the Secretary of Agriculture, to all officers of farmers' institutes, agricultural colleges, to all farmers' papers and to the leading secular papers of the country.

Sixth. That a sufficient number of copies of these resolutions be printed and placed in the hands of each delegate to this convention to be sent to all the papers that they are subscribers to, with the request to print.

Respectfully submitted: W. G. Scott, Minnesota; V. A. Claburn, Alabama; A. K. Fineout, Michigan; P. Anthony, Virginia; A. B. Peters, Missouri.

RESOLUTIONS.

Crop Reporting by the Dept. of Agriculture.

The following resolutions were passed by The American Society of Equity at its Annual Meeting at Indianapolis, Ind., October 23-25, 1905. Delegates representing the organized farmers in nineteen states being in attendance:

Whereas, One of the functions of the Department of Agriculture is to issue monthly crop reports or estimate of the condition and probable yield of the chief crops produced in this country; and

Whereas, These reports are based on observation made about two weeks before they are made public, which makes it possible for the conditions to have changed for better or worse; and

Whereas, Conditions may change several times and very materially after one of these reports and effect the final outcome of the crop quite contrary to the preliminary estimate; and

Whereas, These reports, if issued for any good purpose, should be in the interests of the farmers, but as they are always too late for the farmers to take advantage of them to decrease or increase the acreage, or if they indicate a very large or very small yield the farmers are powerless to do anything to increase or decrease their crops; and

Whereas, The reliability of these reports is questionable as regards accuracy, and as regards the final outcome of the crops can be no more than guesses; and

Whereas, These reports are eagerly awited for by speculators and do effect prices temporarily and variably—one month may be toward lower prices and the next for higher prices—thus fanning the fire of speculation, keeping legitimate business unsetled and have a tendency to affect the prices of growing crops months before they mature or the yield and condition can possibly be known; and

Whereas, They have never been known to be a benefit to farmers but they are purely in the interest of speculators:

Therefore be it Resolved:

First. That the Department of Agriculture discontinue its monthly crop reports.

Second. That it issue only one report a year, and that at a time when the crop can be accurately measured or closely estimated and after it is safe from material danger in quantity or quality.

Third. That a copy of these resolutions be sent to Hon. James Wilson, Secretary of Agriculture, to the President of the United States, to all farmers' institutes, to all farm papers and to the leading metropolitan papers of the country.

Fourth. That enough copies be printed to put in the hands of all delegates in attendance at this convention to be sent to all the newspaper they subscribe for with the request that they publish.

Respectfully submitted: W. G. Scott, Minnesota; A. B. Peters, Missouri; P. Anthony, Virginia; V. A. Claburn, Alabama; A. K. Fineout, Michigan.

RESOLUTIONS.

Gambling and Speculation in Farm Products.

The following resolutions were passed by The American Society of Equity at its Annual Meeting at Indianapolis, Ind., Oct. 23-25, 1905, delegates representing the organiged farmers in nineteen states and territories being in attendance:

Whereas, There exists in this day, in all our large cities certain institutions called Boards of Trade, which have degenerated from a commendable object of building up the city in which located, and promoting their best interests, to gambling houses that are an insult to legitimate business, constant disturbances of business, and a terrible handicap to all our farmers to secure profitable and equitable prices; and

Whereas, There are tens of thousands of small editions of boards of trade in nearly all our towns and small cities called bucket shops, which carry on the same gambling only on a smaller scale; and

Whereas, These boards of trade and bucket shops are responsible for more business failures, loss of legitimate rewards and misery to humanity, than any other sin of our age, not excepting the drink habit; and

Whereas, They are largely responsible for the frequent fluctuations in the prices of staple agricultural commodities—the price changing several times a day; and

Whereas, By these manipulations the free commerce in our agricultural products in this country and foreign countries is sometimes stifled and conditions imposed that are nothing short of calamities either to the producers, manufacturers, or consumers, or all; and

Whereas, This gambling in farm products cannot serve any good purpose to any legitimate business, but it does juggle with supply and demand, and does inestimably injure the producers of farm products, the legitimate handlers, the manufacturers and his employees, and the final consumers. Also it is a constant menace to the maintainence of our foreign markets, because foreign countries are driven in their desperation to seek other fields of production and to obtain their supplies.

Therefore, be it Resolved:

First. That this gambling in the products of the farm—our food and clothing supplies—is a national sin—a blighting, whithering curse, and it must stop.

Second. That the farmers can stop it when they are sufficiently organized, but that Congress can stop it at once by making it a crime to sell "futures" or what the seller does not possess.

Third. That we, representing the American Society of Equity, which stands for equity in all the business relations of life do demand of the next Congress that gambling in all farm products be killed dead, never more to rise and cast its blight over our fair land.

Fourth. That a copy of these resolutions be sent to the President of the United States with the recommendation that he refer favorably to them in his Annual Message to Congress; to Congress; to the Secretary of Agriculture; to all farm papers and to the leading metropolitan papers of the country.

Fifth. That a sufficient number of copies of these resolutions be printed and placed in the hands of delegates to this convention, to be sent to all the papers they are subscribers to with the request to print. The penalty for failure to print or to aid in the suppression of the crime of gambling in farm products being cancellation of subscription to said paper.

Respectfully submitted: W. G. Scott, Minnesota; W. A. Claburn, Alabama; A. K. Fineout, Michigan; A. B. Peters, Missouri; P. Anthony, Virginia.

(Report of Annual Meeting will continue in Dec. 1st No.)

MENTION THIS PAPER

When you write to advertisers. They want to know in what paper their announcement was seen.

This Washer Must Pay for Itself.

A MAN tried to sell me a horse, once. He said it was a fine horse and had nothing the matter with it. I wanted a fine horse. But, I didn't know anything about horses much. And, I didn't know the man very well either.

So I told him I wanted to try the horse for a month. He said "all right, but pay me first, and I'll give back your money if the horse isn't all right."

Well, I didn't like that. I was afraid the horse wasn't "all right" and that I might have to whistle for my money if I once parted with it. So I didn't buy the horse although I wanted it badly. Now this set me thinking.

You see I make Washing Machines—the "1900 Washer."

And, I said to myself, lots of people may think about my Washing Machines as I thought about the horse, and about the man who owned it.

But, I'd never know, because they wouldn't write and tell me. You see I sell all my Washing Machines by mail. (I sold 200,000 that way already—two million dollars' worth.)

So, thought I, it's only fair enough to let people try my Washing Machines for a month, before they pay for them, just as I wanted to try the horse.

Now I know what our "1900 Washer" will do. I know it will wash clothes, without wearing them, in less than half the time they can be washed by hand, or by any other machine.

When I say half the time I mean half—not a little quicker, but twice as quick.

I know it will wash a tub full of very dirty clothes in Six minutes. I know no other machine ever invented can do that, in less than 12 minutes, without wearing out the clothes.

I'm in the Washing Machine business for Keeps. That's why I know these things so surely. Because I have to know them, and there isn't a Washing Machine made that I haven't seen and studied.

Our "1900 Washer" does the work so easy that a child can run it almost as well as a strong woman. And, it don't wear the clothes, nor tray edges, nor break buttons, the way all other washing machines do.

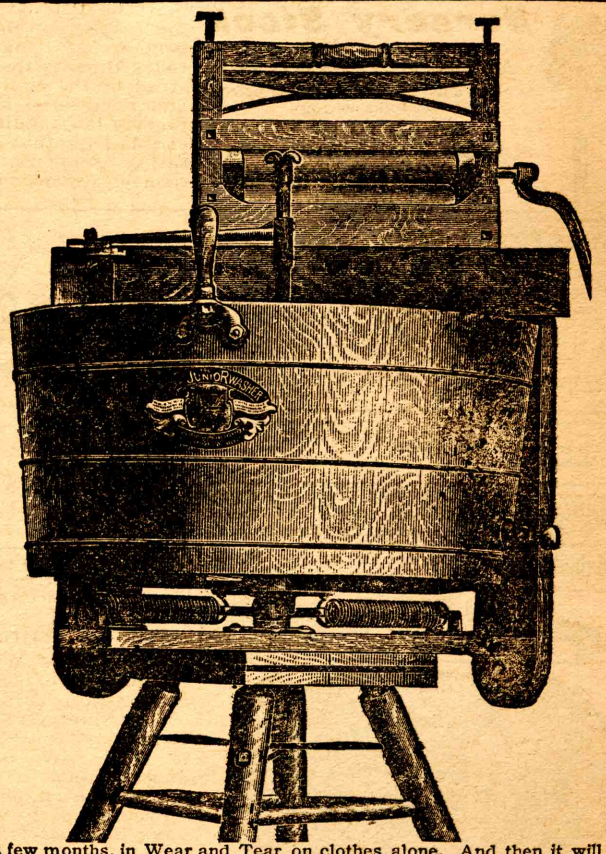
It just drives soapy water clear through the threads of the clothes like a Force Pump might.

If people only knew how much hard work the "1900 Washer" saves every week, for 10 years,—and how much longer their clothes would wear, they would fall over each other trying to buy it.

So said I, to myself, I'll just do with my "1900 Washer" what I wanted the man to do with the horse. Only, I won't wait for people to ask me. I'll offer to do it first, and I'll "make good" the offer every time. That's how I sold 200,000 Washers.

I will send any reliable person, a "1900" Washer on a full month's free trial! I'll pay the freight out of my own pocket. And if you don't want the machine after you've used it a month, I'll take it back and pay the freight that way, too. Surely that's fair enough, isn't it?

Doesn't it prove that the "1900 Washer" must be all that I say it is? How could I make anything out of such a deal as that, if I hadn't the finest thing that ever happened, for Washing Clothes,—the quickest, easiest and handiest Washer on Earth. It will save its whole cost in



a few months, in Wear and Tear on clothes alone. And then it will save 50 cents to 75 cents a week over that in Washerwoman's wages. If you keep the machine, after a month's trial, I'll let you pay for it out of what it saves you. If it saves you 60c a week send me 50c a week, 'till paid for. I'll take that cheerfully, and I'll wait for my money until the machine itself earns the balance.

Now, don't be suspicious. I'm making you a simple, straightforward offer, that you can't risk anything on anyhow. I'm willing to do all the risking myself! Drop me a line today and let me send you a book about the "1900 Washer," that washes Clothes in 6 minutes. Or, I'll send the machine on to you, a reliable person, if you say so, and take all the risk myself. Address me this way,—R. F. Bieber, Gen. Mgr. of "1900 Washer Co.," 948 Henry St,, Binghamton, N. Y., or 355 Yonge St., Toronto, Canada. Don't delay, write me a post card now, while you think of it.

PRODUCTION AND MARKETING

Farm and Other Help

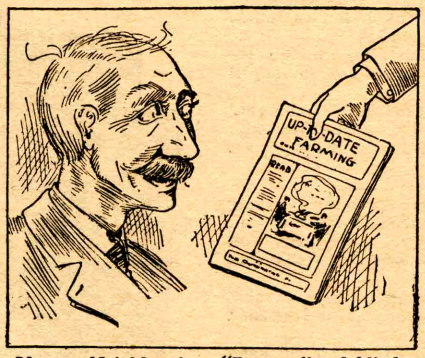
A fact that is clear to any observing person is, that the present day help that can be obtained whether on the farm, in the factory or store, or in the home is far below the quality obtainable several years ago. Therefore, not withstanding the difficulty of getting help and the fact that wages are much higher, the returns received are much less.

This is a matter of alarming importance, and indicates that there is something radically wrong in the system that is governing labor in America. While we may admit all the contentions of organiezd labor for shorter hours and greater pay, as just, yet we cannot agree that when imposing these two conditions they shall impose another one even more onerous, that of ineficient service.

Any employer will be willing to pay more wages when he knows he gets better service, or grant shorter hours if the employee, by bringing superior intelligence and skill and by putting forth greater effort keeps up, or increases the results. But, when the conditions are as at present, viz.: shorter hours, more pay, less results in quantity and quality, then a strife must come between employer and employee.

The exasperating inefficiency of laborers that can be secured on the farms prevents many farmers from carrying out their plans as they would like, and condemns them to be present when all the work is being done on the penalty of it being illy done.

Is there a remedy? Organized labor says the wage is a fixed quantity for a fixed time regardless of the service rendered. Probably every employer, when he spoke about the results accomplished, has had the answer hurled in his ears "Well, I was here all day," as though he must pay for the workman's time rather than for results. Unorganized labor takes its cue from the organized so there it is. As long as a man entertains the idea that he must be paid for his time instead of for results nothing better can be expected. As long as organized labor takes time as the basis for reward instead of the equitable basis—efficiency and results—so long will there be no remedy but conditions will grow worse. eLt us hope that a more sane basis for rating compensation will be adopted soon by organized labor.



If your Neighbor is a "Dumper" and blind to his own interest try "Up-to-Date Farming" on him. It will open his eyes.

Automobiles

Honest, now, do you think the automobiles have come to stay or to go away again, because they are dangerous on country roads? They have come to stay and will run always on all public roads. We cannot help ourselves, hence what's the use of wasting time. money and energy fighting them.

Progress is onward. You would not have it otherwise; now would you? It will be only a little while until the farmers will be riding in automobiles for pleasures. Auto cars will be hauling their produce to market and auto motors will be doing their farm work.

Let us not try to stay the march of progress. If we do, we will surely be swept aside in the end by its irresistible power. Rather let us concentrate, through organized effort, the farmer power to secure wise laws governing the speed of automobiles on our country roads and define the duties of the drivers or owners of them. In time the country horse will get over their fear and there will be no more danger than on the city streets. The more automobiles that travel the country roads the quicker this time will come.

The Minimum Price of Corn

Our readers will note that three prices were made on corn. It was the same way last year. The first price until Jan. 1, 45 cents contemplates the sale with the minimum amount of handling and with the sap that will be in the grain and cobs during this period. The second period, January 1 to April 1, 50 cents, is fair, because the crop will have lost in weight and cost additional to store and market. While the third price 55c, from April 1 to next crop is fully justified by the wastage that ordinarily occurs.

We confidently expect these minimum prices to be realized. They are equitable and will prevail if farmers will have it so.

Crops Overestimated

Usually crops are overestimated rather than underestimated. Even now, farmers who had reported their corn as promising to yield so as to make an average over the country of 40 bushels per acre are finding on coming to gather it, that the old average of about 28 bushels is likely to prevail. All the corn that has been raised will be needed, hence there is no need to rush it to market.

Marketing Potatoes

It is surprising how many farm papers advise marketing potatoes this fall at the best price that can be obtained rather than hold until winter or spring. This is because of the lower price last spring. But suppose all had marketed last fall, what price would they have brought? Or if they take such advice now what price will prevail?

Such advice is never good. We care not what the price in the fall nor what the size of the crop. We leave it to the judgment of our intelligent readers if we are not right. What potato growers need more than any other class is a wise distribution of their crop to all markets, so all will have enough. Then with reasonable control of marketing this country would consume the largest potato crop ever produced and pay a profitable price for them.

Certain large operators in Chicago when they want to realize a big profit on their stock have been known to contract all the refrigerator cars, fill them with potatoes and keep them standing on side tracks. Thus they prevented further shipments and held up the consumers by controlling the supplies on the market. This same game is worked in other cities.

Root Crops

Roots have a high feeding value and should be more generally grown. The U. S. farmers have scarcely begun this industry, while in Canada and all European countries they are among the chief crops. Roots supply the place in winter that grass occupies in the summer rations and no person will deny that grass or green feed for cattle, horses, sheep and hogs, is almost indispensable as a summer feed.

Of course it is too late to arrange for a supply now, but this hint is given to secure what you may have and put them up in available shape for winter use.

The Hog of Today

(Copyrighted)

There is an ancient superstition that the Hog is a filthy animal, hardly fit for food, but I dare make the assertion that it is only since man has become civilized that the hog has been degraded and his name employed as a synonym for all uncleanliness. Records of the hog as a meat producer date back at least 2500 years, and in later times he was raised and herded in the forests of England, from which country nearly all the fine breeds were imported. If you urge as argument against the hog the Jews, the oldest race on earth, have since time immemorial disposed him as too nasty for the table, I must remind you that, as Desraell said, the Jews were civilized when the Britons were barbarous in the forests of England and probably King Solomon's pig sty was on a par in point of dirt with the sty of our day—for as I said before, in proportion as man is civilized into cleanliness, he degrades his swine into filthiness. But to come up to the present time, there is no stock which has changed so greatly in the last half century as the hog, and the change means principally deterioration. There is no effect without a cause and it behooves the breeder to discover what is the reason of this deterioration in his swine.

Much attention is paid to breed and much to feed and that is well for the ultimatum of the hog is the pork-barrel—but somewhat must be lacking somewhere to account for the change, unless, indeed we are to suppose that the hog is on the high road to extinction. But this last is too hypothetical a supposition and may be dismissed without notice.

Looking over the history of the hog for fifty years, we shall see sufficient cause however, and need look no further. Fifty years ago the hog was accredited with as many lives as the cat and it was a common saying that you could not kill a hog by abuse. Old breeders of that period say they have seen them starved to skin and bone, torn almost limb from limb by dogs, their bones broken and bodies deformed and left in that condition to provide for themselves or die. They seldom died and a dead hog, except in the slaughter pen was a rare sight. A A journey of three or four days on foot was no different and disease was unknown among them. Today the life of the hog is less tenacious than that of a canary bird. A heedless blow, rough handling, a few miles' journey on foot or a chase of forty yards and he will lay down and die he is so subject to disease that many veterinarians make disease of the hog their specialty.

There are changes in the hog and to find a plausible explanation of them we have only to compare the environments of the hog of fifty years ago with those of the hog of today.

Fifty years ago he was a "pioneer hog," sharing pioneer conditions.

A sty and trough was unknown to him. He found his own food and bed, but then he had whole sections of prairie and miles of forest in which to do it. He had his choice of all the herbage of the plains and all the nuts of the forest. It was all "beechnut bacon" in those days, and clear fresh water in abundance, he had unrestricted exercise and invariable health of a Nomadic life, asking no favors of man and receiving none. In short it was a case of "root hog, or die!" and he rooted.

What his the hog of today? Instead of limitless unfenced prairies and timberland he is happy if he has one acre in common with ten to one hundred of his kind.

There is no chance for grass to grow under the feet of so many; he never tastes herbage, his food is usually corn and swill, while he drinks from a pool in which some other hog is wallowing and stirring up the mud. The air he breathes is impure with the odor from excrement covered ground, he has no exercise—why should he frisk and sport in a contracted prison in which he is born and which he leaves only to be marketed—besides he is so fat locomotion is uncomfortable, so when he is not eating he sleeps, and consequently is weak, feverish and subject to cholera. Briefly the hog of today is regarded as a staple commodity, and the rule is and by which he is raised, "Get fat, get fat quick, and the fatter and the quicker the better.

Compare the flesh of the pioneer hog with that of the modern hog, the lean meat of the former was firm and fibrous and equalled or exceeded the fat in quantity. The fat was sold without a suggestion of flabbiness, and throughout the body there was plenty of muscle, the bone was strong and dense, while the heart was well developed and fibrous, forcing the healthy red blood through the body with strong, quick beats. The fat of the modern hog is far in excess of the lean and is "tender." That is, soft and devoid of fibre, the only sinews found in him are flabby muscles lying beside the spine in the shoulder and ham. The heart is weak, undeveloped and has not vitality enough to perform its functions properly, consequently the animal dies upon the least excitement. In fact the modern hog is afflicted with the malady or too much fat which is always a disease whether in hog or human.

To be sure, the fibrous flesh of the old style hog is not wanted by the gourmands of this age, but his vitality is sorely needed and to combine vitality with tender flesh is the desired happy medium. To accomplish this we have one suggestion to offer. It is not our hog, but our handling which is at fault. Therefore reform our handling—the Berkshires, Chester Whites, Poland Chinas and Duroc Jerseys are all right in themselves what they need is tenacity. To get this give them more freedom, a variety of food, especially herbage. and if possible let them hustle on the prairie for the latter in a grassy field.

Since prairies cannot be had, let them always have plenty of clear, fresh diver. Never feed them on sour or putrid food. It kills thousands of pigs annually, and may with better results be used for fertilizing and feed seldom and scantily on new corn, which kills more hogs than cholera. Ground barley, oats, wheat, corn, peas, oil cake, meal, clover and rye are all good foods for variety.

I do not offer these suggestions as a panaca for all hog ills, for you must remember that the hog has inherited fifty years of multiplied ills. All I wish to impress upon the reader is that he must not make hot house plants of his swine with knee deep filth for soil, and they will pay him so well, that they may indeed become veritable "mortgage lifters."

The long, ungainly sow bred to a smooth. shapely sire usually brings the most and best pigs.

Keep the hog yard from becoming foul and you prevent disease. Cleaning up after the disease comes is not wise economy.

Provide warm quarters for all animals, Just think of the suffering of the poor dumb brutes confined in a pen or shed little better than outdoors, or left to roam and hunt their own shelter, on cold, stormy days and night with the thermometer at zero. Suppose such prospects were ahead this winter for the man who has dominion over the beasts would he not hustle to build him a comfortable shelter. The merciful man will do the same for his stock.

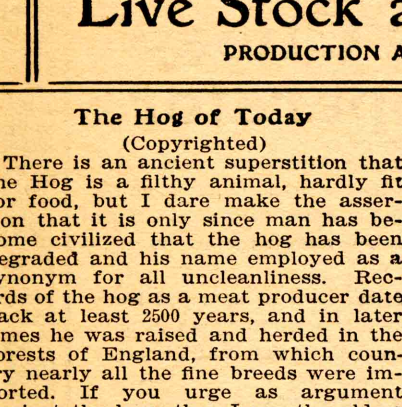
As the Receipts, so Are the Prices

The October business at the Indianapolis stock yards affords a good illustration of the effect of supply on price. Also from this it can be deduced, that, if, the supply can be regulated the price can be also regulated or made.

The following table will show the course of the market, but for a complete understanding, why the price dropped 42½ cents for the month, it must be known that the receipts for this month were 58,000 head more than the same month a year ago or an increase of about 33 1-3 per cent. In other words the buyers have taxed the sellers about 10 per cent because they persisted in sending more hogs to market than they really needed. Study the table:

October.	Receipts.	Price.	October.	Receipts.	Price.	October.	Receipts.	Price.
			12	7500	5.65			
2	2500	5.67½	13	9000	565	23	2500	5.40
3	7500	5.67½	14	5500	5.57½	24	7500	5.45
4	8000	5.60	16	2500	5.50	25	8500	5.30
5	6500	5.75	17	7500	5.50	26	9500	5.30
6	6500	5.75	18	8000	5.50	27	10178	5.20
7	6000	5.65	19	6500	5.50	28	6000	5.20
9	2000	5.65	20	8500	5.45	30	2500	5.30
10	7000	5.65	21	6000	5.45	31	9000	5.25
11	7000	5.60						

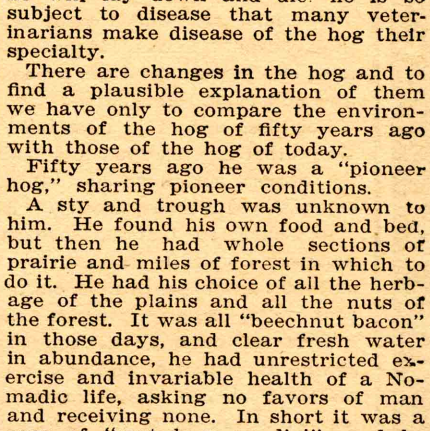
Total, 169,500. Loss for month 42½c. The normal market in Indianapolis will take from 5,000 to 7,000 hogs and prices can be maintained on this basis,



Washed in 1 minute

A Big Difference

One Minute's Washing as compared to at least fifteen. Wouldn't you like to save at least fourteen minutes twice a day? **One minute** with a cloth and brush cleans the absolutely simple Sharples Dairy Tubular Cream Separator bowl shown in the upper picture. It takes fifteen minutes to half an hour with a cloth and something to dig out dents, grooves, corners and holes to clean other bowls—one of which is shown in lower picture.



Washed in 15 to 30 minutes

Count the pieces — notice the difference—and you'll understand why the one who has to do the cleaning prefers the simple Sharples Tubular.

There are other advantages just as much in favor of the Tubular. Write today for catalog V-136 -it tells you all about the gain, use, and choice of a separator.

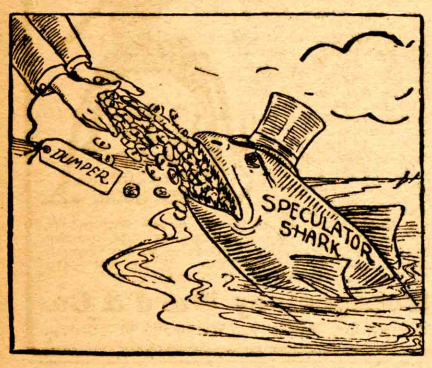
but when the receipts run from 7,000 to over 10,000 daily the demand is overwhelmed and whoever takes the surplus does so at price of his making.

Two things are evident. First, marketing must be controlled. Second, a system of marketing must be put in operation that will know the demand on all markets so the supply may be wisely distributed over all and not too much to some. These things can be done. They are working out and every interested person should make every effort to further the work.



Need of a Head

We see in various live stock papers reports of stockmen going to market centers to buy "feeders." Of course, this means extra transportation in many cases and always commissions that might be saved if the live stock interests had its own directing head and bureau of information.

The Live Stock Journal commenting on this says: "There should be nothing strange in the fact that cattle feeders living below the quarantine line should come to Kansas City and buy stockers and feeders to replenish their pastures."

But it is strange, when a correct understanding is had, and besides it is an extremely bad business policy for either the seller or buyer of both.

Let us see.

In the aforesaid paper we find the following which needs no strengthening to prove the force of our statement in first paragraph:

"In the last two weeks several cattlemen in the Indian Territory came to Kansas City and made heavy purchases of cattle that originated within a short distance from where they will be returned and fed. This fact attracted some attention and caused more or less comment. The men who purchased the cattle talked freely of the venture and after their explanation it was perfectly plain why they came to this market for supplies."

While it is the logical thing for the eastern feeder to go to the Western markets for his lean cattle, it is a bad system that makes it possible for the Western feeder to go East and buy his cattle and ship them back to near the original point, to feed. This covers two railroad charges and a commission that comes out of the price the grower should have.

Let us see how this comes about:

We will say stockman B. has a lot of lean cattle he wants to sell. He asks a fair price for them at home, but finds sales slow and sends them to Kansas City or some other central market. When they arrive there he has surrendered his independence and the cattle are controlled by commission men. It is expensive to keep them, also impractical to return them home. Consequently he is at the mercy of the buyers.

The buyers on the other hand have learned that they can go to the large markets and secure their supplies cheaper, including two freights and a commission than they would be asked at home. As evidence, we quote as follows from the same paper:

"J. M. Beatty, of Talala, I. T., who made the last shipment of thin cattle below the quarantine line, in discussing his purchase, said: The fact of the matter is I can make a steer purchase of this kind right on the Kansas City market, pay commission, freight and other expenses and save money. This is the place to buy cattle, and I am saving money by coming here. The steers have been shipped out of my country pretty closely, and what are there are held at higher prices than I can afford to pay. Besides, in coming here the buyer has the advantage of variety to pick from."

And the following:

"A similar condition is facing the ranchmen in Colorado, at least in certain parts of the State. Last week C. C. Wolver, of Sheridan Lake, Colo., came in with a consgniment of stock and while waiting for it to be sold purchased a big string of stockers which were shipped back to his home. Mr. Wolver discovered that he could do better here, even though he had to pay heavy freight and commission charges, than at home and jumped at the proposition. For years feeders in Ohio, Illinois and Indiana have found it to great advantage to come to Kansas City for their supplies, and it will not be many years before the feeders in Southern and Wetsern States will be as numerous as those from the Eastern States in the fall of the year."

What do the stockmen think of such conditions? What is one person's gain is the other person's loss, besides the sellers of lean cattle are contributing enormous sums to the railroad companies and commission men that could largely be saved to them in the price of their stock if they would get together and do business systematically through a head as all other great industries in the country have.

The A. S. of E. offers the remedy. The plan of the A. S. of E. is sufficient and is the only practical one. It is up to the stockmen, however, to organize and work the plan out. Will they, or will they continue contributing ten hundred times as much to middlemen and railroads as their machine or marketing would cost to build and operate?

Beware of "Cheap" Cream Separators

There was never so much talk of "cheap" separators. It may well be said that the **DE LAVAL** has its numerous imitators on the run, and that most of them are nearing the end of their race. All are offering cut after cut in prices, and making most desperate efforts to unload machines at any cost.

Of course you want a cheap separator. But be sure you know what cheapness means. It means more in a separator than in anything else because the use of a poor machine means WASTE every time milk is put through it.

Don't lose sight of the importance of CAPACITY, and remember always that in proportion to actual capacity the **DE LAVAL** is the cheapest separator made. In addition it SAVES its cost while others WASTE theirs, and it will last TEN TIMES as long.

Remember too that you have got to have new wearing parts for a separator, frequently for a poor one, and that most so-called "cheap" machines now offered will be off the market in a year or two. Then your "cheap" machine must go straight to the "junk heap."

There was never a better time than now to buy a good separator, as with the season of high butter prices ahead it will half save its cost in otherwise wasted butter-fat before Spring. But don't be tempted to buy one of the "paste diamond" class that will soon be worth no more than its weight in scrap-iron, and will have WASTED instead of SAVED its cost while you did use it.

The best is more truly the cheapest in cream separators than in anything else. Send to-day for catalogue and name of nearest local agent.

Prompt Deliveries from 18 Distributing Warehouses throughout the Unit d States and Canada.

Must Have More Money

The Chicago Live Stock Exchange recently adopted what are called the National Live Stock Exchange rules. They provide for an increase in the commission for selling live stock. It is expected that Kansas City, Omaha, St. Louis, St. Joseph, St. Paul, and Sioux City will adopt the same rules and they will go into effect January 1, 1906.

Stockmen can see how easy it is for the organized handlers to increase their income. Contrast this with the difficulty or impossibility of the unorganized stockmen to get a decent return for their investment and labor.

"The Best Liniment I Ever Used"

"Send me one bottle of Absorbine as it is the best liniment I have ever used for soft bunches on horses. I used it on a splint of six years' standing, and it removed it," writes Mr. W. S. Rankin, Hillsdale, Iowa, under date of May 20, 1905. It will do the same for you. Absorbine is a pleasant remedy to use—does not blister or remove the hair and horse can be used during treatment. Price $2.00 per bottle delivered upon receipt of price by W. F. Young, P. D. F., 102 Monmouth St., Springfield, Mass.

A Mill that Sells Itself

Confidence in their machines and confidence in their customers is the secret of the success of the A. W. Straub Co., manufacturers of the old, well-known Quaker City Grinding Mills. Their method of selling speaks well for the quality and efficiency of their mills. Upon receiving a request, they send one of their grinding mills free and prepay the freight. If, after a fair trial, it proves unsatisfactory, they take it back. In other words the machine sells itself.

The thirty-ninth annual catalogue may be obtained by writing the manufacturers, A. W. Straub Co., 3737 Filbert Street, Philadelphia, or 47 South Canal Street, Chicago.

Tree Protectors

Readers will notice an advertisement of the HART PIONEER NURSERIES, Fort Scott Kans., running in this paper, regarding an improved Veneered "Tree Protector." We have seen a sample of these Protectors, and judging from the high class of testimonials they will do all that they claim of them, such as protecting trees from mice, borers, rabbits, hot winds, sun scald, etc. If any of our readers have trees or shrubs to protect, they will do well to correspond with the above firm, and get their circulars and samples.

Do You Want a Piano or Organ?

I want every home not yet in possession of an instrument to read my special piano and organ plan. There is a coupon at the bottom of the advertisement and I want to receive a thousand coupons from readers of this paper. I will send by return mail a piano and organ-buying plan that will surprise you in a dozen ways. If you want an organ I will show you how to keep half the price in your pocket. If you want a piano, I will prove to you a saving of over one hundred dollars. Whether you have ready money or not makes no difference with me. Your promise to pay me a little every now and then is all I ask of any honest home. One of my customers in Iowa wrote me a letter two weeks after he received instrument I shipped him. He says: 'If it wasn't for your easy-buying plan, I couldn't have bought an organ for my children until next spring, and they have been teasing me to get one for the last two years." You will find my advertisement in this issue. Cut coupon out and send to me today. Address J. B. Thiery, The Piano and Organ man, Milwaukee, Wis.

Anyone who has not experienced the pleasures of riding on a Bolster Spring after having become accustomed to the old jolting way, has a pleasure to look forward to. The pleasure is increased ten fold when one considers the saving of jolt to load and wagon, and strain on horses and harness. Anyone of these items will, in a short time, pay the cost of a pair of Harvey Bolster Springs, probably the best known and most satisfactoryof any. You can get them on 30 days' free trial, and will be repaid if you write to the Harvey Spring Co., 108 S. Carver Ave., Racine, Wis.

HOW Mrs. Keith Made Christmas Money

MRS. GEORGE KEITH, of Scranton, Pennsylvania, writes:

"For three years I have paid for my own clothes, bought Christmas presents for the children and earned my own spending money by representing THE LADIES' HOME JOURNAL and THE SATURDAY EVENING POST among my friends and neighbors. The prize money received each spring has been added to the fund which we are saving to buy our own home. Any mother will appreciate how much satisfaction this has given me."

IN ADDITION to paying liberally for every subscription secured this winter, we shall give

$42,000 IN EXTRA CASH PRIZES

Each month not less than $5000 will be given to 325 persons who do the best work during that month. Everything necessary will be sent on request.

UP-TO-DATE Tobacco Department

BY C. HAYES TAYLOR

CONVENTION REPORTS

[NOTE—Lack of space prevented a full report of the proceedings of the Owensboro convention in the issue of November 1. We could but give the scale of minimum prices, and the reports of the important committees. In this issue we complete the proceedings, giving them as fully as possible. Now let us go about the business of carrying out the plans of the convention with vigor.]

The tobacco growers' convention was made up of solid, substantial, representative tobacco growers. Men who have succeeded in the business, and who know from long experience the requirements of the tobacco trade. They were not theorists, nor mere enthusiasts, but earnest, determined business men who would not consider anything but practical business plans. They well know the power of the great corporations who have been purchasers of tobacco in the past and who will continue to purchase their crops in the future. They understand thoroughly the conditions confronting the average tobacco grower, and all he has to contend with. They laid their plans accordingly, and have builded a foundation that cannot be undermined.

The men who served on the committees were the pick of the convention. All were men of wide experience with tobacco, and have studied all phases of growing and marketing the crop. Being men of keen foresight and sound judgment they provided for future emergencies and conditions with a wisdom, we believe, equal to that of the founders of the United States government as embodied in our constitution. Some good men doubt the success of our movement, and some of the best men in America doubted the success of our new republic in 1776. They fear that the farmers of this country will prove faithless to their own interests and will refuse to employ their common sense and patriotism in their own behalf. But the spirit of free and progressive American manhood was incorporated in the plans and principles of the honest, earnest men who met at Owensboro last October to demand a "square deal" in the tobacco trade. And this spirit is the same that has won the victories for the common people in the past and will win victories in the years to come.

The effect of the convention has been to bring into the organization a large number of prominent growers who have been watching the movement with interest. They are now satisfied that the plans of the organization will be carried out by business men of experience and not by theorists, enthusiasts and calamity howlers. One prominent grower in Daviess county, Ky., in an open letter addressed to all tobacco growers makes a strong appeal to those not members of the organization to support the movement hereafter, and promises his own. He had not given the organization any encouragement before. Another grower whose experience and success proclaims him as a man who knows whereof he speaks, recently said: "The work done at the Owensboro convention is destined to revolutionize the tobacco business. Perhaps not in a few months, but in good time."

These statements are given to our readers to impress them with the stability of our movement and the wisdom of our plans. No man can now reasonably withhold his support, or doubt our final success when they understand that the plans adopted were formed by the best business heads in the tobacco business, who with thousands of earnest, determined tobacco growers are behind the new system. We are right in principle and reasonable in our demands. We will win.

The American Society of Equity the Great Foundation

In considering the report of the committees on plan and organization we note:

First, the recommendation that every tobacco grower should become a member of the American Society of Equity. There is good reason for this. All tobacco growers produce other crops to some extent. Their tobacco crop may fail and then their dependence for the year must fall on something else. At such time they will feel the need for profitable prices for other crops, and the American Society of Equity is the only organization with a plan for securing profitable prices on ALL the products of the soil. It is the one society for the protection and advancement of every agricultural industry.

Second, tobacco growers in one section of the country are to a certain extent interested in the prices obtained by growers in a different section for different types of tobacco may in some cases be substituted for each other and similar types are produced in sections of country widely separated. Good business demands, and perfect co-operation depends greatly in unity of action between these sections of country. The American Society of Equity will unite them and promote the co-operation that will insure success, and will enable the growers to stand together for results that would otherwise require long years of laborious effort. In this class of results we include legislative assistance, extension of markets, crop reporting, control of production, etc.

The National Tobacco Growers' Association is a branch of the American Society of Equity, but has powers of its own to make all necessary provisions for handling its own special business according to the wishes of the people interested.

The Committees

Following are the names of the men who served on the several committees, and to whom the thanks of all members are due for their excellent work which has given great credit to the convention.

COMMITTEE ON FINANCE.

S. C. Daniel, Va., chairman; C. N. Stacy, Va., secretary; H. A. Stokes, Va.; Jno. M. Rice, L. N. Robertson, T. T. Barrett, Ky.

COMMITTEE ON PLAN AND ORGANIZATION.

T. T. Barret, chairman; L. N. Robertson, S. T. Burns, Ky.; E. T. Bondurant, J. E. Robertson, Va.; D. T. Hamill, Tenn.; O. O. Lein, Wis.

COMMITTEE ON MINIMUM PRICES

D. T. Hamill, Tenn, chairman; W. C. Green, Secy.; E. E. Gay, J. H. McConnell, Ben Watson, A. H. Cardin, S. B. Robertson, J. W. Dunn, M. F. Sharp, J. E. Minnett, P. W. Foote. Geo. M. Taylor, Ky.; H. A. Stokes, J. A. Hardy, R. J. Marshall, Va.; O. O. Lein, H. E. Holmes, Stephen Haight, Wis.; E. L. Ogden, Ohio.

COMMITTEE ON CREDENTIALS.

R. J. Marshall, Va., chairman; J. B. Kittinger, J. M. Rice, Ky.

COMMITTEE ON ENROLLMENT.

Geo. M. Taylor, W. T. Barrett, Ky.

COMMITTEE ON PLACE OF MEETING.

D. T. Hamill, Tenn., chairman; R. J. Marshall, Va.; L. N. Robertson, Ky.

COMMITTEE ON NOMINATIONS.

E. T. Bondurant, Va., chairman; S. B. Lee, M. V. Carver, Ky.

COMMITTEE ON RESOLUTIONS.

J. N. Banks, Ky., chairman; D. T. Hamill, Tenn.; C. Hayes Taylor.

COMMITTEE ON OFFICIAL PAPER

P. Anthony, Va., chairman; S. T. Burns, M. J. Cox, J. H. McConnell, J. H. Burney, Ky.; H. E. Holmes, Wis.

Permanent Committees

The following permanent committees were appointed to assist in the promotion of the work during the next year:

NATIONAL EXECUTIVE COMMITTEE.

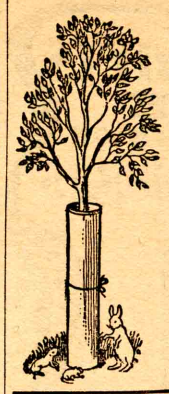
L. N. Robertson, Ky., chairman; Jno. M. Rice, David Moreland, Ky.; C. N. Stacy, W. D. Rice, Va.; D. T. Hamill, Tenn.; O. O. Lein, Wis.

COMMITTEE ON CONTRACTS.

C. N. Stacy, Va.; T. T. Barrett, Ky.; D. T. Hamill, Tenn.

COMMITTEE ON BY-LAWS.

D. T. Hamill, Tenn.



TREE PROTECTORS

75c Per 100
$5.00 Per 1000

As valuable in summer against sun-scald, hot winds, etc., as they are in winter against cold and rabbits. Recommended by all leading Orchardists and Horticultural Societies. Send for samples and testimonials. Do not wait until rabbits and mice ruin your trees. Write us today. Wholesale Nursery Catalogue now ready—Send for copy. Agents wanted everywhere.

Hart Pioneer Nurseries
Box 29, Fort Scott, Kans.

$600.00 EASILY MADE

We will start you right in the Poultry and Egg business. By our plan you can begin in a small way and easily make $600 a year at home, and have all the fresh eggs and poultry you want beside. Now is the time to begin, as eggs will be 40 cents a dozen soon. New illustrated plan, directions and Catalogue Free.

Mills' Poultry Farm, Box 223, Rose Hill, N. Y.

Order 20 pieces and when sold send us the $2.00 and we will positively send you the watch and ring; also a chain. Ladies or Gents style. ALTON WATCH Co., Dept. 11, Chicago.

SPECIAL REPORTS

Regarding conditions in various counties:

WEBSTER COUNTY, KY.—Favors pooling. Pooled 1904 crop, which was but 60 per cent. of a normal crop. Areage of 1905 reduced ten per cent of 1904 crop.

MARSHALL COUNTY, KY.—Favors pooling. Is well organized, the organization being effected in the spring and summer of 1905, therefore nothing was done in 1904. Full report will be furnished later.

GRAVES COUNTY, K.—Total crop of 1905 estimated at 14,000 acres. Of this number 10,000 acres are already pledged. Pledged 1200 hogsheads in 1904. Organization strong.

DAVIESS COUNTY, KY.—Will pool the crop of 1905. It is estimated that 3,300,000 pounds of tobacco was pooled in 1904. Total production in 1903 was 13,215,150 pounds; in 1904 this was reduced to 6,667,400 pounds. Estimated total production of dark tobacco in 1905 is 12 per cent. less than 1904 or 5,867,312 pounds. More tobacco will be pooled this year than last. It is expected that 5,000,000 pounds will be pooled.

HENDERSON COUNTY, KY.—Four million pounds were pooled in 1904, and much more will go into the pool in 1905. Henderson county has produced about 4,000,000 pounds in 1905, against 4,768,500 pounds in 1904 and 8,304,350 pounds in 1903. Ten year average production is about 10,000,000 pounds.

CHRISTIAN COUNTY, KY.—Present crop about 6,200,000 pounds, against about 7,000,000 pounds in 1904 and 11,154,400 pounds in 1903. Quality good. Fairly well organized, and favors pooling. LATER: Practically all the 1905 crop will be controlled by the Association.

CALDWELL COUNTY, KY.—Crop of 1905 will be about 1,600,000 pounds as against 1,704,515 pounds in 1904 and 4,191,210 pounds in 1903. Pooled 1,500,000 pounds in 1904 and will pool more this year. This county is solidly organized.

DANE COUNTY, WIS.—Acreage about 12,000. 1905 crop all sold but about 10 per cent. at prices averaging 10 and 2 against 7 and 2 in 1904. Acreage in 1904, about 13,000. Reduction about 7 per cent.

CHARLOTTE COUNTY, VA.—Organization only begun. No active steps were taken in 1904. Full report deferred.

SCIOTO COUNTY, OHIO.—Bright Burley belt. Have not considered pooling. Desire to hold crops on farm, and to co-operate on price. Only about 500,000 pounds of tobacco produced annually.

CLOVERPORT LOCAL UNION, NO. 3. Breckenridge County, Kentucky.—A. L. Hawkins, secretary of A. S. of E. Local Union No. 3, Cloverport, sends us the report of the crops of tobacco raised by the members of his union for the last three years:

GROWER'S NAME	1902	1903	1904
Catherine Carrol	5,800	5,000	4,670
Samuel B. Walker.....		3,000	
Thomas Jennings		1,500	
Samuel Burdett	1,300	1,000	710
Joe E. Smith.....	1,300	2,493	
Milton Hawkins		1,040	
Thomas Basham	2,500	2,700	2,600
D. E. Chapin.....	1,515	2,821	837
Silas Hawkins	2,100	1,770	1,300
Fred Hawkins	2,400	10,000	2,800
Austin Beavin	5,000	4,500	
P. W. Pate.....	10,000	7,000	3,300
Felix Beavin	5,000	3,000	4,100
J. A. Beavin.....	2,800	3,800	3,100
J. W. Smith.....	5,000	2,500	1,500
J. T. Jennings.....	6,500	5,700	7,900

L. C. Johnson.....	2,000		2,100

Total for year 1902, 66,315; year 1903, 69,374; year 1904, 38,717.

[NOTE: These special reports are of great interest and value. Each local and county union secretary is urged to make out such reports and send to headquarters.]

CONVENTION NOTES

President's Address

President Davenport delivered his annual address. He spoke for something over two hours and made an ecellent presentation of the work being done by the organization and of its purposes for the future. Extracts from his address follow:

"It is well known," he said, "that there are only certain limited sections in the United States where tobacco can be successfully grown. In each of these districts a different type prevails. The tobacco trust, some years ago, marked off the country by metes and bounds, and assigned each of its agents certain territory in which to buy. There was no competition. Prices were fixed at headquarters. * * * They would buy a few representative crops, then keep close for a month or six weeks. The farmers get anxious to sell. The agent buys the bulk of the tobacco at starvation prices.

"You ask the agent why prices are so low. He tells you it is because of overproduction. You don't know how much there is on hand anywhere except in your own community, and you can't controvert his statement.

* * * * * * *

"In the spring this agent meets you and tells you that there has been an advance in the price of tobacco, that it will be a good price next winter, that you ought to put out a large crop. You put out a big crop, keep your children out of school to help you work it, even have your wife in the field during the hot summer months, relying on the promise of that agent. When you have got it housed that agent tells you tobacco is awful low, there was so much of it raised, but being it is you he will give you $4, $4 and $1. And you had to take it.

"The new plan is simply organization. The A. S. of E. set about controlling the marketing of crops. It must also control the production. If overproduction makes low prices, underproduction must make high prices. Hold the 1905 crop of tobacco for the prices fixed by this convention. If they do not take it at that, don't put out a single plant next year.

"I have three crops," continued Mr. Davenport, "in my barns. Before I will sell it for their prices I will haul it out and dump it on the thin spots on my farm."

The speaker showed that the home consumption of tobacco is 440,000,000 pounds and the exports 350,000,000. Last year the production was 65,0,000,000, this year certainly not over 675,000,000. "We are now in position to name the prices," he said, "and if the buyers do not want to take it we will not stick out a plant next year."

Mr. Davenport said that Muhlenberg county made $30,000 last year through the organization of the A. S. of E., on three items, tobaceo, wheat and coal rights.

He then outlined the plan for handling the present crop. His plan is to district the entire tobacco growing territory, putting all territory, no matter

Mr. Edison Says:

Write for the *"Enterprising Housekeeper,"* a book of 200 choice receipts and Kitchen Helps, sent **free.**

THE ENTERPRISE MFG. CO. OF PA., 319 Dauphin St., Philadelphia, Pa.

where situated, that produces a given type of tobacco in the same district; have executive committees composed of a member from each county, and a county executive committee with one member from each magisterial district; have warehouses at points most convenient to producers; employ a competent salesman for each district, whose business it shall be to keep in touch with the markets and dispose of tobacco when authorized by the executive committee of the district; prices to be regulated by the executive committee within certain bounds prescribed by the convention; have tobacco rehandled, redried and put in Eiglish keeping order so that it can be held indefinitely if right prices are not paid shortly.

J. A. EVERITT SPEAKS

The President of The American Society of Equity made a brief address Thursday afternoon. The opera house was filled to the doors to hear the founder of the A. S. of E. expound the doctrine of controlled marketing.

President Everitt was introduced by National Organizer H. B. Sherman, who spoke of him as the one man who had set about obtaining better prices for farm products.

Mr. Everitt began by saying that he had done little for the farmers, had worked out a simple idea that many of the farmers had themselves The only difference was that he put it into operation. "There is nothing wonderful in the matter," he said. "It is simple control of the marketing of farm products, which is bound to regulate prices. It is a simple problem, so far as that goes.

"A year ago Mr. Sherman and I made a tour of Kentucky and organized several unions. That was the beginning of the effort to control the marketing of tobacco. In one year the tobacco growers have attained a higher degree of organization than any other class of farmers, and have gotten more definite results.

"The farmers are assembling this year with a definite purpose and a feeling of power to accomplish it. Probably they did not know in the past what they wanted to accomplish, certainly they did not know how to accomplish it. They know that they have the right plan now.

"But what good is the right plan if you do not put it in operation? That is what you are here for. You must perfect the organization. Do not be satisfied with a partial organization. See that every farmer is a member of the organization.

"You say that some of your neighbors will not hold their crops—will not co-operate with you. There have always been men of that class. In the revolution they were called 'Tories.' By the labor organizations they are called 'scabs.' I do not believe in harsh names, but I believe you should apply some name to your non-co-operating neighbors to which odium will attach. If you can't find a better name, call them 'dumpers.'

"When a farmer has produced any crop he is in the same position as a merchant who has put in a supply of goods for a future season or the manufacture who has a surplus stock on hand. Many merchants have not enough money to pay for their goods. They warehouse them and realize on their warehouse receipts. Farmers must do the same thing. The question of warehousing is as important a matter as can come before this convention.

* * * * * * *

"What have you been paying to find a market for your tobacco? Nothing. You dump it, somebody else finds the market. The consumer pays the bill, and he might as well pay it to you as to some one else.

* * * * * * *

"The question of minimum prices is another important one. Tobacco is a luxury. Every handler makes a good profit. The growers ought to get profitable prices. It is a delicate matter to handle, but I believe you can get high prices as easily as you can get low prices. A low price will not increase consumption, it will not decrease the price to the consumer. It will merely enable the buyer to lay up a great supply against the time of a short crop.

"The greatest danger to our plan of enforcing the payment of equitable prices is over-production. Issue orders to decrease acreage when deemed necessary. Do it through your local unions. You can command prices just in proportion to the completeness of your organization."

THE BIG PARADE

The promised parade of the tobacco growers postponed from Thursday was given very successfully, starting at 1 p. m. Friday. There were several very attractive banners and the crowd of several hundred marchers were pretty well distributed after these. The legends on the banners were as follows and in the order named: "Farmers to the Front," "Kentucky Leads the Way," "Daviess County is For Pooling First, Last and All the Time," "All States Are Welcome," "The Carolinas Are Coming," "Tennessee is With You," "Virginia Joins Hands," "Ohio Sends Her Help," "Wisconsin Demands Equity," "United We Stand, Divided We Fall," There were over seven hundred marchers.

The parade was led by ten mounted police, the Third Regiment band and Company C, in full dress uniform and military accoutrement. Capt. S. H. Ford was marshal and H. G. Overstreet was his aide.

This Will Cure You

of kidney trouble, bladder trouble, or rheumatism. Sufferers can have free treatments by writing the doctor

NO CHARGE WHATEVER IS MADE

In order that all men and women who have given up hope of ever being well again may know that now a genuine, guaranteed home cure for uric acid germ dieeases has been found by Dr. Edwin Turnock, the celebrated French-American

This has cured legions. Will it cure you? Write the doctor and see.

specialist, a free double treatment of the new cure will be sent to any reader of this publication or their friends who may be afflicted with this disease in the form of too frequent desire to urinate, weak back, prostatic trouble, Bright's disease, dropsy, diabetes, stone in the bladder, gravel, wetting the bed, swelling of the feet and ankles, sciatica, lumbago, gout and other forms of the worst kind of rheumatism, kidney trouble and bladder disease.

The doctor does not claim to cure all diseases, but he does cure the diseases he claims to cure. To prove this ask Mr. James H. McClung of Berthoud, Colo., whom he cured of Bright's disease; Mrs. Mary Furstenberg of Boody, Ill., whom he cured of diabetes; Mr. A. P. Yochum of Pittsburg, Pa,, whom he cured of rheumatic gout; Mrs. Phebe J. Brown of Kalispell, Mont., whom he cured of dropsy and ten thousand others whom this new double non-alcoholic treatment cured of each of the diseases and symptoms mentioned in the first paragraph.

All the doctor wants to know is that you have one of these diseases, then you write him what disease you have, and give your name and address, and he will do the rest to cure you. You send no money, no stamps; he will not send anything C. O. D., or send any bills. But he will send you free, without anything to pay:

A double treatment free of charge for your own disease—(the genuine, original and improved cure treatment:) and

A free 68-page illustrated book telling the truth about these diseases, giving different home methods, how to analyze your urine, etc.. etc

To those who earnestly want to be cured this is a heaven-sent free opportunity. Will you take advantage of it. Yes! Then write today to the Turnock Medical Co., 2879 Bush Temple, Chicago, Ill.

Get This Gold Pair FREE

Listen! In the past year I received thousands of letters from spectacle-wearers all over the world, expressing their thanks and appreciation, and the one I give here is a good sample of what they all say. The Reverend O. C. Clark, one of the most prominent ministers in the State of Illinois, says: "I highly appreciate your famous "Perfect Vision" spectacles, for I can honestly and truthfully say that with them I now read the finest and smallest print both day and night, just as well as I ever did in my life Your spectacles are truly marvelous." Now I have no doubt but that the testimony of this noted minister of the gospel is sufficient proof to every fair minded spectacle-wearer that my famous "Perfect Vision" spectacles are really **THE BEST IN THE WORLD**, as I claim.

But I Want YOU to Judge Them For YOURSELF

and thereby get **YOU to send me YOUR testimonial also.** Hence, before placing them on the market for sale at their regular price of $5 per set, I make you the following special offer which will actually save you $4 cash: Just write me your name and address and I will mail you my Perfect Home Eye Tester, free, with which you will be able to test your eyes at your own home, perfectly. Then when you return me the Eye Tester with your test, I will send you a complete five dollar family set of my famous "Perfect Vision" spectacles for only $1 (which is an actual saving of $4 to you), and this will include a pair of my handsome Rolled Gold Spectacles absolutely free of charge. This set will last yourself and family a lifetime. With these famous "Perfect Vision" Spectacles of mine you will be able to thread the finest needle and read the smallest print, both day and night, just as easy as you ever did in your life, and this even if your eyes are so very weak now that you cannot read the **HEADLINES** in this paper. I also hereby agree to return you your dollar cheerfully if you **YOURSELF** don't find them to be the most perfect-fitting, clearest and best you have ever bought anywhere, at any price. Write today for my free Home Eye Tester. Address my company as follows:

DR. HAUX SPECTACLE COMPANY, Haux Building, ST. LOUIS, MO.

I WANT AGENTS ALSO And any man or woman (also storekeepers), without any previous experience whatever, can fit the weakest eyes with my Improved Home Eye Tester. This is so simple that any one can work it with perfect satisfaction and easily earn from $25 to $100 weekly selling my famous Perfect Vision Spectacles, either in their own homes, travelling or in stores. My agents need no license as I furnish necessary documents with the Agent's Outfit.

(NOTE.—The above is the largest Mail Spectacle House in the United States and perfectly reliable.)

The Big Value Premium Budget!

It contains all the following: **20 Popular Songs,** with words and music complete, including "Ta-ra-ra Boom-de-ay," "Little Annie Rooney," "The Man in the Moon is Looking," "Baby Mine," and 16 others; **25 Portraits of Famous Actresses** and stage beauties; Portraits of **All the Presidents of the United States,** from Washington to Cleveland; **Peck's Bad Boy,** Mr. Bifkins' First Baby, Skinner's Dairy, by Bill Nye and four other funny stories, all complete; **A Buffalo Hunt in South Africa,** An Adventure with a Lion, Capt. Dick's Whale, and seven other complete stories of adventure; **The Magic Telescope,** The Magic Rings, The Magic Knife, The Magic Mirror, The Pneumatic Dancer, The Mysterious Bottle, and 57 other Tricks in in Magic; **Mind Reading: Magic Pictures,** The Magic Shrub, The Magic Whirlpool, Tree of Crystals, The Silver Tree, The Barometer Bottle, The Fiery Fountain, and 49 other Amusing Experiments; **The Japan Square Puzzle,** The Double Headed Puzzle, The Triangle Puzzle, The Cut Card Puzzle, The Counter Puzzle, The Star Puzzle, Love's Puzzle, and 57 other Great Puzzles; **20 Amusing Illustrated Rebuses; 101 Fuuny Conondrums; Game of Fortune,** Game of Forfeit, The Book of Love, Cupid's Box, Marguerite's Oracle, Game of Letters. and 56 other Splendid Games; **Marvels of Second Sight: The Clairvoyante, Magic Writing, 324 Jolly Jokes,** for fun lovers; How to Make **Sympathetic Inks** for secret correspondence, Imitation Gold, Moustache Grower, Roya! Washing Powder, Luminous Paint, Patent Starch Polish, Grease Extractor, Furniture Polish, and 92 other valuable **Money Making Secrets; 100 Practical Cooking Recipes; Secrets of the Toilet**—how to become beautiful; **255 Selections for Autograph Albums; 10 Model Love Letters; How to Tell Fortunes** by the lines of the hand, the grounds in a tea or coffee cup, or the white of an egg; **The Dictionary of Dreams; Guide to Flirtation;** How to Cure Bashfulness; **Psychometric Charming,** or, How to Fascinate; **Charm for Healing Diseases,** The Acorn Charm, The Card Charm; **The Language of Gems,** Magic Age Table, Magic Square; **The Lover's Telegraph,** 15 Versions of Love, Some of Nature's Wonders, The Morse Telegraph Alphabet.

Special Offer; We will send the BIG VALUE PREMIUM BUDGET, containing EVERYTHING NAMED ABOVE, by mail, post-paid, upon receipt of only **Ten Cents.** Satisfaction guaranteed or money refunded. Do not fail to take advantage of this greatest of great offers.

COONER & FORTUNE CO., . . . INDIANAPOLIS, IND.

The Value of Crop Reporting

If the farmers only knew just how much tobacco there is in the United States to supply the demand thousands of them would hold their crops off the markets for the higher prices that will come by-and-by. And if the buyers knew just how much tobacco is still in the growers' hands there would be a scrimmage among them for supplies. Yet, the trusts have so nearly eliminated competition that the dealers will buy only as they are in actual need of the leaf. Therefore, the growers must protect themselves by controlling production. Another reduction of acreage may be necessary but we will see before planting time.

When organized thoroughly, the farmers can know before the crop is planted about what the acreage will be and can estimate near enough for all practical purposes the production in pounds of the coming crop. Thus they can control the supply to such an extent that profitable prices will always be paid. When we say "profitable," we mean that prices to be obtained will be such as to make it profitable for the growers to hold production down to a point to make their crops eagerly sought for. In other words, keep production on a level with consumption.

SHAKER SIFTER

Sent with 4 other attractive novelties **Free to Agents.** One hand shaking this sifter works the internal mechanism. Good material and wears well. Catalog free. Dept KC Household Novelty Works, 25 Randolph St., Chicago

Brooks' Sure Cure FOR RUPTURE

Brooks' Appliance. New discovery. Wonderful. No obnoxious springs or pads. Automatic Air Cushions. **Binds and draws the broken parts together as you would a broken limb.** No salves. No lymphol. No lies. Durable, cheap. Pat. Sept. 10, '01. **SENT ON TRIAL. CATALOGUE FREE.**

UP-TO-DATE FARMING

Our Motto, FARMERS TO THE FRONT *Our Object,* EQUITABLE PRICES FOR ALL PRODUCTS. *Our Plan,* CONTROLLED MARKETING

INDIANAPOLIS, DECEMBER 1, 1905

OFFICERS AND DIRECTORS OF THE

AMERICAN SOCIETY of EQUITY.

1905-1906

FOR THE

CO-OPERATING FARMERS OF AMERICA

The Only One

There are more than Two Hundred Farm Papers in the Country Teaching how to Raise Crops but Up-to-Date Farming is the only Paper that Teaches how to sell them Profitably

Which is more important, raising larger crops or getting a fair and profitable price for every crop you grow?

Isn't it strange that an important industry like agriculture should have such a large number of papers to tell you how to produce crops, while you know this very well already, and there is only one that teaches the more important matter of marketing them profitably? Strange, but true.

Ask the merchant, the manufacturer, the banker, the professional man or the laborer, how he esteems the marketing of his goods, wares, skill or time. Each of these have learned that it is the most important to find and maintain profitable markets and often they spend large sums to market. You know this is so.

But farmers have not been spending a cent. They simply worked hard until they had the crops, then they "dumped" them into the hands of other people who have learned how to control, handle and market them profitably.

While the farmer oftentimes did not get decent wages for all the work he and his family and hired people did, the railroads, commission men, elevator interests, stock yards, packing houses, cold storage houses, food trusts, etc., on whom he dumped the crops, who stood with outstretched arms and hungry maw, ready to receive them, and who had learned the science of marketing, always made money. This was the case whether the crops were low or high priced.

But these things are changing. Farmers, many of them, have learned a simple plan how they can get a good price for their crops before the other people can touch them. The plan has been taught by UP-TO-DATE FARMING—this paper—and is being put in operation by the AMERICAN SOCIETY OF EQUITY. This society is at last on the right road to help the farmers. It has the right plan and it is the only plan that will solve the farmers' problems.

We want to teach this plan to every farmer in America. Then, no matter what you produce you will never need to sell it at a loss.

This is not an idle boast. The farmers can and will make their own prices through the AMERICAN SOCIETY OF EQUITY and they will always be profitable prices. The complete success of this movement is as certain as that the sun will continue to shine, or the seasons come in their regular order and that crops will be grown and that people and domestic animals will continue to get hungry and need to be clothed.

The people who we appeal to now to help establish the AMERICAN SOCIETY OF EQUITY may delay its complete success if they refuse, but they cannot prevent it. The only things that can prevent its final success are that the earth will cease to yield crops or that people can dispense with eating. Such conditions are, however, too remote to be probabilities.

Since the most important part of any business is finding good markets for the products, (you must admit the truth of this), and since the industry of agriculture has over two hundred papers devoted to the problem of PRODUCTION and only ONE to the problem of MARKETING, does it not follow that the one paper should have a circulation equal to all the other papers combined? Only in this way can the two important factors—producing and distributing—be on a balance. Every person who produces should know the RIGHT WAY TO MARKET. Therefore, every person who needs a paper to teach him how to produce, also needs a paper to teach him how to market.

Yes, the distributing end of your business is the more important. You have been learning how to produce for years, but the right method of marketing has been taught only three years and many farmers don't know the plan. Therefore, while you might possibly dispense with the papers on production, IT IS OF THE MOST VITAL IMPORTANCE THAT EVERY FARMER LEARNS ALL HE CAN ABOUT MARKETING.

THERE IS ONLY ONE WAY TO LEARN THE RIGHT PLAN TO MARKET FARM CROPS. It is taught exclusively by this paper—UP-TO-DATE FARMING. There is only one way to apply the plan. It is through the AMERICAN SOCIETY OF EQUITY. 'Tis said, "there is no royal road to success," and this is true. But there is a royal road to success in marketing farm crops and it is by the A. S. of E. route. You've got to travel this road if you ever expect to reach the best results on the farm, no difference what crops you grow.

Refuse to take this advice and you postpone the day of your independence from the price making powers and exploiters who have been on your backs all your life. REFUSE to read UP-TO-DATE FARMING and to work with the AMERICAN SOCIETY OF EQUITY, and your problems will remain unsolved. REFUSE to contribute the very small sum required to establish and maintain the A. S. of E. and you will continue to be kept out of hundreds or thousands of dollars that you may as well have, and contribute hundreds or thousands of dollars to that class of people who produce nothing but make millions off of what you produce.

But you are not asked to contribute in advance. There is not a person who raises any farm crop, who has not already been benefitted because of the existence of THE AMERICAN SOCIETY OF EQUITY and the work done by UP-TO-DATE FARMING. These benefits run from a few dollars to hundrers with each farmer. We have had thousands of letters making such statements. We ask only a small contribution of the extra prices you have received to extend this movement and keep it running so that in the future it can do immensely more for you.

Somebody said: "There are three kinds of people in the world, the wills, the won'ts and the can'ts. The first accomplishes everything; the second oppose everything; and the third fail in everything."

To which class do you belong? Are you willing to be put in any class but the first?

We are seeking the people who arre in the first class. We want people who will say "I WILL help this movement that will help ME as much as anybody. And when it is completed ALL the other farmers will help poor, weak ME immensely more than I can help myself." This is the true sentiment of co-operation. EACH HELP ALL AND ALL HELP EACH.

Here's What We Want You To Do

1st. If a member of the American Society of Equity, pay up your dues promptly, ($1.00 a year if a member at large; 30 cents quarterly, if in a local union). These payments include subscription to the official paper, Up-to-Date Farming.

2d. If a subscriber to Up-to-Date Farming, renew your subscription promptly and you should become a member of the society also.

3d. If, dear reader, you are not a member of The American Society of Equity or a subscriber to Up-to-Date Farming, won't you come with us at once. Please remember what we said about the importance of the distributing end of your business and that there was only one paper representing it on the right plan. Up-to-Date Farming is the paper. If you will take the advice, which you will get by regularly reading Up-to-Date Farming, you will make enough extra off of each crop to pay the cost of the paper and society for many years. Tens of thousands of others have done it and we're getting stronger all the time.

We might multiply such arguments to fill volumes, but what's the use. Everything is in favor of establishing the A. S. of E. and abolutely not one good argument against it. Therefore, let us establish it now.

No matter how many other papers you are taking, you cannot afford to be without Up-to-Date Farming.

Read this issue all through and then fill out below blank and send to us before you forget it.

[For the information of interested people we will say that only 25 cents a year goes to pay for Up-to-Date Farming to members of the A. S. of E. The balance goes into the treasury of the society for extension work and every dollar is strictly accounted for.]

Up-to-Date Farming

PUBLISHED TWICE A MONTH

J. A. EVERITT, Editor and Publisher

SUBSCRIPTION PRICE 50c A YEAR

Foreign Subscriptions $1.00 a Year

CLUBS. Five subscriptions, on any offer we make may be taken at the cost of four. This applies to five of one offer or it may embrace several offers. To illustrate, five 50 cent offers for $2.00 (40c each) or five $1.00 offers for $4.00 (80c each).

Many club raisers fail to indicate their names separate from the club. We want to know who our workers are, therefore always write: "This club was sent by (name)."

☞ Always state if a renewal or new subscription. **Don't Neglect This.**

Your Address should always be written very plainly, including **county.** Do not give street or box number when not necessary to facilitate delivery of your mail. If on a rural mail route use the letters R. R. before the number.

Renewals and Change of Address. Give the same name as before. If a change from one member of the family, so state.

If you change your postoffice, give old office as well as new.

If a mark like this appears on the first page it is to notify you that your subscription or renewal has been received. The publisher thanks you and he hopes you will be benefitted by Up-to-Date Farming and take it many years.

Advertising Rates will be quoted on application.

Only Reliable Advertisers are admitted to our columns. We guarantee that they will deal honestly with subscribers. However, should any advertiser in Up-to-Date Farming fail to keep his promise as advertised and not give a subscriber an honest deal, we will make good the amount of the loss, provided you were induced to deal with the party through his announcement in this paper only, and providing such transactions occur within a month of the publication of the paper, and that it is reported to us within a month of its occurence. It is understood that this offer is not binding on the publisher unless you mention Up-to-Date Farming when you write.

The Farmer's Union Label must be made the strongest link in the chain of organized farming, as it has long been the strongest link in the chain of organized labor. By the use of theLabel an article is recognized as a product of organized farmers, and those who use such articles know they are patronizing and sustaining organized effort for improved conditions. Use the Label on your letters, envelopes and on your produce.

The solution of the Farmers 18 Labor Problems that will come through Profitable Prices means a demand for millions of union laborers.

Minimum Prices

Below are the prices decided on by the American Society of Equity. They are the minimum prices, *below which* farmers should not sell. They are all based on some central market, and the farm price will be enough less to equal freight and a legitimate profit to the handlers. Farmers should control their marketing so as to keep the market hungry and the demand seeking the supply, when they can make their own prices—control marketing so your crops go off of the farms over the period of a year instead of in a few months. *If those who can hold will hold all, and those who cannot hold all will hold part, then those who cannot hold may market and all will get the price.* This is the key to controlled marketing. The world must have your products at *your* price if it cannot get them at prices made by some other people.

Prices per bushel unless otherwise stated:

Wheat No. 2 Red, Chicago, Per bushel	$ 1.00
Corn No. 2, Chicago, until Jan. 1, 1906,	.45
" " 2, " Jan. 1 to April 1, 1906,	.50
" " 2, " April 1 to next crop	.55
Rye " 2, "	.75
Oats " 2, "	.38
Barley, good malting, Chicago,	.45
Hay, No. 1, Timothy, Chicago, per ton,	12.00
Beans, No. 1, hand picked, Navy, Detroit,	2.00
Cotton, Middlings, New York, per lb	.12
Broom Corn, Chicago, per ton,	$85.00 to $100.00
Hogs, Chicago, per cwt., alive,	$6.00 to $6.50
Cattle " " " "	$5.00 to $6.00
Wool, medium, unwashed, on farm, per lb.,	.30
Potatoes, Chicago,	.65

The right plan—the plan of the A. S. of E.

—o—

If you miss any copies of this paper please send a card and they will be sent.

—o—

The American Society of Equity cannot perform miracles except with the help of the farmers themselves.

—o—

See the Minimum price on page three. The prices given on corn are for the new crop. Old corn is selling for a premium over the new.

—o—

"Prove all things and hold fast to that which is good."—From Holy Writ. The plan of the A. S. of E. has been proven good. Will you hold fast to it?

—o—

Get the habit. What habit? Well, its not a bad one; we only want you to get the hibit of lending your Up-to-Date Farming to your neighbors.

—o—

Quit "knocking" the trusts and look after your own business. When you set your own business right it will be time to attend to the other peoples' business.

—o—

Have you complied with instructions about sending resolutions to newspapers, etc., as printed in November 15th number? If you have not, look up this number and do it at once.

—o—

See minimum prices in first column of page three. Cut them out and give to your local paper and send to any city paper you subscribe for, with request to publish.

—o—

Have you asked your neighbor to become a member of The American Society of Equity or a subscriber to Up-to-Date Farming? If not, why not do it today?

—o—

The basis of successful co-operation in any line of human endeavor is a practical plan. The A. S. of E. has a practical plan and the only one farmers ever had, as those acquainted with it will admit.

—o—

No good Equity man or woman will never send a letter unless a piece of Equity literature is enclosed. Your correspondents will be hungry for more as soon as they get a taste. Send any amount, 10c or more, and we will send you a supply.

—o—

The car shortage no doubt prevents many farmers from dumping their produce on the market as rapidly as they otherwise would, but it is not conducive to making a thorough distribution to all markets to meet the maximum needs.

—o—

Don't be discouraged. Those who hold staple crops for the minimum prices are bound to get them. The world needs all the crops, not only a part. The "Dumpers" may delay the day of equitable prices, but they cannot control always.

—o—

Not all farmers are prosperous and never will be. When, by the plan of obtaining profitable prices through a minimum price based on average yields, the average farmer is prosperous, there will be a great number who do not rank up even with the average, who will still be hard up.

—o—

There is always a right way and a wrong way. But as long as farmers have no certain basis to work to, like profitable prices, even the logical right way, will often prove wrong. Instance, the right way discovered to raise big crops but it was the wrong way to get good prices.

Four bumper corn crops in succession—the largest the country ever grew. Is it not about time for a short crop? Don't sacrifice this crop, but if you cannot get the minimum price hold it over against a short crop year which is bound to come soon, most likely next year.

—o—

Keep thinking! When at work in the fields or about the buildings, keep a thinking. Hand work and brain work can go together, so keep thinking when busy or when housed up in bad weather. Up-to-Date Farming always gives many ideas that are worth thinking about. Do you know of any other paper to equal it? Can you possibly afford to do without this paper?

—o—

It will cost something to organize and co-operate, but it will be a mere trifle compared to what farmers are losing every year by not having their complete organization and adequate system for marketing. We can safely say that farmers can, and will save and make enough in a year, and not overtax anybody in price, to run their organization for fifty years. Then why do they hesitate?

—o—

This country has a larger crop of wheat than last year by about 100 million bushels, but the world's crop in the Northern hemisphere is short of last year more than two hundred million bushels. In view of this is there any good reason why the present price should be 25 cents a bushel less than a year ago. How can we reconcile supply and demand with the present price?

—o—

Another illustration of what farmers lose by not being thoroughly organized to report their own crops is shown in the apple market. Prices have advanced much after the bulk of the supply was in the hands of the second owners, on account of the very short supply. Trade papers report the business "in a most satisfactory condition" which is easily comprehendible.

—o—

Roosevelt says the railroads must be good, but the trouble will be reforms will be tried from the present basis of operation. There are fundamental principles of equitable railroading that are all obliterated in the present systems and we must go back to them before much good to the masses will be accomplished. This paper will have more to say about railroad matters in the future from the farmers' standpoint.

—o—

Did you read the ringing resolutions in November 15th issue? There were four sets of them, as follows:

OUR FOREIGN MARKETS; GAMBLING AND SPECULATION IN FARM PRODUCTS; CROP REPORTING BY THE DEPARTMENT OF AGRICULTURE; FARM PAPERS AND FARMERS' INSTITUTES.

We have printed them in circular form. Send for a copy of each or a supply to pass around. Free, except send stamp for postage.

—o—

Honest, good friend, what should be the prime inducement to subscribe for a farm paper? Merit, and its ability to teach you what you don't already know, or a premium? Has Up-to-Date Farming been worth the subscription price or must we bribe you to take it by an offer of some cheap merchandise? We believe our subscribers don't expect the cheap premium as an inducement.

Every advertiser in Up-to-Date Farming helps to give you a better paper than the subscription price pays for. Let us patronize those advertisers liberally. Send for their catalogs. If they can't give you a bargain don't buy. But many, many times you will find something you want and need at a reasonable price. Remember, too, we guarantee our advertisers.

Booklet E 37

Wonderful to educate the people; 64 pages and cover. All we ask you is 6 cents a dozen to pay postage. Order a lot and distribute them.

CONVENTION NUMBER

We have reserved some of this extremely valuable, educational number for late applicants.

If you have not ordered a bundle yet we wish you would do so at once.

If you want the doctrine of Controlled Marketing to premeate your neighborhood, which will of itself be powerful in shaping local prices, you cannot do anything beter than distribute this number.

The Convention Number contains almost a complete report of the Annual Meeting of the American Society of Equity with the revised constitution and by-laws of the society and the annual address of the president—taken altogether, an array of facts and arguments, that will convert the worst doubting Thomas and prepare him to join the A. S. of E.

Before any person should consider that he or she has done their duty to their society they should secure at least ten new members. The best start you can make is by circulating the convention number of Up-to-Date Farming in your neighborhood.

Consider, if you please, how much Mr. Everitt has done for this movement and those who know the truth admit that he has made less profit out of it than the average farmer has. It is, therefore, not asking too much of you to get ten members.

Here's What We Will Do

A bundle of 10, 15 cents postpaid.

A bundle of 25, 30 cents postpaid.

A bundle of 50, 50 cents postpaid.

A bundle of 100, 75 cents postLarger quantities at same rate.

Come Now, Once More and All Together This Time

EVERY READER order a bundle; EVERY MEMBER of the A. S. of E. order a bundle; EVERY ORGANIZER order a bundle, to convert new members. The president's address alone will do a great amount of good if read by all your neighbors.

This number will be a revelation to those farmers who possibly have not heard much about the American Society of Equity.

Cut out below and send.

GROUP PHOTOGRAPH OF DELEGATES

The group photograph of Delegates as printed on first page of November 15, will be furnished to Delegates, Local Unions or Members desiring them, size 11x14 in., prepaid at one dollar each. These pictures will have an historic value, representing as they do the first representative body of men ever gathered together for the purpose of deciding on prices of their own products.

Orders should be addressed:

THE AMERICAN SOCIETY OF EQUITY,
Indianapolis, Ind.

The German Tariff

As time passes and next March will soon approach, which is the time for the proposed new German tariff to go into effect, we might ask what are the farmers going to do about it?

Trusting to Congress, as they have in the past, will be the reply, if they give one. Theirs is a false hope. As we have tried to show, this is a matter beyond the power of Congress unless it will give assistance to educate farmers how to market their products so as to maintain fair and uniform prices always as a basis on which Germany may base an equitable tariff. If Congress would order that the $90,000 (we believe this is the sum) appropriated to continue the free seed farce year after year should be expended in literature to farmers, to teach them how to market, it would be expended for some good use. If Congress would do this, and, if necessary, add to the amount sufficient to put proper literature in the hands of every farmer in the country, agriculture in America would soon be in a position to dictate terms of entry of her products into foreign countries, and the markets could be enormously increased.

Among the changes that are proposed, affecting agriculture, are the following, as reported by the Department of Commerce and Labor.

On rye, the duty is now thirty-five per cent., and is to be doubled, or seventy per cent. ad valorem.

The specific duty on wheat is advanced 114 per cent. (more than doubled); on wheat flour, 157 per cent. (more than one and one-half times); on corn, 212 per cent. (more than twice doubled); on dried fruit, 150 per cent.

The rates on provisions are affected as follows: The specific rate on bacon is advanced eighty per cent.; on pork, 176 per cent.; on beef, 200 per cent.

Again we ask, "What are farmers going to do about it?" We have already recommended that farmers' conventions or mass meetings be held in every state in the country previous to next March to intelligently consider this vital problem. These meetings must not be mixed up with manufacturers, but must be purely agricultural; of farmers for farmers. The farmers, and we have in mind stockmen and every branch of farming, are intelligent enough to solve their own problems if not hampered by manufacturers, bankers and politicians.

Think of this matter seriously and let us warn you again; if you will not help yourselves no other class will help you. In this case the other classes are positively powerless to help you even if they were willing, except you would give your hearty co-operation, which at present you are not in a condition to do.

If farmers will now become active all over the country, and call state mass meetings without delay, the tide that is drifting away from you can be turned with such a flood in your favor as you never experienced before. Local Unions and County Unions of the A. S. of E. should act at once; prominent citizens of every state, interested in agriculture, should enlist in this pressing need of the hour. Other farmers' organizations should not hold back, but make this the special business of the day. This is a matter that we are all interested in, also it requires the combined wisdom and work of all and that without delay.

(Note—To any person who wants more light on this most momentous matter I will be pleased to send free a copy of "The American Peril," which shows clearly the impending danger, and proposes a plan which is pronounced by some of the soundest reasoners in the nation to be THE ONLY plan to retain and enlarge our foreign markets.

Also, I will be pleased to be present and assist in any state mass meetings held to educate the farmers as to their duty in this movement,—J. A. Everitt.)

Hold Back 3,000,000 Bales

The following news item from New Orleans is one in the direction of Controlled Marketing that the American Society of Equity cannot endorse.

"Following the arrival of President Harvie Jordan, the Southern Cotton Association to-day perfected plans for taking off the market 3,000,000 bales of cotton by means of a series of pledges which the farmers will sign themselves, stating their name and address and the amount of cotton they will hold. The cotton held will not be sold for less than 15 cents a pound, according to the pledge. President Jordan says that half the crop has already been sold at an average of 10 cents, and the spinners must have all the remainder."

The power of organization should never be used for extortion. It has, however, been so used in many cases, and we have seen it in commercial enterprises, transportation, finance and labor. We had hoped that it would never be used as a weapon in the hands of farmers to wrest from others an unfairly high price for their produce.

The Southern Cotton Association, at their meeting to agree on a price for the 1905 crop of cotton, set eleven cents as a fair, minimum value. The Farmers Union, which is strong in some of the cotton states, endorsed this action. The A. S. of E., as is its custom, set the value at twelve cents, on basis of New York market, which equals about eleven cents in interior points. Therefore, there was an unanimity of opinion as to the values.

This price was published to the world, and we believe was unanimously accepted as fair and equitable by both producers and consumers. But now goes forth an edict that 3,000,000 bales of cotton shall be held for fifteen cents a pound (twenty-five per cent. over the minimum price), and why? There can not be any other reason given than that the prime movers in the Southern Cotton Association believe they can force the price to fifteen cents, and if they have the power they believe in exercising it.

But what will be the possible result and the sure effect?

In the first place, confidence in the sincerity and fairness of the farmers' association is destroyed with the consumers, and they put themselves on an exact level with the speculators and gamblers. Instead of the farmers association guaranteeing definiteness and uniformity of price, which should be the hope of the farmers and consumers,, it lends itself to create a feeling of uncertainty no less harmful than the old condition. If the farmers, through their officers and representatives, first make a price, then later knock it down or set it up higher, who will ever place any confiedence in them?

More than all this is the imputation that may be made against the officers that they are using their offices as a vantage grounds for speculation. Suppose we concede that the cotton growers can put the price of cotton to almost any price they please simply by holding back the supply, which is a fact, what is to hinder those on the inside from buying immense quantities of cotton, then notify the farmers, or get them to pledge themselves, to hold back the supply until the price is forced from eleven cents to fifteen cents a pound.

Think of the power for evil that can be exerted by a few officers with millions of producers backing them up. It is more power than is safe to be placed in any man's or set of men's hands.

We are not charging that the officers ever have, or ever will take advantage of their opportunities along this line. But the whole proceeding is unbusiness like, harmful to all legitimate interests and, if persisted in, will injure the cotton growers and that section of the country more than the old system when prices were made and unmade on boards of trade.

The American Society of Equity wants to go on record again for one price a year and leave the matter of taking it, or holding for a higher price, entirely with the individual farmers. Also, while we believe in the sacredness of a pledge or contract, any cotton grower who has broken away from his declaration of a fair minimum price and pledged or contracted to raise the price to fifteen cents, possibly without due consideration, should repudiate that pledge or contract at once.

Later:—Have our worst fears materialized? The following news item from New York tells the rest.

J. H. Hoadley and Harvie Jordan make $8,000,000 in Cotton Deal

(By Publishers Press.)

New York, Nov. 21.—In the bull movement in cotton today, which caused the staple to leap $5 a bale in five minutes, Joseph H. Hoadley and Harvie Jordan of New York are reported to have made $8,000,000. The latter is president of the Southern Cotton Growers' Association.

False Prophets

From an exchange we take the following:

"Did you notice that the price of wheat went down on receipt of news that the internal troubles of Russia were being pacified by the czar's backdown in the face of revolution? What of it? It means much to the farmers of this country. As soon as the new capitalist regime gets into working order in Russia, capital will invade that country as it never has, and the farmers will next year be using modern machines instead of the ancient ones they now use, with the result that they will supply the world market and the price of wheat will fall to half what it is today. Just mark the prediction."

There never was a time when people should be more independent in thought, than the present. We have frequently warned our readers to not credit everything that they read in the newspapers or that is told them. Learn to think and reason for yourselves. Let us see how it will naturally be with Russia if reforms are worked out and how will the United States be affected?

In the first place Russia will not be transformed in a year, nor in a few years. To educate the people of that nation will require many years before they can bring it up to a state of agricultural production as intense as in the united States. While this is going on something else will be also occurring, education, intelligence, civilization and enlightenment increase the desire for gratification of personal wants, in fact will create such wants.

At present the great masses in Russia are living in extreme poverty. If we are to credit the reports from that country, human beings there, have less of the comforts and necessities of life than the brute creatures have in the United States. Since the reports are so numerous and all agree to the desperate condition of the Russian peasants, and Russian poor of other classes we are compelled to accept them as stating the true condition. Following is a sample of the reports sent to this country and as this is from a highly reputable writer.—Lady Henry Somerset—it may be given credence:

"The present suffering is impossible to exaggerate. In the interior of Russia today the entire population are famishing in their houses. Mice have even ceased to exist because there is no food. Cats have been starving through the absence of mice and dogs because there is nothing to throw to them. The infant mortality is appalling. The milk is carted away from the country to make cheese in St. Petersburg. When a child is born, after three or four days, the mother has to go to work in the fields, and the child has no nourishment but a horrible contrivance called a "sucking bag" a piece of rag filled with black bread which is rarely changed and spreads disease. Then dysentary sets in and the baby dies. The people live in houses in which no man would stable his horse; on filthy straw they eat and sleep, here the children are born, and the women keep their hideous homes among the calves and the pigs and the fowls, while these animals are yet alive, and in unbearable desolation when they are dead. And now that they are no longer fed they can only crawl to the big stove to warm themselves in turn while others freeze in the corners of the hovel. The peasant's normal feed is nothing better than plain cabbage in hot water, hemp oil, boiled graot, to which is added perhaps a fowl at Christmas or at Easter. But all this has been lacking for some time and black bread has been the only food, and now that famine stands grim and gaunt outside the home even the bread is wanting, but the Russian Government cares nothing so long as the taxes are paid."—Lady Henry Somerset.

The population of Russia is in excess of 130,000,000. Think, if you dare, of many millions of human beings in that empire on the verge of starvation and the many, many more millions who are not getting as much food as the body naturally craves. Then think of the domestic animals, which, we must assume, are in no better physical condition and ask yourselves, where is Russia's first duty when she undertakes reforms? Is it not natural to suppose that one of the first steps will be to stop the exportation of grain until her own people are fed? How will this affect the United States other than to advance the price of our grain? As the reforms are worked out and education is spread, the wants of the millions will increase and multiply and the ability to consume will, for many years, keep pace with the ability to increase production.

We need not be alarmed over the hoped for redemption of Russia, but we consider the prospect a matter of congratulation for the American farmers. When the peasants in Russia are delivered from their miserable condition the chief, unfair, competition against our farmers will be removed. When the Russian farmers refuse to live in worse conditions than beasts in this country would survive, but are elevated in the scale of living, they will also refuse to produce grain at starvation wages and agriculture all over the world will have an uplift.

This country forbids the emigration of the Chinese on account of their habits of living cheaply which makes them unfair competitors in labor. But our farmers have always had to compete in the world's markets with such cheap labor as has placed the Russian farmers in the miserable condition as portrayed. We have advocated losing our foreign markets for agricultural products rather than retain them and force our farmers to a level that they must compete with the Russian peasants and Argentine peons. Better to sacrifice the surplus that we may have, if it must sell on the basis of such unfair competition, and confine ourselves to raising enough for our own country where we meet only the competition of organized industry, organized capital and organized labor, all of which can afford to pay prices that will dignify farming in the eyes of all callings because of the earnings it makes, and will lift agricultural up to a level with the best of any industry.

We welcome reforms in Russia and may God speed the day of enlightenment in that nation. Then will unfair competition be removed, because, then, the farmers of Russia will have wants and desires equal to the farmers in the United States, Canada, England, Germany, France, etc., and unprofitably low prices of farm products will forever be at an end.

With proper representation at this time we believe the new government of Russia could be shown that the greatest good it could do for its people would be to establish the American Society of Equity throughout the land. We are doing what we can through people at Washington, but the correct way would be to send a representative of the Society and American farmers direct to the Russian capital.

English Farmers' Produce Association

The following, from England, may be a hint to American farmers near good markets, and particularly where interurban railroads are in operation. We don't see the necessity of the $500,000 capital stock, unless they intend to establish expensive depots in the cities to receive and market their produce. In this connection we think that it would be sufficient to open a selling station and equip it with the necessary help and possibly means of delivery.

In Indianapolis the commission men and jobbers of produce frequently try to get an act through the council to tax farmers or hucksters who go through the country and gather up farmers' produce, and sell it to consumers or stores. We suppose the same condition prevails in other cities. If necessary, the farmers can wield a heavy club when it comes to a fight for free markets. The item follows:

A co-operating company is being formed with a capital of $500,000 by the big landowners in northeastern England. Elimination of the middleman is one of the alms of the company to the benefit of farmer and consume alike. Produce will be collected by motor cars and other means. Thus meat, bacon, butter milk, fruit, poultry and eggs will be distributed quickly in the large towns from the various depots. It will aim towards the reduction of cost in marketing and the ousting of foreign produce. Advantage will also be taken of minimum railway rates which the individual can not obtain.

Wisdom to Sell

"It takes more wisdom to sell a crop than to raise it."

The above is from an exchange. It implies that by exercising wisdom, crops can be sold satisfactorily. Now, farmers, it is up to you to exercise the wisdom. But are any of you wise enough to know when is the best time to sell as regards price? Do any of you know what the price will be next May? Is it not all speculation, according to the old system, instead of a matter of knowledge, reasoning or wisdom?

Compare this advice with the A. S. of E. plan, viz: "Decide on a price that will be profitable and sell at that and no less." Speculation is eliminated; any person will have enough wisdom to do this if he wants to, and very little knowledge will be required.

The Equilibrium

Are all our industries on a perfect equilibrium? If they are, then farm product values are in the right ratio with agricultural imprements, dry goods, groceries, iron, steel, boots and shoes, etc., and the value of each of these in the right relation with each other.

If there is a perfect equilibrium of each commodity with each other, then our country will enjoy the maximum prosperity and nothing within or without can disturb it. Even if an approximate equilibrium is maintained, we are safe from danger of panics and seasons of depression.

But on the other hand, just as sure as any material commodity becomes depressed in price, it is bound to throw the whole industrial scheme of the nation out of balance.

Because of the ability of manufactures, mine operators, transportation companies and bankers to control their output, they can control their prices, consequently there is not much danger from those directions. But what would happen if farmers do not, first, control their production (if this should ever become necessary, which we doubt), and, second, do not control their marketing, so that prices will be forced down much below the relative values of the controlled industries?

If this should occur again as it has frequently occurred in the past, there can be only one result. The equilibrium of values in our various industries would be destroyed. The farmers could not buy from the other classes, the merchants and manufacturers would soon feel it.

It would be evident in enforced closing of factories and discharge of employes, thus working down the line and through every large artery and small vein of commerce until every industry is affected.

This process of "evening" will go on until the equilibrium is again restored, but it will be on a much lower basis of values for all commodities. This is exactly what has occurred many times in this country and if the causes were analized, we claim that the low prices of farm products would be found to be at the root of the trouble in all cases in recent years.

The object of the American Society of Equity is to maintain the equilibrium of farm crops with other commodities, not by pulling down other values to a level with farm products, but by raising the value of farm crops up to a level with others. It is the aim of this society to put the farmers in a condition so that, no matter how high values may be shoved up in other lines including labor, they can always follow. Then, and not until then, will continued prosperity be guaranteed to this country.

To Increase Growers' Profits

Under this head we take from an exchange the below item. The professor talks as though all that was necessary to increase farmers' profits 's to increase the yield, and incidentally the quality. The article is interesting as showing the average of advice given to a too credulous class of people—the farmers:

Prof. ———— is recognized at home and abroad as one of the greatest experts the world has yet produced in all that relates to the practice and science of cereal culture. His writings seem to warrant these astonishing statements:

1. Growers of wheat, corn, oats, rye, barley or buckwheat can readily add from 5 to 10 per cent. to their average yield per acre each year.
2. Along with this increase in production will come improvement in quality.
3. Larger yields of better quality mean bigger profits, because—
4. These results need not require any extra outlay of cash or labor.

Many farmers are anxious to co-operate to thus increase their profits. If the movement becomes general, it will add millions annually to the farmers' wealth. Prof. ———— agrees to undertake an organization for this purpose if enough of our readers are interested to warrant him in so doing. If you favor the idea write Prof. ————. "As a grower of some —— acres of wheat, —— acres corn, —— acres oats, I would like to join your effort to increase grain growers' profits, provided this involves no extra expense to me." Everyone who raises small grain ought to enlist in this effort.

Perhaps the great professor, famed at home and abroad, will enlighten the farmers, along with his other "astonishing statements," as to why the larger the crop the lower is the price. Or to confine the question to a definite crop, let him explain why a 550,000 bushel crop of wheat raised in 1904, if sold at the average November (1904) price at Chicago, viz: $1.17½, would bring $645,750,000, and a 650,000,000 bushel crop of wheat, raised in 1905, if sold at the present November (1905) price at Chicago, viz: 88c, would bring only $570,000,000, or $73,750,000 less.

Now here is a condition where the crop was increased 100 million bushels and the price decreased over seventy-three million dollars.

We refer to these matters only to start our new readers to thinking, and as warnings that they should not take everything seriously that they read in the papers.

If enough farmers were educated up to the point where they know how to market intelligently and had the advice, then the professor might be justified in carrying out his campaign of education. Before that time it will be the part of wisdom to put a stipulation in the contract that he will also "undertake" to prevent prices falling in an equal or greater ratio to what the crop is increased.

The're All Agreeing to It

Following are some extracts from other papers which are good as far as they go, but they don't go far enough.

"Farmers, stand by co-operation; that anchor holds."—Exchange.

"When the farmer pays as much attention to marketing his produce as he does to the quality and abundance of production, he will be the most independent man on earth."—Exchange.

"Often farm organizations meet with failure, but how much more is annually lost to the agricultural districts of the country through failure to co-operate?"—Exchange.

"Farmers need to co-operate to promote their profits in the sale of farm products. It is their only hope in competing in the market centers. It means business methods applied like the other fellows are applying them. It is sure to win in the end. * * * Are you thinking enough about this important matter? You should."—Exchange.

What does it benefit you if away off in some other country there is a land flowing with wine and honey, that you are told of, but the way to reach it is not pointed out? You may spend your life time hunting the way and perish before you find it. Or, if, across a deep, wide river are pleasures, profit and happiness if you can only get there but there is no bridge on which to cross? Suppose Christ had come on earth and told of the everlasting joy in heaven, but failed to reach the way to go there, what would it have benefitted humanity?

What farmers need is to be convinced that co-operration is necessary and will be profitable; but above all else they want to know HOW TO CO-OPERATE.

This paper is the only paper that tells the whole plan and the American Society of Equity is the only way.

Visible Supply and Price

Readers of Up-to-Date Farming well know that our contention has always been that if the "visible supply" of any staple commodity is kept small fair prices can be made and maintained. We might go farther and say, that in proportion to the scarcity of a staple farm commodity on the markets can the prices of that commodity be put up and maintained regardless of how much of the same commodity is on the farms in the hands of the original owners.

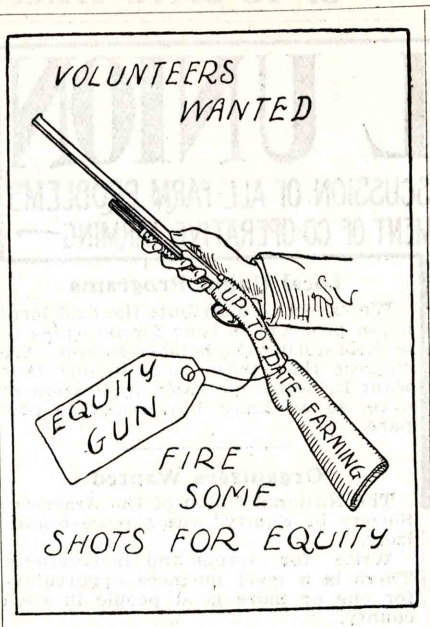
In proof of these assertions let us submit the following table taken from the Year Book of the Dept. of Agriculture. It is worthy of a careful study.

Statement showing the visible supply of wheat in the United States and Canada, and price, on March 1, 1891-1904.

	Bushels	Cts. per bu.
1891	50,995,000	94¼
1892	67,821,000	87⅜
1893	114,670,000	72⅞
1894	103,548,000	58¾
1895	110,546,000	52¼
1889	98,834,000	66½
1897	63,481,000	74½
1898	50,956,000	104½
1899	56,189,000	72⅞
1900	93,384,000	64⅛
1901	87,676,000	74
1902	89,857,000	76
1903	81,518,000	74½
1904	59,618,000	*102
1905	55,633,000	116

*The 1904 price given in the Year Book is 77c., but the cash price at Chicago on March 1st, 1904, was 98½c to $1.02.

Further comment would appear unnecessary as this table shows that as the "visible" supply goes down the price goes up. Does it not follow, if the "visible" supply could be eliminated as a factor and the farmers feed the market just as the demand appears, that prices can be made, that they can be maintained and that they can always be uniform?



Cheap Hogs

From a Chicago paper we pick this sentence, "This is the season of the year when Mr. Packer takes the tuck out of the hog market."

This is also the season of the year when Mr. Farmer views the great corn crop, he meditates and concludes hogs will be cheap and rushes them to market. Does not the stockman play into the hands of the packer to "take the tuck out?" How much controlled marketing would be required to preserve the price? Honest now, have you thought about this matter? A correct knowledge of demand, which can be gotten; a little control of supply, sometimes; will do the business. Farmers can do these things at the cost of a few cents each where now they are losing dollars.

A heavy packer is out with a statement that he believes corn will sell for 35 cents in Chicago and hogs for 4 cents a pound. This statement was given wide publicity and, no doubt, many stockmen will hurry to sell "before the price goes down." This is exactly what the packers want them to do. But why does Mr. Packer want hogs at even 4 cents a pound if there is going to be too many of them, which is the inference? Will hams, and shoulders, and bacon from 4c hogs be consumed faster than those from 6c hogs? Positively no. As far as making a larger market the 4c. hogs won't do it, hence why might not the stockmen just as well have 6c since no more will be used at 4c?

We have advanced the same argument in various garbs for three years. We know our old readers are tired of it, but we always have some new ones each month and in such an education as we are conducting, where all listen to the same teacher, there must be some repetitions.

Corn

Corn is the crop to keep your mind on now. Don't let it get away from you at an unfairly low price. If you sell any of this crop at less than the minimum prices set by the A. S. of E.—45c., 50c. and 55c.—it will simply be held against you until consumed, before you can get a good price for the balance of your crop or for the next crop.

If you were to sell this crop, or a large part of it, at 25 cents a bushel it positively would not relieve the situation should there be a surplus. This cheap corn WOULD BE HELD by some other person. It would simply be a transfer of ownership and not a diminuation of supply. The cheap corn in second hands would increase and aggravate the competition because those people won't have the same interest in the corn the farmers have or should have. Their interest will be to get a margin for handling, a few cents a bushel, for instance, while the farmer's interest is to get a price that will make his investment profitable, give him good wages for his time, and make him a profit over all.

The fairest kind of competition farmers can have are brother farmers. Hence, never sell a bushel or pound of produce at an unfairly low price but hold it yourselves. Don't compete with each other to see who can sell first and most "before the price goes lower" as some argue. This is a stock argument of buyers to stampede you. Every bushel of corn you will sell this year at less than the minimum prices will be held against the balance you and your neighbors have, perhaps, into the next crop year. But if you refuse to sell for less than the minimum, as much will be consumed and you will always be able to control the situation.

Count every cent under the minimum prices set by the A. S. of E. as so much lost. Which is the truth.

Telephones

The committee on telephones, at the annual meeting of the American Society of Equity, included in their report a recommendation that the National Union should give information about material, cost of building lines, installation, etc.

We are pleased to refer any of our interested readers to the following houses, some or all of whom publish books that will give much more information than we can give now in the paper. After first getting information from these sources we will be pleased to take up the matter for working out your telephone problems through these columns. The list follows:

Swedish-American Telephone Co., Rural Department G., Chicago, Ill.

Standard Telephone and Electric Co., 352 Jefferson street, Milwaukee, Wis.

Stromberb-Carlson Telephone Mfg., Co., Rochester, N. Y., Chicago, Ill.

Please say that you are a reader of Up-to-Date Farming and if you are a member of the A. S. of E., also, always give this information. We also suggest that it will be to your personal interest and the good of the A. S. of E. if you will procure official printed stationery.

French Farmers Are Inoculated

The following dispatch from Paris shows the temper of the French gardener regarding values and the pretensions of others to fix their prices.

Paris, November 7.—A singular strike has broken out in the vicinity of Lyons. There is a commune which makes a specialty of growing cabbages. The growers recently held a meeting and unanimously resolved to resist the pretension of the manufacturers of pickled cabbage to fix a price of 50 cents a hundred kilos. The cultivators who demand 80 cents have resolved to stop gathering in this year's crop and leave the cabbages to rot on the ground rather than accept the manufacturers' price.

The Greatest Crops

Taken altogether the crops of the United States are the greatest ever grown and they will undoubtedly bring the most money. They will bring hundreds of millions of dollars more than they would have brought under marketing conditions as they existed a few years ago. But they will not bring as much as they should.

Every crop harvested should bring the minimum price as agreed upon by the American Society of Equity for the first bushel or pound as well as for later ones. Then all farmers would get their just portion. That they do not, however, should not discourage our friends. We believe enough are controlling their crops to force the price to the minimum before the year is around.

Clover Seed

The necessity for complete and reliable reports of yield and condition as soon as a crop is ready for market was emphasized this year in clover seed. For about three months after the crop began to be marketed the price was around $5.00 to $6.00. Then, apparently, the fact began to dawn on buyers that the crop was probably the shortest one grown in years and the price went up about $2.00 a bushel in a few days. Of course the bulk of the crop was out of the growers' hands and in the hands of middlemen, and the farmers will buy it from them next spring at the advance price. One dealer in Toledo made $80,000 in a week. Surely the farmers create the perfect conditions to make millionaires and foster trusts, and then continually cry against them.

Present price $7.75 to $8.00 a bushel in Chicago and Toledo markets for contract grade of clover.

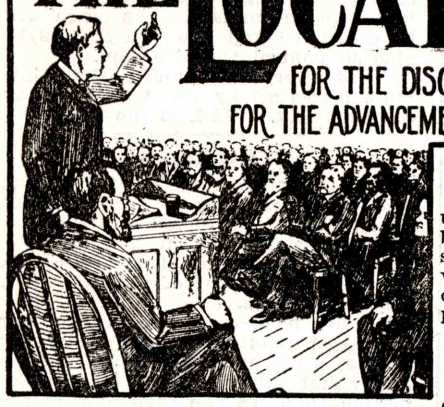
THE LOCAL UNION

FOR THE DISCUSSION OF ALL FARM PROBLEMS
FOR THE ADVANCEMENT OF CO-OPERATIVE FARMING



THE AMERICAN SOCIETY OF EQUITY

Headquarters Indianapolis, Ind.

Is an international organization, incorporated, with headquarters at Indianapolis, Indiana, and whose first and principal object is: "TO OBTAIN PROFITABLE PRICES FOR ALL PRODUCTS OF THE FARM, GARDEN AND ORCHARD." It also has other objects of great importance to agricultural interests, which will be worked out as the organized farmers desire to take them up. The supreme body is

The National Union

Composed of the officers, directors and accredited representatives from subordinate bodies. The unit of organization is

The Local Union

This is the home workshop of the American Society of Equity. In it, must be forged and shapened the interests that shall revolutionize agriculture, and usher in the time when the soil tiller shall no longer be a "hewer of wood and a drawer of water" for other classes, but when he shall stand erect, an important and independent member of society.

State and County Unions

There are also State and County Unions that may be organized depending on the development in the counties and states.

Fees and Dues

THE MEMBERSHIP FEE is $1.00, payable when becoming a member. Any person can become a MEMBER AT LARGE no matter where he resides if he can be reached by the U. S. Mail. Every member is recommended to join a local Union if one is in his neighborhood. The fee is the same.

THE DUES are $1.20 each year, payable wholly in advance, or may be paid 30c quarterly, or 10c monthly in advance, (except the dues for Members at Large is $1.00, payable in advance to headquarters.)

The MEMBERSHIP FEE is apportioned 60c to organization fund and 40c to headquarter expenses and to supply the official paper to each member one year. The DUES are apportioned 40c to headquarter expenses and the official paper subsequent years; 20c to the county union, 10c to the state union and 50 cents is retained in the local union treasury.

Each member receives a certificate, a badge, all bulletins and other public documents issued from headquarters, and Up-to-Date Farming, the official paper, paid for by the National Union.

Supplies, including books, blanks, etc., are furnished FREE to all new local unions and all old ones that apply and remit their dues.

Complete instructions will be sent free on request, how to organize local and county and state unions and all information about fees, dues, etc.,

The Emblem

of the American Society of Equity as here shown, is symbolical of PRICE, being on an equality with PRODUCTION AND CONSUMPTION.

Revised Constitution and By-Laws

They are now ready to distribute in pamplet form. Please send a two cent stamp for one, or ten cents a dozen.

Members' Manual

In reply to numerous inquiries, we will say that the small Record Book and Member's Manual is no longer used. Members' cards will be issued instead.

Badges and Members' Cards

Organizers are requested to carry a supply of badges and members' cards in the future and deliver them as members are secured. This also applies to officers of local unions. Instructions will be sent to all organizers and officers.

Insufficient Address Orders

As the result of our repeated cautions the number of insufficient address orders is growing gratifyingly less. We have only four to report, as follows. Whose are they?

David Sheesley, Sr., $1.50.
Some place in Illinois, 35 cents.
Mooresville, Ark., 25 cents.
Wm. P. Halter, Silver Run, Md., 6 cents, but no such postoffice in State.

When writing repeat your order in way of identification.

Local Union Programs

We expect to distribute the first local union program in time for meetings to be held during the holiday season. We suggest that those local unions that want it, better file their application at once, so we know how many to prepare.

Organizers Wanted

The National Union of the American Society of Equity wants more organizers.

Write for terms and instructions. There is a good business opportunity for one or more good people in each county.

President Everitt's Picture

By the time this issue reaches our readers we will have mailed thousands of those beautifully vignetted pictures of our president. They are printed on highly finished enameled paper, size 11x14 inches, in a rich cepia brown and will form a fitting adornment for any home. Each Local Union should have one framed and hung in its meeting place.

One of these beautiful pictures will be mailed free to every free will contributor of 25 cents or more to the Equity Press Fund or to any subscriber who will advance his or her subscription to Up-to-Date Farming to some date in 1907.

On these liberal terms every person desiring profitable prices for farm products and the complete success of the cause of equity should have the inspiration afforded by the leader's picture.

$5.00 Reward

The National Union of the A. S. of E., in order to stimulate organization, will pay $2.00 to the organizer who will report the largest local union organized before Jan. 1, 1906. Also, $3.00 to the organizer who reports the most members before that date.

No person is barred from competition except the National Organizer. The only condition we make is that you say when reporting that you are competing for the cash rewards. The name and address and numbers will be printed in Jan. 15 number.

Important to Organizers

At the Annual Meeting, which was largely composed of delegates who have had experience as field workers, the needs of the organizer were carefully considered. A rate of compensation was agreed upon that should fairly compensate each worker, who makes an earnest effort; therefore it is expected to retire after January 1, 1906, all who do not secure a commission under the new terms and give his territory to another. It is hoped that, with better prospects ahead, all good organizers will qualify immediately and renew their efforts.

Corresponding Secretary

Appoint a son or daughter of a member to fill this position. Duty. It will be his or her duty to send notices of meetings to newspapers, local and foreign, including farm papers and also reports of the meetings.

Farmers have asked very little from the press in the past and got very little. The time has come when they should demand and get their share. Farmers should also support those papers that help them, and give the cold shoulder to the others.

The Unity of Price

Organizer Sam J. Hampton recommends that a day be set apart and designated as "The Day of Unity of Price." "On this day," he says, "let all local unions meet at the same time in a public gathering of every farmer and let the secretary of each local union read the scale of prices and have it ratified by several millions of farmers on the same day. This action would be a wonderfully impressive thing and would create a powerful sentiment in favor of the farmer's demand for fair prices." This is a good idea and it must be carried out after the next annual meeting. We recommend now that each local union set its own date and hold such a public meeting as soon as possible.

Local Unions, Educators

The education to the boys and girls that will be secured in the local union meetings is something that should not be despised. Here they can acquire a knowledge of business, and of parliamentary rules, practice and proceedure such as might not open up to them any other time during life, and which may fit them to preside in legislative bodies, or as heads of business concerns or societies in the future.

The education secured here will be an invaluable drilling, no matter what the future calling. Whether engaged in great things or small, they should all be done in time and order. Join the local union, attend the meetings and learn from it.

"The heavens themselves, the plants and this center,
Observe degree, priority and place,
Insisture, course, proportion, season, form,
Office and custom, all in line of order."
—Troilusand Cressida, Act 1, Sc. 3.

Appeal to Local Unions and Members

C. O. Drayton, Greenville, Ill., state organizer for Ill., makes the following appeal:

Instead of being required to send eighty cents per annum per member to headquarters, you are now required to send only forty cents per member, which pays for the official paper for one year and all expenses of the National Union.

I kindly request every Local Union in our state and elsewhere, to send National Secretary, M. Wes Tubbb, Indianapolis, Ind., forty cents per member, in December, 1905, which will pay in full your dues to the National Union for 1906. Be sure to collect this from every member and from every farmer and business man friendly to our cause. If you have the money in your local treasury and wish to pay it thus, very well, if not, appoint a regular committee to attend to this very important matter. A National headquarters well and faithfully supported by every meber is of great importance to our noble cause.

C. O. DRAYTON.

Through an oversight the National Organizer's name was omitted from list of officers printed in the convention number. Hon. H. B. Sherman was selected National Organizer. His home is Greensburg, Ind., but he can always be reached by addressing letters care of headquarters. At present the National Organizer is working in Illinois.

Equity Speakers

A great many calls are constantly received at headquarters for speakers. We refer to the following, who will accept such calls to address meetings. Write them for terms:

C. C. Simpson, Dardanelle, Ark.
T. J. Woodard, Clarksville, Ark.
W. E. Johns, Tifton, Ga.
Walter Newby, Woodward, Ia.
E. B. Oglesby, Cloverport, Ky.
W. S. Ball, Hardinsburg, Ky.
S. B. Robertson, Calhoun, Ky.
E. E. Gay, Vultons Creek, Ky.
T. J. Mann, Liva, Ky.
L. N. Robertson, Utica, Ky.
D. T. Hamill, Guthrie, Ky.
E. L. Davenport, Cisney, Ky.
F. B. McCown, Kirkmansville, Ky.
J. W. Cannon, Liberty, La.
A. K. Fineout, Barryton, Mich.
Walter Todd, Kelden, Mich.
W. C. Webber, Rochester, Minn.
C. W. McDade, Ceylon, Minn.
M. H. Poole, Geyser, Mont.
Chas. C. Wilson, Queenstown, Md.
D. Phillips, Pool Siding, Neb.
J. B. Whiting, Interlaken, N. Y.
Chas. H. Olive, Reno, N. Dak.
Louis H. Erdmon, R. R. 2, Kenmare, N. D.
L. S. Meyer, Grand, Okla.
R. H. Molden, O'Keene, Okla.
W. M. Baker, Republic, Ohio.
J. F. Gordon, Jamestown, O.
B. M. Thompson, Freeland, Tex.
Welton Winn, Santa Anna, Tex.
Dr. C. W. Bowman, Caddo Mills, Tex.
J. W. Overstreet, Bedford City, Va.
Riley Pritt, Beverly, W. Va.
Sam. J. Hampton, Durant, I. T.
Senator L. P. King, Winfield, Kas.
P. Anthony, Kaseys, Va.
T. T. Barrett, Henderson, Ky.
O. B. Shafer, Hastings, Neb.
C. O. Drayton, Greenville, Ill.
Dr. T. W. Evans, Concord Depot, Va.
James M. Vaughan, Cumberland, Va.
N. C. Crawley, Baraboo, Wis.
D. S. Edwards, Hopkinsville, Ky.
M. J. Cox, Benton, Ky.
E. R. Williams, Stockholm, Okla.
Rev. W. H. Millar, South Haven, Mich.
E. T. Bondurant, Rice Depot, Va.
A. H. Howerton, R. R. No. 1, Spout Springs, Va.
R. J. Marshall, Brookneal, Va.
Rev. E. T. Hays, Olive Branch, Ohio.
W. N. Thompson, Hastings, Neb.
F. W. Ploetz, R. R. No. 1, Coloma Station, Wis.
F. L. Hamilton, Coloma, Wis.
C. G. Billings, Eau Galle, Wis.
P. M. Shaw, Perry City, N. Y.

Push

The season, when the work on the farm pushes the farmer, is now over, and this is the time for every farmer to do something to push his society to the front.

It is true that farmers must co-operate if they want definiteness to prevail in their business. On definiteness everything desirable connected with farming depends. If you know when you plant that you will get a definite price—a profitable price—regardless of whether the crop is large or small, you can make definite calculations on improvements and expansions for the future. Your business will then settle down to a basis like is ejoyed by well regulated commercial enterprises instead of being subject to the uncertainties of a wobbly price, the result of greed and unfair manipulations.

There are many good men in nearly every neighborhood who are not yet members of the A. S. of E., They should join at once for their own god, and the good of those who are now in. There are associations of manufacturers and all the leading manufacturers belong. Nearly every town has its Commercial Club or Business Men's League, and nearly all the merchants belong to them. If it is good for them, why not good for the farmers?

It is good for the farmers to co-operate. They can receive all the benefits others can and gain advantages over their old conditions that others did not need to contend for. Hence, organize and co-operate. As the A. S. of E. has the best plan—a plan that all other farmers' societies are patterning after—it is certainly wise to join this society

Every member, every organizer, every local union should see to it that every god farmer is brought into the organization at once.

Necessity for Organization

If one point was emphasized more than any other at the Annual Meeting, it was the necessity for rapid organization.

At the meeting such terms were arranged that will make the work of organizing more profitable and thus justify good people in undertaking the work.

In the future organizers will be commissioned and clothed with certain authority, also it is the aim of the National Union to protect them from unauthorized and inefficient people. This is not intended to operate against Local Unions organizing others where there is no organizer, but it is expected where there is an organizer in a district that he will be sent for.

Local, county and state unions are requsted to recommend candidates for organizers. The National Union must largely depend on such recommendations to get the very best men or women for the work. But this should not prevent any person, who is competent, from making application direct.

Women—some of the good workers are women—and in a number of cases, wives, help the husbands. There are even cases where some other member of the family, boy or girl, assists as secretary at home to care for correspondence, finances and even in the meetings.

An Important Request

Having been appointed to organize and look after the general interests of the A. S. of E. in the First Congressional district of Indiana, I earnestly request that each Member at Large in this district send me their name and address at once, as I desire to submit some matters of great importance to them. All farmers who are not members, but would like to see a local society organized in their neighborhood, are also requested to send me their address. I have made arrangements for our national organizer, H. B. Sherman, to be present at a number of meetings, and those who respond first to this call will reap the benefits which always result from one of his addresses in any community. Address

CHAS. A. SPEER,
Fort Branch, Ind.

Organized Forms

Remember that the organized forms of the A. S. of E. are Local Unions, County Unions, State Unions and a National Union.

Three local unions entitles the county to a county union. Five county unions qualifies the state for a state union. Strive for your county and state unions.

A MEMBER AT LARGE is a member who does not belong to a local union. He may reside any where as long as he can be reached by the United States mail. The fee and first year's dues are $1.00 and the Annual dues are $1.00. He receives the official paper as long as he remains a member.

Ten or more people may organize a local union. The membership fee is $1.00 and no more. The charter is issued without extra charge. The dues are $1.20 a year which may be paid all in advance, or 10c monthly or 30c quarterly in advance. The membership fee is all remitted to the National Union, 60 cents of it goes to the organization fund 25 cents for the official paper and 15 cents for supplies and expenses of the National union to conduct all the work. The dues are appointed as follows: 40 cents to the National Union, 30 cents to the County Union and 50 cents retained by the local union. If no County Union is in existence then its share must be held in the local union treasury until such time as it is organized. People joining local unions after chartered must pay the same fee as charter members, viz., $1.00.

SPECIAL MEMBERS are the wives of regular members and their sons and daughters over 14 years of age. They are admitted free.

COUNTY UNIONS may be organized by each local union in a county (or at least three of them sending one delegate and an additional delegate for each 10 members or major fraction thereof.

STATE UNIONS may be organized by each county union in the State (or at least five of them) sending two delegatess and an additional delegate for every 100 members of the society in the county.

Above is a synopsis of the conditions governing the various unions that all officers and members should be perfectly familiar with. Each member and officer should, however have the complete constitution and by-laws. They were printed in November 15th issue or may be had for a two cent stamp, or ten cents a dozen.

Conventions and Meetings

This column is at the command of members, officers and organizers to advertise their meetings. Use it and you will find it powerful to secure attendance.

PROVINCE OF ALBERTA, (Canada), at Edmonton, December 8, 1905. A convention of all farmers' organizations. The A. S. of E. members should turn out in force, as this convention will mean much for the future of the Society in Canada, but immensely more for the welfare of Canadian agriculture. Correspond with Nester Noel, Riviere Qui Barre, Alberta, Can., or Wm. J. Keen, Edmonton, Alberta, Canada.

INDIANA CORN GROWERS' ASSOCIATION will meet in room 67, State House, Indianapolis, Wednesday, Jan. 3, 1906. A. G. Mace, Secy., Lexington, Ind.

WISCONSIN, STATE CONVENTION at Eau Clair, Wis., Jan. 12, for the purpose of organizing a State Union of the A. S. of E. All local and county unions and members and farmers generally take notice.

ST. CLAIR, (ILL.) COUNTY UNION. A county union was organized for St. Clair county, Ill., at Lebanon, Nov. 4. The meeting was earnest and enthusiastic. The officers elected were Otto Rumer, Mascoutah, president; L. N. Staats, Lebanon, secretary; German Frey, Summerfield, vice president, and Philip Richter, Mascoutah, treasurer.

Addresses were delivered by secretary-elect and state organizer C. O. Drayton. The next meeting will be held the first Saturday in April, 1906.

FRANKLIN COUNTY, MO., members of the A. S. of E., are urged to attend the next county meeting with Japan local union on the first Saturday in January (Jan. 6), 1906, beginning at 10 a. m.

I will never forget the fine time we had with tihs union Sept. 30th last. This occasion was a mass meeting and basket dinner. My dear farmer friends, you don't know how much you are missing when you fail to attend one of these meetings.

I cordially invite every member to come to this next meeting and bring a friend along. Also bring or send 25 cents to Mr. Richard Ford, secretary of County Union, Sullivan, Mo., which you are to pay to defray the expenses of your delegate to the Annual Meeting. You will think the 25 cents invested was worth ten dollars when I tell you of the great men at the helm of your society; of the great work done and how this movement to give farmers EQUITY has spread.

This means that farmers are coming to the front and will soon be there if you are loyal to the plan of the A. S. of E.

Rally men, rally into the open door,
Who would be a traitor and victory on before?

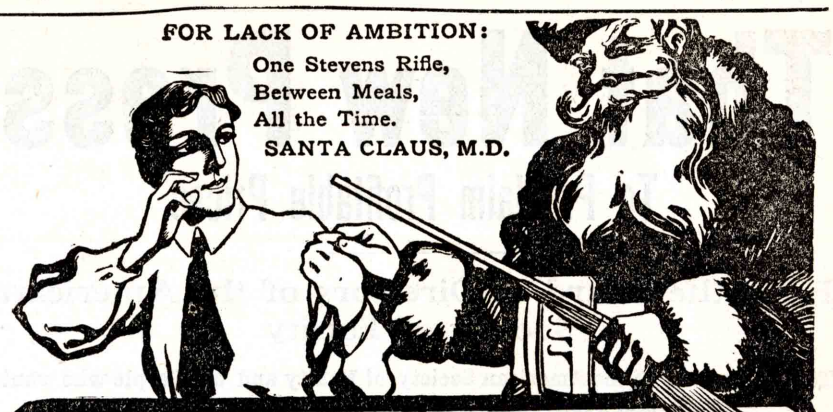
In conclusion I want to say that I am the county organizer and lecturer. If you want to make an appointment let me know ten days ahead. Address, C. H. Calvin, Sullivan, Mo.

The Good Time Season

The good-time season
Is a-comin' right along;
The whole world's singin'
Of a jubilation song!

Fields have brought you plenty—
Kind reward of toil,
That song of jubilation
Is an echo of the soil!

Oh, the good-time season
Is happy on the way,
An' you'll hear its music ringin'
In a regular hooray!



STEVENS FIRE ARMS

are a sure cure for "What shall I do?" or any form of listlessness. A "Stevens" may be prescribed with perfect confidence for any bright American lad. *It has been the making of many a boy*, rousing him from a state of mischievous idleness to wide-awake, quick-witted usefulness. It raises his self-respect by showing him how he can be a real help in ridding the farm of thieving birds and damaging rabbits or foxes. It stirs his ambition as a hunter and trains him to be careful, quick and ready. It takes him out of doors at all seasons of the year, giving him healthy exercise and developing vigorous, manly qualities.

There is nothing you can give your boy which will tend more to make him manly than a Stevens Firearm.

RIFLES FOR BOYS:	
"Stevens-Maynard Jr."	$3
"Crack Shot" . . .	$4
"Little Krag" . . .	$5
"Favorite No. 17" .	$6

Our Catalogue of Shotguns, Rifles and Pistols, Free

Send two 2-cent stamps, to cover postage, and we will mail you free a 140-page book on Stevens Firearms, their variety, selection and care; also much valuable information in regard to ammunition, sights, targets, etc. Every lover of a gun should have it.

Insist that your dealer gives you a Stevens. If he can't or won't, write direct to us and we will send, express prepaid, any Stevens Firearm on receipt of catalogue price.

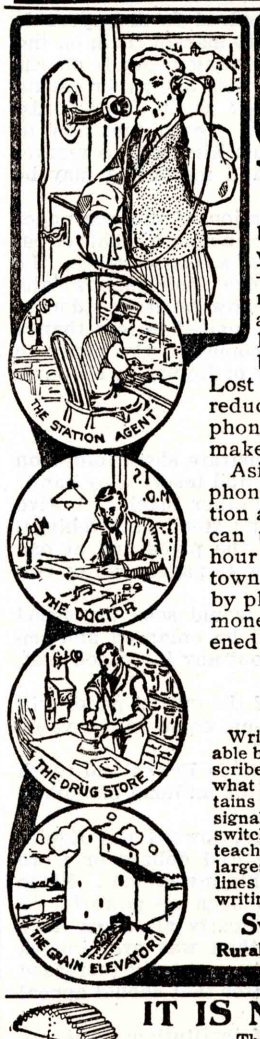
PUT YOUR FARM ON A BUSINESS BASIS



WITH a telephone in your house you are in constant communication with your grain, stock, and produce buyers, your bank, your station agent, your grain elevator, your implement store—everybody with whom you have business relations. Farmers with telephones are prosperous and successful. You can keep informed daily on market quotations, buying and selling most advantageously. Lost time when machinery breaks down is reduced when broken parts are ordered by phone. A phone saves trips to the station to make inquiries for cars for shipping.

Aside from saving time and money, the telephone makes farm life more pleasant. Isolation and loneliness are things of the past. You can talk with neighbors and friends at any hour of the day or night. Shopping trips to town are saved, for anything can be ordered by phone. A doctor can be hurriedly summoned when the life of a loved one is threatened by illness.

Our 80-page Rural Telephone Book is Sent Free on request

Write before the limited supply runs out. This valuable book tells how to organize a company, secure subscribers, build lines, and install instruments; advises what to use and where to buy; shows cost per mile; contains models for franchices, by-laws, rules, codes of signals, contracts; has illustrations of telephones, switchboards, tools, supplies and wiring diagrams; teaches how to remedy telephone troubles. It is the largest and most complete book on rural telephone lines ever published—valuable and instructive—worth writing for. Write while your mind is on it.

Swedish-American Telephone Co.

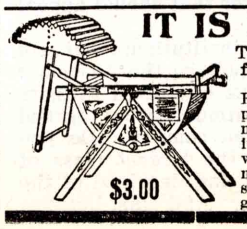
THIS 80 PAGE RURAL TELEPHONE BOOK FREE!



IT IS NOT A QUESTION "Shall I get a Washing Machine?" That is answered "yes". The thing to decide is, "What Washer is best for me?" If you answer right you will purchase a

PEDIGO PERFECTION WASHER

Every ounce of effort put forth counts **on the clothes.** No gears to waste power. The motion is only a light forward and backward swing of the arm—no back bending. Strength cannot be saved better than this washer does it. Will wash **to perfection** a lace handkerchief or a carpet. The most wonderful part of our proposition is the price, only $3.00. Why pay $10.00 or more for pretty talk and a complicated machine? Your money back if not satisfied is the way we sell Pedigo Perfection Washers. Try one on our guarantee. **COONER & FORTUNE CO., Indianapolis, Indiana**

That New Press

To Proclaim Profitable Prices

From the Board of Directors of the American Society of Equity

To the Members of the American Society of Equity and all People who want Steady and Profitable Prices for Farm Products to Prevail

GREETING:

More Than One-half of Successful Farming is in the Marketing of the Crops.

This statement is literally and absolutely true. Yet, until a few years ago the world simply stood helpless and stupid over the problem of the distribution of farm crops. Until three years ago there was not one institution or newspaper in the country that attempted to teach farmers how to market their crops on a rational plan, such as would preserve to them the just fruits of their toil, and returns on their investments.

Today there is not an institution, but one, in the country that is trying to solve the farmers problem of marketing, notwithstanding that this is really more important than producing. Also among more than two hundred farm papers printed in this country and about twenty-five printed in Canada, only one paper is teaching the most important part of farming; viz., the way to market the crops, always profitably, and equitably, to the consumers.

To make this statement clear we will say, that over two hundred farm papers in the United States and Canada are devoted to teaching farmers how to produce crops, while only one paper is devoted to the more important problems of marketing them on a plan that will insure profitable prices always.

There is only one paper in America teaching the correct system of marketing crops. That paper is Up-to-Date Farming. It is teaching the only plan that will ever solve the farmer's problem of the distribution of his crops so he will be protected in their value, above all other people and classes, yet, when the new system of marketing is established. Consumers will be protected in the prices they pay as they never were under the old system.

Other farm papers have been invited to join in this movement. The publisher of Up-to-Date Farming has appealed to them. The American Society of Equity in annual meeting appealed to them; tens of thousands of members have appealed to them to help them get profitable prices as well as to teach them how to raise the crops, but until the present time they have refused. They prefer to let farmers fight their battle of marketing, each single handed, against the organized bands of raiders called boards of trade, stock yards associations, commission men, etc., rather than try to change condition, that are good enough for themselves, but the worst that could possibly by devised for the farmers.

Therefore, knowing that there are over two hundred farm papers to teach how to produce crops and only one to teach how to market them on the correct plan; and as more than half of successful farming depends on the correct marketing of the crops, does it not follow that this one paper should have as large a circulation as all of the others combined? Or in other words, should not each farmer who takes any farm paper to teach him how to produce crops, also take the only paper that will teach him how to market them profitably, so the balance between production and marketing may be maintained?

But how shall this be accomplished? The circulation of the one paper —UP-TO-DATE FARMING—is now 150,000 copies twice a month. This circulation overtaxes the present printing facilities. As a consequence, the printing is prolonged, so that many subscriptiont receive their papers late. If the printing facilities were adequate, there would now be issued double the number of copies, and they would be printed and mailed in less than a week. Who can estimate the power of these extra copies of the paper to educate the people and build up the American Society of Equity in all parts where now unknown.

Over $1,600 Are Subscribed Already.

At present the paper is first printed; then each separate sheet folded on another machine; then the different parts are gathered and inserted by hand; then stitched on a machine, and then trimmed on another machine. Five operations. With the new press, the printing, pasting (istead of stitching), folding, gathering and trimming, will all be done by the press and at one operation, and will cover a range of 16, 20, 24, 32, 40 or 48 pages, one or two colors.

Also, with adequate printing facilities the paper would soon be issued weekly and a German edition printed. Also it would be enlarged and improved in many ways, all of which could be done without any increased cost, because of the saving in printing that will result.

To instal a plant that will print a million copies of the official paper will cost about $30,000. This is a large sum of money—a sum equal to the value of three fine farms. But what will it mean to farmers?

Such a press, through its ability to proclaim Profitable Prices and teach the only way to secure them, will be worth hundreds of millions of dollars to farmers in the increased prices of crops.

The individual who subscribes ten dollars, or more, toward the Equity press and equipment, will soon get returns of a hundred dollars or more through better prices, besides the direct earnings on his investment. Since UP-TO-DATE FARMING with a small circulation has been so powerful to teach a new system of marketing so that prices on nearly all crops have been made higher and have been better maintained than was ever known before; who can estimate the power of this paper with a greatly increased circulation; yes, of a million circulation? This is a matter that should appeal to every farmer in the United States and Canada.

The old line newspapers are largely the tools of institutions that are growing wealthy by manipulating farm products. We believe the Associate Press has been given a hint to not give publicity to the organized farmers matters, consequently, it was impossible to have the minimum prices, agreed on at the last annual meeting, telegraphed all over the country. Do you begin to see how you are handicapped? Just think of the largest class of people in America, representing the greatest industry, being deprived of the great news service represented by the Associated Press. And this, because the American Society of Equity they would all be benefitted, but fear they other industries and institutions don't understand that through the rise of to equip a publishing plant where the official paper could be produced in would be injured as by former farm organizations.

At the annual meeting of The American Society of Equity, the opinion was general that the Society should own its own official paper. Also the sentiment was that the first step in this direction would be for the Society to equipp a publishing plant where the official paper could be produced in quantities and of a quality to properly serve this great national farmers' movement. Following is the report of the committee:

Report of Committee on Equity Press.

Gentlemen:—This body having decided to own its official organ, we, your committee on Equity Press, recommend that steps be taken immediately to purchase and install said press and necessary equipment to the end that this organization may be fully equipped to herald forth to the world the grand truths of Controlled Marketing:

And we further recommend that there be an assessment made on each member of 25 cents, and that each member of this body be made a committee to wait upon its respective union or unions setting forth the necessity of this important move, excusing from payment all who have heretofore donated to this fund.

Respectfully submitted,

C. G. Billings, Wis., Chairman; Julius Philips, Mo.; A. B. Shafer, Nebr.; D. B. Greathouse, Ky.; J. T. Patterson, Ark.

As this report shows, the committee, and the delegates in attendance, recognized the importance of a new press "to herald forth to the world the grand truths of Controlled Marketing," and have made a recommendation how to secure it But we fear the 25-cent assessment will not raise the required sum.

A press and equipment, such as will meet the requirements of the offical paper up to the point where it has one million members will cost, we will say, approximately—$30,000. This sum should be raised and raised at once.

What is done should be done promptly. Prices of staple farm crops are slipping down all along the line. We are largely deprived of the newspaper publicity that was given our movement two years ago when the contest was on for dollar wheat. The newspapers then thought it could not be done, but when they saw it could be done and they see the power of farmers exerted in many and varied ways, they appear to have taken fright. But the development must not stop. Prices must be sent up to the equitable basis and maintained there. What we lose from the general newspapers we must make up in our own.

How can the Equity Printing Office be equipped? We will submit a plan which should appeal to all who want good prices and who want to make a good investment.

1st. Let the directors decide on the amount to be expended.

2nd. Divide the amount into shares of $10.00 each, and offer them to members and others who may want to make a good investment in amounts of $10.00 or multiplies thereof.

3rd. The assessment plan as recommended by the Committee should be carried out. Also members and others are still encouraged to make voluntary contributions of any amount from 25 cents up. The part of the equipment represented by such assessments and voluntary contributions to belong to the Society, and the rental as provided below, shall be paid into the treasury of the Society the same as paid to other shareholders.

4th. Until such time as the Society shall have completed its negotiations for the purchase of the official paper and publishing plant it is agreed that J. A. Everitt, present publisher of the official paper, shall pay to the shareholders fifteen (15) per cent. annual interest on cost of the new equipment, keep the plant insured for the benefit of the shareholders, and make all necessary repairs at his own expense.

5th. The American Society of Equity reserves the right to purchase the press and equipment at any time on the payment of the original cost, less one-third of the amount paid out in dividends to the shareholders. This one-third to represent the depreciation on the plant by wear and tear.

It will be like this: Suppose the Society buys the press in one year, the shareholders will get their original investment back and 10 per cent. If the Society does not purchase it in six and two-thirds years, the shareholders will have all their money back and the plant will yet be in prime condition. In ten years they will have their original investment back, 50 per cent. in addition and the plant, which would still be worth a large sum.

All who want farmers to come to the front, profitable prices made and maintained and uncertainties of values at an end, should fill out the blank below and send it in at once.

Done by the Board of Directors of the American Society of Equity, this 20th day of November, 1905.

J. A. EVERITT, President; M. Wes TUBBS, Secretary; ANDREW J. SMITH, Treasurer; W. C. WEBBER, C. N. STACY, C. O. DRAYTON, W. C. BALLINGER, Directors.

Compulsory Co-operation

You see a crowd of boys make a raid on an orchard. One bold, active lad climbs the tree, shakes down the apples while the others fill their pockets.

In all general co-operative movements among men it is much the same way. There are usually a few leading spirits—the pioneers—who do the hard work while many more stand back or follow in the wake, bear none of the brunt of the battle, but share in the benefits.

No more vital matter is before the farmers to-day. Shall a few bear all the burden of expense and do all the work while they cannot reap more than their proportion of benefits?

What is needed is something that will compel the co-operation of all to be benefitted and prevent the stubborn "dumpers" from discounting the efforts of organized farmers.

This is all up to the organized farmers themselves. There are remedies. We need hardly propose them. In your local union meetings bring this matter up and dispose of it, then write to your official paper and tell us how you solved it.

This will be interesting work; it is legitimate work; it is your duty. If "self-preservation is the first law of nature," you are only applying natures' first law when you take steps to preserve to yourselves the equitable reward for your labor.

The New Press

The delegates at the Annual Meeting wanted it and voted in favor of it. The members and local unions want it. All the farmers in the country want it, and the publisher of the official paper wants it to herald profitable prices, to teach how to obtain them and to confuse the speculators and gamblers.

It is to belong to the American Society of Equity and will be the first step toward the farmers owning their own official paper, and their own printing plant.

Come to think of it, what could possibly be more valuable to agriculture in America than a great publishing house belonging to the farmers, as the government printing office in Washington belongs to all the people? Here could be printed the society paper in English, German, French, etc. Bulletins could be issued at intervals, givings conditions of crops and advice about growing and marketing them. This publishing house could be a real school from where farmers would learn the real truth and get real, live practical advice about draining, irrigation, breeding live stock, grain, vegetables, etc.; stamping out disease, fighting insects and blight; guarding the farmers against weeds and instructions as to the best ways to eradicate them and in a thousand ways benefitting agriculture because of the concentration of effort to one central head and the superior facilities that naturally will be at hand.

The farmers' printing office should be second only to the government printing office, as agriculture is second only to the combined industries of the country.

Let us have that new press quickly.

This showing is encouraging. The New Press will certainly soon be a reality. Every reader's attention is asked to the action of the Board of Directors of the A. S. of E. as published on another page with reference to the New Press. Let us try to greatly increase the list before the next issue.

I believe the A. S. of E. is the only thing to bring farmers to the front and put them on an equality with other business men.

You will find enclosed two dollars—one dollar for "that new press." I hope the time will not be long before you can get it.—S. W. K. Sexton, Wrightstown, N. J.

May the day speedily come when our grand and good official organ, Up-to-Date Farming, will visit us weekly with its grist of cheering and inspiring articles.

It is the greatest educational power for farmers in the field of journalism to-day, the only true exponent of their trials and tribulations.—M. H. Markum, Hackney, Kans.

Inclosed please find $1.00 for renewal of my subscription and 50c for that new press. I like Up-to-Date Farming better than any other farm paper. Every farmer would find it profitable to take it and practice its teachings. It is the only paper SHOWING him how to make more money.—Fred W. Struck, Newburg, Ind.

I think Up-to-Date Farming the best farmer's paper published.—H. P. Hudson, M. D., R. R. No. 3, Brownville, Tennessee.

I will do all I can for Up-to-Date Farming and wish it every success. It is the best friend the farmer ever had in advocating his rights.—Peter Kavanaugh, Emmet, Mich.

Inclosed find $1.00 for renewal of subscription for two years' I appreciate the masterly work you have accomplished for the betterment of the condition of the American farmers. May you have the support you so much deserve and accomplish all you desire in liberating the farmers from commercial bondage.—Leander Simmons, Allegan, Mich.

I freely give $1.00 to help on that New Press. Am anxious to see it installed and hope all will soon realize its importance and do their part toward getting it.—W. J. McGee, Yorker, Miss.

Give us a clear and bright and upright paper published once a week as soon as possible. You have certainly done a wonderful amount of good in the few years of our noble and good society's existence. May God bless your labors ten or an hundred fold in the future. This depends upon the support you get by those to be benefitted. All "wind" and no fuel the fire must go out, so you will please find inclosed check for five ($5.00) dollars which apply as follows: $2.25 to the Press Fund, 75c for convention papers, and $2.00 for extension of my subscription.—John J. Erford, Carlisle, Pa.

Note.—Besides acknowledging our thanks for such liberal support it will be interesting to all readers of Up-to-Date Farming to know that Mr. Erford is paid the farthest in advance of any subscriber on our list. FEBRUARY, 1912 marks his expiration date.—Ed.

Enclosed find a list of Grand L. U. (No. 1489.) This union ought to do good work. Mr. Williams is Probate Judge, Mr. Sharp, County Attorney; Mr. Mouser, County Clerk; Mr. Grim, County Treasurer; Mr. Darnell, Registeror of Deeds; Mr. Bennett, Postmaster; Mr. Mitchell, Editor Canadian Valley Echo; Mr. Squires, Editor Grand Republican Progress.

I think every member owns a farm and all see the great need of organization and co-operation among farmers.—L. S. Meyers, Org. Grand, Okla.

I have been a constant reader of Up-to-Date for the past three years and a close watcher of events. To say that I am now satisfied that your plan will prove successful is but expressing a firm conviction.

I have been watching the course of events from all over the field and have been in the fight for equity myself ever since I caught the battle cry "Controlled Marketing."

We are in the fight to win or die. Your paper has done a great deal of good here and many of the F. E. and C. U. boys are careful readers of it. I am willing to do my part so inclose $1.00 for that new press.—D. Matchett, Wooster, Ark.

Enclosed find money order for $3.00 for which I wish you to send a copy of the "Third Power" book to each of the following gentlemen to help spread the greatest movement of the age.—C. A. Detweiler, R. R. 9, Clinton, Mo.

TO secure the biggest crops of corn, fertilizers must be used liberally. Apply at least 500 pounds to the acre—with 3½ per cent. nitrogen, 8 per cent. available phosphoric acid, and 9 per cent. POTASH.

POTASH is a most important factor in corn culture. Our practical books for farmers are yours for the asking—no cost or obligation of any sort, and a vast fund of invaluable information in them.

DRY FEET-GOOD HEALTH

Buy rubber wear that's all rubber, then you are safe. Pure rubber is expensive. That's why some manufacturers cheapen it with substitute fillers. That's fatal to wear; your boot leaks in no time. Not so with

BUCKSKIN
Brand Rubber Boots and Shoes.

They are guaranteed to be all pure rubber—finest quality made. Note, too, that they are reinforced at every point where ordinary rubber wear breaks. That's another reason why they outlast any other kind you can buy. Guaranteed and sold on 10 days trial. Save your money and your health by buying Buckskin goods—branded plainly on every boot leg and shoe heel. If you can't get that kind from your dealer, write us. We'll supply you direct and send you book showing how they are made.

Buckskin Brand Rubber Boots and Shoes received the Grand Prize for Quality at the St. Louis Exposition.

BANNER RUBBER CO.,
400 Bittner St., St. Louis, Mo.

A Real Rubber Boot—every inch of it

This boot is especially made for hard wear. Only the best *new* rubber and duck are used. We recommand the

Security
LYCOMING DUCK BOOT

to Farmers, Stockmen, Fruit-growers and every man who needs a *good* boot. Like everything else, it will wear out, but it is built to give the greatest amount of satisfaction possible. Boots made of *old* rubber cannot stand the wear—there's a dollar's worth of pure rubber and good duck for every dollar spent in the "Security." All "Lycoming" Rubber Boots and Shoes are of the highest quality only.

Go to your dealer and *try on a pair.* Note carefully how well made they are. If your dealer does not have them in stock he can easily get them for you.

Quaker City Feed Mills at Reduced Prices.

It is announced that the famous Quaker City Feed Mill is on the market at a reduced price this year. Whoever buys a Quaker City buys what is confessedly the standard, and has been for nearly 40 years. It is ball bearing, easy running, has separate hoppers for ear corn and small grains and surely does more grinding for power used than any other. We show one of the eight sizes. The manufacturers, The A. W. Straub Co., 3737 Filbert St., Philadelphia, and 47-49 S. Canal St., Chicago, send the Quaker City anywhere on ten days' free trial, freight paid to destination. Catalog free. There seems to be no reason why every feeder should not afford himself a Quaker City this year.

STATIONERY
For Up-to-Date Farmers

Every farmer should use neatly printed stationery. It is business-like and gives a tone to your correspondence. Some business houses sort out the printed envelopes from their mail and open and attend to them first. Members of the A. S. of E especially should use up-to-date letterheads and envelopes. We offer special stationery containing the seal in a beautiful design. Your name and address, and name of your farm or business also if desired, nicely printed. On the reverse side of the paper are printed appropppriate circulars, such as "Farming Exists by Divine Right," "Where Duty Lies", etc. You will spread the movement with these messages if you order some stationery. Price, PREPAID

100 Letter Heads	100 Envelopes $1.00
250 Letter Heads	250 Envelopes $1.80
500 Letter Heads	500 Envelopes $3.25

AMERICAN SOCIETY OF EQUITY
INDIANAPOLIS, INDIANA

Third Annual Meeting

(REPORT CONCLUDED)

Secretarys Report

M. W. Tubbs, secretary, now read his annual report and address as follows:

Mr. President, Delegates and Members:

Economic movements that have been dependent upon educational advancement have always been confronted by opposition from sources where help would be expected. The American Society of Equity is no exception. It has had to fight the battles alone and unaided. Its plans were new and radically different from all previous attempts to benefit farmers by organiaztion. You all know the obstructions placd in its way and the reluctancy with which even the farmers have accepted the new truths, especially during the first two years of the society's existence.

The veteran in organization might have anticipated these conditions and devised plans that would have been perfect at the start. This is not probable, however, as history fails to record any important economic evolution that has not been marred by errors. Here again the A. S. of E. has unfortunately followed numerous precedents and has mistakes to its credit or discredit, as you prefer to consider them. But mistakes are of value and it has been truly said, "He who makes no mistake, makes nothing of value." The fact that the American Society of Equity, though it made mistakes, has grown and flourished, has gained in membership and influence, has become recognized as the leader among farm organizations and its plan and objects have been endorsed and recommended by the leading and subordinate farm organizations all over the world should inspire that confidence among its own people—the farmers—as to win their universal support.

The principles of the American Society of Equity have been weighed in the balance of a most exacting public but in no case have they been found wanting. Many have sincerely doubted their practicability, but none have assailed their entire justice. Criticisms have usually been directed at the promotor as the critics early recognized that the principles were correct and impregnable. Their only hope of success in squelching this new idea of controlled marketing, as the power to compel profitable prices, lay in creating a public sentiment that the whore thing was merely a scheme of a shrewd editor to build up the circulation of his own paper. That they have been diligent in this most despicable warfare needs no reiteration. That it has had a powerful influence in holding us back is too evident to be denied and that it has caused the loss of thousands of dollars worth of time in explaining and counteracting this evil influence. besides multiplying the expense of the National Union in preparing and distributing tons of additional literature to convince and convert a willing public made sceptical by their frequent warnings, the expense account will show.

But, granting them credit for all of these hindrances they have collectively made less progress than the cause of Equity and stand today condemned for opposing the best interests of our most numerous class—the farmers.

In face of such opposition coupled with its undoubted effect in holding back the rapid development that was anticipated when the financial policies of the society were first formulated on the noble principles of economy, it is not surprising that all who have labored in the promotion of the movement have sustained financial losses and made personal sacrifices. It has been a matter of wonder why farmers usually keen to grasp an advantage when offered them, have refused to accept and assist in this movement. The answer, I believe, based upon my intimate knowledge of conditions as reflected by the correspondence, is loud sounding in the covert or open opposition of other farm papers, and the secular press owned and controlled by those who have profited at the farmer's expense. They must be held accountable and made to pay the penalty for their misdeeds.

The society is to be congratulated in having a man at the helm with a determination that knows no defeat, with a pen many times mightier than the sword and with an energy bordering almost on the superhuman. Without such a leader success could not have been atained and farmers today, as in the past, would have been powerless to maintain even living prices on their present bounteous crops.

It is to be regretted that the price of victory has fallen so heavily on Mr. Everitt personally. He has uncomplainingly sacrificed much of his personal interests for the liberation of the American farmers from the greed of the class that has occupied the position of vantage between our two greatest classes—the producers and consumers. Whether his effort will be appreciated and his losses made good by the farmers who reap the reward of his labors, or whether he will be forgotten and unhonored remains for the historian to record, but certain it is he will have the satisfaction of knowing that he has set the thoughts, the ideas, the plans in motion; yes more, has kept them moving, that are responsible for more genuine, enduring good for the agricultural classes, for legitimate business enterprises of all classes and for humanity in general, than any other man that ever lived in this or any other country.

* * *

The preceding general report throws necessary light on the following statement and the statistical report now submitted:

The official paper—Up-to-Date Farming— is so closely related to the society that for practical results its subscribers may be considered synonomous with the members of the society. Hence its growth shows the growth of the society.

On December 24, 1902, when the A. S. of E. came into existence there were approximately 30,000 subscribers. Many of these were women and men, not farmers, living in villages, etc., who had subscribed for the paper more to get some premiums than for the paper and practically all such have left our ranks, leaving only those interested in and willing to support a principle.

About one year later, October, 1903, the subscription list had grown to 49,561 or a gain of nearly 66 2-3 per cent. In October, 1904, there were 82,-527 subscribers while fully 10,000 non-farmers had been dropped from the list. This was a gain of about 50 per cent. while in October, 1905, the number has increased to 137,826 or a gain of over 60 per cent. In comparison with the gain during the first year, which was about 20,000, a gain of 55,-199 may be recorded for actual increase during the period between October, 1904, and October, 1905, against 19,561 during a similar period of the first year or 32.966 during the second year. With this favorable showing and the growing public sentiment in favor of the A. S. of E., we may confidently expect to reach the quarter million mark, 250,000, before October, 1906. Then, when it is realized that there are several times as many non-members and non-readers of the official paper co-operating on our plans, we can begin to realize why profitable prices are largely maintained and why speculative influences are powerless to prevent them to any considerable extent, or keep prices permanently depressed.

There has been chartered approximately 150 Local Unions. About 400 of these have been organized under or have ratified and are now working under the new constitution. There are 70 active under the old constitution that have made recent reports while there are about 1000 that have not yet ratified the late constitution which I confidently expect will fall in line under the revision made at this meeting.

In the matter of County Organiaztion, 12 states have participated. There has been 58 county union charters issued.

To avoid repetition and save time the financial report will all be included in the report of the Auditing Committee. This was deemed advisable owing to the fact that it will cover the entire period of the society's existence. From this report it will be observed that for the past year the society has been practically self-sustaining.

It is a fact to be greatly deplored that many secretaries are entirely unqualified for the position they hold, and will pay no attention to requests for information, even when blanks and prepaid envelopes or postage are sent them from headquarters. To illustarte,

INDIANAPOLIS, IND.

early in August I mailed 270 circular letters with prepaid return self-addressed postal cards to get information desired regarding county organiaztion, and 52 cards were returned. Some of these several days past the time limit indicated. The last report asked for and strongly reinforced in two issues of the official paper was the special report regarding Local and County Unions—number of regular and number of special members—name and address of secretary and definite information as to whether they had ratified the new constitution or not. These to constitute the base of our report and the basis of calculation in planning for the future. Behold a grand total of 127 returned. Then too, reports we do receive are sometimes so abominably bad that we are compelled to return them for interpretation, while others we try to accept and guess at what is meant or intended. Great care is urged and should be exercised in the selection of secretaries.

Regarding the field force, there are approximately 500 men giving the work more or less of their time and attention. and nearly 300 of these are ready to make the business of organization their principal business, providing this meeting devises plans and provides funds that will pay them a fair compensation for the time and effort spent. Ample provisions for our organizers is the most important matter for the consideration of this meeting and upon its proper solution depends the future development of this movement.

Respectfully submitted this 24th day of October, 1905.

M. WES TUBBS,
National Secretary,
The National Union of the American Society of Equity.

Committee on Local Press

We, the Local Press committee, recommend:

First, that a special effort be made to select secretaries for local unions, who will take a special interest in conducting an Equity Department in all of their local papers, for the purpose of introducing the objects of the Society into every home, and keeping the same before them continually.

Second, that these departments be supplied regularly with notices of meetings and a pressing invitation for visitors to attend; also reports of all additions to the Local and everything of special interest that may be accomplished; also all items of interest; also liberal extracts from our official paper.

Third, that each District Organizer make arrangements with some aggressive paper in his district which will take a special interest in binding together the local societies of his district and in furnishing sample copies of special editions to send to such lists of farmers as may be furnished, especially from unorganized territory.

Fourth, that local or county unions, if there be such, make a special effort in each county to raise sufficient funds to place Up-to-Date Farming in the home of evry farmer for at least three months, and that the same be distributed through the local district papers which publish an Equity department.

Fifth, that a special effort be made to get every publisher of a local paper enrolled as a member of the American Society of Equity.

CHAS. A. SPEER, Ch'rm.,
Ft. Branch, Ind.

[The National Union will be pleased to send free to any newspaper a heading suitable for a farmer's department. A print of the head is shown herewith.

This is for a single column department, but we have a larger one for a double column department. Put this matter up to your publisher and close the deal.

In addition to the committee's report, we recommend a "corresponding secretary" to attend to the publicity feature and have referred to it elsewhere in this paper. Also, the society organizer migh become the agent for the local paper that co-operates with us.—Ed.]

RESOLUTIONS ON RAILROADS

Whereas, All the industries except farming being organized has created a crisis in our economic affairs that calls for immediate action by every citizen interested in a square deal and good government; and

Whereas, The policy persued by railroad companies in discriminative freight rates has resulted in the building up of one commodity at the expense of another and making a prince of one man and a slave of another; and

Whereas, The wealth and power of our country rests in its soil and to permit railroad companies to exploit and cripple agriculture is a crime against American civilization and a neglect of duty for which we are paying a severe penalty. Therefore be it

Resolved, That it is the sense of this convention that the remedy for this evil is in increasing the powers of the Inter State Commerce Commission along the lines laid down by President Roosevelt.

Report of Committee on Minimum Price of Farm Products

The committee on prices for farm products for the year of 1905, submit the following report:

(SEE MINIMUM PRICES ON PAGE 3.)

We further recommend that all farmers keep these prices in mind, hold for them and ask them. The farm price in each case to be determined by deducting freight to the central markets, and a reasonable commission for handling. Eastern farmers should base their calculations on eastern markets, when the Chicago market is at the minimum.

Respectfully submitted: G. W. Wilson Chairman, Illinois; Wm. Hill, Wisconsin; John G. Koch, Indiana; Otis Rockett, North Carolina; C. F. Porter, Florida.

Accepted.

REPORT OF AUDITING COMMITTEE.

To the National Union:

We, your Auditing Committee, have investigated and looked into the methods of keeping accounts of the society, and report upon them as correct and satisfactory up to this time.

The revised constituion and by-laws proscribe the methods of keeping accounts for the future, and the officials should be held strictly accountable for reports in accordance therewith.

N. C. Crawley, Chairman; C. O. Drayton; Sam. J. Hampton, Indian Territory; J. H. Burney, Kentucky; Gurley Taylor, Indiana.

Accepted.

AFTERNOON SESSION, WEDNESDAY, OCT. 25TH.

For this session, as well as for others, lectures and speeches were scheduled, but they were crowded out on account of the more important business matters.

The first event of the afternoon session was taking a photograph of the delegates. Seventy-three of them, including the National officers, went to the front of the State Capitol, where on the broad steps and the grand capitol building as a background, a beautiful and clear photograph was made of the first real convention of American farmers, met to agree on prices for their own products.

ELECTION OF OFFICERS.

For President—J. A. Everett, of Indianapolis, Ind.

For Vice-President—J. B. Whiting, of Interlacken, N. Y.

For Secretary—M. Wes Tubbs, of Indianapolis, Ind.

For Treasurer—A. J. Smith, of Indianapolis, Ind.

For Directors—W. C. Webber, Rochester, Minn.; C. O. Drayton, Greenville, Ill.; C. N. Stacy, Amelia Ch., Va.; I. F. Bellenger, Royal, Ala.

The balance of the afternoon session was taken up by addresses. Rev. Touhy, of St. Louis, Mo., who is an enthusiastic member of the A. S. of E., and who will work for the organization in the future, entertained the convention. N. C. Crawley, of Wisconsin, delivered a very able speech, characteristic of the addresses he makes before his Wisconsin meetings. Informal talks and discussions occupied the time until 5 p. m., when adjournment was had, with date for next meeting not set.

Don't forget; you haven't got everything good out of this issue if you miss the advertisements. Read them. Write the advertisers.

WORDS OF PRAISE WELL MERITED

BY A WELL KNOWN ARTICLE.

So much has been written by the standard medicial authorities, of all the several schools of practice, in praise of the native, or American, medicinal plants which enter into the composition of Dr. Pierce's Golden Medical Discovery, that in attempting to quote from the various works on *Materia Medica* one hardly knows where to commence, since they are so voluminous that only the briefest and most imperfect reference can be presented in a short article like this.

Briefly then let us say that the "Golden Medical Discovery" was named from the sturdy little plant Golden Seal, the root of which enters largely into its composition. Besides this most valuable ingredient, it contains glyceric extracts of Stone root, Queen's root, Black Cherrybark, Bloodroot and Mandrake root.

Finley Ellingwood, M. D., an eminent practitioner of Chicago and Professor of *Materia Medica* in the Bennett Medical College of that city, in his recently published work on Therapeutics, says of Golden Seal root: "It is the most natural of stimulants to the normal functions of digestion. Its influence upon the mucous surfaces renders it most important in catarrhal gastritis (inflammation of stomach) and gastric (stomach) ulceration."

Many other authorities as well as Dr. Ellingwood extol the Hydrastis (Golden Seal), as a remedy for catarrhal diseases of the nasal passages, stomach, bronchia, gall ducts, kidneys, intestines and bladder. Among these, we may mention Prof. John King, M. D., author of the American Dispensatory; Prof. J. M. Scudder, M. D., in his "Specific Medication"; Dr. Hale of the Hahnemann Med. College of Chicago; Grover Coe, M. D., of New York, in his "Organic Medicines," Dr Bartholow of Jefferson Med. College and scores of other leading medical writers and teachers.

All the foregoing eminent authorities extol the curative virtues of Golden Seal in cases of stomach, liver and intestinal weakness, torpor and ulceration of bowels. Dr. Ellingwood recommends it most highly, "In those cases of atonic dyspepsia when the entire apparatus, including the liver, is stagnant and inoperative." He also extols it most highly in the many weaknesses and derangements peculiar to women and says, "It is a most important remedy in many disorders of the womb." Golden Seal root (Hydrastis), is an important ingredient of Dr Pierce's Favorite Prescription for weak, nervous, "rundown" women

But to return to the "Golden Medical Discovery" it may be said that its curative properties are not wholly dependent upon Golden Seal, valuable as it is, as other equally potant ingredients add greatly to its value and in fact are not less important than the Hydrastis, or Golden Seal.

In all bronchial, throat, lung and kindred ailments, Stone root, Black Cherrybark, Queen's root and Bloodroot, each plays as important a part in effecting the phenominal cures of "Golden Medical Discovery" as does Golden Seal. All these ingredients have the endorsement of prominent practitioners of all schools of medicine for the cure of diseases of the bronchia, throat and lungs.

Of Queen's root, Prof. King says: "An alterative (blood purifier) unsurpassed by few if any other of the known alteratives. Most successful in skin and scrofulous affections; beneficial in bronchial affections; permanently cures bronchitis; relieves irritations; an important cough remedy; coughs of years' standing being cured; aids in blood-making and nutrition and may be taken with out harm for long periods."

Queen's root, Golden Seal root, Stone root, Black Cherrybark and Bloodroot, all articles extolled by leading practitioners of all the schools, as the very best of cough medicines, are made especially valuable when combined with chemically pure glycerine which greatly enhances the curative action of all these ingredients in all bronchial, throat and lung affections, severe coughs and kindred ailments.

Who can doubt the efficacy of such a compound, when scientifically made up, as in Dr. Pierce's Golden Medical Discovery? Who can doubt that it is a most effective remedy for the several diseases for which its ingredients are so highly recommended by the formost writers on *Materia Medica*?

It is in the cure of the more chronic or lingering, persistent, and obstinate cases of bronchial, laryngial and lung affections, attended by hoarseness and severe cough, which if neglected or badly treated would generally have run into consumption, that "Golden Medical Discovery" has won the highest praise from all who have observed its marvelous control over these and kindred affections. It is no cheap compound made-up of trashy ingredients for free distribution, that curious people may experiment upon themselves as with the many fake nostrums so commonly sent out as "trial bottles." It has a forty year record, embracing many thousands of cures behind it, is sold at a reasonable price and may be found in all drug and medicine stores in this and many foreign countries.

It will be seen from the above brief extracts how well "Golden Medical Discovery" is adapted for the cure of all blood diseases, as, scrofulous and skin affections, eruptions, blotches, pimples and kindred ailments; also that it is equally good in all Catarrhal affections no matter where seated, and for all cases of indigestion, or dyspepsia, torpid liver, or biliousness and as a tonic and invigorator in all manner of weaknesses, and in nervous debility and prostration the above extracts amply show.

Much further information as to the properties and uses of "Golden Medical Discovery" and Dr. Pierce's Favorite Prescription for weak women, will be found in a little booklet of extracts from standard medical books which will be mailed *free* to any address on request, by letter or postal card, sent to Dr. R. V. Pierce, Buffalo, N. Y.

All the several ingredients of Dr. Pierce's medicines will be found, from the reading of this little booklet, to have the strongest possible professional endorsements and recommendations for the cure of all the diseases for which these medicines are recommended. No other medicines for like purposes have any such endorsement. They are non-alcoholic, non-secret, safe and reliable.

Live Stock and Dairying

PRODUCTION AND MARKETING

The Trusts Price List

Choice to prime steers	$5.75@6.30
Common to good steers	4.00@5.50
Inferior to common steers	3.10@4.00
Good to fancy cows and heifers	3.00@5.00
Yearlings, good to choice	4.50@6.00
Fair to choice stockers	3.00@3.50
Fair to choice feeders	3.75@4.25
Good cutting to fair beef cows	2.15@2.75
Common to good canning cows	1.40@2.00
Bulls, common to choice	2.50@4.00
Calves, common to good	3.75@5.50
Calves, good to fancy	5.50@7.25

Out of these prices must be taken commission, yardage, freight. The market has been constantly working into this condition, and has settled into it, and is getting worse and more detrimental every day to the shipper's interests. At these figures, the farmers might as well give their products away. Everything favors the buyer, except, perhaps, in the exception of really choice offerings of really prime, young, fat steers. There is always a strong demand for them, no matter what the general market may be, and these cattle alone maintain fair prices. Conditions will remain so until the farmers co-operate.

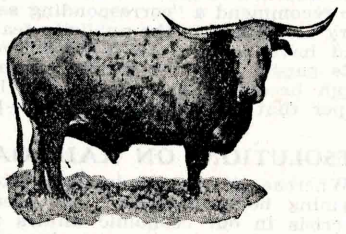
It is a fact, that nearly all class of people are organizing, and co-operating to control their industries. The farmer who has gone to the bottom of things, finds that the basis of "Successful Co-operation" to succeed, must be on a strictly business basis, handled by competent men, and the watch word "pull together."

Are you thinking, our readers, about this important matter? Or do you want to remain in the rut, and at the mercy of the "Beef trusts" through a failure to get together. So enter into the spirit of the "Society of Equity" for controlled marketing, to promote your profits on Live Stock and other products and you will be benefitted.

A good start has been made and the work is being felt and the right spirit is now afloat.

The law of the survival of the fittest holds good in every kingdom mineral, vegetable, animal. What was the fittest a few years ago is unfit now, and in accordance with this law of shifting necessities we find that within our memory the whole gamut of cattle has been run through in supplying the larder with beef. Shorthorns, Holsteins, and the Texas steer have each had their day to shine, or rather to tickle the palates of people and princes. But with the change of conditions regulating profits each of these has run out in turn, and now the stock breeder will have none of them. Indeed the Texas steer, by imbreeding with successive fashionable breeds, is quickly following the track of the Buffalo to complete extinction.

Not many years ago the ponderous steer bred on the western prairies was the best selling beef animal in the world. He was wanted by exporters, by butchers by cattle connoisseurs and by gourmands. To be in prime condition he must be four years old and weight from 1600 to 2000 pounds. Many fine bunches of such steers have been marketed, exhibited at fat stock shows and then sent across the seas to grace the table of my lord, mein herr and monsieur le duc. But times, conditions



and cattle change, and the once highly-rated big steer is no longer profitable.

The demand now is for a younger and fatter animal, something through which the porcelain teeth of the aged can sink wthout effort. To be highly prized and priced this young animal should be two years old, or under, should weigh 1000 pounds, and should be a Polled Angus or a Hereford (as they dress more) to please the buyer. The more blood he has in him of these new fashionable breeds and the sooner after birth he is in condtion to put on the market the better for the profits of the breeder.

The profits of the breeder on this steer are greater than on the old style four-year-olds. The two-year-old matures sooner, sets fat quicker and the better his blood the quicker he fattens—and while he weighs about thirty per cent less than his predecessor, his cost per pound is much less also. The breeder has the expense of his feed and care for only half the time he had his predecessors, one item in cost of raising whch more than compensates for his lesser weight. It is the breeder's maxim that the quicker an animal can be put in condition for the block the greater the proportionate profits. Good breeding, careful feeding and early maturity are very essential to success in cattle breeding. It is well for the breeder to remember that competition is sharper and prices lower and that economy in those items of greatest cost, food and time, should be considered in meeting the demands of the markets. A steer can be fed to a weight of 1000 pounds cheaper than one can be fed to a weight of 2000 pounds, and while the immediate profit is smaller it will come quicker. Again, the profit on two well bred two-year-olds is larger than on one of the old style four-year-olds.

This argument presupposes that the breeder has a good animal to start on. Scrubs pay poorly at best, and often do not pay at all, to say nothing of those which are a clear loss. The price of the coarse grains and feed stuffs is low, but to feed it to a poor animal is almost like putting salt in a sieve, while to feed it to one of good blood is to use your five talents to make five other talents. Beside these considerations the farmer will have had the additional great advantage of a supply of manure which will bring very tangible profits in increased crops.

So make hay while the sun shines,
That's the proper tune,
But if the sun ain't shining,
Just make it by the moon.
But make it,
Oh, make it,
And pile it up and stack it,
Every day,
For time keeps on flying,
And life is dying, dying,
So toil and stop the sighing,
Every day.

Can You Answer These Questions?

How does the stomach of the horse compare with that of the steer in size?

When is the best time to water a horse?

How much grain and hay should a work horse be fed?

How does the cost of raising a colt compare with that of raising a steer?

Is it safe to work mares in foal?

How soon can a mare be bred after foaling?

What is the value of the droppings of a steer, measured by the price of commercial fertilizers?

What does it cost to produce a pound of beef?

How much gain in weight should you make for every bushel of corn fed to steers or hogs?

What weight cattle command the best prices on the market?

How long is a good boar capable of service?

All these and a thousand and one other questions of vital interest to every man who owns live stock are answered in "The Standard Feeder," a book of 160 pages, handsomely illustrated with views of prize live stock and the homes of successful stockmen. It contains the practical experience of more than 100,000 farmers and feeders who make money from stock. The price of "The Standard Feeder" is 50 cents, but one copy will be sent to you free, if you mention Up-to-Date Farming and tell how much stock you keep. Address Standard Stock Food Co., 1569 Howard street, Omaha, Neb.

Why Rubber Boots Don't Wear

There is no greater temptation to adulterate in any line of manufactured goods than in the article of rubber. As is well known, rubber is not produced in this country. The supply is hardly equal to present demands. The consequence is high prices, which induce some manufacturers to mix in substitutes, making "rubber" at a much less cost, but of inferior quality. Nowhere is this more apparent than in boots and shoes and gum overshoes.

Any man can remember the time when he got much more wear out of his gum boots than he does now. It is because his boots now are not rubber, but are usually made of a composition consisting of rubber and some cheap substitutes.

There is a manufacturer that is taking a different course. We refer to the Banner Rubber Company, 400 Bittner street, St. Louis, Mo. Readers are familiar with their Buckskin brand of rubber boots and shoes from seeing it regularly advertised in our columns.

Another feature of these Buckskin boots and shoes is their superiority in making. The company having determined upon the policy of using only pure rubber, goes also a long step ahead of other manufacturers in reinforcing where breaks are most likely to occur and building up, as it were, with duplicate layers. This is forcibly shown in the separated parts in the opening cut in the boot, pictured in the advertisement. Buckskin boots and shoes are to be had generally of dealers. Any one not finding them should correspond direct with the manufacturers. They have a neat book which they mail to all writing them for it, and which gives further particulars in regard to their making.

The Feeding Value of Stock Food

A. L. Wellington

There have been so many arguments for and against the use of stock food as a conditioner, food-saver, and preventive of disease that thousands of farmers are exceedingly skeptical when the particular claims of this or that stock food are laid before them.

Of course it is a well known fact that there are hundreds of so-called stock fooods on the market made by unscrupulous men whose sole desire is to fleece from the farmer a few dollars with no intention of receiving a second order.

I am not going to take up your time with these "saw-dust" foods, but it is only fair to give them passing notice, not because of their value to the farmer, but on the contrary, because they are in a large measure responsible for the prejudice which exists among thousands of intelligent farmers against reliable stock foods sold under a positive guarantee of satisfaction.

Many stock men have the wrong impression of stock food. I have in mind at least fifty letters from as many different men stating that they had fed a certain reliable stock food to their stock without any apparent improvement being noticed Upon investigation it was found that exactly forty-seven of these men had fed the food according to their own ideas and not strictly according to directions, as printed on the package The result was that the system of the animal was not capable of assimilating the quantity of grain and stock food given. Instead of benefiting, it actually caused indigestion and other ailments brought on by over-feeding.

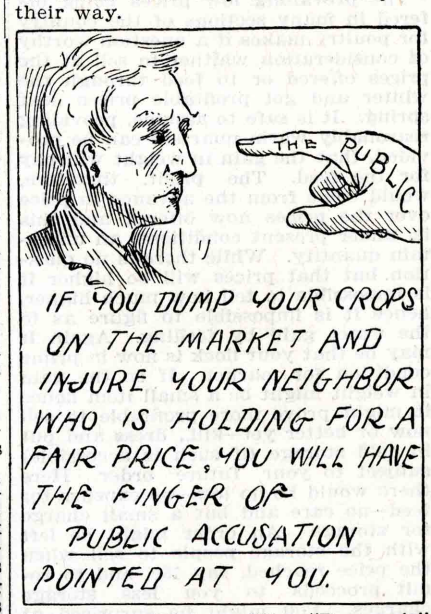
These facts were carefully pointed out to each of. the forty-seven men. Each man was asked to feed the stock food according to directions for exactly thirty days, to the same animals which had been reported as showing no improvement. The result of this experiment was that every one of these stock men reported that immediately after they started this test the animals began to gain in every way and at the end of thirty days, these same animals were found healty specimens worth one hundred cents on the dollar. This is all the more remarkable, as evidence of the feeding value of stock food, when you remember that this list of animals included horses, cows, steers, calves, hogs and other live stock. The feed given to these animals necessarily varied to an enormous extent. THE HORSE DID NOT RECEIVE THE SAME FEED AS THE HOG. THE MILCH COW WAS NOT GIVEN THE SAME FEED AS THE SHEEP. BUT EACH OF THESE ANIMALS RECEIVED THE REQUIRED PORTION OF STOCK FOOD MIXED WITH THE REGULAR FEED.

It is a well known fact that less than sixty-five per cent. of the feed given to live stock is assimilated. That means that thirty-five per cent. is wasted. If you are a stock owner just figure out for yourself the loss you incur every year in waste feed—in feed that does not nourish, and therefore, does not show you one cent of profit.

Now if there is anything on the market which will turn this waste feed into health and profit is it not worth your earnest consideration and a fair trial, irrespective of what this man or that man may say or tell you? You are the man who is vitally interested—it is your money which pays the yearly feed bill and if stock food will save you but ten cents on every dollar's worth of feed and keep your live stock healthy and growing at an actual cost of about one cent a day for each animal, what care you for the theories and arguments put forward by lecturers and others, many of whom do not know the relative value of oil meal to cabbage leaves.

Carefully prepared stock foods are not patent medicines or cure-alls, but for building up run down stock, fattening for market, preventing disease and saving feed, a good reliable stock foood is just as essential to the intelligent farmer as is the stable which protects his cattle from the cold.

"Dumpers!" Have you got them with you? If you have, coax them into the local unions. If they won't come, then sentence them to temporary social ostracism until they see the folly of their way.



Companion Picture (The "Dumper's" Invitation to Come In); Will Appear in Dec. 15th Issue.

In reducing the stock to a winter basis save the best for the dairy and for breeding.

If you want a cow to become fit for the butcher, stop milking.

Don't underfeed. It is doubly important, however, to warn against overfeeding and waste.

Pumpkins are good to take the place of green pastures. If you have not got them we suggest that you stick a pin in next spring's calendar with the word "Pumpkin" over the date to plant.

There is as much need to have a well bred dairyman as to have a herd of well bred cows.

There are many improved articles to use in handling milk and making butter. Have you investigated them? Perhaps some of them will reduce your labor and increase your profit.

Cleanliness should not be next to the dairy, but right in and all through it.

The International Live Stock Show to be held at Chicago has been postponed from December 2-9, to the 16-23. This show, or exposition, is the greatest of its kind in the world. It is given by the Union Stock Yards Co. of Chicago and this year will be held in a new, and what is expected to be, permanent home that cost $280,000.

One of the object lessons to be learned by stockmen, at the exposition, is, how those who handle their products can be lavish with money. But who ever heard of the stockmen themselves—the first owners of all the stock—proposing to give such a show? However, we advise all who can, to go and see the show.

Wake up, stockmen. You've been on the uncertain road long enough. The time has arrived when you should put your business on a basis of certainty. for profits and you can do it in the A. S. of E. A good time to do such work is right now.

Tit for tat, butter for fat, kick the cow and she'll kick back.

Were you proposing to keep any cows over winter that won't pay for their keep and a profit besides? Don't know? You better know.

To get hold of money is not always in hard work and long hours, but more frequently in holding for a known, profitable price.

HIGHEST HONORS ON CREAM SEPARATORS

Following in the footsteps of the Paris and St. Louis World's Fairs which gave their GRAND PRIZES (very highest awards) EXCLUSIVELY to the

DE LAVAL CREAM SEPARATORS

the Lewis & Clark Exposition, Portland, Ore., has granted the DE LAVAL machines the highest award there offered, or a

GOLD MEDAL

And as a further honor the DE LAVAL COMPANY was the only exhibitor receiving the distinction of being awarded all GOLD MEDALS on its entire exhibit.

Thus the stamp of SUPERIORITY has once again been placed upon the DE LAVAL machines by the world's most competent judges and experts, and another addition made to the long list of FIRST PRIZES and AWARDS which have invariably been granted them for twenty-five years.

Verily is the DE LAVAL the WORLD'S "GRAND PRIZE" CREAM SEPARATOR and the CHAMPION of the SEPARATOR field.

UP-TO-DATE Poultry and Bees

PRODUCTION AND MARKETING

Hens have sense.

They are controlling the supply of eggs just now and prices are good. Who will contend that controlled marketing will not make the price?

This will apply to the surplus poultry usually marketed at the holiday season. How are prices? If organized you can make them suit very quickly.

Is it not a fact that if you owned ALL the marketable poultry in the United States at this time you could get any reasonable price you might ask? You, farmers and poultry raisers, do own it all—pity you are not sufficiently organized so as to follow some concerted plan of action and get at least a fair price. How long will you go it alone and lose?

It will pay to separate the market fowls from the laying and breeding pens if you decide to keep them for good prices, as their care and feeding should be somewhat different. If you can not provide warm quarters, however, even for those intended for market, better sell them as it is impossible to get good results in cold quarters.

The butchering season is at hand. It is said of the large packing houses that they use all parts of the hog but the squeal, and if you will give the hens access to the waste you will be surprised to see the amount of it they can appropriate to good use. Bones, gristle, etc., of course, must be run through the bone mill and if you haven't bought one yet, don't put it off another day. It will prove the best investment you ever made. Say the cost is fifteen dollars and you had to borrow the money it would only take 90 cents a year for interest, while the gain in eggs would amount to several dollars.

The following firms manufacture reliable green bone cutters and if you will drop them a postal MENTIONING that you got their address from Up-to-Date Farming they will send you particulars. Their catalogues also usually give valuable hints regarding care and feeding that make them especially valuable.

Enterprise Mfg. Co., 319 Dauphin St., Philadelphia, Pa.
Humphrey & Sons, Joliet, Ill.
E. C. Stearns & Co., Syracuse, N. Y.
Wilson Bros., Easton, Pa.
Stratton Mfg. Co., Erie, Pa.
F. W. Mann Co., Milford, Mass.

Have you secured a thoroughbred rooster yet? Only a trial will prove the importance of doing this but it is a fact that the introduction of new blood from any of the standard heavy breeds in a flock of common fowls will add materially to their egg production and enormously to the weight of next year's flock, especially if they are of light or medium weight now. As a guide to selection we will name in order of greatest merit several of the leading breeds most popular and most profitable for farmers. White Wyandottes, white Plymouth Rocks, Barred Plymouth Rocks, Light Bramahs, Buff Plymouth Rocks and Silver Laced Wyandottes. For those desiring egg production principally and having exceptionally warm quarters for winter the Leghorns, Black Spanish and Games can be highly recommended.

Feeding and Marketing

The prevailing low prices being offered in many sections of the country for poultry makes it a question worthy of consideration whither to sell at the prices offered or to feed through the winter and get profitable prices next spring. It is safe to assume, providing reasonably warm quarters can be provided, that the gain in weight will pay for the feed. The profit, therefore, would come from the advance in price over the prices now offered and this is, under present conditions, an uncertain quantity. While there is no question but that prices will be higher it is impossible to tell how much higher, hence it is impossible to figure as to the exact gain by feeding. Again it may be that your flock is now in prime condition for market. If so the gain in weight might be a small item hence it might prove more profitable to sell now or better yet—kill,, dress and put in cold storage (if such is accessible) subject to your future order. Here there would be no loss—no expense for feed—no care and but a small charge for storage. An order might be left with the storage people to sell when the price reached, say 15c, and to remit proceeds to you less storage charges. You might be surprised at the short time they would remain in storage. It is a fact that consumers in the larger cities always pay 15c a pound or more for "chicken" no matter how many years ago hatched and it keeps the dealers active in supplying the demand and still keep prices down on the producer. For this reason they are glad to get storage stock, even at several cents above prices offered, rather than to put up the price in open market.

Farmers must consider seriously the cold storage question and at no very distant date arrange to have it in the leading market centers.

The matter of feeding for market differs somewhat from feeding for eggs. The quantity need not be nearly so great. The variety may be less and it is not necessary to force the market fowls to so much activity as is essential for the laying flock. Grit, lime or oyster shells, charcoal and water are essential in either case. Cut clover and green bone should be fed a couple of times a week but not so liberally as with the laying hens, in fact, the feeders will not eat so much even if offered them.

If it be decided to keep a flock of feeders it will be well to inform by postal or otherwise some of the leading buyers, including butchers and hotels, that use poultry in large quantities, that you are doing this and that they will be available when the price will justify a sale. It wont be far into 1906 until the demand will come and with it the price.

Old Indian Fashions

The American Indians used to grind their corn by pounding it between two stones. An up-to-date farmer would laugh at such an old-fashioned mill. Indians had no way of skimming milk except to let it stand in came to the top. The women did the skimming as well as the milking. They lost sometimes as much as half the cream by such an unscientific method.

Some of the very farmers and dairymen who would laugh at an Indian mill are skimming their milk—AND LOSING HALF THEIR CREAM. Modern methods of skimming are as far ahead of the old method as modern mills are ahead of Indian grinding stones. The up-to-date skimming machine is the Sharples Tubular Cream Separator. It often doubles your dairy profits—skims the milk as soon as drawn from the cow—leaves fresh, warm skim milk for young stock—requires that only the cream be put away. In use from Moline to California—and far ahead of pans or cans. Ask the Sharples Separator Co. for their plainly written, fully illustrated catalogue No. V 136. Address them at West Chester, Pa., or Chicago, Ill., or Toronto, Can. They have large offices at each place.

VETERINARY COURSE AT HOME. $1200 year and upwards can be made taking our Veterinary Course at home during spare time; taught in simplest English; Diploma granted, positions obtained for successful students; cost within reach of all; satisfaction guaranteed; particulars free. ONTARIO VETERINARY CORRESPONDENCE SCHOOL, Dept. 10, London, Canada.

NEWTON'S Heave, Cough, Distemper and Indigestion Cure. A veterinary specific for wind, throat and stomach troubles. *Strong recommends.* $1.00 per can, of dealers, or Exp. prepaid. The Newton Remedy Co., Toledo, Ohio.

SKUNK Skins, HORSE and CATTLE **HIDES** and all other kinds of RAW FURS bought for spot cash. 10 to 50% more money for you to ship Raw Furs and Hides to us than to sell at home. Write for Price List, Market Report, and about our **HUNTERS' & TRAPPERS' GUIDE** A $5000 BOOK Best thing on the subject ever written. Illustrating all **Fur Animals.** 300 Pages, cloth bound. All about trapping, kinds of Traps, Decoys, **Trappers' Secrets.** Price $1.50. To Hide and Fur Shippers $1.00. ANDERSCH BROS., Dept. 98 Minneapolis, Minn.

What You Gain In a few words, you gain this by using a Tubular: (1). One-quarter to one-half more cream, because Tubulars skim by centrifugal force, which is thousands of times stronger than the force of gravity that makes cream rise in pans. (2). One-half to twice as much for butter, because Tubulars remove dirt and bacteria, thus making gilt-edge butter possible. (3). Half the work saved, because you finish skimming five minutes after milking, feed warm skimmed milk at barn, and have only the can of cream to care for. Write today for catalog W-136. It tells all plainly.

STOP WASTING FEED

Grain and hay fed to an unthrifty animal is largely wasted. Put your unthrifty stock in a thrifty condition, and make your thrifty stock **do better and pay better,** by using

STANDARD STOCK FOOD,

IT MAKES STOCK THRIVE.

More than 250,000 farmers and feeders have **tested** and **proved** its money-making value. They know that it gives live stock of all kinds a better appetite; tones the system; stimulates the flow of digestive juices and enables the animal to digest its feed better, more easily and more thoroughly.

If you will compare **Standard** with other stock foods you will find that it looks better, smells better, tastes better and **is** better than any other—purer, stronger, more concentrated.

It is the Cheapest to Feed, because a pound of it contains more feeds, will last longer, go farther and do more good than any other. You can try it on our money-back **"Square Deal" Guarantee.**

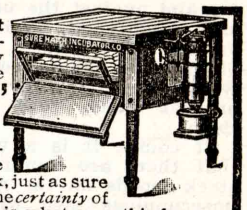
ASK YOUR DEALER. If he will not supply you, send us his name, tell us how much stock you keep and we will send you our 50 cent stock book free. 160 pages; more than 200 illustrations; 12 chapters on feeding and care of all kinds of live stock. Write now—to-day.

STANDARD STOCK FOOD COMPANY,
1569 Howard St., Omaha, Neb.

Manufacturers, The Standard Line, Stock Food, Worm Powder for horses; Worm Powder for hogs, Gall Cure.

"I have fed Standard Stock Food all the time to my sows and pigs, also to my lambs and am well pleased with the results, and always speak well for your food when opportunity presents."
WALTER G. KAY, Oskaloosa, Kan.

Wonderful Hatcher



You can almost count your chickens before they hatch if you use the **"Sure Hatch" Incubator**

For every hatchable egg will give you a healthy chick, just as sure as you're born. The *certainty* of the "Sure Hatch" is what gave this famous incubator its name. You can take off 85 per cent hatches and better every 30 days with a "Sure Hatch."

And there's money in chicken raising when you get it down to a *certainty.* When you can figure up a profit of $12.00 to $15.00 per month on each machine you operate.

We sell our 1906 "Sure Hatches" for **$7.50** and up on **60 Days' Trial, Freight Fully Prepaid by Us.** Take off two trial hatches. Count your chicks. You will find a chick for every egg except those not hatchable. No other incubator on the market will show results like that—comparative tests prove it! Write for Free Catalogue.

Question Box

Under this head will be answered questions of a general interest, sent in by subscribers and members.

Q.—May local unions hold secret meetings?

A.—Yes.

Q.—If a member is in arrears how does he become in good standing?

A.—(1) By paying up his arrearage. (2) By paying not more than $1.00 if more than one year in arrears.

Q.—How can a member at large join a local union and what is the fee?

A.—If in good standing in National Union there will be no fee. He will be subject to the dues as apply to members in local unions. (See Local Union Dept. for valuable information about fees and dues.)

Q.—Why is it so necessary for members to attend their local meetings regularly?

A.—It is most necessary—a most urgent duty, for members to attend every meeting of their local and try to make them interesting and instructive, and try to give some ideas of their own, that suits the agricultural persuits of their vicinity.

"Think for thyself, one good idea,
But known to be thy own;
'Tis beter than a thousand
Gleaned from fields, by others sown."

It is just as necessary, for you to attend your local meetings as it is for your children to go to school every dav. Then when you go to a County Union, after a regular atendance of your local, you understand the proceedings. If you are negligent about your local, you will be inclined to get weak and while napping, the enemy will come in, and devour the fruits of your labor.

Q.—Is it the intention of the A. S. of E. to federate with organized labor?

A.—No. All the newspaper items to this effect are without the sanction of the National Union of the A. S. of E.

Q.—The Ohio Farmer has at various times biterly attacked the A. S. of E. Should farmers continue to support this paper or any other that opposes any honest attempt on the part of farmers to better their business?—Ohio Member.

A.—No.

Q.—Can our local union recommend a good man for organizer?

A.—Certainly. We'll be glad if you will do so.

We will now turn the "Question Box" over to member Mr. Lewis E. Carrico of Daviess Co., Ky., who has a bunch of questions to answer.

Have You Ordered Your Third Power Book?

THE GREATEST EDUCATIONAL WORK FOR FARMERS EVER PRINTED 320 PAGES CLOTH BOUND

By J. A. EVERITT, Founder of the American Society of Equity.

THE THIRD POWER BOOK is eagerly bought by the people when offered. Read report from an Organizer as follows:

"I explained the THE THIRD POWER briefly and then the sales began. Mr. A. S. Smith and myself handed them out as fast as we could take in the quarters. Five men each wanted a bunch of five books which I let them have. I had to hide one copy so I would have a copy left for a sample. ONE HUNDRED COPIES WERE SOLD IN 20 MINUTES. I don't know how many would have sold if the supply would have lasted."

The above letter was from South Carolina but this book is having a large sale everywhere and the demand has hardly begun.

YOU will be a better man or woman and your business will be more successful if you read

The Third Power

Farmers who read this book will at once see possibilities in their business and in life on the farm such as they never dream of before.

The Third Power is not an advertisement but an entertaining, instructive book, which when you read the first chapter you cannot be driven from it until you have read it all. Many readers have wrote: "I read and reread it."

"IF A FARMER GOES TO WASHINGTON"
Specimen illustration from The Third Power

What Is The Third Power?

Read What The Press Says About It.

"It is an earnest argument for a higher appreciation of the dignity of agriculture as a vocation. * * * It aims to give agriculture its proper place among the noblest of industries and enable farmers, by co-operation, to secure rights and benefits to which they are justly entitled."—Journal, Indianapolis.

"It shows an existing need of combination among farmers and outlines a plan which will lift farming to the same level with capital and organized labor; or make them the third power in the world. * * * A million farmers may dictate their own prices. * * * The arguments are presented in a convincing manner, and all needed information is given."—Mahin's Magazine, Chicago.

"It shows that the farmers should organize not for political, but for business reason. The assertions are not made modestly but boldly, and in language simple and strong."—The Advertiser, Newark, N. J.

"It emphasizes the power which lies in the hands of the farmer to-day, outlines the opportunities for him to place himself and his business in the highest position to which he is entitled, and also aid in giving a suitable recognition to agriculture as the third power."—Detroit Tribune, Detroit, Mich.

"The ideas that farmers should organize to protect and foster their interests are set forth and elaborated with great detail, and the effort is made to show that it would be perfectly practicable for the farmers to meet organization with organization, and so to become practical masters of the situation." * * * Indianapolis News.

"It is apparently published in the interest of the American Society of Equity, though not in a narrow sense. It is a general plea for justice to the producer for what is important for man's material welfare."—Brooklyn Times..

"It is a book of interest to farmers all over the country. * * * Its key note is "co-operation is the life of trade." Its aim to arouse agriculturists to turn over a new leaf. * * * It is clearly, sanely and concisely written."—Buffalo Evening News.

"It is the most ambitious effort yet made as well as the most complete to show the benefits that will flow to farmers through organization. It is written with a thorough understanding of the subject in hand. The author has evidently thoroughly studied the subject in all its phases. * * * In the space allotted for a review it would be impossible to set out even briefly the line of arguments followed, but we can say, without overstepping proper limitations, that the book is one that every farmer can read with profit."—Indianapolis Sentinel.

"The present discouraging conditions (of agriculture) are forcefully discussed; the benefits of industrial co-operation are clearly and logically presented, and the opportunity is given every farmer to throw off the rusty shackels of suggishness and indifference, and assist in promoting one of the greatest and best movements of the age. The attention of every person in the country interested in agriculture should be directed to this work."—Albany (N. Y.) Times.

"It is issued as a protest of, or for, the farmers against the domination of non-producing classes in pricing farm products. * * * It urges upon farmers the value of combination as a solution of the serious problems that affect farming. It reveals an extensive acquaintance with agricultural conditions, and urges upon the farmers the necessity of early and united action for their own benefit."—Seattle Times.

"It will doubtless have its effect in wakening the tillers of the soil to their possibilities."—Evening Telegram, Philadelphia, Pa.

"It is written for the furtherance of the interests of the farmer, *and contains a solution for all the serious problems that effect farming.* * * * Every American farmer should read the book."—Tribune, Oakland, Cal.

"The author is evidently a sincere man and an active champion of the best interests of farmers. The book can be read with profit by those who are seriously considering the economic questions of the day."—Cleveland Leader.

"It ought to do much toward stirring up our American farmers to a sense of their power and responsibility as citizens of a republic and conservators of our liberties."—Louisville Times.

"It is a very forcible book, brimful of sound and comprehensive arguments as to why farmers should band together in a powerful organization, which should be able to dictate the prices for their products, instead of, as now, being under the domination of non-producing classes. The author is a strenuous worker in the interest of farmers, and this forceful book undoubtedly will awaken a great deal of interest among them on this topic."—Mail Order Journal, Chicago.

"It is an interesting volume, devoted to propoganda work in the cause of agricultural co-operation. * * * and what they propose to do to make themselves a united and important power in the industrial life of the country."—Albany (N. Y.) Argus.

"There is nothing altruistic and very little that is visionary about the author of "The Third Power," although largely in the nature of special pleading it is so clearly written, and its logic is apparently so sound, that it is a surprisingly interesting work, even if one does not happen to be a member of the class to whom it is primarily addressed."—Philadelphia (Pa.) Record.

$1.00 is the price but for education we offer it for only **25c**
320 Pages Cloth Bound.

$6.00 FREE—We mean just what we say. To each person who will send 25 CENTS for a $1,00 cloth bound Third Power book and the coupon below, we will also send a bond worth $6.00 in cash. The conditions are explained on the bond. This is a plan to sell a million.

A MILLION COPIES

of this book must be sold. Then industrial and political America will be revolutionized, although it is not a political work. The revolution will come through the farmer power—the Third Power.

There are thousands of local Unions, thousands of members of the A. S. of E., and tens of thousands of others who ought to order 25 or more each Nothing can be thought of that will do more good in any community than a general reading of the Third Power book. To make it easy for all to help, the following extraordinary prices are made:

Per DOZEN copies $2.00 (16⅔c each); 25 COPIES $3,75 (15c each); 100 COPIES $15.00. At these prices they will be shipped by freight or express and purchaser pays transportation.

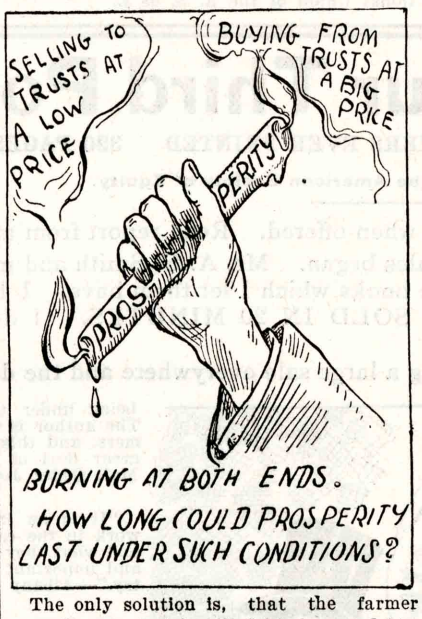
Q.—Why does non-financial confidence stare the poor farmer in the face?

A.—Owing to the great oppression of the inhuman trusts of various names and visage, the producer of the soil—the poor farmer—is cramped on every side, and is compelled to go in debt for the very necessary things to sustain life, which he pays for at a big price, and when he sells his produce, it is often actually bought by a trust, below the cost of production, thus literally burning the candle at both ends.



The only solution is, that the farmer cannot pay, what is called his honest debts, not because it is his will, but because it is the will of the cruel and unmerciful trusts, which at times make angelic donations to various institutions of the county, by making a raise in the price of life-sustaining goods ,which are consumed by the masses. Then the trust man is called a great philanthropist; and the poor farmer is recognized at once, whose financial credit is worth nothing, when it should be the very best.

Q.—Why did the farmers object to the United States Government's false reports on the 1905 crops, and yet never did object before?

A.—The farmers objected, simply for the reason, that the agricultural world is being organized, for justice and equity, and by their organizations, they have become educated to know their rights, and to maintain them and to know when they are swindled, as they were during the past summer, when cotton and tobacco, both were reported twenty per cent. more than the actual production .When the farmer complained of being swindled by a false report, and demanded a correct statement from the United States Agricultural Department, the crop reports of the farmers were accepted by the National Officials, and the people, as the only satisfactory and true ones. Talk about farmers' organizations never being strong enough to accomplish good! Right then and there in their wee-wee infancy, they demanded justice, and was heard by the nation, and they received justice, they received a correct crop report. Such was the first sound of the trumpet of the organized farmer; and it will be heard all over the world!

Letter from David Dobetter

No. 58.

Near Williamsport, Ind., November 15.

Dear Mr. Everitt—You know that in my last letter I spoke about getting the children settled near the old home farm when they get to a point where they want to locate, and stated that I intended to see one of the neighbors about selling his place to us.

I went over this morning and had a little talk with him, and came back feeling sorry for the neighbor and worse a great deal than when I went over. I think I told you that he had not done very well for a number of years, but I did not begin to know the whole situation. He and the old lady told me all about it this morning. There were tears in their eyes some of the time. I won't say about my own. But I am sure if you had been there your heart would have been touched.

This is the way the story runs:

There were two boys in the family. Nice, likely boys they were, too, when they were young. Everbody liked them, they were so bright and lively. Well, the oldest one of them took it into his head that he could get along faster and help the old folks better if he should go away to town and send part of his wages home. It is the way lots of boys have of thinking in these days. They don't know what they are talking about; the only way they ever can learn is by taking some lessons in the school of experience.

So the boy went away. He got a good job, and for a while he sent his money home regularly. Then the money stopped coming. The old man wondered about it, and it worried him so that he set out to see what was wrong. Somehow he could not help thinking if everything was all right Jim would keep on sending some of the money he earned home. It almost broke his heart when he found out why Jim had forgotten home. I hate to tell about it now. So many fathers and mothers all over the country know just how it was. Jim had got into bad company and gone to the bad. He was clear down down bad. He had lost his place. Two or three times he had been in the city jail, and now he was just hanging around waiting for something to turn up, but that is not the way the world goes for men who have gone the pace Jim had.

Well, it was an awful time when the old folks found out about Jim. They kept it to themselves. You know how that is. They were proud of their name and loved Jim in spite of it all. But things kept going bad on the farm. By-and-by the other son, two years younger, took cold and died. They thought he worked too hard one day getting in some corn. Anyway, he wasn't sick more than two or three days. That left the whole thing on the old man's shoulders. Help has been scare and high priced, and everything seems to have gone down.

The last feather was when Jim signed his father's name to a note and left it for the old man to pay. They had to put a mortgage on the farm to get out of the scrape. That's where they are to-day. It is a pretty tough place to be in, and wife and I sat up late last night thinking about it and talking it over. The farm can be bought. Its got to be sold. The man that holds the mortgage says he will foreclose if the interest is not kept up, and I think there are three years' interest due now.

The question is shall we buy the farm? That old man and woman have spent their whole life there, building up what they thought would be their home when they got old. Every tree around the house they have set out. Its all their work. There would be something like a thousand dollars left to them besides paying up the mortgage. That would not be enough to live on, especially if they moved away to town. It costs more there, you know.

What do you think about it? Shall we buy the farm or not? It is a good piece of land, about a hundred and sixty acres of it in all. We can get it quite reasonably now, things being as they are.

Awaiting your answer with much interest, I am yours sincerely,

DAVID DOBETTER.

UP-TO-DATE
Home on the Farm
HOW TO KEEP IT BRIGHT, HAPPY AND CHEERFUL

Crisp December is now here,
And Christmas comes but once a year
Merry, Merry Christmas.

Home on the Farm

Home on the farm! What memories are recalled by those few words. Many a man in his city home or boarding house allows his mind to turn back to other days when he knew the real pleasures of home life on the farm. Many a girl who sits all day by the desk in an office or stands hour after hour behind a counter feels her heart turning back to farm scenes, she once thought she would be glad to forget.

At this time of the year the home life in the country takes on its most attractive features. The field crops should all be safely housed. The stock comfortable in winter quarters. The cellar is filled with the products of orchard, field and garden. The boys have time for hunting. The girls are busy with presents for the coming holidays. The evenings are spent in reading, writing letters, popping corn, and other pastimes that make life on the farm worth living. Soon snow and ice will afford sleighing and skating parties. The long evenings are invitations for the "Union," "lyceum" or "literary" at the district school house, also for numerous "parties" and "socials." The telephone in the house is a source of pleasure, comfort, and practical utility these days.

Home on the farm! The birthplace of the world's greatest men—the best training school on earth for our boys and girls—and always the inspiration of the poet, the philosopher and the statesman. I heard the vice-president of this land of ours make a statement a few Sundays ago that will be re-echoed in the mind and heart of many a city man who knew the blessings as well as the hardships of home life on the old farm. He said, in addressing a huge meeting of the Young Men's Christian Association in Indianapolis: "If I had a boy or girl to rear to manhood or womanhood, I had rather place them in a home on the farm, and surround them with the influence of country life than have them anywhere else." The vice-president knows that what one learns from nature and experience is not forgotten, and he likewise knows that nature gives her best thoughts, and experiences its most strengthening tests, out on the farm.

In looking back over the progress of the past twenty years, no change is more striking than the changes on the farms in that period of time. The farmer is brought in closer touch with the world and its dealings than our forefathers ever dreamed of being. There is little need for the farmer boy or the rural maiden to go into the city to live in order to secure those things the youthful mind desires. We can have city advantages in our farm homes without the disadvantages.

Looking into the futlre, I see a brilliant—a glorious prospect for the homes on the farms. Through co-operation we are bringing them to us rapidly. When our local union meetings are made interesting with the topics of the day, and the questions concerning the welfare of the community, the county, the state and the nation, are discussed there; when the products of the farm are no longer sold for prices below the cost of production; when the mortgage is lifted; when there is money for use in fixing up the farm home and making it more than the city home can possibly be; when the natural craving of our boys and girls are for the things necessary to develop them in their honest and noble desires—then the homes on the farms will be unsurpassed in the history of the world. Hasten the day.

Hedges Around the Home

Hedges are very popular in many sections, and there is good reason for it. Hedges are planted for three p poses, principally: ornamentation, protection from winds, and as fences. If good judgment is used in selecting the hedge, and proper care given it, the farm home can be made better and brighter thereby.

The best hedges for general farm use is the Osage orange, and the Citrus Trifoliata. This latter is a very thorny plant and makes a better hedge than the Osage orange, becoming so thick in a few years a bird can hardly go through.

For an ornamental hedge the Amur river privet is best. They make very attractive borders to yards and lawns. Arbor vitae also makes a very good and attractive hedge but is far more costly than the privet. Add to the value and appearance of your farm by some good hedges.

Tarts

These delicacies are always appreciated, and more especially by the children at this season of the year. They make a most welcome addition to the lunches of the school children. From contemporary journals we have selected a number of recipes that our culinary expert assures us, will give eminent satisfaction.

Follow any good rich pastry recipe in making the paste for the shells. Roll thin and prick with a fork to prevent blisters. Grease the patty pans and pinch the paste closely to the edge.

LEMON TARTS.

Add together the yolk of two eggs, two-thirds of a cupful of granulated sugar, a tablespoonful of melted butter and the pulp and juice of one lemon. Beat well together, then add two-thirds of a cupful of water. Bring to a boil in a porcelain-lined ketle, then stir in one-third of a cupful of water in which has been blended a tablespoonful of flour, or a little more if it does not seem thick enough; stir until smooth. Fill the tart shells already baked with this custard, and pile on top the beaten whites of the eggs, to which has been added a little sugar. Put in the oven just a moment.

CREAM TARTS.

Line patty pans with paste and bake without browning. When cool heap with whipped cream, and lay a teaspoonful of red currant jelly on the center of each tart, or rich strawberry preserves.

PINEAPPLE TARTS.

Make a custard of one pint of milk, one-half cupful of sugar, and two eggs. Mix well the sugar and eggs, add the milk and set on the fire to thicken; stir constantly. When done set away to cool. Stir in one-half of a can of shredded pineapple before ready to serve. Fill into baked tart shells.

APPLE TARTS.

Line round patty pans with paste. Pare and core tart apples, cutting them into halves; put a half in each paste shell, a teaspoonful of butter, a tablespoonful of sugar, and a pinch of nutmeg or cinnamon. Bake until the apples are soft.

How a Rifle Was Baptzied

Our readers will be interested to learn the result of the prize competition inaugurated by the J. Stevens Arms & Tool Company, 225 High street, Chicopee Falls, Mass., makers of the famous Stevens rifles.

The object of this competition, which closed August 15, was, as already stated in this paper, to get an appropriate name for a new boy's rifle.

The name selected as the best was 'Little Scout," sent in by C. F. Meroney, of Greensboro, N. C., who is the fortunate winner of the first prize. Several competitors suggested the same name, but Mr. Meroney's letter was the first to be received.

We understand the "Little Scout" will make its first appearance about January 1, 1906.

Thousands of names were received from all over the country. The choice of names handed in was a flattering tribute to the character of Stevens firearms, for it was a significant indication that dependability and accuracy are characteristics closely connected in the minds of the public with Stevens rifles.

The company has brought out a book of 140 pages which ever gun lover should possess. It illustrates the many different types of the world-renowned Stevens firearms, besides giving a fund of useful information on such questions as the care of shotguns, rifles, pistols, choice of ammunition, reloading implements, targets, etc. The company is doing really an educational work in sending this book free to anyone forwarding four cents in stamps to cover the postage.

This is the farmer's own department, or for any person who wants to be heard in the interest and for the welfare of agriculture. Use it, so your brother farmers will know what your mind is regarding the great farmers' problems of the day.

God Loves a Cheerful Giver

Dear Editor:

After reading October 15th number, of our official paper, my soul is stirred within me and impells me write to all the members of the A. S. of E. and to farmers everywhere as far as our paper reaches.

Oh, if farmers would only stop to think about their great problems. Had not the A. S. of E. come and taught us how to market, what would we be getting now for our crops? You know that heretofore, for such crops as we have grown the last few years we received 50 cents to 65 cents for wheat; 5 cents to 7½ for cotton; 15 cents to 30 cents for corn and 15 cents to 25 cents for oats. But consider the prices now, and farmers have only begun to organize.

I care not under what name the society goes before the farmers, the great and god plan for our beloved society of Equity is the main spring that is giving the results in all farmers' societies today, and all those that ignore the great doctrine of controlled marketing and refuse to teach it are doing no good for farmers. The command by Holy Writ is: "Prove all things and hold fast to that which is good." We have proved the A. S. of E., therefore, let us hold fast to it.

In view of what our society has done for all farmers in America, and for each one individually, I am constrained to cry shame, shame on those farmers who have not yet joined this movement, and if any member of the society is delinquent in paying up his dues, or in keeping his subscription to our official paper paid in advance, I also cry shame, shame. If any farmer who has seen the call for funds to buy the new press and has not contributed, I again cry shame, shame.

What shall we think of people who have been benefitted so much and then wont help a little. Who will give $2.00 to the press fund? Who will give $1.00. Brothers, wake up, and do your part, for we must have that new press, and our paper weekly. Also every person who takes any farm paper to teach him how to produce, should not delay a minute to subscribe for the one paper that teaches how to market. Let us stand together like a band of brothers for the welfare of our family, our business, our country and for the welfare of future generations. God loves a cheerful giver, therefore, let us support our society, the only correct one we ever had, loyally and generously.

R. D. GIBSON, Meridian, Tex.

An Appeal to Reason

Brother Members of A. S. of E.

Come, let us take counsel together, so that we may know where we stand. It cannot be that we are too selfish to advance our cause, lest we might benefit some other calling, but more likely that you do not fully understand the A. S. of E.

The plan of the A. S. of E. certainly is as near perfect as the ingenuity of man can make it. It is simple, plain and practical, and when carried out in its true spirit it will give justice and do equity by every human being, be he king, potentate, or one in the lowest scale of humanity. The plan is based on the grandest idea ever conceived by mortal mind, and that mind must have been inspired by the spirit of the Golden Rule.

I apprehend that many of us are led by the same thought that controlled former farmers' organizations. The guiding sentiment of the former (now almost forgotten) organizations was that in order to organize it was necessary to classify, or to form into clans. It has been proven time and again that the spirit of isolation and clanishness is an element of death in any organization which is intended to promote business interests. Let strife, bitterness and mistrust between the classes be relegated to the realms of oblivion, and let fraternity, good will and peace with all men and all classes be our watchwords.

This being an age of concentration, it becomes more obvious day by day that the interests of the various classes and the varied industries are so closely allied, so interwoven, that they can not be separated without detriment to all.

In our economic conditions elements must be at work to preserve the equilibrium amongst the various interests.

The farmers, being the largest class and their interests being more widely diffused, are more at the mercy of contending forces than any other class. Some years ago their interests being greatly jeopardized, they called on "Mr. Alliance." He recommended the leveeing of the stream of Agriculture—not only of either bank, so as to keep the rivulets of individual interests out, but also advised an embarkment across the outlet of their stream, lest it might carry the interests of agriculture into the stream of common interests. The project being popular, he very soon had millions of men who worked with zeal and a whoop. The smaller streams stagnated; the larger streams, chafing under the restraint, with augmented force finally broke all bounds, rushing madly over the obstructing debris to its destination, carrying Mr. Alliance and his scheme to destruction.

After a time another civil engineer, a "Mr. Brother of Freedom," comes along! He concluded that with a few minor changes the Alliance would be all right. He, with decreased force and less zeal, set his men to work, meeting the same fate as did Mr. Alliance. From time to time other engineers came along, and making a slight change in the program, went to work again.

In the meantime a master civil engineer, one who has a word-wide experience in civil engineering, comes along, carrying the credentials of Equity. Pointing out the errors and defects of former plans, he recommends that all obstructions and snags of greed and rocks of spoilation be removed, so that the interests of all may glide smoothly in their legitimate channels. He also recommends that all the barnacles of speculation, boodle and graft be scraped from the various crafts that carry the diversified interests of the nation, and suggests that direct channels be opened so that the varied interests may pass safely and quickly between those especially concerned.

With these recommendations carried out and all the varied interests moving along safely under the grand banner of Equity, and the equilibrium being restored, American freemen may take time to see to the safety of the tree of liberty, which some of the older citizens may remember but probably has been overlooked by the younger generation in their mad scramble for gain. For their good we would refer them back many years to the time when a band of brave men planted a small twig. The soil being fertile, it grew to be a very large tree—the tree of Liberty. Its ponderous branches rearing their loftly heads into the blue vault of heaven might be named "American Industries," its strong roots growing deep in the soil of American freedom might be termed "Agriculture." Cut off one or more of the branches and the tree may still live, but destroy the roots and the tree dies. The buzzards and hawks are feeding on the choicest of the tree.

Brother members of A. S. of E. and American Freemen, will you stand supinely by and see the work of destruction completed, or will you take your stand as becomes citizens of the mightiest of republics—of that Giant

Reliable Heart Cure

Alice A. Wetmore, Box 67, Norwich, Conn., says if any sufferer from Heart Disease will write her, she will, without charge, direct them to the perfect cure she used.

Simpson-Eddystone

Solid Blacks

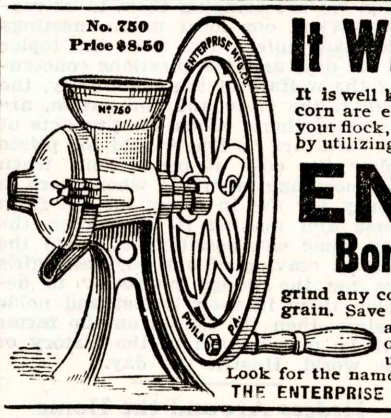
The standard calicoes for sixty-three years—standard for quality; standard for intense, fast color; standard for long wear.

Ask your dealer for Simpson-Eddystone Solid Blacks.

Three generations of Simpsons have made Simpson Prints.

The Eddystone Mfg Co (Sole Makers) Philadelphia

No. 750 Price $8.50



It Will Save You Money

It is well known that bone meal, ground shells and cracked corn are excellent for poultry. Increase egg production in your flock, by grinding your own poultry food, and save money by utilizing much that would otherwise be waste.

ENTERPRISE

Bone, Shell and Corn Mills

grind any combination of roots, bark, dry bone, shells, corn or grain. Save their cost in grinding bone meal for fertilizer. Mills are equal to steel and have a capacity of 1¼ bushels of corn per hour. Weight 60 lbs. Other mills $6 and up, with or without pulley attachment as desired. Look for the name "Enterprise." Full information on request.

THE ENTERPRISE MFG. CO. of PA., 319 Dauphin St., Philadelphia, Pa.

PONY and COMPLETE OUTFIT FREE

ANY BOY or GIRL, 18 years old or less, can learn how they can have my private pet PONY "Bob" with his elegant rubber-tired PONY CART and finely Custom-made HARNESS delivered at their door without a cent of cost. I will pay all transportation charges myself. I do not want a single cent of your money. "BOB" with his PONY CART and HARNESS, just as I shall deliver him, is easily worth $300.00. I will send you full particulars showing you that there are absolutely no blanks. If you wish the PONY and complete OUTFIT delivered to you, all charges prepaid, address a postal, asking for full particulars how to secure him, to CHARLES E. ELLIS, Pony Dept., 24 North William St., New York City, N. Y.

of the West—who can stand with folded arms and awe into submission the haughtiest, most arrogant and most powerful empire of the eastern world? Will you be true to yourself, true to your posterity and to your country? If so, come up to the work manfully. Throw off the shackles of indifference and concentrate your forces so that you may be able to cope with the powers of the bell-born spirit of greed and speculation. By so doing, you will be repaid a thousand fold by feeling in your inmost heart and conscience that you have contributed very materially to the betterment of the world, and have helped the discouraged and despondent to take fresh courage—to renew their efforts for the betterment of themselves, the community and the world at large.

Let truth and civic righteousness reign, and let equity ever be our guiding star, is the wish of

C. B. GERBER,
Russellville, Ark.

Peppermint Growers and Manufacturers of Essential Oils, Attention!

This Class of business comes in the line of farming, and it has been proved beyond contradiction, that in order to always get a fair price for any farm products, an organization of farmers is necessary. Growers and manufacturers of essential oils are not exceptions. This class of business is disturbed by great fluctations in prices, encumbered by many uncertainties both to buyers and growers, sometimes getting into the hands of a few speculators who hold for exhorbitant prices. Then the consumption becomes less, causing an accumulation, and the first we hear there is a great cry of overproduction.

For example, the fall of 1904, the crop was short, the farmer receiving from $3.50 to $3.85 per pound for peppermint oil. In the face of this shortage oil of peppermint went gradually down from January, 1905, until when the crop of 1905 was ready for market only $1.85 per pound could be obtained in the fore part of the season, and at this writing. November 15th, prime oil will only bring $2.25 and slow at that.

It seems highly essential that this class of farmers should get together and decide on a minimum price for our produce. Let us educate ourselves and not be behind the tobacco and cotton growers. Let us get where we will not be scared by false reports, and totter at every rumor of large acreage and great yield. If it is necessary to cut down acreage in order to get a fair price for labor. let us get where we can know where we are at. Honest handlers would much rather have a fixed price so they need not be afraid to take on a stock. The farmer is surely responsible for the ills in this branch of business. Who will co-operate with me? Who is in favor of organizing on the only sure plan—that of the American Society of Equity.

Let's hear from each other in Up-to-Date Farming or by letter or any way so we can put our business on a business footing. Let us organize for our benefit—as the buyers are organizing for their benefit and against ours. Yours for Equity.

GEO. C. WATTLES,
Sherwood, Mich.

Farmers' Problems in Australia

From The Age, Melbourne, Australia:

"At the conference of farmers' union delegates the proceedings were concluded with an address by Mr. J. L. Dow, agricultural editor of "The Leader." To the writings of that journal upon farmers' interests frequent allusions had been made during the conference.

"Mr. Dow said he wanted them to push the organizations still further forward, so as to include combined selling as well as combined buying. He was in communication with Mr. Everitt, of Indianapolis, Ind., U. S. A., the head of the great farmers' marketing combination in America, which, although not yet four years old, had already converted one-third of the farmers of the United States for combined selling, and was rapidly covering the whole. Their plan was to refrain from rushing the market, and thus keep prices up to such rates as would be remunerative to the producer and yet not grievous to the consumer. The trusts ringed wheat to make fortunes for themselves, regardless of producer or consumer, but the American organization was a trust composed of the farmers to ring their wheat, but only to a fair price for the producer. The railway wheat barns throughout Riverina, South Australia and Victoria lent themselves to combined selling. With these and the farmers' unions wheat could be handled so as to enable the producer to have some say as to price with the buyer, instead of, as at present, having to take what the buyer thought proper to give him. Mr. Dow was awarded a unanimous vote of thanks by acclamation."

Unlimited Power

Dear Editor:

Up-to-Date Farming and our beloved Society has done a hundred fold more for the uplifting of the farmers of this nation than all other influences combined.

I have been a member of other farm organizations for a third of a century and give them credit for doing much good but they did not have the elements of permanency and vanished from view. Now, strange as it may seem in the fullness of time, came The American Society of Equity, with its simple, unpretentious plan but the only plan ever offered to the farmers of America to solve all their perplexing problems.

Others have earnestly desired to see the time when the producers of all our food and clothing supplies could secure enough in exchanges to make their homes comfortable and enjoy many of the luxuries of life, but it was denied them until the A. S. of E. was born.

May God help the people at the head of our society and give them courage and determination to spread the good work. You have the confidence of all right-minded people. Be of good cheer and future generations, yet unborn, will rise up to call you blessed for conceiving the plan and so unselfishly carrying it forward. I for one want to say your labors are most to be commended because they are in the interests of a class of people who for ages were powerless to help themselves, but by your teachings you put unlimited power in their hands.

WELTON WINN,
Santa Anna, Tex.

A Reliable Premium House

Every lady reader of Up-to-Date Farming should write to the Pure Food Co., 388 W. Pearl, Cincinnati, O., for their catalogue, etc. In fact men or women can earn valuable premiums or large cash commissions. Just now they are giving away 5,000 China Dinner Sets. This firm appreciates that their success depends on the satisfaction agents and customers receive. If you want to buy fine groceries, tea, coffee, soap, etc., at moderate prices and at the same time get handsome pdemiums write this company.

Boys, Read This

Then ASK your father and mother to read it and all talk it over together. WILL it not PAY YOU to begin this PRELIMINARY PREPARATION NOW, this fall?

Have you anything to market or any business involving correspondence—if so, the ADDITIONAL PRESTAGE TYPEWRITTEN LETTERS will give to your business IS SURE to SECURE for you "TOP PRICES" or special consideration, so that it is quite likely your EXTRA PROFIT will more than pay for the machine. At any rate the EDUCATIONAL BENEFITS MUST NOT BE OVERLOOKED.

SEVENTY-FIVE PER CENT. of the SUCCESSFUL TYPEWRITER OPERATORS occupying good, paying and responsible positions today CAME FROM THE FARMS. Many of them had no knowledge of typewriting or typewriters until they entered the Business College. They had it ALL to LEARN there; and as LEARNING to operate a typewriter consists ONLY in PRACTICE so that the RIGHT letter or character may be struck with the eyes blindfolded, how MUCH VALUABLE TIME and MONEY would have been SAVED if they had only had this PREVIOUS PRACTICE.

Besides, how much real enjoyment an ambitious boy or girl would get by being able to prepare their compositions or essays on a typewriter. At the same time they would be learning something that might cost them many hours of hard work and considerable CASH later on.

This is not all. No person doing a small business can estimate the STRENGTH a typewritten letter lends to their business. It at once gives them a HIGHER RATING than would otherwise be accorded them, and hence they are shown "FAVORS" not commonly granted. A farmer PROGRESSIVE ENOUGH (and there are thousands of them) to OWN A TYPEWRITER would be expected to furnish A NO. 1 PRODUCTS, and, of course, would COMMAND PRICES ACCORDINGLY. It is true that the ADVANCE "over market" frequently accorded a nicely typewritten letter offering something for sale has often MORE THAN PAID FOR THE MACHINE.

If you have a boy or girl, or if you desire to be up-to-date and to secure the "top prices" it will be a big investment to buy a typewriter.

It is not necessary to buy a HIGH-PRICED, NEW MACHINE in order to accomplish ALL THE RESULTS ENUMERATED ABOVE. We can sell you a second-hand machine for TEN DOLLARS that WILL DO AS NICE WORK and is as practical to learn on as a new one costing ONE HUNDRED DOLLARS. If you can afford it, IT WILL PAY YOU to PAY a LITTLE MORE AND GET a BETTER MACHINE.

We have ALL KINDS, Oliver, Smith, Remington, Chicago, etc., etc.—new and second-hand—ALL makes, and in price from TEN DOLLARS UP.

Write us, telling about what you want to pay—the kind of machine you prefer—if you have a choice, or send us the cash you want to invest, and IN RETURN for YOUR CONFIDENCE, we will send you the BEST BARGAIN for the money we have in stock, and will also include a ONE DOLLAR instruction book free. Let us hear from every progressive farmer and every ambitious boy or girl.

Monument Place, Indianapolis, Ind.

AN EXCURSION TO THE ISLAND OF CUBA

Two Indianapolis Teachers Arrange for an Interesting and Attractive Midwinter Outing, from December 22 to January 2, Inclusive

Before the Spanish-American war Cuba was no better known to the average American than any other of the many islands adjacent to the continent, but to-day this island, with its chief city, Havana, is attracting more attention than all the others combined. It abounds in places of historical interest, and relics of the past, exhibiting in all its life the customs and spirit of the mediaeval ages. Volumes could not tell of the charm of Havana, with its landlocked bay and beautiflly laid-out parks. The sharp contrast between the present and the days that have passed away forever—the tumbled-down walls, the cathedrals and the narrow streets, would hold the traveler charmed indefinitely.

Pursuant of many requests which come to Messrs. Hall and Forsyth, of the Indianapolis high schools, by persons who had accompanied them on other trips, for an excursion to Cuba, they visited the island in June, and now have every detail arranged for what promises to be the most attractive outing of the season.

The party will leave Indianapolis, Ind., via the Pennsylvania lines to Louisville, Ky., thence via the Louisville and Nashville Railway to Mobile, Ala., where they will abord the steamship Royal Prince George for Havana, covering an itinerary of over three thousand miles in twelve days; two of which will be consumed in the trip on rail, over the beautiful country between Indianapolis to Mobile and return, four on the ocean and six on the island of Cuba.

The ticket will cost $75, and will include the following items: Transportation for the entire journey, standard Pullman sleeners Indianapolis to oMbile and return, all meals Indianapolis to Mobile and return, an early morning street car ride over the "Highlands" of Birmingham, a visit to the capitol of the Confederacy at Montgomery, transportation, meals and berth on the steamer, round trip; lodging at Hotel Inglaterra during the entire stay on the island, a full day's trip on a special train over representative districts of the island, giving the party an opportunity of seeing sugar and pine apple plantations, cocoanut and orange groves, fields of tobacco and forests of royal palms. The above covers every item of necessary expense for the entire trip, with the exception of meals while in Havana, and these will cost you no more than they do here in the States.

A beautiful booklet containing one hundred and twenty-five pages of information and descriptive matter is now ready for distribution and will be sent free if you mention Up-to-Date Farming. If interested in this trip write the managers or W. W. Richardson A. G. P. A. Pennsylvania Lines, corner Illinois and Washington streets, Indianapolis, Ind.

Get This Gold Pair FREE

Listen! In the past year I received thousands of letters from spectacle-wearers all over the world, expressing their thanks and appreciation, and the one I give here is a good sample of what they all say. The Reverend O. C. Clark, one of the most prominent ministers in the State of Illinois, says: "I highly appreciate your famous "Perfect Vision" spectacles, for I can honestly and truthfully say that with them I now read the finest and smallest print both day and night, just as well as I ever did in my life. Your spectacles are truly marvelous."

Now I Want YOUR Testimonial ALSO

and before placing my famous "Perfect Vision" spectacles on the market for sale at their regular price of $5 per set, I make you the following special offer, which will actually save you $4 cash: Just write me and I will mail you my Perfect Home Eye Tester, free. Then when you return me the Eye Tester with your test, I will send you a complete five dollar family set of my famous "Perfect Vision" spectacles for only $1 (which is an actual saving of $4 to you), and this will include a pair of my handsome Rolled Gold spectacles absolutely free of charge. This set will last yourself and family a lifetime. With these famous "Perfect Vision" spectacles of mine you will be able to read the finest print just as easy as you ever did in your life, and I will return your dollar willingly if you *yourself* don't find them to be the finest you ever bought anywhere, at any price. Write now for my free Home Eye Tester. Address:

WHY WE CAN DO IT.

It may seem almost incredible that we can give away such a Book absolutely free. The reason why most books of a similar nature sell at from $3.00 to $10.00 is that limited editions only are printed. These are sold on subscription by canvassing agents or through book stores at enormous profits. We buy our paper by the carload at lowest cash prices. We print immense editions after the type is once put on the press. These are some reasons. The **important** reason is that **we want to make your acquaintance.** We want every owner of stock to know us, our methods and just how much assistance we can be to you. The longer you have this Book, the more you will value it. As to our responsibility we refer you to Duns, Bradstreets, or any Commercial Agency, the First National Bank of Omaha, or any Bank or large business house in this city or to the publisher of this paper.

BRIEF DESCRIPTION OF THE BOOK.

This Book contains over 160 pages, with more than 150 illustrations, is well and substantially bound with artistic covers, and weighs nearly a pound. It is well worth $10 to any stock owner although we furnish it **free.**

It is the most complete and authentic Veterinary Guide ever published and its value to every owner of Horses, Cattle, Hogs, Sheep and Poultry cannot be overestimated.

Study the partial list of contents carefully and see for yourself that every condition that can possibly come up is covered in a thorough, yet simple manner, reflecting the results of many years of successful practice of the leading Veterinarians from all parts of the world.

It will be worth many dollars to you to be always in a position to treat your own stock no matter what ails them. Don't confuse this with the numerous Stock Books with which the country is flooded. It is not a "Stock Book." It is in every sense a Veterinary Guide or Doctor Book for Horses, Cattle, Hogs, Sheep and Poultry. Books containing less real merit are being sold every day in the year at from $3 to $10. No owner of stock has the moral right to remain in ignorance relative to the proper care and treatment of his stock when he can secure a copy of this valuable book **free** where we have no dealer.

ABSOLUTELY FREE.

The Rex Company, Dept. 312 Omaha, Neb.: Please send me **absolutely Free** and all charges fully prepaid a copy of the mail edition of your 160 page "Rex Book, the Veterinary Guide." I am not to pay you one cent for the book either now or at any time in the future. The book is to be sent **absolutely Free** and without conditions.

INDIANAPOLIS, IND

Co-operation

M. WES. TUBBS.

A little thought in the mind of man
May grow and expand to a definite plan;
It may set in motion reforms grand and good;
It may rob a nation, almost of its food;
It may be a blessing to toilers today,
Tomorrow, another, may cast them away.

The power of thought is beyond comprehension;
Its rare exercise is worthy of mention.
It rules the world from the minds of a few;
It piles up wealth; aye, for them, not for you;
It rules Uncle Sam—there's no question about it—
Be it good, be it bad, the people will shout it.

Would the people but think in a serious way,
Exploiters and grafters could last but a day.
They would cast them aside like worms, in disgust;
Their places, they'd fill with men they could trust.
They'd soon learn the reason their wages had sped.
They'd soon see the folly of the lives they had led.

The thought of a man, so easy to grasp,
Why follow, so blindly, the trail of a calf?
The trail may be good for the step you now take,
But yonder, ahead, you will come to a lake—
Then over a hill, through the mud of a bog,
The calf blindly wanders, and is lost in the fog.

A little thought, in your mind, oh, man
Would keep you from following any such plan.
Yet back you go to the place of starting
Not of your future path, any more certain,
Again you start out with the step just in sight
Quite likely you'll reach the bog ere it's night.

Would the people but think in a serious way,
Exploiters and grafters could last but a day.
Instead of reaching at the end of the year
The place you started; it is very clear
You'd avoid the lake, the hill and the bog
And not, like the calf, get lost in the fog.

A thought, weigh it well, to you it is given—
The wealth of the nation it's said is eighty billion.
The men who produced it are following yet
The paths of vain glory, so often beset
With lake, hill and bog—and are doing today
The things that have sapped this vast fortune away.

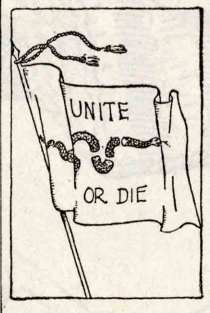
A thought, and a word, if you please, will express it—
You see it, you know it, but will you confess it?
Your church or your party, your pride or your purse
Keep you fighting each other; and what is still worse
Permits of the plunder on the back, right and left
While in front you still follow the path of the calf left.

A thought, grasp ft now, before it's too late;
One word will express it—co-operate.
The wealth of this nation from you has been taken.
Most efforts today are to keep you mistaken,
To keep you divided, to keep you apart.
By prejudice, party, court, church or retort.

A thought, will you heed it? Oh, laboring man,
Stop your strife and contention. Act while you can.
Get together your parties, your cliques and your clans
Demand of your leaders, co-operative plans.
Stop maintaining systems and forces opposing—
Cut loose from all leaders who insist on bulldozing.

A thought, well you know it, and sad, though it's true
Your income but equals the bills that fall due.
Your labor you sell at a price, fair, perhaps
But you can not avoid those plundering chaps
Who legislate wisely for him, them and they
Who lay out the paths and election bills pay.

The trust and the magnate are lost in the fog;
But the profits you pay help fatten the hog.
The cost of the laws to protect you from graft (?)
Are paid from your purse as you follow the calf;
A little on sugar, oil, crackers and bread
More, vastly, on meat, protection and cred. (credit.)



One tells you do this, another do that.
You start to do this, a voice says not that.
You start to do that, another says this—
While off to one side you hear some one hiss.
Thus dazed and bewildered, you wander along
As though led to destruction by a Siren's sweet song.

Oh, man, why not think? Look ahead once, and see,
Are you gaining or losing as the days quickly flee?
Do you see in dis-union, the ghost of a show
For any improvement, on the path you now go?
As stated before now, stated again—
One thing under Heaven; Co-operation will win.

Your leaders oppose it—to them it is sin.
Their own little clique, the nation, must win. . .
They shout the same truth in a voice loud and clear
But others so shouting must, them not come near.
For if they should merger; horrors to fear!
Some would lose offices held very dear.

Strength would be gained to the one from the two
So the third and the fourth and the fifth, also—
Might enter the one; but hold, don't you see—
The dozens of grafters ;why, where would they be?
So follow the calf to the lake, o're the hill, to the bog;
The leaders are willing you be lost in the fog.

Maintain your party, your pride, your cliques and clans
They all will supply you with excellent plans—
But do not hope to gain relief
By blindly ollowing a belief
If co-operation ever wins, co-operation must begin.
If leaders oppose, refuse or sin, it's time to put new leaders in.

Political Bosses, Labor Leaders, Money Lords,
Have had their sway since time records.
The masses have followed, the trail of the calf,
Leaving the grain; trudging on with the chaff.
Would the people but think in a serious way
Exploiters and grafters could last but a day.

IT IS NOT A QUESTION "Shall I get a Washing Machine?" That is answered "yes". The thing to decide is, "What Washer is best for me?" If you answer right you will purchase a

PEDIGO PERFECTION WASHER

Every ounce of effort put forth counts **on the clothes.** No gears to waste power. The motion is only a light forward and backward swing of the arm—no back bending. Strength cannot be saved better than this washer does it. Will wash **to perfection** a lace handkerchief or a carpet. The most wonderful part of our proposition is the price, only $3.00. Why pay $10.00 or more for pretty talk and a complicated machine? Your money back if not satisfied is the way we sell Pedigo Perfection Washers. Try one on our guarantee. **COONER & FORTUNE CO., Indianapolis, Indiana**

Up-to-Date Farming

Representing the Union, or Co-Operating, Farmers of America

PUBLISHED SEMI-MONTHLY
At 940 North Pennsylvania St.

Entered at the Indianapolis Post-Office as Second-Class Matter

Volume VIII | INDIANAPOLIS, DECEMBER 15, 1905 | Number 24

Up-to-Date Farming
PUBLISHED TWICE A MONTH

J. A. EVERITT, Editor and Publisher

SUBSCRIPTION PRICE 50c A YEAR
Foreign Subscriptions $1.00 a Year

CLUBS. Five subscriptions, on any offer we make may be taken at the cost of four. This applies to five of one offer or it may embrace several offers. To illustrate, five 50 cent offers for $2.00 (40c each) or five $1.00 offers for $4.00 (80c each).

Many club raisers fail to indicate their names separate from the club. We want to know who our workers are, therefore always write: "This club was sent by (name)."

☞ Always state if a renewal or new subscription. **Don't Neglect This.**

Your Address should always be written very plainly, including **county.** Do not give street or box number when not necessary to facilitate delivery of your mail. If on a rural mail route use the letters R. R. before the number.

Renewals and Change of Address. Give the same name as before. If a change from one member of the family, so state.

If you change your postoffice, give old office as well as new.

If a mark like this ✓ appears on the first page it is to notify you that your subscription or renewal has been received. The publisher thanks you and he hopes you will be benefitted by Up-to-Date Farming and take it many years.

Advertising Rates will be quoted on application.

Only Reliable Advertisers are admitted to our columns. We guarantee that they will deal honestly with subscribers. However, should any advertiser in Up-to-Date Farming fail to keep his promise as advertised and not give a subscriber an honest deal, we will make good the amount of the loss, provided you were induced to deal with the party through his announcement in this paper only, and providing such transactions occur within a month of the publication of the paper, and that it is reported to us within a month of its occurence. It is understood that this offer is not binding on the publisher unless you mention Up-to-Date Farming when you write.

The Farmer's Union Label must be made the strongest link in the chain of organized farming, as it has long been the strongest link in the chain of organized labor. By the use of theLabel an article is recognized as a product of organized farmers, and those who use such articles know they are patronizing and sustaining organized effort for improved conditions. Use the Label on your letters, envelopes and on your produce.

The solution of the Farmers 18 Labor Problems that will come through Profitable Prices means a demand for millions of union laborers.

Minimum Prices

Below are the prices decided on by the American Society of Equity. They are the minimum prices, *below which* farmers should not sell. They are all based on some central market, and the farm price will be enough less to equal freight and a legitimate profit to the handlers. Farmers should control their marketing so as to keep the market hungry and the demand seeking the supply, when they can make their own prices—control marketing so your crops go off of the farms over the period of a year instead of in a few months. *If those who can hold will hold all, and those who cannot hold all will hold part, then those who cannot hold may market and all will get the price.* This is the key to controlled marketing. The world must have your products at *your* price if it cannot get them at prices made by some other people.

Prices per bushel unless otherwise stated:

Wheat No. 2 Red, Chicago, Per bushel	$ 1.00
Corn No. 2, Chicago, until Jan. 1, 1906,	.45
" " 2, " Jan. 1 to April 1, 1906,	.50
" " 2, " April 1 to next crop	.55
Rye " 2, "	.75
Oats " 2, "	.38
Barley, good malting, Chicago,	.45
Hay, No. 1, Timothy, Chicago, per ton,	12.00
Beans, No. 1, hand picked, Navy, Detroit,	2.00
Cotton, Middlings, New York, per lb	.12
Broom Corn, Chicago, per ton,	$85.00 to $100.00
Hogs, Chicago, per cwt., alive,	$6.00 to $6.50
Cattle " " " "	$5.00 to $6.00
Wool, medium, unwashed, on farm, per lb.	.30
Potatoes, Chicago,	.65
Sweet Potatoes, Home Market,	.75

Booklet E 37

Wonderful to educate the people; 64 pages and cover. All we ask you is 6 cents a dozen to pay postage. Order a lot and distribute them.

Did you send the resolutions to the newspapers?

—o—

The great annual meeting filled the very atmosphere with enthusiasm, and the effect is seen in rapidly increasing organization.

—o—

If there was ever a time when there should be "a long pull, a strong pull, and a pull all together," that time is now. Nothing succeeds but success.

—o—

Equity in all the business relations of life. This is what the development of the A. S. of E. will lead to. As it becomes powerful it will level all business up or down until inequity will not be practiced by any strong class against the weak.

—o—

But it will take numbers to accomplish it.

—o—

And there is a mighty army gathering under the A. S. of E. banner.

—o—

Again we will say that the American Society of Equity is not seeking affiliation with organized labor notwithstanding persistent newspaper reports to that effect.

—o—

Patronize the advertisers in Up-to-Date Farming. The more you buy from them the more they will advertise and the more papers we can distribute.

—o—

See the minimum prices on page 3. They are all equitable—hence should prevail. They will prevail when the dumpers are done marketing as more crops are controlled this year than ever before.

—o—

Our advertisers could not afford to advertise did they not have something that will interest and satisfy readers. Look in the advertising column for what you want to buy.

—o—

We would like to have the doings of the tobacco people appear in the whole edition so as to show what this determined class of people are doing, but it crowds out too much valuable matter for our other people.

—o—

There are many farmers so busy producing that they have no time to think about price making and marketing. For that reason another class of people who have time have taken marketing of their hands. Lucky farmer (?) Accommodating middlemen.

—o—

The farmers' effort is not to tear down but to build up. The success of the farmers' effort will insure greater stability to every legitimate business, uniformity of reward for legitimate effort, but less opportunities to make immense fortunes by people who produce nothing but live by their wits off of the efforts of others.

—o—

Organize in America an army of one million or more farmers and you will have laid mines under every inequity that is prevalent today, whether in social, business or political life, that when the match is touched to the fuse will blow them off of the earth. No power of wrong can possibly stand against such an army organized for good and equity.

—o—

The past season has been an educational one for the cotton planters. Their business has been assaulted from almost every quarter, and any previous year under like circumstances, the cotton crop must surely have been almost lost through ruinously low prices. But amid such a bombardment as no crop ever had before, the doctrine of controlled marketing, though but imperfectly understood, and still less perfectly applied, saved the crop and kept the planters on their feet.

—o—

The tobacco growers have really shown more determination to secure prices by controlled marketing than has any other branch of agriculture. And they have succeeded, though they had to do some heroic work to accomplish it. They are already getting more for the tobacco than the minimum price fixed at Owensboro. Everything we originally claimed has been realized by the tobacco growers. Every other branch of agriculture can do as well.

—o—

Up-to-Date Farming is the official mouthpiece of the American Society of Equity, but that makes it none the less valuable and interesting to the general readers. The A. S. of E. is not an exclusive society; its doors are not closed against any good citizen of the country; and the doctrines we advocate as Society doctrines are of vital concern to everybody. Besides we do not stop with these matters; we give in each issue something of special interest to every soul, and we are going to give much more of such matter. Let every friend of us and our cause assist us in swelling the circulation of Up-to-Date.

—o—

"Should there be no relapse from his present high position as a wealth producer;" says Secretary Wilson; "three years hence the farmer will find that the farming element, about thirty-five per cent of the population, has produced an amount of wealth within ten years equal to one-half the entire national wealth produced in three centuries.

A very encouraging outlook, indeed. But who is going to guarantee against a relapse? Not the consumer, because he wants his supplies as cheaply as possible. Not the speculators because they always have the ideal conditions when supplies are abundant and prices low. Not the railroads, the millers, or the shippers, because they get as much for handling a cheap bushel as a dear one. If there is no relapse and if the present condition of agriculture is to be maintained the farmers must continue to sustain their position.

—o—

Up-to-Date Farming occupies a unique position as an advocate of farm price making through controlled marketing. For years it advocated that doctrine entirely alone, and in spite of the jeers and ridicule of the agricultural press. That period is passed, and great societies all over the country are now taking it up and urging it upon their followers, and bringing it before high official bodies. It is THE PLAN; there is no doubt about it, and every friend of Progress and Right ought to read the paper.

Members of the A. S. of E. don't have to subscribe for Up-to-Date Farming, nor do they have to renew their subscriptions; the Society does that for them, and pays for it out of the Society fund. Those who are not members get the paper at 50 cents a year, and as one of the many great results of the annual meeting, arrangements are being made to make the paper greater than it ever was before—a greater farm paper, a greater family paper, and a greater advocate of farm price making through controlled marketing; and every person on earth is interested in that. It is the salvation of agriculture, and the salvation of agriculture is the salvation of everybody and every business in America. Now, we want everybody to read this paper. Those who already read it, please tell everybody so.

—o—

From an exchange we get the following:

Throughout Great Britain the agricultural organization society is fast taking control of farm affairs and wielding a large influence to adjust their grievances. The membership is now over 6,500, and there are over 100 branch societies, embracing 33 counties. The aim is to promote justice in the marketing of farm products, to cheaper freight rates where excessive, and to promote education among the farming classes. The effort is to establish definite standards for all products, so that the producer who is at fault may be discovered and justly advised.

The A. S. of E. plan exactly. In another part of this paper is also a report from Australia. Truly the sun never sets on this society and our farmers are securing allies even in unexpected places.

Volume IX

This number completes volume VIII of Up-to-Date Farming and with the next number we will begin volume IX.

President's Address

Copies of this will be supplied in booklet form free, except please remit postage. Remit 5c, 10c or more and a supply will be sent you. No true equity man, woman, boy or girl should mail a letter without enclosing one of these. The size is just right to go in an envelope.

No Cecession

We have absolute faith in the ultimate triumph of the American Society of Equity. Therefore there will be no cessation in the effort at headquarters to spread the education and accomplish organization.

So much depends on the triumph of this movement that he would not be true to himself or to posterity who would indulge an idle moment while so much remains to be done. There can be no such thing as rest and recreation thought of by the people at headquarters. While farmers will have some time for rest in the winter we expect no let up from the daily rotine of duties—no cessation from toil. In fact, we are prepared to handle a greatly augmented amount of business that is bound to come between the present and next spring.

This is not said in a complaining spirit. We are glad to put forth the greater effort and work longer hours as the demand comes. It is a labor of love, as well as for the triumph of principles and the realization of our early claims that we work for. These will be sufficient reward.

Producers and Consumers

If any two classes on earth should be friendly the classes named above should be. Neither could hope to prosper without the other—one could not live without the other. If there were no consumer, the producer (of food products) could live—he could subsist upon his own products. But that is all he could do. His surplus would be absolutely worth nothing. He would have no use for it, and without the consumer, it would be of use to nobody else.

On the other hand, the consumer of food products who is not also a producer of them, could not live without the producer. Animal life cannot be sustained without food. Civilization and modern division of human effort has placed mankind in these two classes, and it will take a long period of reaction to wipe out the lines that mark them, and again inaugurate the primitive mode of living when each individual sought the means of subsistence at the uncertain hand of nature.

So these two classes must exist, and they must be mutually dependent upon each other. Indeed, almost all are producers and almost all are consumers. One class produces a surplus of food products for another class to consume. That class, perhaps, produces a surplus of products for decency, comfort, convenience, etc., for the other class to use.

The interests of these two classes, of all classes, in fact, are so intimately connected and interwoven that there is no room for a quarrel between them. But the very fact that each must have the products of the other, that neither can get along without the other, has given birth to another class, a special class, that "toil not, neither do they spin, and yet Solomon in all his glory" gathered not wealth as do they. They have located themselves between the producers and consumers, and by various devices, compel both the inflowing and outflowing streams to pass through their hoppers that they may take toll of both at their own sweet will. To make their positions and their unmeasured gains secure, they keep the great classes of production and consumption at variance with each other, and make each blame the other for what neither is responsible for. They sing in the ear of each the old song that the producer is fighting for high prices and the consumer for low, and as the producer is, by such methods, compelled to accept low prices and the consumers to pay high, each charges the other with the wrong, and the war between them is kept up, giving the horde of greed a free and easy field of plunder.

Now, this is not a tirade against the so-called middleman, the agent of local distribution, the legitimate business man. Earlier efforts to bring these two classes into harmonious relations, feeling the effects without seeing clearly the cause, were inclined to make war upon legitimate business interests. But not so now. A deeper insight has shown that the trouble is entirely beyond the legitimate agents of distribution, the common business interests of the country, and that it is centered in the most selfish combinations of Godless greed that ever plundered an unsuspecting people. It is they that compel low prices to the producer and high prices to the consumer, no matter whether of food products, raw material for the factories, or manufactured articles themselves, and that the local or retail distributors are as much in the hurtful power of these combines as are their customers.

We have often said in these columns, and we wish to respeat it now with emphasis, that if the producers and consumers, no matter whether of the inflowing or outflowing tide, could bring themselves into such harmonious relations that there would be nothing between them but the legitimate agencies of distribution, (the merchants, to be unmistakable), the producers could get more for their products, the consumers could pay less for their supplies, and the merchants do a much larger business at as favorable profits.

The proposition is not paradoxical; it is certain, true, demonstrable. It comes from knocking out the cormorants that feed upon labor's vitals as the vulture fed upon the liver of Parnassius.

Production and consumption must get together. They belong to each other. They are working for each other. Their interests flow in the same mighty stream, but down opposite slopes, if you please. The trouble arises from artificial obstructions wher they would meet and commingle in the valley of distribution. Bring them together at that point and the breakwaters of selfish greed will crumble like children's cob houses.

It Depends on the Farmer

A writer in one of the leading magazines says: "The solution of industrial troubles which have so disturbed the nation for many years will eventually be found in agriculture." And again: "The backbone of America, as was demonstrated in our wars, is the farming interest."

These truths, so slow to get into the magazines, but which have at last found their way there, have long been declared in these columns, and the sooner the farmers themselves awake to their own importance, the sooner will the desired results be achieved.

If any one can offer any solution of the matter short of the organization of the farmers, it is his duty to speak, and to speak quick and loud. We believe it can be brought about only by organization, and for that we are working—not only for organization, but for organization in the simplest and yet most powerful form.

It takes power to accomplish anything, and in these days the power of organization seems to be the only one that is effective. The farmers constitute the only large class that is still unorganized, which not only deprives them of the power for good they might exert, but it makes of them a prey for the power, in many cases so heartlessly exercised, of other organized classes. These facts ought to stimulate every farmer to exert himself in the work of organization, and each should induce all others to lend their influence to form organization on as conservative a basis as that of the A. S. of E.

Price of Potatoes

It is probable that the minimum price of potatoes was set below the prices that will prevail for this crop. At the time of the meeting the committee could not accurately estimate the damage done by blight and rot which have been responsible for the higher prices. However, 65 cents is a very good price for all who have any to sell and is surely high enough for those who lost their crop and possibly must buy.

Secretary Wilson a Bear Factor

Not necessarily the Department of Agriculture, but Secretary Wilson is essentially a "bear" factor in the market. He evidently feels that the best thing he can do for the country is to show tremendous productivity of its agriculture. His recent report makes it appear that the soil in 1905 produced a value exceeding six billions of dollars! ($6,415,000,000.) That would be a dollar for every second in about two hundred years.

We do not know the learned Secretary's method of figuring, but the common school boys of the country know that no such sum has passed, or will pass, or can pass, into the farmers' hands as a result of the crops of 1905; no, not if we include every penny's worth consumed by the producers, and it is proper, of course, to include that.

Six billion dollars, as we have said, is a dollar for every second in two hundred years. If the Secretary's report is true, then, the farmers in the single year of our Lord 1905, raised products to the value of more than two hundred dollars for every second in the entire 365 days of that year! If they did, in God's name, who got it? It is very sure the farmers did not.

The Secretary is no doubt an extreme optimist, and believes no cause can be served so well as in making it appear prosperous. That is not a bad theory except when it reacts upon the very people whom the Secretary, presumably, desires to benefit. These exaggerated reports do not add one grain, one boll, one blade or one stalk to what the farmers did actually produce; but, under the generally prevalent system of price making by boards of trade on reported yields, (and the Secretary so far appears unable to see any other way to make prices), they furnish the strongest arguments for making low prices, and thus, without adding a mite to the quantity produced, they subtract millions of dollars from its market value! This has been clearly demonstrated in the cotton reports of the present year, so notoriously corrupt and misleading.

In spite of exposures made in his Department, Mr. Wilson has surely not considered this phase of the question, else he is a confirmed "bear" on the farm product market, and the surrender of his portfolio should be demanded by the agricultural interests of the country.

Cambling in Farm Products

One set of resolutions passed at the A. S. of E. Annual Meeting was aimed at gambling and speculating in farm products. Some sets of these resolutions were promptly sent to Secretary of Agriculture Wilson which was the order of the meeting. Until this time we have not had an acknowledgement.

These resolution were also placed in the hands of Senator Beveridge of Indiana with strong representations that he should exert himself to have the matter brought before congress. He promised to put them in the form of a memorial to congress and also said he would ask for a letter from Secretary Wilson supporting them and against the practice.

Now comes an interview from Secretary Wilson and printed in The Chicago Daily Tribune as follows:

"In dealing with the crop report 'leak,' Secretary Wilson, after referring to the 'gross breach of trust on the part of one of the employes of the bureau of statistics,' says: 'This department acted with vigor and dispatch when it got evidence of wrong-doing on the part of its own officials, but we have no evidence of disciplinary or preventive action at the traders' end of the line, where gamblers, interested neither in the production nor consumption, disturb values to the injury of both and make loud outcry when creatures of their own kind corrupt officials to betray confidence for the love of money.

"The responsibility for this 'leak' is shared by every one, who, to get money without work, gambles in farm products. When this form of industry ceases these parasites who tempt department officials will have to work for their bread."

From the above, the secretary has placed himself on record as against this form of gambling. We will see now what he will do, if anything, to put a stop to it. We fear it will be like other spasms with government officials—deplore the evil, but take no steps to correct it.

Fair Prices for Corn

In the scenes through which the cotton planters have recently passed, and the victories they have won, the corn growers ought to see an important lesson for themselves. An immense corn crop is the result of the labors of 1905, and it follows a great crop of 1904. The crop of 1904 was held well off the market, and a remunerative price was maintained throughout. Yet the close of the season saw the crop well consumed.

What shall be the fate of the crop of 1905? Large as it is, it is not beyond the limits of consumption. All that is necessary is to market it so as to meet the continuous demands of consumption, but not so as to satiate consumption, destroy demand, and crush the market. Remember a low price will not materially increase consumption although it result in transfer of ownership.

The corn crop may be said to be harvested between the first of October and the middle of December. It is consumed between the first of October of one year and the same day of the next. Between what dates, then, should it be marketed as a business proposition? Evidently during the entire time of its consumption. Should it be marketed between the dates of its harvesting, the market must take it and hold it to wait upon consumption, and, rest assured, the market will pay itself for doing so; and it will pay itself out of the growers' profits.

In other words, if the crop be marketed between, or approximately between, the dates of harvesting, prices are bound to rule sufficiently low to make the purchasers entirely safe for a margin of profits based upon the most unfavorable possible contingencies. One may readily see what the producer must pay for the privilege of marketing the corn crop at or near the time of harvesting it.

A little business activity, concentration of effort, and co-operative action, could save the corn growers millions of dollars during the next twelve months—dollars they have already earned. We are very slow to believe they will not do it. Indeed, we may reverse that and say they WILL do it, for there is now quite a furore of organization throughout the "corn belt."

New York Potatoes

Farmers in portions of New York are holding potatoes for their own prices. The following dispatch tells the story:

"Potatoes are moving very slowly and stock is hard to get at 70 cents to the farmers. Stock comes so slow that there is no life in the business and I don't think there will be for the next twenty or thirty days. Farmers here are looking for a one-dollar market.

They are doing the same thing in Wisconsin. A dispatch from that State says: "Farmers have got all their potatoes safely housed for later sale. I think there is very little question that there is quite a quantity of potatoes in the farmers' hands." A dispatch from Old Town, Me., says of potatoes: "Despite heavy supply price is away up; farmers holding of course." Proofs accumulate of the disposition of farmers to be independent and of their power to be independent.

Just a word of caution. Don't hold too persistently. In the present partially organized state it is impossible to tell how many potatoes are in farmers' hands. If storing is general in the fall and the usual difficulty of marketing is experienced in the winter prices may be forced very high during the winter to fall too low in the spring when everybody is anxious to sell. Better keep feeding the market at profitable prices.

Concentation

The Saturday Evening Post of November 25th, has a very sensible little editorial headed "Concentrate." In it the editor takes occasion to compliment President Roosevelt on the part he played in bringing about peace between Russia and Japan through the treaty of Portsmouth. The part which particularly attracted us was the following paragraph:

> Highest among the qualities which made Roosevelt able to pluck victory from the very claws of defeat was—concentration! It is not enough to have the good will to do any given good act; it is not enough to have the courage. There must also be concentration! Many a courageous will, in many cases even Roosevelt's own, has come to naught through scattering. To make fame for one's self and progress for one's time and people, concentrate!

That is a doctrine true as Gospel, and it is one which, in the present emergency, should appeal with tremendous force to farmers.

That farmers are not having a fair divide of the opportunities of life is apparent that the most unscrupulous cannot deny it. With everything they buy priced by the seller and everything they sell priced by the buyer, there is no place where their interests are, or can be, protected—no place where they can say an effective word in their own behalf—they have not "their day in court," a right guaranteed to everybody even by the old English law. For years they toiled, feeling the wrong but not realizing whence it was. Now, however, they understand it; they have been taught it by the persistent efforts of Up-to-Date Farming and the A. S. of E.

But the time for peace is not yet; we are not yet ready for Portsmouth. There must be much more agitation and education. FARMERS MUST CONCENTRATE. So long as they are divided between Paul and Apollus; so long as they are halting between opinions, the very best plans will fail of their purpose and fall short of complete success. Farmers must organize and stay organized, must concentrate, keep their shoulders to the wheel, and press forward. If there had been nothing for THEM to do, the work that has been done was unnecessary. Some giant power would have spoken the fiat and, presto change, the farmer would have received his share of life's opportunities, so long denied him, and he would have put equitable prices on his products, as others put upon theirs. That giant power exists, but it is in the farmers themselves, and it cannot

be made available, cannot be given voice, except through organization and concentration. CONCENTRATE.

Irrigation—the Cost and the Benefit

A western publication of recent date informs us that there is now in course of irrigation in the West 1,859,000 acres of land, and that $32,870,000 have been appropriated by the general government to that purpose. There have also been approved projects for the irrigation of 799,000 acres more at a cost of $8,900,000. Previous to these appropriations $23,270,592 had been expended for irrigation purposes. From the authority quoted we take the following:

The average value of irrigated land in the United States is $47 per acre. This acreage therefore will add $87,373,000 to the taxable property of the United States in land value alone. According to the census report of 1900 the average annual income from irrigated land is $15 per acre. On this basis an income of $27,885,000 per annum will be added to the nation's wealth by the projects already approved.

In the above there are two declarations which, to say the least of them, are very misleading. For instance: "This acreage, therefore, will add $87,373,000 to the taxable property of the United States in land values alone."

This sentence is well calculated, if, indeed, it was not so intended, to make the public believe that the United States, by expending $32,870,000 received in return property of the value of $87,373,000. It did no such thing. This irrigation did not add a cent to the "taxable property of the United States." The United States has no taxable property. It is not benefited a cent by taxable property, because the United States does not tax property.

Granted that the figures are true, this amount has been added by this government expenditure to the taxable property of certain States and Territories and counties and municipalities in the West, for they tax property, but not to the United States, for the government does not tax property.

And again: "On this basis an income of $27,885,000 per annum will be added to the nation's wealth by the projects already approved." That is impossible, for the nation, the government, derives no increase from any such sources. We are aware that it will be said that aggregate taxable property and the aggregate of the people as a nation are what is meant, and that perhaps is true. But the point being discussed is a specific expenditure by the government and the profit that has resulted therefrom. But who gets the profit? The owners of the land irrigated? Who are they? There is so much graft, so many selfish schemes, so much perversion of public funds to private benefits, that people have naturally, and we believe properly, grown suspicious.

There is another thought. It is well known, confessed in the highest circles, that syndicates, speculators and perverters of the laws that are supposed to govern ordinary people, have obtained large land holdings in the West. Are these the beneficiaries of the irrigation projects and expenditures? We imagine the average citizen would like to know.

Once more. Is it narrow-minded to ask why all the States, represented by the funds in the national treasury, should thus spend millions to increase the taxable property by other millions in a few States and Territories? Would like sums be spent for improvements in Indiana, Ohio, Kentucky and Illinois? And who gets that $7,000,000 of income? Even States do not derive incomes from such sources. Smells like graft, sure as you're born.

How They Control Prices

Inconsiderate persons have sometimes censured farmers for seriously considering the question, and really putting it to practice, of making prices themselves by withholding their products from the market until demand reaches the price. And when it was reported that a few cotton planters, in a fit of indignation or a mad frolic, had burned three or four bales of cotton merely to show what COULD be done if necessary to save the crop and prevent an utter collapse of the market, a great howl was raised, and the planters of the entire South were roundly abused as being so heartless as to dare to destroy their cotton rather than let it go at low prices to clothe the naked. Of course, the speculators were the ones that did most of the howling, and all the abusing.

Now note the methods of the speculators. Not long since there was a large fruit crop in Georgia and Tennessee. The fruit cars on the railroads tapping those regions belonged to private car companies, who also seemed to have an interest in the fruit production there. The railroads had no lack of cars until the fruit that belonged to the car owners had been shipped. Then there immediately ensued a "car famine," the railroads were powerless (or claimed to be) to transport the fruit in any quantities for lack of cars, and the fruit of acres and acres of orchards rotted beneath the trees. No matter how much the fruit growers lost, nor how many persons were denied the healthful use of fruits, provided this fruit of individuals was kept out of competition with that of the private car magnates! These facts came out in an official investigation.

A very few years ago there was a surplus of bananas. The speculators of a great market city had secured as many as they thought the demand would take at the prices they had made—they did not believe they could maintain their prices if more bananas were permitted to enter the market. Bananas continued to arrive from the producing centers, but they never went on the market in competition with the stocks already laid in by the speculative buyers. Car load after car load was sent about thirty miles out of the city and dumped into a river! And yet there were thousands of children in that city, and adults, who would have greatly enjoyed those bananas, but, no! so distributing them would have broken the speculators' price! The matter was reported at the time in the public press, but not a single suggestion was ever made that the fruit might have been given to the poor!

Last year (1904) there was a larger potato crop. Speculation laid in a supply at a price it had made itself, which it proposed to sell out to consumers at a price also to be made by itself. But there were still potatoes back in the fields, and they continued to come in in car loads. The cars were side-tracked and held there unloaded until nature joined hands with the speculators and destroyed the potatoes by freezing them. This served the speculators in two ways: it destroyed the potatoes and kept them out of competition with their already secured cheap supplies, and it held the cars and kept them from going back for more potatoes! The speculative interests could well afford to pay for the use of the cars standing on the track to freeze the potatoes to keep them from breaking their high prices to consumers, and at the same time create a "car famine" to keep other potatoes from coming. What if the growers did lose their crops on account of it! And who howled because the potatoes were fed to the frost for nothing instead of the hungry people at prices in fair proportion to the prices paid for them in the fields?

Talk about unscrupulousness—about destroying products to maintain prices! You find it after speculation has secured its supply. And the dumper is responsible for it all. He makes it possible by early supplying speculation at prices that give such a margin between production prices and consumption prices as to enable such things to be done. He robs himself and he starves his friends, the consumers. That's what the dumper does.

Never destroy any good thing that God has given you to feed and clothe a world, that must soon be hungry and might be naked but keep it away from speculation's greedy maw, and secure the benefits yourself. In the matter of perishable products there is still a problem, but organization will solve it.

If this is not a reasonable thing for the producers to do in view of what speculators do, then pray why not? If speculators may buy what they want at ruinously low prices made by themselves, and then destroy the balance to maintain the high selling prices, also made by themselves, why may not producers HOLD their surplus to maintain THEIR prices, and prevent the destruction of good things?

Letter From David Dobetter.

No. 59.

Near Williamsport, Ind., Dec. 15.

Dear Mr. Everitt:

Whew! It seems good to be able to sit down a bit and breathe naturally. These have been pretty busy days for us at Clover-Leaf-Farm for the past weeks. It is always so when we are putting the last finishing touches on the fall work, but it does seem as if there had been more hustle this year than ever before. But we have things prtty well under cover now for the cold weather that is on the way. Such splendid weather as we have had to close up the work in I never saw, it seems to me. Every day has been just about perfect. I am glad we have enjoyed it, too. Sometimes we let all the comfort be taken out of the sunshiny days, thinking, "Well, this is a splendid day, but it will rain to-morrow!' How do we know what will come to-morrow? Anyway, to-day is all right. Let's enjoy that and let to-morrow take care of itself.

We husked out a fine crop of corn this year. They say there is a big crop all over the country. I am glad of it. That means better times and better food for the folks that have to buy. I never thought it worth while to worry over good crops. The kind Father that gave them to us knows how much will be needed better than we do. This is a big world and lots of folks in it to eat. Big crops of corn and wheat and potatoes tell the story of comfort where there might be hard times. Thank God for the buhper crops and thank the influence that has shown farmers how to get good prices for them.

We had the children home for Thanksgiving. We talked over the project of buying the neighbor's farm, and everybody fell right in with it. So we have our plans all laid how we will go about it. The only thing that troubled me at all was the fact that if we bought the place, it would leave the neighbor without a home. But we have got that all fixed. The other night as I lay awake thinking about it, after all the rest were asleep, a plan came to me and I am sure you will want to know about it. We are going to propose to the old folks that we will buy the farm and let them stay on a corner of it. How will that do? You see if we see them go away, it may be the last of them. I know of a good many farmers that have moved away from the farm and pretty soon moved away to their last long home. Take a man that has been used to the outdoor air and to having something to do every day, and set him down with nothing to do but sit on a dry goods box and whittle and listen to the foolish talk of a lot of loafers and soon the end will come. The bottom will drop out of life and the world will lose a good man.

I am going down to the place in the morning and tell them how we have figured it out. We will build a nice, cosy cottage for the old folks anywhere they want it and help them to get moved. There shall be a bit of land with the house, so that the old man can have something to busy himself about and we will do all we can to make their last days as bright as we can. I almost hopped out of bed when I thought of it, I was so anxious to go right down and see what they thought about it Then I kind of come to myself and said right out loud: "Hold on, here! They're all abed and asleep. It wont do to get excited about it. Anyhow, you don't know what the children and the wife will think about."

But I do know now. John is going to take the old farm if we buy it. I was sure he had not found anything in the school to wean him away from the farm. And it pleased him very much when I told him about the dream I had had of the days when he would settle down near Mother and me and be where we could lean on him when we get old. I suppose some would think that it would be pretty dull business for a young man with a college education to take up farming. I don't see why that should be so. There is room for the smartest men in the world on the farm. It would be a good thing if if we had more men there who could enjoy the country and at the same time keep an eye on the world, looking through the glasses of the scholar.

So that is our plan now. The details must all be left till I have seen the neighbor and talked with him about the new plan. But now we are setting our stakes far ahead, and looking for better things than any we ever have seen yet. I feel rested, telling you about the future in store for us; and still I must not tire you. So good-bye.

DAVID DOBETTER.

CHRISTMAS TIME
IS "STEVENS" TIME
The Happiest Boy in the World.

He has something which he can *really use*—not just an idle toy that soon will fall to pieces, but *a lasting joy and pleasure.* With

STEVENS FIRE ARMS

he can help father save his crops from crows, his chickens from hawks, and his barn from rats.

He may even surprise them in the kitchen with a rabbit or a partridge.

RIFLES FOR BOYS:	
"Stevens-Maynard, Jr."	$3.00
"Crack Shot" . . .	4.00
"Little Krag" . . .	5.00
"Favorite, No. 17" . .	6.00
Single Barrel Shotgun, No. 105	7.50

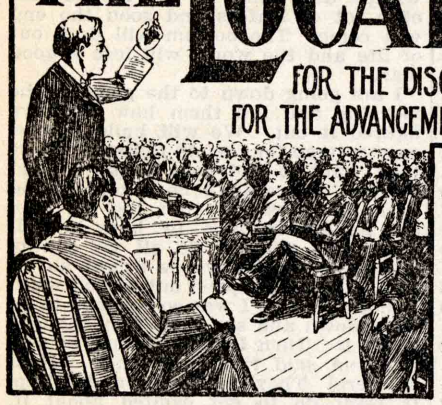
Every one should see the "Stevens" Catalogue, a 140-page book. It gives *full information about the famous "Stevens" firearms.* How to select them, how to test them and how to care for them; also important points regarding ammunition, sights, cleaners, targets, and everything pertaining to a gun. Send 4 cents to cover postage and we will send it *free.*

Tell your dealer you want the "Stevens," and if he cannot supply you, send your order direct to us. "Stevens" firearms are sent, express prepaid, on receipt of catalogue price.

J. STEVENS ARMS AND TOOL CO., 225 High Street, Chicopee Falls, Mass., U.S.A.

THE LOCAL UNION

FOR THE DISCUSSION OF ALL FARM PROBLEMS FOR THE ADVANCEMENT OF CO-OPERATIVE FARMING



THE AMERICAN SOCIETY OF EQUITY

Headquarters Indianapolis, Ind.

Is an international organization, incorporated, with headquarters at Indianapolis, Indiana, and whose first and principal object is: "TO OBTAIN PROFITABLE PRICES FOR ALL PRODUCTS OF THE FARM, GARDEN AND ORCHARD." It also has other objects of great importance to agricultural interests, which will be worked out as the organized farmers desire to take them up. The supreme body is

The National Union

Composed of the officers, directors and accredited representatives from subordinate bodies. The unit of organization is

The Local Union

This is the home workshop of the American Society of Equity. In it, must be forged and shapened the interests that shall revolutionize agriculture, and usher in the time when the soil tiller shall no longer be a "hewer of wood and a drawer of water" for other classes, but when he shall stand erect, an important and independent member of society.

State and County Unions

There are also State and County Unions that may be organized depending on the development in the counties and states.

Fees and Dues

THE MEMBERSHIP FEE is $1.00, payable when becoming a member. Any person can become a MEMBER AT LARGE no matter where he resides if he can be reached by the U. S. Mail. Every member is recommended to join a local Union if one is in his neighborhood. The fee is the same.

THE DUES are $1.20 each year, payable wholly in advance, or may be paid 30c quarterly, or 10c monthly in advance, (except the dues for Members at Large is $1.00, payable in advance to headquarters.)

The MEMBERSHIP FEE is apportioned 60c to organization fund and 40c to headquarter expenses and to supply the official paper to each member one year. The DUES are apportioned 40c to headquarter expenses and the official paper subsequent years; 20c to the county union, 10c to the state union and 50 cents is retained in the local union treasury.

Each member receives a certificate, a badge, all bulletins and other public documents issued from headquarters, and Up-to-Date Farming, the official paper, paid for by the National Union.

Supplies, including books, blanks, etc., are furnished FREE to all new local unions and all old ones that apply and remit their dues.

Complete instructions will be sent free on request, how to organize local and county and state unions and all information about fees, dues, etc.,

The Emblem of the American Society of Equity as here shown, is symbolical of PRICE, being on an equality with PRODUCTION AND CONSUMPTION.

Revised Constitution and By-Laws

They are now ready to distribute in pamplet form. Please send a two cent stamp for one, or ten cents a dozen.

Organizers Wanted

The National Union of the American Society of Equity wants more organizers.

Write for terms and instructions. There is a good business opportunity for one or more good people in each county.

$5.00 Reward

The National Union of the A. S. of E., in order to stimulate organization, will pay $2.00 to the organizer who will report the largest local union organized before Jan. 1, 1906. Also, $3.00 to the organizer who reports the most members before that date.

No person is barred from competition except the National Organizer. The only condition we make is that you say when reporting that you are competing for the cash rewards. The name and address of winners will be printed in Jan. 15 number.

A merry Christmas and a happy New Year.

May the New Year prove to be a year of unbounded success for every local union and member.

Isn't it wonderful how rapidly time flies? The next issue of UP-to-Date will be dated 1906. Wonder what that year has in store for the A. S. of E.? That depends upon how true the members are to themselves and their cause.

The enthusiasm enkindled at headquarters by the annual meeting is not yet cooled down. So many level headed men, assembled from such distant points in so great a country as this, and for so noble a purpose, is enough to awaken stones and sticks. Every local union ought to catch some of the fire.

Why not make the week between Christmas and New Years a week of special organization effort The farmers MUST unite before complete controlled marketing can be secured. The more active the members and locals the quicker will this be accomplished. Can members fail to feel their responsibility and discharge their duty?

The Annual Meeting, acting upon the combined wisdom of that great body, decided that the organization fund should be left in the treasuries of the local unions. This places upon their shoulders the burden of organization, and lays them under a responsibility they were never under before. The hope of the cause and of agriculture is in rapid and complete organization, and unless the unions accomplish this, the next annual meeting will se wisdom in taking some other course.

The annual meeting added to the Society another organized form, and this provision should be carried out as rapidly as possible. So soon as a State has five chartered county unions, a meeting should be called at a convenient place and time for representatives to meet and organize State unions. Before this step is taken the movers in it should comunicate with headquarters regarding the county unions in the State so that none may fail of notification of the meeting. There is but one direction in which for any of us to move now, and that is forward; and everybody should realize how fast time passes, and the movement should not be handicapped by any delays.

Jointly responsible with the local unions for complete and rapid organization are the county unions. These being composed of representatives of the local unions, which really make them the local unions of a county in concentrated activity, and being by the constitution "charged with the general supervision of the work of the Society in their respective counties, and they are therefore, expected to complete and maintain the organization therein." This duty so emphatically imposed, must necessarily clothe them with power to "raise revenues to meet the necessary expenses of the same." They may, therefore, "levy upon the local unions per capita dues to meet legitimate expenses." Dues thus levied by county unions for organization purposes may be drawn out of the organization fund; and local unions and county unions thus equipped, will be expected to do such a work of organization as has never been done before. Every county union at its January meeting should make this subject its most important business, and the combined wisdom of the county should be directed to carrying it out.

What of the past? Are there any causes for discouragement? We think not. This is a big country. Eighty millions of people constitute an immense school, and our agricultural interests are very varied. In so tremendous a school, with but a single teacher so far as the millions of papers that come from the press is concerned, with the public and official life of the nation indifferent or actually opposed, little more could be done in the years we have been at work than to drop a pebble here and there, to set the waves in motion.

That has been done. The right of way for controlled marketing has been secured. Thousands of noble men and women and several local papers, have come to our assistance, and great victories have been won, notably in the maintained prices of wheat, cotton, tobacco and corn.

The crowning act of all, the great annual meeting of 1905, brings with it what should encourage every one to not only hope, but to work; and if doubts have crept into the minds of any, and they have grown lukewarm, those doubts should be immediately dispelled, and the flame of enthusiasm set to blazing so brightly by the annual meeting, should catch in every heart and enkindle such a glow as to give results for 1906 that shall absolutely overwhelm the powers that unfairly oppress.

Another feature growing out of the annual meeting is a determination to make Up-to-Date Farming a better home and family paper than it ever was before. We want to imbue farmers, merchants and everybody with the idea of controlled marketing, but at the same time we want to entertain and benefit every member of the family—the tired housewife, (God knows she deserves the best), the boys and girls and the hired help. With this in view, we shall make a greater effort for subscribers than ever before, and we wish now to impress this upon local unions and members. Get everybody to join the union if posible, and then they get the paper without other payment than their regular dues, but if any be not inclined to join the union, secure them as subscribers for Up-to-Date. Let's get the doctrine before the people and keep it there.

The right plan at last.

How long will it require to establish it?

If farmers would count the cost of organizing and then set against it the sum that is annually lost to them because they are not organized it would open their eyes.

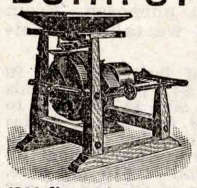
If there is a good man in your community to organize the A. S. of E., send in his name and we will commission him. There is not a community in the country that cannot produce such a person.

The time to increase your membership is at hand. If you want to see your union take on greater life, do something. The Local Union programs will help.

The fullest measure of success can only come to a local union when each member realizes that he is a part, is needed, and that the union is for him. If members would always keep singly in their minds the benefits the union can give them and that cannot be secured in any other way, they would be loth to dispense with these benefits. The trouble with so many is, they don't live up to their privileges; they trust to Providence or good fortune instead of making everything serve their purposes and compelling things to come their way.

Try It Before You Buy It
If it don't suit, return it. We'll pay freight.

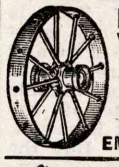
Quaker City MILLS
are sold on above proposition. Reduced price this year. 40 years on the market. 8 sizes. Ball bearing. Grinds **ear corn** and **small grain.** Send for free catalog.
The A. W. Straub Co. 3737 Filbert St., Phila., Pa. 47-49 Canal St., Chicago, Ill.

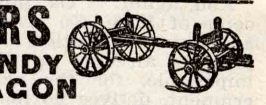
BUHR STONE MILLS


We have led in this line for 54 years. Our factory is the largest in America. Our mills require little power and last a lifetime.
Nordyke & Marmon Co.
1202 Kentucky Avenue, INDIANAPOLIS, IND.

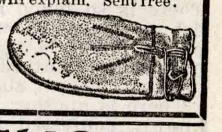
Mode Cobbler
Stop paying tax to the shoe maker. You can repair shoes better with the Model Cobbler. Repairing two pairs pays its cost. This outfit contains a complete set of tools for general boot and shoe repairing. No toys. Illustration shows contents. Complete instructions for half-soling sent FREE.
Price of the Model Cobbler outfit only $1.00.
COONER & FORTUNE CO.
INDIANAPOLIS, IND

AGENTS WANTED **For Mend-a-Rip**
Greatly improved. Better than ever. Does all kinds of light and heavy rivetingand stitching. Saves its cost many times a year. A perfect Hand Sewing Machine and Riveter combined. Notice the Automatic Spacer which makes neat, even stitching. **To show it means a sale. Agents make $3 to $15 a day.** One agent made $20 first day and writes to hurry machines to him. Write for special agts. price. **J. B. Foote Foundry Co. Dep. 339 Fredericktown, O**
(The Great Agents Supply House)
[NOTE—We have used the "Mend-a-Rip" outfit and find it as represented. This advertiser is reliable.—ED.]

FARMERS HANDY WAGON




Low steel wheels, wide tires, make loading and handling easier. We furnish **Steel Wheels** to fit any axle, to carry any load. Straight or staggered spokes. Catalogue **free.**
EMPIRE MFG. CO., Box 68 F Quincy, Ill.

We sell More Gloves through the mails than all other glove houses put together. There is a reason for this. Our new catalog will explain. Sent free.
Deerskin Mitts like illustration 60c pair. 2 pairs $1.00.


DEERSKIN GLOVE CO.
18 Middle Street,
GLOVERSVILLE, N. Y.

DRAUGHON'S *Business Colleges*
25 Colleges in 15 States. **POSITIONS** secured or money REFUNDED. Also teach **BY MAIL.** Catalogue will convince you that Draughon's is THE BEST. Address J. F. Draughon, Pres't.
EVANSVILLE, PADUCAH, NASHVILLE or ST. LOUIS

SAW MILLS

Don't buy until you investigate American Saw Mills. Factory at doors of iron, coal and steel production. Lowest freight rates; prices right, too. Five sizes portable saw mills; shingle machines; lath mills; cord wood, cut-off and rip saws; steam and gasoline engines; feed mills. Free catalog.
AMERICAN SAW MILL MACHINERY CO.,
135 Hope Street, Hackettstown, N. J.
New York City Office, 637 Engineering Building.
Distributing Points: San Francisco, Portland, Seattle, Vancouver, St. Louis, New Orleans, Atlanta and Richmond.

DeLOACH PATENT
is the Original and Simplest Variable Friction Feed.
SAW MILLS
Avoid imitators and infringers and buy the Genuine. Saw Mills, 4 H.P. and up. Shingle, Planing, Lath and Corn Mills, 4 Stroke Hay Presses, Water Wheels. Catalog free. We pay the freight.
DeLOACH Mill M'f'g Co., Box 850, Atlanta, Ga.

SUPERIOR STONE POST.
No more rotten fence posts. Just the thing that meets the present demand. Cheap, strong, durable. Easily made at home or in a large way. Sand, gravel, cement and carbon looped rods as reinforcement. State or county rights for sale. Agents wanted. Excellent Profits. Write.
B. F. STULTZ, Elkhart, Indiana

We Want a limited number of good Northern People to join us in locating homes in the South. Address
P. H. FITZGERALD. P.O.Box 165, Indianapolis, Ind.

Reward for Ability

As has been announced, in the future a program will be prepared for each semi-monthly meeting for local unions. We want these to be great helps to the local unions and to the entire communities. Also we want the local unions and members to help the national union make them interesting and valuable. Therefore to encourage members to contribute to these programs we offer $5.00 cash for the best contribution from a member during the balance of December and January. Also we will pay for other contributions submitted that have sufficient merit to publish. The widest latitude will be allowed—anything that will be interesting in your own union it is assumed will be interesting in others.

If this offer results in developing considerable talent among our readers we will continue it month after month. The winners' names and addresses will be published and credit will be given all printed.

WIsconsin State Meeting

On January 12, 1906, there will be held at Eau Claire, Wis., a state meeting to organize a State Union of the A. S. of E.

Our Wisconsin brethren, under the leadership of State Organizer N. C. Crawley, never do things on a small scale and this may be expected to be a large and important meeting. Of course Wisconsin members are all expected to interest themselves in the success of the undertaking while farmers and friends of farmers are urged to attend.

Publicity

Do you ask your local papers to print announcements of your meetings? If not you are missing your very best opportunity to extend the good work in your community. They will be glad to print your dates of meetings and also reports of meetings held.

If any of the old workers have not received new terms, application blank, commission, etc., write for them at once.

Conventions and Meetings

This column is at the command of members, officers and organizers to advertise their meetings. Use it and you will find it powerful to secure attendance.

INDIANA CORN GROWERS' ASSOCIATION will meet in Room 67, State House, Indianapolis, Wednesday, Jan. 3 1906. A. G. Mace, Secy., Lexington, Ind.

INDIANA POTATO GROWERS' ASSOCIATION will meet in Room 12, State House, at Indianapolis, Thursday, Jan. 4, 1906. It is expected that J. A. Everitt will address the association on marketing potatoes. D. F. Maish, Secy., Frankfort, Ind.

FRANKLIN COUNTY, MO., members of the A. S. of E., are urged to attend the next county meeting with Japan local union on the first Saturday in January (Jan. 6), 1906, beginning at 10 a. m. Albert Johnson, Secy., Japan, Mo.

WISCONSIN STATE CONVENTION at Eau Clair, Wis., Jan. 1, for the purpose of organizing a State Union of the A. S. of E. All local and country unions and members and farmers generally take notice. For further particulars address the chairman of the respective committees as follows: On transportation, Thomas Emmerton, Bloomer, Wis.; on hotels, C. N. Luce, Eau Clair, Wis.; on reception, E. E. Tobey, Eau Clair, Wis. All delegates and members are requested to wear the badge in plain sight, so they may be recognized on arrival. N. C. Crawley, State Organizer, Baraboo, Wis.; H. B. Hotchkiss, Secy., County Union, Eau Clair, Wis.

WILL COUNTY (ILL.) INSTITUTE at Joliet, Ill., Jan. 18, 19 and 20, 1906. Robert Eaton, President, Elwood, Ill. It is expected a representative of the A. S. of E. will be at this institute to tell how to market crops.

MECOSTA (MICH.) COUNTY UNION will hold a meeting with Barryton Local Union No. 1, four miles northeast of Barryton, Mich., Jan. 13, 1906. All members of the A. S. of E. are invited and all the unions are urged to send delegates. We want to make this a big meeting. A. K. Fineout, President, Barryton, Mich.

CHIPPEWA CO. (WIS.) COUNTY UNION will meet at Chippewa Falls, Wis., on Jan. 6, 1906, at 10 a. m. It is desired that every local union be represented and that delegates be accompanied by a complete report of their union.—John Prince, Co. Secy., R. R. No. 2, Bloomer, Wis.

ILLINOIS STATE UNION.—A meeting will be held at East St. Louis, Ill., Jan. 20th, 1906, at 9 a. m., for the purpose of organizing a State Union of the A. S. of E. Each county union in the state is requested to send two delegates. The meeting will be held in the parlors of the Royal Hotel. For further particulars see more extended notice in Local Union Dept. C. O. Drayton, Greenville, Ill., State Organizer.

National Organizer Sherman will hold meetings in Dubois County, Ind., on following dates: Dec. 20th, 21st, 22d and 23d. For particulars write to J. G. Koch, Huntington, Ind.

ALABAMA MEETINGS.

National Organizer Sherman will transfer his field of operation from the North to the South, beginning with the first of the year.

Meetings have been arranged in Alabama as follows: Snead, Jan. 2d; Brookville, Jan. 3d; McLarty, Jan. 4th; Douglas, Jan. 5th; Gad, Jan. 6th; Elrod, Jan. 9th; Black Oak, Jan. 10th; Tenbroeck, Jan. 11th; South Hill, Jan. 13th. All in Alabama.

As Mr. Sherman expects to stay in Alabama one month, he will be pleased to hear from sections needing his services. Address headquarters, or, after Jan. 1st, any of the advertised points.

Equity Speakers

A great many calls are constantly received at headquarters for speakers. We refer to the following, who will accept such calls to address meetings. Write them for terms:

C. C. Simpson, Dardanelle, Ark.
T. J. Woodard, Clarksville, Ark.
W. E. Johns, Tifton, Ga.
Walter Newby, Woodward, Ia.
E. B. Oglesby, Cloverport, Ky.
W. S. Ball, Hardinsburg, Ky.
S. B. Robertson, Calhoun, Ky.
E. E. Gay, Vultons Creek, Ky.
T. J. Mann, Liva, Ky.
L. N. Robertson, Utica, Ky.
D. T. Hamill, Guthrie, Ky.
E. L. Davenport, Cisney, Ky.
F. B. McCown, Kirkmansville, Ky.
J. W. Cannon, Liberty, La.
A. K. Fineout, Barryton, Mich.
Walter Todd, Kelden, Mich.
W. C. Webber, Rochester, Minn.
C. W. McDade, Ceylon, Minn.
M. H. Poole, Geyser, Mont.
Chas. C. Wilson, Queenstown, Md.
D. Phillips, Pool Siding, Neb.

I have taken nearly all farm papers, and they are all out of date (teaching the old story of how to grow large crops of fine quality) but one, and that one is Up-to-Date Farming. It is getting better with each issue.—Frank Funderwhite, Kimberton, Pa.

Interest is reviving here, and we think we can whip all delinquents into line and hold prices to a profitable basis. Success to you all and the cause of equity.—W. P. Wikoff, Secretary, Lum, Tenn., Local Union No. 38.

I herewith send you money order for $3.75 for twenty-five Third Power books. I want them to give to my neighbors to help the good cause along. I hope the whole United States may soon be organized for equity and profitable prices.—F. C. Herschbach, Fort Gage, Ill.

A Real Rubber Boot every inch of it

This boot is especially made for hard wear. Only the best new rubber and the best duck are used, put together in such a way as to give the greatest strength where it is needed.

Security
LYCOMING DUCK BOOT

can't afford to wear out as soon as the ordinary kind—it's got a reputation to sustain. We strongly recommend "Security Boots" to Farmers, Irrigaters, Stockmen, Fruitgrowers and every man who needs a *good* boot. Like everything else, it will wear out, but it is built to give the greatest amount of satisfaction possible. Boots made of *old* rubber cannot stand the wear—there's a dollar's worth of pure rubber and good duck for every dollar spent in the "Security." All "Lycoming" Rubber Boots and Shoes are of the highest quality only.

Go to your dealer and *try on a pair.* Note carefully how well made they are. If your dealer does not have them in stock he can easily get them for you.

Durability

HAMILTON BROWN LARGEST IN THE WORLD SHOE CO.

ST LOUIS, U.S.A.

To California—
Why don't YOU go too?

Most people who go to California go in tourist cars because they are clean, comfortable and economical.

Most people who go to California stop at medium-priced hotels costing not more than $1.00 per day. They see just as much and enjoy the experience as heartily as the (comparatively) few who live at the luxurious "bon ton" resorts.

Most people who go to California prefer one of the Rock Island's two routes and the exceptionally good accommodations provided.

Most people go to California who can afford it as well as you can.

Why don't you go too?

Let us send you our illustrated California booklet and help you to plan the trip.

"Through an oversight on my part I allowed my ad in Up-to-Date Farming to miss one insertion. Enclosed find money for the same advertisement six months. I do not like to miss a number as your paper is giving excellent results."—C. O. Warford, Newburgh, N. Y.

When the readers of this paper realize its VALUE for selling their surplus, etc., we will have scores of such announcements. Send YOUR order for the next number.

UP-TO-DATE FARMING, Indianapolis

UP-TO-DATE Field Crops

PRODUCTION AND MARKETING

The Distributing End

The crops are harvested. The wheat is in the bin, (if it has not been dumped); the hay is in the barn, and the corn is in the crib. The barn-yard has been cleaned up, we shall assume for good farming's sake, and the horses and cattle, and other live stock, including poultry, are all in clean, comfortable quarters. The farmer' institutes have been held, and, of course, you and your family attended that in your county, and heard all that was said.

It is evening. The children are home from school, and you are all gathered in the cozy living room.

What are you talking about? The distributing end of farming—the marketing? You did not hear anything at the institute to set you to thinking about that, did you? Scarcely. Every effort there was directed to making more stuff as if abundance in the fields would make farmers rich without regard to price—without regard to whether they can sell it at a profit or not; and without regard to that other fact, which the institute instructors refuse to learn, that the more farmers produce in the great aggregate the less it is worth to them when dumped on an unwilling and satiated market.

Think about distribution, and talk about marketing. The local unions are this month discussing the question, "Resolved, that the selling of the surplus is of greater importance to the farmer than the production of it."

And it is; for upon the selling and the price you get depends the remuneration you are to have for your labor as a farmer. Upon that depends the comforts, enjoyments and support of the family now gathered in the home nest to spend the long winter evenings.

Talk about that which is of most interest to you, and determine that, after you have made the crops, they shall yield you fair wages for your toil. While you were working for what you and your family and your domestic animals are to consume, you were working for yourself, and you were your own paymaster—your remuneration is what good and comfort you can get out of it. But when you worked in producing a surplus, you were working as a hired hand for other people, without a fixed salary.

What shall those other people pay you? What are you worth? Had the salary been fixed in advance, what would you have done the work for—you and your teams—and paid all expenses as you did? Who shall determine that important question for you? The person, or persons, or powers and combinations that fix a price upon your surplus products, determine what your labor is worth what you and your family are worth in the productive world, and they do it without consulting you!

Who ought to determine your salary, you or somebody else? Who ought to fix the prices on your products, you or somebody else? By whom should it be done as a matter of right? Yourself, of course.

Well, then, are free American farmers to accept, in so important a matter, anything less than RIGHT? They have accepted it for years and years; have submitted in this regard to what no other laborer has, and the long submission has almost led them to believe they are living and laboring under nature's plan; but it cannot be so because it is not right. The great source of right declares "the laborer is worthy of his hire," and if so he can only be a man with other men when consulted as to the amount of his hire, in the farmer's case determined entirely by the price of his products.

Then, after the summer's work is over, and you snuggle together in the home to while away the winter evenings, isn't it well to talk about the distributing end of farming—the price making and the selling?

Don't look away off to the market centers where speculators make the prices, and feel your individual helplessness. Look rather to the thousands of farmers' homes, where Up-to-Date comes as it does to yours, and where there families are talking as we are urging you to talk, of the distributing end of farming, and the making of prices. Where Right and numbers stand the flag of victory waves.

Winter in the Fields

The winter interest in field crops centers in preparing the fields for the coming year—mainly in fertilization.

Farming without fertilization can no longer be depended upon. It is true there are localities and farms whose native fertility still exists, and crop after crop, it seems, may be grown almost without limit; but there are exceptions, and the broad acres to which the world must look for food have to be treated kindly, and require many of their former gifts returned before they respond to the farmers' call as they once did.

The fertilization most to be relied upon in large farming is the growth and plowing under of fertilizing crops—clovers, peas, etc.—the legumes. But the season for discussing that method of fertilization is not now.

On farms, however, where stock is raised, fertilization is a timely topic. Farmers are farming much better than they did a few years ago, and in spite of the harmful manipulation of the prices of their products, they are making money, and are better off financially than they have been at other periods in the agricultural history of the country. Yet on many farms are going to waste as many dollars as the profits they have saved.

Every source of manure should be carefully guarded, and the manure saved, and when saved it should be "put where it will do the most good." Load after load of valuable fertilizer may even now be wasting in thousands of barn yards, or may be befouling the air and breeding disease germs in a thousand barns and stables, while on those same farms there may be points aggregating acres, that the farmer plows every year for nothing because in other years they have been robbed of the very elements the wasting manure would restore to them.

Haul out the manure. Fertilize the farm. When you plant a seed be sure there is something there for the plant to feed upon that it may grow. It is unwise to try to grow starved and stunted plants, when the very food they need to make them vigorous is in your way in and around the barn yard.

It is a little late even now to clean up the barn yard. Much of the time it will be too muddy to get into the fields with loads, and at other times the manure will be so frozen as to make it impracticable to take it up and load it; but that in the barns and sheds may be taken out when the ground is frozen, and piled up in the fields for future spreading, or, what is better, spread as it is unloaded.

Every rain robs the manure not under shelter of some of its richest elements, hence the sooner it gets onto the fields the better. The leachings will then go down into the soil where the elements are needed. The noblest crop the farmer can cultivate is brains; the next is muscle. Let the brains direct the muscles.

In speaking of fertilization in winter, we have no reference, of course, to the application of commercial fertilizers, which are properly applied at time of seeding.

The Banner Is Waving

PEARL ULILLA DAVIS.

Farmers, aim true, it is up to you,
For you are the power of the world;
Come, co-operate, it is never too late,
The flag is now unfurled.
It is waving high beneath the sky
So triumph in victory;
It's emblem is price, a profit price,
An honest Equity.

You may come slow, but it is bound to go,
For thousands have formed in line;
The march is on, all doubt is gone,
And our farmers wear the sign.
It was a fight, but now in delight
We see the gamblers squirm.
They had us down and called us "clown"
But true, "The worm will turn."

Hurrah! the banner is waving,
The speculators raving,
The farmer profit saving,
And all is victory.
The work seems so much lighter,
And dollars grow the brighter,
While we hang on the tighter
To triumph Equity.

WELCOME WORDS TO WOMEN.

From the view point of the average man housework is very easy. The wife is right at home. She is her own mistress. She can sit down and rest any time. She can even go to bed for a nap if she feels like it. She can order her household affairs just to suit her own convenience. If she doesn't feel equal to doing work to-day, she can do it to-morrow. That's the beautiful *theory* of the average man.

Just suppose the Egyptian task-masters, when they made the required daily tale of bricks tax the uttermost of human strength, had said to the toiling slaves, "Don't hurry, take a rest every now and then—only don't forget that your tale of bricks must be all right at night or else there'll be trouble."

There's the fact. There are the day's duties to be got through, and the women who *can* rest may not. The woman, who, when she married, said, "Now, I'll be my own mistress," finds herself a slave to household cares and duties.

And oh! how much that woman needs rest sometimes. She brushes and scrubs, and rolls pastry, her temples throbbing, her back aching, her nerves quivering under the stress of pain. What she would give if she could just creep upstairs and throw herself on the bed in a darkened room and rest.

Rest would temporarily relieve the strain, doubtless, but it would be the same story over again to-morrow. The real need of weak, nervous women is strength, and that need is fully met and satisfied by Dr. Pierce's Favorite Prescription. It makes weak women strong and sick women well. It removes the causes of women's weakness, tranquilizes and invigorates the nerves, encourages the appetite and induces restful sleep. "Favorite Prescription" is a positive cure for the most complicated and obstinate cases of leucorrhea, excessive flowing, painful menstruation, unnatural suppressions and irregularities, prolapsus or falling of the womb, weak back, "female weakness," anteversion, retroversion, bearing-down sensations, chronic congestion, inflammation and ulceration of the womb inflammation, pain and tenderness of the ovaries, accompanied with "internal heat."

"I am pleased to add my testimony in behalf of Dr Pierce's Favorite Prescription," writes Miss Earline Agard, Chaplin, Patriotic Daughters of America, of 413½ Michigan Avenue, Lansing, Mich. "I cannot find language to express my gratitude and joy over the fact that I am well once more. Wearing my corsets too tight seemed to have brought on an extra abdominal pressure, weakening the ligaments and pushing the internal organs down. What to do I knew not, as no medicines I took seemed to help me.

"I had heard of Dr. Pierce's Favorite Prescription and determined to try it, as a last resort. Before the first bottle was used I began to feel better, but could hardly believe that this was permanent, but my improvement went steadily on, and within four months I was like a new woman. Now I have no more pains, am well and strong, and am extremely grateful to you."

There is nothing to conceal about the make-up of "Favorite Prescription." It is an absolutely pure medicine—made of native roots—Nature's own restoratives, compounded after a formula concerning which there can be no question, by skilled chemists and by thoroughly scientific processes. Doctor Pierce is perfectly willing to let every one know that his "Favorite Prescription" contains Blue Cohosh root, Lady's Slipper root, Unicorn root, Black Cohosh root and Golden Seal root. Every doctor knows that such a prescription is beneficial in the diseases of women and when properly compounded is certain to effect a cure in nearly all cases when given a fair trial. Every bottle of the "Favorite Prescription" which leaves Dr. Pierce's immense laboratories in Buffalo, N. Y., has plainly printed upon its wrapper all the ingredients of which it is composed. Thus Dr. Pierce proves to the world his own confidence in the remedy which for forty years has borne his name and which is known all through the United States and Canada, England, Australia, and in parts of South America, Africa and Asia, as a sovereign cure for those diseases which, unchecked, make our women old before their time.

It will be noticed that there is no alcohol in the "Favorite Prescription." Dr. Pierce never believed in using alcohol in the preparation of his famous household remedies. For it, he substitutes chemically pure glycerine, which has wonderful properties for extracting the medicinal principles of roots and preserving them at their full strength, without any deleterious effect whatever.

In favor of Dr. Pierce's medicines is the frank, confiding, open, honest statement of their full composition, giving every ingredient in plain *English*, without fear of successful criticism and with confidence that the good sense of the afflicted will lead them to appreciate this honorable manner of confiding to them what they are taking into their stomachs when making use of these medicines.

Dr. Pierce feels that he can afford to take the afflicted into his full confidence and lay all the ingredients of his medicines freely before them because these ingredients are such as are endorsed and most strongly praised by scores of the most eminent medical writers of all the several schools of practice as cures for the diseases for which these medicines are recommended.

Your druggists sells the "Favorite Prescription" and also that famous alterative, blood purifier and stomach tonic, the "Golden Medical Discovery." Write to Dr. Pierce about your case. He is an experienced physician and will treat your case as confidential and without charge for correspondence. Address him at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., of which he is chief consulting physician.

It is as easy to be well as ill—and much more comfortable. Constipation is the cause of many forms of illness. Dr. Pierce's Pleasant Pellets cure constipation. They are tiny, sugar-coated granules. One little "Pellet" is a gentle laxative, two a mild cathartic. All dealers in medicines sell them.

Send 31 one-cent stamps to cover cost of mailing and get a copy of Dr. Pierce's Common Sense Medical Adviser, over 1000 pages. Address Dr. R. V. Pierce, Buffalo, N. Y.

UP-TO-DATE Live Stock and Dairying

PRODUCTION AND MARKETING

Stockmen are still at sea; they don't control their marketing.

Two and a half to three cents for beef cattle on the farm, and twenty to thirty cents for beef in the city—well, there's something in the middle there somewhere. There's more than a mouse in the mountain between these two prices.

There is a matter we wish to impress on consumers; don't forget it: When we speak of low prices we refer entirely to the primary markets, the prices paid the producers, and not to the prices paid by the consumers. The prices paid by the consumers, in most cases, are out of all proportion to the prices paid to the producers. Specially is this true in regard to meat products. An equitable adjustment of these prices, and, indeed, of most others, would give the producers more and supply the consumers for less. Don't lose sight of this fact.

Few people in all the productive world need a shipping barometer worse than do the live stock men. With their product it is an ebb and a flow, a jerk and a jump, and the great packing houses pull the string. If there could be a steadiness and regularity of shipment, there would be a regularity of supply and a steadiness of price. This would be better for producers, butcher and consumer, as the whole meat supply business would be on a steady basis. This can be brought about by organization—mutual and equitable organization. An organization of stock growers can't do it, because they are only one division of the army. An organization of consumers can't do it, because they constitute only another division of the army. An organization of the butchers, packers and retailers can't do it, for they represent no more than another division in the same army. And the strange part of it is, when these are organized separately, they are organized to fight each other; and in this triangular fight the butcher and packer division has invariably whipped the other two—whipped them in detail and in entirely different battles, because it has always been able to keep the other two apart. To solve the live stock and meat supply problem there must be an organization together of all concerned in it on a mutual and equitable basis, and then any who will not join in the equity of it—the packers, for instance—can be held in subjection by the other two, or be kicked out bodily.

A few years ago the meat producing and meat buying world was electrified by the announcement that the packing houses had discovered methods by which actual wastes could be saved in value sufficient to pay all the expenses of running the packing houses. The stock growers were delighted, because it seemed to them so great a saving that had been heretofore a loss, ought to mean a better price for live stock; and so it ought. The meat buyers were pleased because they thought the payment of the expense of butchering, etc., from a heretofore unknown source ought to give them meat at a lower price; and so it ought. But what are the facts? The price to the grower is less than before, and the price to the consumer is greater than before! Hence, somebody else is getting all the gain resulting from the utilization of the waste, and more besides than they got before, or the saving of the waste is costing more than it brings. There is a dilemma here with at least two horns, which both producer and consumer would like to have explained.

When the government tackles a trust, the average citizen naturally expects results favorable to the people, for we have all been taught that nothing beneath our flag is tronger than the government—that the government is stronger for right than any conceivable thing can be for wrong. It is a pity that anything ever occurred to weaken that belief, but in several memorable contests, the power of the government, or, rather, the means employed to exert it, has not appeared to be very reassuring. Take the investigation of the Beef Trust, for instance. President, judicial department, attorney-general, United States courts, were all heralded as entering the arena against the packers' combine, and every once in awhile a little glow of "something doing" flashed out through the press; but so far as live stock men and meat consumers can tell, the packers are still "doing business at the same old stand, and in the same old way."

Exceptional cases are not to be taken as a basis for computing general results, but we give the following merely as showing the drift of live stock profits: A Merino ewe belonging to Mr. Chauncey Griswell, of Nevada, as reported by the Breeders' Gazette, raised twin lambs that sold at 8 cents per pound on the Chicago market. They also produced 16 pounds of wool that sold at 20 cents per pound—the lambs and wool sold for $18, the year's income from a single ewe, not counting her own fleece. It takes a pretty well watered lot of corporation stock to beat that. Sheep well cared for are good property.

Will You Take a Sheep

An old farmer, about the time the temperance reform was beginning to exert a helpful influence in the country, said to his newly-hired man:

"Jonathan, I did not think to mention to you when I hired you that I think of trying to do my work this year without rum. How much more must I give you to do without?"

"Oh," said Jonathan, "I don't care much about it; you may give me what you please."

"Well," said the farmer, "I will give you a sheep in the fall if you will do without rum."

"Agreed," said Jonathan.

The eldest son then said, "Father, will you give me a sheep, too, if I do without rum?"

"Yes, Marshall, you shall have a sheep if you will do without."

The youngest son, a stripling, then said, "Father, will you give me a sheep if I do without?"

"Yes, Chandler, you shall have one, also, if you do without rum."

Presently Chandler spoke again. "Father, hadn't you better take a sheep, too?"

Cream is Money

HOW TO SAVE MORE OF IT

It matters not whether you are selling your cream or making it into butter at home, the more you have of it the greater your dairy profits will be. This fact is self-evident, yet many cow owners are daily wasting one-half their cream by the use of the old fashioned gravity setting process of skimming milk, and at the same time wondering why their cows do not pay better. A **DE LAVAL CREAM SEPARATOR** would stop this waste and double the cash returns from the cows. If you own three or more cows you cannot afford to be without a **DE LAVAL** machine. It will lessen your work and expenses fully one-half and double your profits.

By purchasing a **DE LAVAL** at once and using it through the coming winter season when butter prices are highest it will more than half pay for itself before spring. Every day's delay in purchasing a **DE LAVAL** means a loss of just so much money to you. Do not put it off but write today for illustrated catalogue and name of nearest local agent.

The DE LAVAL SEPARATOR CO.

$201.00 in Prizes and 2 Silver Medals

WON ON BUTTER MADE FROM
GATHERED CREAM
SEPARATED BY
U. S. CREAM SEPARATORS

"Richmond, Quebec, Sept. 28, 1905.

I am pleased to advise you that my butter which was made from **gathered cream** at the Kingsey Creamery, of which I am proprietor, was **awarded $201.00 in Prizes** at the different Expositions of this season.

The first of these was the Sherbrooke Exposition, where I received the Eastern Townships Bank **Prize of $75.00** for the best exhibition of creamery butter, and also the **Medal** for the **highest score** in points.

At the Toronto Exposition I received **Two First Prizes** and **One Second Prize,** and tied with another Quebec Creamery for the **Silver Cup** offered for the highest score in points, with the result that we were both awarded a **Silver Medal,** also a **Diploma,** for the **highest score** instead of the Cup.

At the Ottawa Exhibition I received **One First Prize** and **One Second Prize.**

I also took the **First Prize** at both the Richmond and Drummond County Fairs.

Last year I was **awarded $112.00** in Prizes and a **Gold Medal.** I believe **this record cannot be equalled** by any other Creamery in this Province or in the Dominion of Canada, and think this speaks well for the quality of butter made from gathered cream, **90 per cent of which was separated by the farm sizes of United States Cream Separators.**

E. W. EVANS."

CARTER WIRE FENCE MACHINE CO., Box 96 Mt. Sterling, Ohio.

UP-TO-DATE Poultry and Bees

PRODUCTION AND MARKETING

This is the time of year when the hen adopts the idea of controlled marketing, and holds her products for a price and gets it.

Sameness of diet for a long continued period is the cause of many poultry troubles and meager egg production.

A patch of rye near the poutry yard for the hens to run upon when the ground is bare, is an egg producer, but the seed should have been sown in September or October.

Boiled and mashed potatoes, mixed with bran or middlings, or both, is a fair substitute for green stuff as an occasional (frequent) winter feed for laying hens.

Clover hay in the poultry house or runs is a good thing for fowls to scratch in and pick over. If cut fine it is all the better. Unthreshed millet is good also, and so is unthreshed pea hay.

We never say much about breeds, for selection depends upon the object of the breeder—eggs or flesh—but the Leghorn varieties come nearer converting into eggs all the feed they eat than any other fowl. One writer goes so far as to say "the Leghorn pullets, if rightly managed, will pay for themselves with eggs before pullets of the larger breeds of the same age, have reached maturity."

Uniformity in the poultry yard is very desirable even among common fowls. A coop of chickens all alike is much more attractive than is one of all sizes, shapes and colors, and they ought to bring a better price on the market.

Comfort and a healthful variety of feed, grit, lime or shells, a dust bath and free access to water—these are just about the essentials of winter egg production.

Keep the poultry house clean. This has always been our hobby, and experience as the years go by only makes us ride it the harder. After cleaning out, sprinkle lime or ashes all over the floor, and on the perches. Lime may be a little too strong if left too thick upon the perches, and make the feet sore. But not so with ashes either wood or coal. See that it gets into every crevice. This is good treatment for summer as well as winter.

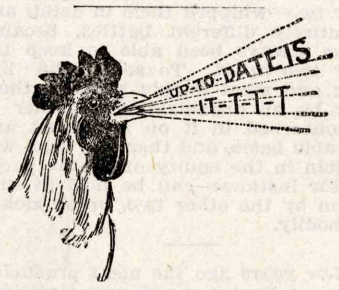
Not a small item of profit from the poultry house is the manure—there is no better manure for the garden or truck patches, and potatoes respond to it more readily than to almost any other kind of fertilizer. In cleaning out the poultry house the droppings should be put in barrels or boxes and kept dry. If the practice has been to sprinkle lime or ashes in the poultry house after every cleaning, as recommended above, this makes the manure all the better, as it corrects whatever acidity might occur and holds the ammonia.

A great deal is said about the care of poultry, and to read it all, one would think poultry raising a serious undertaking, but it is not. As a writer in a recent prominent publication says: "When once you get started and give your poultry the same care you do your other stock, there is nothing on the farm that will pay as well for the money invested. When you can take a 50-cent hen and make her pay $1.00 above cost of feed, you have a pretty good percentage of profit, and this is being done right along, and many do much better."

The Turkey—Wild or Tame

Of all the birds that God has made, few are more majestic in appearance than the turkey, and few are more profitable to raise on the farm. All have seen the domestic turkey in his many varieties, but only the oldest of our readers have seen this native wild one in his beauty and shyness. The editor of the Inland Poultry Journal tells in a charming way an interesting experience he and a boy companion of his had with these grand birds, an experience any of our boy readers would give half their anticipated Christmas pleasures to enjoy:

"Wild turkeys were common. You could hear them almost any time of the day, but to get a good look at one, except at a distance, was considered a treat. One afternoon in early winter a boy friend of mine and myself had the pleasure of studying these wild birds to our heart's content. We were setting qail traps in the edge of a corn field when we heard the call of the wild turkey. We knew they were coming our way, so we crawled into a hollow stump, the top of which was covered with rank weeds that had grown during the summer. We remained perfectly quiet and in a few minutes the leader of the flock, a grand old tom, came in sight and finally took a position on the old rail fence, less than one hundred feet from our hiding place. The weeds around the stump acted as a veil for us. We could see the turkey but he could not see us. In a short time some twenty-five birds, old and young, had made their appearance. One after another took their position on the fence, some sunning themselves, others pluming their feathers, and we had an elegant opportunity to study them. Some of the young ones were full of play and their antics would make a clown ashamed of himself. They would run at one another, jump in the air, flying perhaps twenty feet, turning on the wing and dart again at their opponents. Finally three of them got mixed up in a sort of a cakewalk that was too much for our youthful minds to stand, and when we broke out in a laugh the turkeys were all in the air in an instant."



Grains Picked Up.

Good luck has never become acquainted with lazy poultrymen.

Quality is worth more than quantity in the poultry yard.

By proper care is meant intelligent personal attention.

Each day brings its duties, and each season its appropriate labors.

Pure bred fowls are not always standard bred, but standard bred fowls must be pure bred.

The fowl is one of creation's wonders. The egg, of course, is a masterpiece both as to construction and content; but the clothing of the bird is no less a wonder. The feathers combine in a remarkable manner, lightness, perfect ventilation, the very best retainer of heat and excluder of cold, and a singularly perfect dirt repeller.

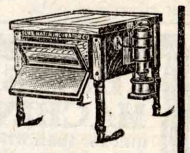
The turkey is the bird that sells—he is the banker of the poultry yard, though the common hen makes the most frequent deposits.

The bees have retired to winter quarters; are they well fixed?

The early pullets ought to be laying now. Are they? See after them.

ON THE FARM

Nothing you can buy will pay for itself quicker and be a source of satisfaction longer than a



1906 SURE HATCH INCUBATOR

America's finest, most used and most successful chick hatcher.

DOES THE WORK better than the old hen. Bound to hatch everywhere and at all times, Winter or Summer—North, South, East or West. 80,000 sold in 8 years. Over 20,000 sold last season. UP-TO-DATE

Home on the Farm

HOW TO KEEP IT BRIGHT, HAPPY AND CHEERFUL

Thoughts that Come

Draw the blinds. Winter has fairly set in. It is dark and dreary without, but within is the light and comfort of Home. How sweet a picture of life is this—the human heart and the home. Often when sad hours come, and storms of trouble rage around, if in the heart may still glow the light of hope and happiness, what matter the storms that beat upon the earthy walls around us, but cannot reach the soul where light and happiness is!

The frosts have killed the flowers. The pets of a summer have lost their beauty, and lie dark and dead where a few days ago they smiled up at us in joy and gladness. So has perished many a hope. In life's spring time they sprang up as did the flowers. Summer saw their spreading foliage and their opening flowers, but as autumn came the chill winds of reverses kissed them all too rudely, and the winter of fate laid them helpless at our feet. Loved ones proved untrue, perhaps, and frosts quickly gathered on our dearest hopes. Roses plucked from Heaven's own Eden and given us to transplant in our life garden, smiled at us for a while and withered. How chill the winds that blew their innocent lives away!

The birds don't sing any more around their leaf-hidden nests. The leaves that sheltered them lie crisp and crumpled under our feet, and naked branches mourn for them as chilling winds unbidden pass.

How desolate nature seems! The flowers are dead. The birds are gone, and their music is hushed. The green grass is brown, and the blue skies of summer are hidden by clouds so gray, and dark, and cold!

But, lo! a miracle. The summer rains that came like falling tears as though all nature wept, have ceased, and pretty flakes sift down from somber clouds, and soon the dark resting places of our idols look pure and beautiful, and we know they sleep but to rise again.

So may it be all through our lives. As loved ones fall and disappear from our sides, and as cherished hopes are crushed and fond dreams dispelled, though the chilling winds and biting frosts of disappointment pinch us sore, may thoughts and motives pure as the snow cover them, and may aspirations high as light and deep as love take their places. Let us know that what is good must live forever. Let such be our thought at this Christmas time.

Christmas on the farm! Hope comes to the young; sweet echoes to the old.

Whom will you make happy and how?

Santa Claus is getting ready. What shall he bring you? All we ask him to bring Up-to-Date Farming is thousands and thousands of subscribers.

That reminds us. During the merry Christmas time will not Our People see how many new subscribers they can get for us? We want to talk to everybody about controlled marketing and all other good things for the people in the country.

The New Year follows quickly after Christmas. That's a splendid time to begin reading Up-to-Date Farming, but unless Our People tell the other people so, how are we to get them to know it?

We have met with many disappointments, just as all of our readers have, but still we are not unhappy, and as the joyful season approaches, we feel from our very heart of hearts to say to all Our People—

"A MERRY CHRISTMAS AND A HAPPY NEW YEAR."

It is all right to benefit by past lessons, and for this purpose remember past experience. Otherwise let yesterday go. Don't worry over it. Live in today and get ready for tomorrow.

In the home or elsewhere know that no day can be lived twice. It is a present that God hands you to keep for just a little while; then he takes it back again. Make good use of it while you have it.

Say, are you doing all you can to make home happy for mother? We have known many things thought of after mother had gone that would have made her happy if they had been done before she went away!

Say, Home Folks, turn over a new leaf this Christmas. There will be written on it in great big letters: "GET SOME SUBSCRIBERS FOR UP-TO-DATE." Santa Claus wrote it, sure as you're born.

The old fashioned fire-place! Yes, we know it is going out of use, and the rooms are being better warmed up by furnaces and heaters; but there is nothing that called the family together and kept them there like the old-fashioned fireplace.

Look out for the grip. This is its season—a disease which the Irishman said "keeps you sick a long time after you get well." Avoid taking cold.

Patient: "Doctor, I have a bad case of blues over low prices. What would you prescribe as a remedy?"

Doctor: "Take Up-to-Date Farming twice a month, and digest it thoroughly."

We wish we were with all our boys and girls; we would like to teach them the Christmas games we played, well, say—fifty years ago!

Even while we write the glad laugh of youth comes floating into our room showing that—

Hearts are light and lives as gay
As in the long, long years agone:
That Hope on wings as swift as then,
Still flits among the joyous throng.
Laugh on, Oh youth, this gladsome morn,
The moon will come with joys and tears,
And fondest dreams dispelled will be,
Crushed 'neath the weight of passing years;
Laugh on.

Home-Made Sausage

The sausage you make yourself with an Enterprise Meat and Food Chopper is made easier, is cut better, and tastes better. Not only cuts sausage, scrapple and mince meat *coarse or fine*, but is indispensable in the kitchen for hashing vegetables, fruits, fish, or cooked meats.

ENTERPRISE
Meat Choppers

are built for work. They are strong and durable, cut clean and *stay sharp*. They cannot rust or break. 45 sizes and styles, for hand, steam and electric power, $1.50 to $300. With the Enterprise Chopper and an **Enterprise Sausage Stuffer** the farmer has an ideal outfit for taking care of his meat at killing time. These useful machines can be had of any hardware or general store. If not, write us about it. See that the name "Enterprise" is on the machine you buy. Write for the "*Enterprising Housekeeper*," a book of 200 choice receipts and Kitchen Helps, sent **free.**

THE ENTERPRISE MFG. CO. OF PA., 319 Dauphin St., Philadelphia, Pa.

Fresh Paint Talks

By O. L. Chase.

—And Two Gallons Free to You to Prove All the Claims Made in This Talk.

O.L. Chase

I AM THE PAINT MAN.

I haven't a bit of sense—except paint sense,

Figuratively speaking, I'm wrapped up in Paint—I am smeared all over with it.

My whole time, thoughts and ideas are on the question of paint.

I stand for *fresh paint*—

And I'll tell you why—

Paint no sooner begins to live than it begins to die—and when you buy paint you buy it for the *life* in it—for the time it's going to live upon your building.

—And to get the most value for your paint money you must buy the *life* of the paint—not in the can, but the life *on your buildings*.

—You ask me what *is* the life of paint?—and I tell you quick—

Pure, cold-pressed, old process Linseed Oil—*that's* the life of Paint—that's the binder, the soul,—the thing that makes Paint stand the racket in storm and sun, and holds the pigments together on your buildings.

—And why does fresh paint made to order have more life than mixed paint?—you ask.

—I'll also give you a quick answer to that—

If you could see through the tin of a can of mixed paint you would see a chemical row going on—

The mineral paint pigment—white lead, coloring matter, and dryer—commences to eat the life out of pure linseed oil the minute they get together—

If they have been together in a can on a dealer's shelf, or in a manufacturer's warehouse, for six months, there is just six months' life gone out of the oil—

If they have been together a year, a year's life is killed.

Maybe you never thought of it, but that's the reason why so many jobs of paint crack, curl up, peel off, get chalky, and rub off on your hand.

The oil in that Paint was dead when the Paint was put on—the pigment dried out when exposed to the weather and sun not having the protection of the oil coating.

Now, I'll tell you another thing—

Ready-mixed Paint that you buy in the can is always stale paint—half dead paint—because of the method of its manufacture.

Here's a little paint secret—a manufacturer's secret:

The ready-mixed paint manufacturer has to make his paint up for stock a long time in advance of the sale—he's making it for his warehouse or for the dealer to hold on his shelves, waiting for a customer—

Sometimes the paint waits in these warehouses or on dealers' shelves for six months—a year—two years—longer—so you see when it's opened for use, it's half dead—or three quarters dead, or maybe nearly all dead—

And another thing:

There's a cement-like sediment in the bottom of the can—this can never be properly mixed again.

* * *

Now, I am spending money in this advertisement to tell you these things, because *my* method of manufacturing and selling paint is *different*.

First—my method of manufacturing;

I manufacture my pure pigment, and pack it in separate cans, from my pure old process linseed oil—which I call "Oilo" to designate it from cheap adulterated oils on the market—

I manufacture this Paint to order *after* each order is received, and I date each can the day it's packed, with the date placed right on the can by my inspector, so that when my Paint goes to the customer it's *absolutely fresh*— a *certified* Paint—that has every bit of life in it.

It's such good Paint that I sell it on six months' time—

No other Paint concern in the world ever sold paint on time until I started.

Maybe their paint wouldn't stand it—I don't know—but anyway, they never sold it that way.

—And to test my Paint I allow any customer to use two full gallons out of any six-gallon order or over, and then if he is not satisfied that all of my claims are true, and that my Paint is the *most elastic, springy* paint under the brush, looks the best, and is the best, he can send back the balance of the order, and the two gallons will not cost him a penny.

Why You Should Order Now for Spring

There's a limit to my manufacturing capacity—

On account of making paint to order, I am not able to make up a gallon of paint in advance of the big Spring season, which places me in a position every Spring where I have to send back orders, being unable to supply the demand.

5,000 gallons is a lot of paint to make in a day.

My orders run larger than that—

I'm telling you this because I have an advance-order plan which will enable you to get paint in the Spring months just the week you want to use it.

I number these advance orders, place them on file in my office, with space and material reserved in my factory to make up these orders during the week they are wanted, and these come ahead of all orders taken later in the painting season.

So if you want to insure yourself getting my made-to-order fresh paint at a certain time next Spring, write for my Advance-Order Blank, and my beautiful Paint Book just off the press, which tells all about fresh and made-to-order Paint and gives you a large collection of good sized color-cards to select from—select the paint you want—send me an advance order, subject to cancellation within thirty days from the time the paint is to be delivered, and subject to a change in color if you desire.

I will acknowledge this order, and register it up, and guarantee to furnish you the Paint on my "Two gallons—free trial—six months to pay" plan—

The date of payment will be six months from the time the order is filled—

This will insure you getting fresh paint just when you want it, on 6 months' time.

And let me tell you—over half the capacity of my factory is already sold out for next spring, so you should write me at once, if you want to take advantage of this advance-order offer.

Fight Years Guarantee

I give an officially signed, iron-clad Guarantee for eight years on my made-to-order fresh Paint.

This is the longest and most liberal Guarantee ever given by a Paint Manufacturer—and back of this guarantee stands my $50,000 Bond.

All in all, my paint proposition is the greatest one ever put on the market, and you should get my literature at once.

For a postal card with your name and address I will send you my beautiful Paint Book—my little Instruction Book, entitled "This Little Book Tells How to Paint," copy of my Eight-Year Guarantee, and my Advance-Order Blanks.

Write at once.

O. L. Chase *The Paint Man,*

415 B 6th St. St. Louis, Mo.

A Column of Timely Hints

Don't sign them for nursery stock unless you know what you are getting, and then—pay the money.

The rabbit is your true grafter; he still knows how to gnaw young trees, and he goes about it very quietly—he doesn't even tell his neighbors until it is done.

When you set out the trees last fall did you forget to take off the label wires? Better do it before growth starts in the spring.

When it isn't too cold, open the cellar door at night so that it may fill up with cool air; then close the door in the day time to prevent the warm air from driving the cool air out again. Cool, steady temperature is best for apple preservation and for that matter for all fruit and vegetables.

Don't waste any of the ashes from the fire-place, stove or grate. They are worth money around the fruit trees. This is a fact.

Did you ever try packing apples in dry oats, or wheat, or rye? They'll keep that way; we've tried it.

Why do you suppose apples were so cheap last fall at picking time? There was but little more than a third as many raised in 1905 as there was in 1896, yet the price was pounded down all through the season. Well, the apple raisers didn't know it; it seems like they just actually won't read.

We believe it is safe to predict good prices for fruit next year. The cold storage houses will be pretty well emptied this winter and the following spring. Look after the orchard. Clean it up—prune the trees. Get ready to spray; and while you are spraying to kill the little parasites, organize to knock out the big ones.

The cherry must be in ground that drains well; it will absolutely do no good in cold, wet sour land. Ashes and lime are good dressings for cherry trees.

Don't neglect to mulch the strawberry bed. Next year's crop may depend upon it.

Blackberries are usually hardy, still we have known crops saved, and good ones too, by carefully removing all the old dead canes, and then bending down the living ones, and mulching them with straw or fodder. Don't weight them too heavily; it is best not to press them too close to the ground.

Keep the trash and mulching a few inches away from the stems of small trees—give the mice no excuse to come back at you.

Timber is getting scarce, and in a few years fence posts will be a problem—it is now. Some of the railroads are setting farmers a good example in this regard; they are planting hardy catalpa (catalpa speciosa) along their right of way. They are choosing wisely. The catalpa is the most rapid grower of the durable woods, and its range of adaptability is very wide.

With all our learning and progress, Nature is still an excellent teacher. The most thrifty forest trees grow where other trees and shrubbery shade the ground, and their own leaves make a mulch beneath them. Orchard trees, however, are domesticated and will not do well set in the crowded forest, any more than domestic animals would do well turned loose where wild animals thrive. But they need the shade and the mulch and they must be provided just as feed and care are given the domestic animals that the wild animals do not need. Mulch the trees with any sort of litter, and shade the ground with a growing crop—if the trees are large, with clover or peas, or other such growths.

Boy: "Papa, you sprayed last year to kill the fruit insects and fungus, but when you come to sell the apples, something got away with the profits all the same."

Papa: "Yes, my son, I paid $25 for a machine to kill the little pests with. I ought also to have paid 50 cents for a machine to get after the big pests with—Up-to-Date Farming. I've done that for the next year, and, from what I have already seen, the 50-cent machine will be worth more to me during the year than the $25 one.

And the people who have gotten control of the eggs and turkeys said: "Let there be higher prices"—and there were higher prices and the wailings of the consumers availed naught. Verily the people who stood between the farmers and the consumers had much to be thankful for.

Will the farmers learn a lesson from the hens and control their marketing of the more plentiful products and compel profitable prices for them?

Read the guarantee of advertisers on epage 3. Then order from as many you will get satiefactory treatment. as you want with the knowledge that

As the busy subscription and organizing season is now on, we remind our friends again to be sure to give their full name and address, including county, when they write.

On such terms every farmer and friend of farmers should secure a picture of the founder, and leader of, the movement for profitable prices which has already been a vast power for good to every American industry.

That New Press

To Proclaim Profitable Prices

THE FOLLOWING is the plan of the Board of Directors of the A. S. of E. to obtain the "Equity" press and equipment. This plan, with explanation was published in December 1st number. If you have not subscribed to the press fund please do so at once so the order for the press can be placed. Such a good and safe investment like this cannot be made any day. Embrace it while you have an opportunity and also you will help the most worthy movement along.

When manufacturers, and bankers, and laboring men make an appeal for funds to help their industries it is cheerfully given. Will farmers display the same wisdom? Farmers must pay something to market their crops. This is the quickest way to establish and maintain good prices besides it is a guaranteed big dividend payer.

THE PLAN

1st. Let the directors decide on the amount to be expended.

2nd. Divide the amount into shares of $10.00 each, and offer them to members and others who may want to make a good investment in amounts of $10.00 or multiples thereof.

3rd. The assessment plan as recommended by the Committee should be carried out. Also members and others are still encouraged to make voluntary contributions of any amount from 25 cents up. The part of the equipment represented by such assessments and voluntary contributions to belong to the Society, and the rental as provided below, shall be paid into the treasury of the Society the same as paid to other shareholders.

4th. Until such time as the Society shall have completed its negotiations for the purchase of the official paper and publishing plant it is agreed that J. A. Everitt, present publisher of the official paper, shall pay to the shareholders fifteen (15) per cent. annual interest on cost of the new equipment, keep the plant insured for the benefit of the shareholders, and make all necessary repairs at his own expense.

5th. The American Society of Equity reserves the right to purchase the press and equipment at any time on the payment of the original cost, less one-third of the amount paid out in dividends to the shareholders. This one-third to represent the deprication on the plant by wear and tear.

It will be like this: Suppose the Society buys the press in one year, the shareholders will get their original investment back and 10 per cent. If the Society does not purchase it in six and two-thirds years, the shareholders will have all their money back and the plant will yet be in prime condition. In ten years they will have their original investment back, 50 per cent. in addition and the plant, which would still be worth a large sum.

All who want farmers to come to the front, profitable prices made and maintained and uncertainties of values at an end, should fill out the blank below and send it in at once.

Done by the Board of Directors of the American Society of Equity, this 20th day of November, 1905.

J. A. EVERITT, President; M. Wes TUBBS, Secretary; ANDREW J. SMITH, Treasurer; W. C. WEBBER, C. N. STACY, C. O. DRAYTON, W. C. BALLINGER, Directors.

SUBSCRIPTIONS ARE NOW BEING RECEIVED

PRESS FUND

ANDREW J. SMITH
Treasurer of the A. S. of E.
Indianapolis, Ind

Date.....190....

Enclosed find $ .....for..... shares of $10.00 each in the Equity Press Printing Plant.

This subscription is made on the following conditions:

1st. That the money is to be subject only to the order of the Board of Directors of The American Society of Equity, and ONLY for purchasing a Press and Equipment as set forth in plan outlined in December 1st Up-to-Date Farming and repeated above.

2nd. By making this subscription I do not in any sense contract any liability, now or in the future, beyond the amount of this subscription.

3d. That I receive fifteen (15) per cent. per annum interest on the amount subscribed and paid, to be remitted to me quarterly, each three months.

4th. The amount of this subscription is payable on call by the Board of Directors when needed to meet the first or subsequent payments on the said Press and Equipment.

This is the farmer's own department, or for any person who wants to be heard in the interest and for the welfare of agriculture. Use it, so your brother farmers will know what your mind is regarding the great farmers' problems of the day.

The Dumb Creatures Talk It

Dear Mr. President Everitt: Is it a fact that a great question or doctrine ever takes such a hold upon localities as to fill the very atmosphere with it, so that living nature breathes it until all life becomes innoculated with it? I have not thought such a thing possible, but, I tell you, I am a little bit puzzled.

A few days ago I was passing through a neighborhood in Illinois, and stopped to talk a few minutes with a farmer about the A. S. of E., controlled marketing and Up-to-Date Farming. I had not been talking long when a fine old rooster jumped upon a shed, and yelled at the top of his voice: "UP-TO-DATE IS IT-T-T!" Scarcely had the echoes of this surprising declaration died away, when a beautiful guinea hen hopped upon a stump nearby, and in her true feminine tones, rather shyly told us to "make PRICE! make PRICE!" At the same time a quail out back of the barn lot, first in a low even tone, then with a quick, emphatic jerk, said: "Make—make—PRICE!"

I was surprised. Would not you have been? The farmer wanted me to see his cattle, and we walked out to the pasture. The lord of the herd was majestically walking across the field, earnestly and emphatically repeating his deep, bass voice: "H-o-l-d—y-o-u-r—CROPS! H-o-l-d—y-o-u-r—CROPS!"

Mr. Everitt, what does it all mean? Are these dumb creatures learning faster than the farmers themselves are?—A. LITTLE SURPRISED, Nutting, Ill.

Dear Mr. Everitt:

I have scanned the proceedings of the Annual Meeting, as published, and like them very much. I congratulate you on your able Annual address. It is full of meat and I do wish that all the farmers of America could read it and comprehend it in its entirety.

There is no doubt but that we are on the eve of a revolution in agriculture. There is going to be a change in the selling of all agricultural products. In fact, that change has already been worked out to a large extent; but what has been accomplished is a small fraction of what is sure to come. "Controlled Marketing" with farmers has come to stay, of this I have no doubt.

We have made the fight against the Tobacco Trust on controlled marketing, and we have won. We will always be victorious if we keep together. Italy has bought all the Regie tobacco suitable to their needs. This is the last one of the foreign governments to come to terms. The Italian contractor has been our real foe. He swore in his wrath; "our government will never buy a pound from your association." They held out as long as they could. The growers held the tobacco, but last week they gave in and bought all we had of the 1904 crop at 6½c. to 12c. per lb. and want more at the same price.

When they found they could not buy at prices made by themselves they paid our prices as above just as pleasantly as they paid 2c. to 4c. for the 1903 crop. We will want more for the 1905 crop because it is a better quality.

The only enemy or opposition the farmers have now is themselves. They have been only a concrete mass of crude ignorance. They need education. They have seen the power of controlled marketing and if they will continue to apply it the 1905 crop will sell speedily at even better prices than the 1904 and the 1904 crop sold 100 per cent. higher than the 1903.

I grow tobacco, but I also grow other crops. My wheat crop is usually worth as much as my tobacco crop. I stand for profitable prices for all crops all along the line. This is the only sure road to real, enduring prosperity. We are expecting a grand meeting at Clarksville next year.

D. T. HAMILL, Guthrie, Ky.

Merchants to Stand by the Farmer

Mr. Everitt: Seeing the necessity of farmers' organization to protect our interests and secure profitable prices for our products, we are badly in need of a local union at this place. The closest one is three miles away. Here at Weir we have a good place to establish a local union, and there are plenty that say they will join. I am not particularly a farmer, though I own a farm.

I believe we merchants ought to work as hard to help the union as any farmer. The county merchant's duty is to stand by the farmer. I foresee where the merchats can be a great factor in establishing profitable prices for farm products. Let's all go hand in hand and put the gamblers out of business, so we can price our own stuff.—Melvin Pahkham, Weir, Kentucky.

$200.00
IN CASH PRIZES FREE

Other Prizes are Given for Sending us Subscriptions; but THIS $200.00 IN CASH PRIZES WILL BE AWARDED ABSOLUTELY FREE to the persons sending us the neatest correct solutions.

Arrange the 41 letters printed in the centre groups into the names of six cities of the United States. Can you do it? Large CASH PRIZES, as listed below, and MANY ADDITIONAL PRIZES to those who send in the neatest solutions, will be given away. **First Prize, $50.00 in Gold. Second Prize, $25.00 in Gold. Third Prize, $15.00 in Gold. Fourth Prize, $10.00 in Gold. Five Prizes of $5.00 each. Ten Prizes of $2.50 each. Fifty Prizes of $1.00 each. Making a Total of Two Hundred Dollars in Prizes.** Don't send us ANY MONEY when you answer this advertisement as there is absolutely no condition to secure any one of these prizes. **RULES GOVERNING THE CONTEST.**—In preparing the names of the six cities, the letters in each group can only be used as many times as they appear, and no letter can be used that does not appear. After you have found the six correct names you will have used every letter in the 41 exactly as many times as it appears. These prizes ARE GIVEN, as we wish to have our Magazine brought prominently to the attention of everyone living in the United States. Our Magazine is carefully edited and filled with the choicest literary matter that the best authors produce. **TRY AND WIN.** If you make out the six names, send the solutions at once—who knows but what you will WIN A LARGE PRIZE? Anyway, we do not want you to send any money with your letter, and a contest like this is very interesting. Our Magazine is a fine, large paper, filled with fascinating stories of love and adventure, and now has a circulation of 400,000 copies each issue. We will send **FREE** a copy of the latest issue of our Magazine, to everyone who answers this advertisement. **COMMENCE RIGHT AWAY ON THIS CONTEST** and you will find it a very ingenious mix-up of letters, which can be straightened out to spell the names of six well-known cities of the United States. Send in the names right away. As soon as the contest closes you will be notified if you have won a prize. This and other most liberal offers are made to introduce one of the very best New York magazines into every home in the United States and Canada. WE DO NOT WANT ONE CENT OF YOUR MONEY. When you have made out the names of these cities, write them plainly on a postal card and send it to us, and you will hear from us promptly BY RETURN MAIL. A copy of our fascinating MAGAZINE WILL BE SENT FREE to everyone answering this advertisement. Do not delay. Send in your answer immediately. WE INTEND TO GIVE AWAY VAST SUMS OF MONEY in the future, just as we have done in the past, to advertise our CHARMING MAGAZINE. We find it is the very best advertising we can get to offer LARGE PRIZES. Here are the names and addresses of a few people we have recently awarded PRIZES: M. M. Hannah, Fernwood, Miss., $75.00; H. A. Parmelee, Milford, Neb., $61.00; Kate E. Dunlap, 138 N. Hill Street, Los Angeles, Cal., $61.00; Mrs. E. Preister, Richmond, Tex., $55.00; M. G. Christenson, Gregg, Minn., $50.00; Mrs. C. E. Welting, 1330 Lauderdale Street, Memphis, Tenn., $50.00; Mrs. Harriet S. Bullard, 120 Intendencia Street, Pensacola, Fla., $40.00; J. C. Henry, Box 118, Sligo, Pa., $25.00; Henry Perry, Central Islip, L. I., N. Y., $25.00; James A. Cooter, Holden, Mo., $25.00; Evelyn S. Murray, 132 S. Central Avenue, Austin, Chicago, Ill., $25.00; Mrs. L. D. Puffenberger, 340 West Forty-fifth Street, New York City, N. Y., $20.00. We could go on and point to hundreds of names of people who have gained large sums of money from our contests, but only give a few names. The solution can be worked out by an alert and clever person, and it will amply pay you to TRY AND SPELL OUT THESE CITIES. Brains and energy nowadays are winning many golden prizes. Study it very carefully and let us see if you are clever and smart enough to spell out the cities. We would rather take this way of advertising our excellent Magazine than spending many thousands of dollars in other foolish ways. We freely and cheerfully give the money away. YOU MAY WIN. We do not care who gets the money. TO PLEASE OUR READERS IS OUR DELIGHT. The question is, Can you get the correct solution? If you can do so, write the names of the cities and your full address plainly in a letter and mail it to us, and you will hear from us promptly by return mail. Lazy and foolish people neglect these grand free offers and then wonder and complain about their bad luck. There are always plenty of opportunities for clever, brainy people who are always alert and ready to grasp a real good thing. We have built up our enormous business by being alert and liberal in our GREAT OFFERS. We are continually offering our readers RARE AND UNUSUAL prizes. We have a big capital, and anyone can easily ascertain about our financial condition. We intend to have the largest circulation for our high-class Magazine in the world. In this progressive age publishers find that they must be liberal in giving away prizes. It is the successful way to get your Magazine talked about. Of course, if you are easily discouraged and are not patient and are not willing to spend any time in trying to work out the solution, you certainly cannot expect to win. USE YOUR BRAINS. Write the names of the cities and send them to us, and we will be just as much pleased as you are. We desire someone to be successful, and as it does not cost you one cent to solve and answer this contest, it will be very foolish for you to pass it by. In all fairness give it some of your leisure time. SUCCESS IS FOR ENERGETIC AND THOUGHTFUL PEOPLE, and the cause of FAILURE IS LACK OF INTEREST AND LAZINESS. So, dear reader, do not pass this advertisement without trying hard to make A SOLUTION OF THE LINES OF LETTERS PRINTED IN THE CENTRE OF THIS ADVERTISEMENT. We suggest that you carefully read this offer several times before giving up the idea of solving the puzzle. Many people write us kind and grateful letters, profusely thanking us for our prompt and honest dealings, and saying that if we had not so strongly urged them to try to win they would not have been successful. It always pays to give attention to our grand and liberal offers. OUR PRIZES have gladdened the hearts of many persons who needed the money. If you need money you will give attention to this special offer this very minute. If you solve it, write us immediately. DON'T DELAY. **WE WILL GIVE OTHER PRIZES THIS SEASON.** Get your name on our list and win a prize. Do not delay. Write plainly.

Hit the Nail on the Head

President Everitt:

Yesterday I received the bundle of papers and distributed them, keeping one for my own perusal. Had I known of the A. S. of E., I could have distributed them to better advantage.

I am for the A. S. of E. first, last and all the time. It seems to me you have at last hit the nail square on its head. Put the control of the market where it rightfully belongs, in the hands of the producer—let the farmers get their price, then control the output—it can, and it must, be done.

The farmer of today is anything but independent. Where does he ever set a price and get it, unless in selling a mule to another farmer? The trust sets the price what you shall pay and what you shall receive.

I want to join the A. S. of E. and I want to take the mouth-piece of the Society. I mail you $1.25—50 cents for Up-to-Date and 75 cents for 100 convention numbers containing your speech. I want to put them where I think they they will do good.—Henry E. Swain, Smithfield, Ky.

Merchants and Farmers Co-operating

"I noticed in the last number of Up-to-Date the article, 'Why It Is So,' by Jas. Farmer, Barry, Ill., where the idea of co-operation between the farmers and retail merchants is dealt with. We have done something in that direction right here at Riviere Qui Barre. Our storekeepers are members of the Society, and in order to encourage us and hold us together, they grant us a rebate of 10 per cent. on every cash purchase by a member of our union in good standing. I had no trouble at all to obtain that from them, as they understand perfectly well that it would be to their advantage just as much as it would be ours that farmers could secure profitable prices for their products.

I want to propose this to our convention that meets Dec. 8th: That the large label of the Society be posted in every store recommending the members to patronize it, where the proprietor would grant us the 10 per cent. rebate. Of course, I don't know how they will take it. But if they would agree to do that, it would be magical to make farmers join and make them pay their dues. The storekeepers give free delivery to the city people; it seems to me that they could afford to do something for farmers at least when they pay cash, and as it will benefit themselves in the end. If you approve this move, please send me a few large label cards. I wish Department of Canadian be on them if possible."

Encouraging Words from Kentucky

Editor Up-to-Date Farming:

I wish every farmer in America could be induced to read your paper during one year, carefully and studiously. To my way of thinking it is the paper of greatest value to farmers and the agricultural world. I consider it the best paper that ever came to my address. The cause it advocates is progressive and just, and its principles sound and conservative. I know any farmer who reads it regularly and understands what he reads will become an earnest adherent to its teachings.

Our local union, McEuen, No. 1412, is progressing nicely. We were organized with a membership of 25, and have added to our union steadily. We have several members who are very energetic in securing new names.

We no longer believe the old saying "Comptition is the life of trade." It may be true, yet competition is dying, and will soon be a condition of the past. Mr. Everitt's new version, "Co-operation is the life of trade," is replacing it, and co-operation is the protector of trade. The farmers united will compose the greatest union of all. We have the power to control our own affairs, and the Divine right of minding our own business. Why should we not work together in harmony and along good business lines?

Organize to co-operate, and co-operate for a greater measure of prosperity. We are doing wonders in Kentucky Yours earnestly,

CHAS. E. HAMILTON.

Gilbertsville, Ky., Nov. 1, 1905.

The simplicity of the organiaztion; its freedom from all spectacular show; its democratic equality all commend it to my commonplace Puritan soul.—Wm. H. Miller, South Haven, Mich.

The "Grapevine" Telephone

About the middle of September according to our correspondent, Mr. Tony Harpstrite, of Trenton, the Local Unions in Looking C'ass Township put into operation the "grapevine" telephone and and arranged a picnic of true blue Equity farmers. Four Local Unions participated. They were New Baden, Nos. 1 & 2; New Memphis, No. and McKee, No. 1. Everybody enjoyed the day and the gathering was a success financially. It was decided that each Local Union should send $5.00 out of their share of the proceeds to help on that new press and accordingly it was forwarded with the report. The report concludes as follows: "The A. S. of E. is now getting the farmers 15c a bushel more for their wheat than under the old system and still the price is climbing. Hold on to every bushel you can for the $1.00. Make the world see that you are a factor that they must recognize. The sooner this principle is recognized the better it will be for the producer and the consumer. Farmers make a big mistake in not doing all they can to put this work to the front. Up-to-Date Farming is getting better every number and gives more truths than all the other so-called farmer's journals combined.

TONY HARPSTRITE, Secy.

New Baden, L. U., No. 234, R. R. No. 2, Trenton, Ill.

Jefferson County, Wis.

Editor Up-to-Date Farming:

Our local union is in the southwest portion of Jefferson County, and in a great tobacco section. The growers have sold by contract and I do not know of a single crop that is unsold. Prices range from 8 to 10 cents, with 2 cents for fillers. This is much better than last years' price of 3½ cents, and farmers are fairly well pleased, yet they feel that higher prices could have been obtained if the growers had been organized fully, and held their crops average 9½ and 2 cents.—John W. Robbins.

Note—Wisconsin produces about 45,000,000 pounds of tobacco annually. Counting out 10 per cent. for fillers, we have 40,500,000 pounds of leaf. In 1904, the crop brought 3½ cents or a total of $1,417,500. The 1905 crop sold at 9½ cents will bring $3,856,500, a gain to the tobacco growers of nearly $2,500,000. According to the United States Census of 1900, there are 3,000 farmers in the state who raise tobacco. Dividing the total gain among them, we have AN AVERAGE GAIN OF OVER $800. THESE FIGURES ARE FACTS, and should teach the lesson conclusively.

It is not impossible to organiez the 3,000 growers in Wisconsin. When organized they can command the higher prices every year. Unorganized, they may be compelled to sell for 3½ cents next year, and the next. Let "ORGANIZE" be the watchword and "PROFIT" will be the result.—Ed.

Gentlemen:—I am a member of the A. S. of E. and an active worker of the society. I want to sound a note of warning to all our Kentucky brothers and elsewhere to be on your guard and don't be sidetracked from the straight line drawn by the A. S. of E. Our plan is the best, yes, in my opinion, is the only one that will eventually succeed. If any of the organizers show an inclination to depart from the true doctrines and principles report them to the National headquarters.

ZOBO

Nothing affords so much pleasure and harmless amusement as the Musical Zobo. It is a wonderful musical novelty. Any one can play it in a minute without practice. The latest "hits" rendered on a Zobo are delightful. Can be used in the house around the fire or in street parades. If furnishes good dance music; can be used for amateur theatricals or any place where music is desired. Boys and Girls, Old and Young are delighted with a Zobo for home music or for entertainments. The Zobo is made of strong material and is not liable to injury. 6 inches long. One mailed for 10c. A dozen post-paid $1.00.

Most anyone can use a dozen Zobo's for Christmas presents. Try them for the young folks. Send a dime for sample or a dollar bill for a dozen.

A COSTLY instrument requires practice to learn and an expert to make beautiful music. With a Zobo a novice can make pleasing music from the start. Send for one on my recommendation. If it don't suit return and get your dime.

Fill in coupon and mail.

LAND WARRANT—How to get a Land Warrant, and make a Home upon good Fertile Lands, in a Mild Healthful Climate. Address **P. H. FITZGERALD, P.O. Box 165, Indianapolis, Indiana.**

Good Medicine

The cheerful, happy men and women are the best equity people.

The crop was a bumper,
The farmer a dumper,
And down went the price to the bottom.
But, no care what the size is,
Crops held for the prices—
By thunder, the farmer has got 'em!

If a little poison will kill a dog, what will stop a wagon? The dog's tail will stop a-waggin'.

Little Willie isn't well—
Seems to have a bilious spell,
We're afraid he's delicate.
(Ate some apple tarts at eight;
Nine o'clock had cookies; then
Followed ginger cake at ten.
At eleven slipped around
And some cheese and doughnuts found).
Didn't heed the dinned bell;
Wouldn't eat; he isn't well.
Little Willie isn't well.
—Woman's Home Companion.

High as a house; low as a mouse; bitter as gall, but sweet after all.— walnut.

Wicked Patient—Do you think a warmer climate would be better for me, doctor?
Doctor—It might, but I've been trying my best to keep you out of it!

Aspiring Writer—I always thought for me to be a poet would be fine.
Editor—It ought to be—fine or imprisonment, or both.

The farmer tries hard to make people and set them up to keeping house in the fields. The wheat makes heads, the corn ears, the potatoes eyes, and tobacco hands. In the matter of housekeeping, the cotton furnishes bowls, the chickens combs, the fish scales, the trees trunks, and in the garden are plenty of beds.

First Boarder—What was in that soup we had for supper?
Second Boarder—I give it up.
First Boarder—So will I. Let me get where I can lean over, please.

Caller—Is Miss Lily in?
Small Boy—No, sir, she's out.
Caller—With whom is she out?
Small Boy—She's out with you for one.

"I was one of the men behind the guns," shouted the politician.
"How far behind?" squeaked the man with the small, thin voice.

Fudge—Your wife seems to be always busy.
Mudge—Yes, sir, she is busy from morning till night hunting something for me to do.

S. S. Teacher—Children, what happened to destroy the happiness of Adam in the Garden of Eden?
Little Shockly—'Cause, Miss, the Lord made 'im a wife.

"Thompson," said the bookkeeper to his assistant, "do you know why you are like a donkey?"
"Like a donkey?" echoed Thompson, opening his eyes wide. "I don't."
"Because your better half is stubbornness itself."
The jest pleased Thompson immensely, for he at once saw the opportunity for a glorious dig at his wife. So when he got home he said:
"Mrs. Thompson, do you know why I am like a donkey?"
He waited a moment, expecting his wife to give it up. But she didn't. She looked at him somewhat pityingly as she answered:
"I suppose it's because you were born so."

It used to be said, "If wishes were horses, beggars would ride," but we've past that now. If wishes were horses beggars would want automobiles.

The best remedy for the man who knows it all is to let him get married, then he'll find out he don't.

"Eggs are very high now," says Uncle Threadbare. Wonder if his hens make their nests in the trees where they roost.

WON BY A VOICE

Romance of a Farmer Boy—With a Happy Ending

By H. J. Warner

"John," said Mrs. Sanders in that characteristic stage whisper which portended an important family conference.

Mr. Sanders kept on reading his copy of Up-to-Date.

"John," Mrs. Sanders repeated, somewhat more commandingly, imperiously, one might say.

Mrs. Sanders was seated at the dining-room table, mending socks, while her husband sat with his feet propped up against the stove, his big silver specs playing peek-a-boo with his eyes, and his mind absorbed in an article.

"John Sanders, I want you to listen," the wife finally said a third time, laying down her work. "John, something's the mater with Nick."

"Guess there is," was the reply. "Where's the lad again tonight?"

Calicoes of Quality

Thousands of first-class dealers sell them.

EDDYSTONE PRINTS **The Eddystone Mfg Co (Sole Makers) Philadelphia**

"John, I don't know—and that's just the trouble."
"Did he feed the chickens? Told him twice."
"He did. Nick is a good young man, and you can be proud of your boy, John. Does his work all right, never frets, but John he walks around so like in a trance, don't hear or see nobody, won't talk, don't show no appetite——"
"Well, Sarah, give the lad some medicine," the husband replied, starting in again to read his paper.
"John Sanders, drop that there paper. I say!" his wife exclaimed. "I want to tell you what I think. Upon my soul, I believe—you know, Nick's been that sickly way ever since the big picnic in August."
"Pie wears off sooner than that, Sarah," John interposed.
" 'Tain't pie, John, no, 'tain't pie—something else is wrong, and you know, I believe—Nick's in love."
"Nick in love? Sarah, your plum off. Why, the lad won't look a girl in the face."
"That's just the style that get it bad when they get it," Sarah replied. "Yes, now I'm sure he's in love. I wonder who the girl is, rackin' my brain all evening here; could you guess?"
"Don't guess nothing, I don't, Sarah, and I figure there'll be no marrying business around here with that boy. Why, he don't know yet how to make a hoss-trade without tellin' the other fellow all about the bad points of his hoss—queered a trade for me that way last week. I was going to get fifty dollars more——"
"Yes, I know, Nick is very honest," Mrs. Sanders interjected, "but now that you talk, John, I think he's in love with old man Babbitt's Jennie."
"Babbitt's Jennie!" cried Mr. Sanders, interested for the first time. "Why, Babbitt has got a mortgage on his place more than the whole farm is worth. There'll be no Jennie around this house, I tell you, for a daughter-in-law."
"Maybe it's Stella Ford," Mrs. Sanders remarked, half to herself.
"Yes, Ford has six girls to feed," Sanders answered, or rather grunted, again picking up his paper. "Six girls! What's there left for any one of them? You women can't figure a bit."
And Mr. Sanders went back to his article while Mrs. Sanders from time to time tried to revert to the subject of their son's love affair. Growing wearied after a bit, Mr. Sanders went off to the bedroom, grumbling because Nick was still out of the house, while Mrs. Sanders went back to mending stockings and wondering who her daughter-in-law would be.
So Mrs. Sanders sat working and musing for half an hour, when the door opened and in came Nick.
You wouldn't have recognized him from the description Mrs. Sanders had given. Nick, despite that awful name (for his grandmother, by the way, was responsible) looked anything but the disconsolate lover. His face was radiant, he walked up spry and whistled a merry tune. Mrs. Sanders looked up in surprise.
"Hello, ma! Pa gone to bed?" Nick asked.
"That's good," he continued, when Mrs. Sanders nodded.
"Why good?"
"I want to talk to you about somethin', ma," came the response, while Nick blushed from one big ear to the other. His long figure twitched nervously and his big, good-natured face was a pity to behold in its embarrassment.
"Yes, Nick," Mrs. Sanders replied in an undertone and in breathless suspense.
"I'll tell you tomorrow, ma," Nick continued, after a pause.
"Tell me now, my boy," the mother answered, half forcing the young man into a chair. "Tell me now, and I won't tell pa. Did you ask her tonight?"
"Not yet, ma," and the young man turned crimson.
"But you're in love, Nick, tell me—admit it. Who's the girl?"
Nick only blushed some more.
"Is it Jennie?"

TO WOMEN WHO DREAD MOTHERHOOD!

Information How They May Give Birth to Happy, Healthy Children Absolutely Without Pain—Sent Free.

No women need and longer dread the pains of child-birth or remain childless. Dr. J. H. Dye has devoted his lif to relieving the sorrows of women. JUST A MOMENT of your time required to say: "I saw your advertisement in Up-to-Date Farming." Do this when you answer advertisements. It costs nothing and helps you, the publisher and the advertiser. Will you remember?

STATIONERY

For Up-to-Date Farmers

Every farmer should use neatly printed stationery. It is business-like and gives a tone to your correspondence. Some business houses sort out the printed envelopes from their mail and open and attend to them first. Members of the A. S. of E. especially should use up-to-date letterheads and envelopes. We offer special stationery containing the seal in a beautiful design. Your name and address, and name of your farm or business also if desired, nicely printed. On the reverse side of the paper are printed appropriate circulars, such as "Farming Exists by Divine Right," "Where Duty Lies", etc. You will spread the movement with these messages if you order some stationery. Price, PREPAID

100 Letter Heads	100 Envelopes $1.00
250 Letter Heads	250 Envelopes $1.80
500 Letter Heads	500 Envelopes $3.25
1000 Letter Heads	1000 Envelopes $5.25

Give your express office. Write very plainly AND ORDER NOW.

Nick grinned and shook his head.

"Then it's Stella, ain't it, my boy?"

And Knick grinned another crimson negative.

"Then who can it be, my boy? 'Tain't Frieda Brown?"

"No, ma, she's a likely girl, but it ain't her," Nick finally managed to reply.

"Well, then, Nick," Mrs. Sanders said assuming her air of command, "Who is it? Do I know her?"

"I don't know, ma," Nick blurted out.

"You don't know—what's her name?"

"I don't know that, either, ma," and the tears came to the young man's eyes.

"Don't know her name, Nick?" the mother asked sternly. "Nick, have you been flirting—carrying on with some stranger?"

"No ma, but I can't remember her name—and that's just the trouble—it's made me half sick ever since summer."

Mrs. Sanders burst into tears herself. She put her arm around the young man and kissed him.

"I know you ain't right, Nick," she said. "Knew it long ago—but you was feeling better tonight, wasn't you, Nick?"

Nick blushed and nodded vigorously.

"I was over at Frieda's," he mumbled, after a pause.

"Did you see your sweetheart there?"

"No, ma, but I heard her," and his face gleamed.

Mrs. Sanders dropped into a chair.

"I ain't crazy, ma, I heard her—yes, if you heard that sweet voice once you wouldn't forget it, either—and such a neat, quiet, prety girl she was, too—with big blue eyes. I met her at the picnic in Auguest, you know."

"I thought it was that picnic," Mrs. Sanders murmured.

"I saw her and talked with her there—and she talked a lot with me, but nobody told me her name, and I didn't know till next day how badly I wanted to see her again."

"Why didn't you ask some one for her name?" Mrs. Sanders answered.

"I don't like to, ma; anyway, I'm afraid they'd laugh. She's a city girl—came up with some of our crowd to that picnic, but until today I didn't know for sure who it was she came with. Now I know it was Frieda. I heard her tonight at Frieda's house."

Nick was waxing loquacious, but his mother interrupted him.

"Is the girl stopping at Frieda's again?"

Nick shook his head.

"Then where is she, boy?"

"Ma"—and the tears again stood in the young man's eyes"—she's way off in Chicago."

Mrs. Sanders gave another horrified look.

"That boy is going plum crazy," she thought. "You said you heard her tonight," she said.

"So I did, ma, so I did." Nick rejoined. "Oh, I heard her sing and talk and play the zither, just as she did at our picnic."

Mrs. Sanders arose.

"Nick," she cried sternly, "Nick, I'm goin' to call the doctor."

Then the poor woman broke down in tears. Nick arose in turn and put his big, bulky arms around the mother.

"Ma, I told you I ain't crazy, but now you know Frieda's got a phonograph."

A light dawned on Mrs. Sanders.

"Yes, a real, genuine talking machine, one of the kind on which you can make your own records," Nick continued. "Well, I just dropped in with Charlie at Frieda's tonight, and they made some records, and after they made them they got out some of the old records—talking, singing, band music and dance music, and so on. Everybody had a lovely time, except myself. Then suddenly they put on one of their home-made records, and Frieda said, 'Here's a record of a friend of mine in Chicago. She sings beautifully.' And then I heard that voice—that voice, ma, that I heard at the picnic.

"They had three records of her—one playing the zither, one singing, and the third talking and holding dialogues with Frieda—oh, if I could only hear it again!"

"Why didn't you ask them to play the records once more?"

"I didn't dare, ma, I was afraid they'd catch on. And they're all teasin' me anyway—say that I'm in love. Oh, I wanted to ask them the name of the girl, but I knew Charlie'd catch on."

Mrs. Sanders looked at the floor in silence for some minutes while Nick stared at the ceiling. His vocabulary was exhausted. For the first time he had spoken his mind, and now he could do nothing more than blush.

After awhile Mrs. Sanders continued.

"She's a friend of Frieda's," the anxious mother inquired, "and you say she stopped there last summer, and they made records of her voice? Is that all you know?"

To all of which Nick nodded.

Mrs. Sanders sat musing again. After a bit she arose.

"My boy," she said, "go to bed. There's a lot of things to do tomorrow, and pa wants you up early. But I'll fix things for you—don't give up hope, I'll fix everything all right."

She kissed the young man, who, kissing back, just mumbled, "But don't tell pa nothing."

Wherewith both adjourned to their beds. Mrs. Sanders laying her plots and reveling in her ingenuity.

Well, it was the next evening at supper that Mrs. Sanders showed her trump card.

"John," she said, "don't you like to hear some nice band pieces, ragtime, comic songs, and so on?"

"Guess I do," the old man grumbled, "but what's the use of liking things you can't have?"

"You can have them, and we'll have a concert tonight," Mrs. Sanders replied. "Did you know the Browns had a phonograph?"

"Never did," was the reply. "Pass me some more meat, Sarah."

"Well, we're going over to Brown's tonight to hear a concert on that there phonograph. Nick'll hitch up right after supper."

Mr. Sanders didn't like to have anything done when his wife commanded, but neither did he relish particularly opposing her and, in this instance, with a musical treat in store, he consented readily.

So Mr. and Mrs. John Sanders and Nick drove over to the Browns'. Mrs. Sanders started in at once to explain that Nick had heard such beautiful ragtime and Sousa marches the night before, they'd like to hear a few, too, if it wasn't too much trouble.

"No trouble at all," the Browns said, for Frieda's six-year-old sister could run the phonograph as well as the old folks.

In two minutes the machine was ready for a concert. Nick listening patiently to Sousa marches, dances, minstrel records and what not. He wanted to hear those three records of the beloved voice, but did not dare to ask.

Finally Mrs. Sanders accomplished her mission by leading the conversation dexterously to made records. Frieda explained that they made their own records, then shaved them off and used the same records over and over again dozens of times, but that they had just three records left of a beautiful singer, a girl who stayed with them last summer. So these records were played, and Nick listened in heavenly ecstasy.

"Who's your friend?" Mrs. Sanders blurted out.

"Why, Ethel Richards," Frieda said. "She stayed with me two weeks."

"Yes, good looker she was," Mr. Sanders interjected. "Father a lawyer, as I remember."

Here was an idea for Mrs. Sanders—just thrown at her.

"You know, John, we were always going to turn that law case over to some Chicago lawyer," Mrs. Sanders remarked, and, turning to Frieda, she continued, "Have you Mr. Richards' address?"

Frieda didn't remember, but she said she had a letter from Ethel some time ago, which she would hunt up. Mr. Sanders laughed—said his wife must be crazy to talk about turning that ten-dollar clothesline case over to a Chicago lawyer. Anyway, the case had been dropped a year ago, and so on, but Mrs. Sanders insisted upon seeing the letter from Miss Richards.

"Well, I'll just take it home and copy the address," Mrs. Sanders said when Frieda brought the letter, "if you don't mind," and of course Frieda didn't mind.

So the evening passed with more dance and minstrel and other records, and it was late before the three visitors left. Nothing more was said about the Ethel Richards case and I doubt if any of the Browns thought anything was involved beyond a notion of the enterprising Mrs. Sanders to hire a Chicago lawyer for a ten-dollar case.

Anyway, when Mrs. Sanders got home she wrote forthwith to Mr. Richards about her law case and added a postscript saying that her son Nick wished to be remembered to Miss Ethel whom he had met at a picnic in the summer.

Back came a letter from Mr. Richard's regretting that he could not handle the law case, but stating that his daughter Ethel was glad to be remembered and thanking Nick for the favors he had done for her at the picnic, including a special boat ride, a pony ride, etc. Then Mrs. Sanders induced Nick to write back himself. Days and days of anxious waiting, and actually a short, pleasant note came from Miss Ethel.

Months passed. Shall we tell of all of Nick's anxiety—how he wrote a little longer letters each time, how the replies, also, came longer and longer at shorter intervals, how he called on Frieda more and more frequently until the neighbors thought it was a sure love match between him and Frieda?

Suffice it to say that Frieda became both Ethel's and Nick's confidant, that she enjoyed playing Ethel's records over to Nick hundreds of times without wearying.

Finally Nick made a record of his own voice in Frieda's machine and sent it to Ethel, who in turn put the record on her phonograph and sent the reply on another record.

You can imagine the rest.

It wasn't long before Nick—with his mother's urging and his unsuspecting father's consent—had to take a trip to Chicago on business. Quite properly he called on Ethel. There wasn't anything but a friendly relation at that time, but we know that Ethel liked Nick, the honest, straightforward, bashful but intelligent lad.

And we have learned since that Ethel secured the permission of her parents to spend the Christmas holidays with Frieda. In her heart of hearts, Ethel knows as well as we that she is coming to see Frieda because Nick is near, and as for Nick, he's already rehearsing how to pop the question and hear the sweet word "Yes" pronounced by the voice he loves.

If you should want to purchase a saw mill there are two firms to write too, De Loach Mill Mfg. Co., Box 850, Atlanta, Ga., and Am. Saw Mill Co., 135 Hope St., Hackettstown, N. J. Both of these companies sell excellent mills, and their catalogues are interesting.

At the glove metropolis of the world is located a large firm selling gloves direct to wearers. They have published a very handsome catalogue full of fine illustrations. Gloves to suit you and your pocket-book are there. Send for a copy to Deerskin Glove Co., 18 Middle St., Gloversville, N. Y.

How about a watch for Xmas? Inquire of R. E. Chalmers, 356 Dearborn St., Chicago.

A book for all stock owners is Flemings Vest-Pocket Veterinary Adviser. Send for a copy free. Fleming Bros., 207 Union Stock Yards, Chicago.

The Curtis Pub. Co., E 29 Arch St., Philadelphia, Pa., will pay $5,000 in cash prizes to agents in January. Write for full information.

It is a pleasure to open a box of goods from the Larkin Co., of Buffalo. Everything comes out just as ordered. I know, because I got a box. Send for book of Larkin products and new Premium List 16. By buying from the factory you save 50 per cent. or get a premium of equal value with the goods you purchase.

Diseases of the eye and ear are treated fully in books published by Dr. W. O. Coffee, 68 Century Bldg., Des Moines, Iowa. Send for the book you need.

Advertisers pay us to tell the people what they have, and we make them give us an assurance that they say they have.

Have You Ordered Your Third Power Book?

WE HAVE one for you. No person engaged in farming or in any business that depends on the properity of farmers to be successful should delay in obtaining a copy.

A general reading of this book will do more to guarantee continuous prosperity in the country than any other thing that can be done.

Your business will be more successful if you read

"THE THIRD POWER"

Order a copy today and learn how The Third Power, the farmer power, is arrising in the land.

If convenient read the large advertisement in December 1st issue.
